Radio is a special closeness

Only the warm sound of Radio takes them away to their own special world.
Only Radio enchants them with the wonder of words and the magic of music.
And, only with Spot Radio can you enter this world at a time precisely right for you.

Edward Petry & Co., Inc.
Radio Division
The Original Station Representative
KVTV's new "weather ball" is the symbolic beacon of the station's leadership in Sioux City; it dominates the skyline the way KVTV dominates the metropolitan market. It illuminates the sky above the city the way the station illuminates product advantages for consistent sales of client products. The guiding light in Sioux City is KVTV... literally and figuratively.
WCKT, Miami, Florida

announces the appointment of

HARRINGTON, RIGHTER & PARSONS, Inc.

New York • Boston • Chicago • Detroit • Los Angeles • San Francisco

as national sales representatives
effective July 1, 1961

(Bomar Lowrance & Associates will continue
as southern representatives in Atlanta and Dallas)
Public service

in step with the times

Television is seen and heard in every type of American home. These homes include children and adults of all ages, embrace all races and all varieties of religious faith, and reach those of every educational background. It is the responsibility of television to bear constantly in mind that the audience is primarily a home audience, and consequently that television's relationship to the viewers is that between guest and host.
Renewal form—last lap

FCC is in home-stretch on program renewal form (303) and hopes to give it final reading at special meeting next Thursday (July 6). Then it will be released for proposed rulemaking prior to FCC-over-August adjournment with comments invited from licensees.

Here are some of salient provisions: Composite week and percentages for program categories remain; “public service” nomenclature will become “public affairs” with no distinction between commercial and sustaining; phrase “promise vs. performance” is dropped with new yardstick “proposed vs. actual”; Part IV covering programming will be split—one form for radio and other for tv; requirements for checking community needs is stressed and back-door requirement that affiliates disclose network clearances of public affairs programs urged by Chairman Minow may yet be slipped in.

Lender frightened

If broadcasters think current wave of bad publicity will pass without ill effect, this incident may change their minds. Long-established radio station that has been netting about $400,000 per year before taxes for past several years had made deal with big insurance company for $500,000 loan—wanted for recapitalization. Fortnight ago lender reneged with explanation that uncertain ties of government regulation of broadcasting made radio risky investment.

40-second breaks

Several station representative firms are understood to be pushing use of new 40-second station breaks next fall, particularly by those advertisers which are not using spot tv or use it only modestly. Main targets at Edward J. Petry & Co., for example, are said to be Shell Oil, Argus Camera, Hazel Bishop, Chesterfield Cigarettes and Gulf Oil and some of these advertisers are being asked by Petry to consider 40-second station breaks as programming-advertising effort.

FCC allocations squeeze

Fm, for first time, is becoming matter of inter-American allocations concern. Canadian government delegation conferred with FCC Broadcast Bureau officials over availability of assignments for Canadian stations in light of rapid expansion of fm in U. S. Involved are assignments along border which would preclude use of same channels in nearby Canadian areas.

Fm isn't covered in terms of NARBA treaty or in separate agreement on tv allocations. Some years ago, Canada simply proposed that its Department of Transport, which supervises allocations be notified of assignments in this country. Now, with fm available assignments rapidly being absorbed, Canada seeks consideration in further U. S. grants.

Local monopoly?

You'll not find it in FCC’s long notice setting up overhaul of fm spectrum, but there’s serious concern over concentration of control of broadcast media through ownership of am, fm and tv stations in same market. There’s unpublished FCC staff proposal to ban such common ownership.

New franchise pitch

Filing fees or franchise taxes, or both, to defray FCC’s $12 million-plus annual budget were discussed at meeting last Wednesday but with widely divergent opinions and little likelihood of rulemaking action prior to summer recess next month. Ramrodded by Chairman Newton N. Minow who had cleared proposal with Budget Bureau, initial pitch envisaged pay-as-you-go schedule of fees for licenses, applications, hearings, etc. Fee systems have been proposed for many years and in 1951 act was passed authorizing such schedules but in a July 1955 Senate resolution the FCC was told to suspend any consideration of the plan.

Misgivings were expressed on number of counts including possible discrimination against broadcasters and other communications users (whether fees would be made government-wide). One fear expressed was that payment of franchise tax would give licensees property or vested right in their facilities for full license term (some broadcasters favor this).

Large economy size

Latest wrinkle in selling network tv news and information shows is to offer package containing spread of different kinds of shows at different times of day. At NBC-TV, for example, if single advertiser takes whole package, he gets “comprehensive discount” which reduces average-per-program cost considerably. According to one report, some hour-long shows in such package deals may be priced as low as $30,000 for time and talent.

ABC-TV clearances

ABC-TV affiliates are getting concentrated pitch from network to clear time for feed of 11-11:15 p.m. News Final show. Some reports say that 60 affiliates have already cleared with advertiser Sun Oil Co. (it now sponsors program on WMAL-TV Washington, D. C., and WABC-TV New York) demanding at least 62 markets east of Mississippi before it picks up network sponsorship. ABC-TV News and Special Events VP James Hagerty, whose prize project this is, says report of 60 clearances is too high at this time, but that he’s “satisfied” with progress so far.

Split on WMGM

Six commissioners present for last week’s FCC meeting were split on question of approving Crowell-Collier’s $11 million purchase of WMGM New York (CLOSED CIRCUIT, June 26). No vote was taken and item is scheduled to be brought up again this week. At issue is operations of other C-C stations—KDWB St. Paul, KEWB Oakland and KFWB Los Angeles.

Ford’s year of study

What does public interest, convenience and necessity mean? FCC Commissioner Fred W. Ford in address last Wednesday before Washington State Assn. of Broadcasters traced legislative and judicial history of enigmatic standard, spending year on research, not excluding his regular duties. He comes up with no definitive answer but with formidable justification of FCC’s program report of year ago. He undertook study in effort to answer former FCC Commissioner Charles King, Detroit Law School dean, who contended standard was incapable of definition.

CBS shuffles

CBS Radio is auditioning new shows in search for replacement program for In Person (Mon.-Fri., 7:10-7:30 p.m.) which network has tagged for deletion in new revision of schedule. Also being considered: possible replacement of Mitch Miller Show (Sat., 7:10-7:55 p.m.) with another program. Network feels some of shows already auditioned have “exciting” possibilities.
The Audiences of WPIX-11 and the top Network station are the same: A. C. Nielsen has proved that a rating point on WPIX-11 and on New York's leading Network station delivers the same number of families with the same income levels, home and automobile ownership characteristics, job occupations, etc. On WPIX-11 national advertisers are reaching the right people at the right time with the right kind of impressions ... minute commercials in prime evening time in a "network atmosphere" of fine programming, advertisers and audiences.

*Where are your 60-second commercials tonight?*

NEW YORK'S PRESTIGE INDEPENDENT
WEEK IN BRIEF

If Uncle Sam's blessing will do the trick, the fm auroral medium faces the prospect of the bright future its boosters have been predicting. Last week FCC proposed a potent shot-in-the-arm for fm. Lead story . . .

IS FM TO BE BASIC MEDIUM? . . . 23

It's o.k. for community antenna operators to pick up tv programs from stations not protected by copyright or exclusive license, according to a federal court ruling in case brought by Salt Lake City stations. See . . .

STATIONS LOSE CATV CASE . . . 52

Now that the tv networks are widening the time limits for station breaks, stations are starting to come out with prices for 40-second-spots. Some operators say public will prefer a single announcement. See . . .

COSTS FOR LONGER BREAKS . . . 30

Better tv programming? It's coming but not for another year, FCC hearing in New York is told. Several talent and producer witnesses refute earlier testimony there isn't any freedom for creative people. See . . .

BETTER PROGRAMS IN 1962 . . . 40

What this industry needs more than a nickel slide-rule is a massive program of basic research covering the fundamentals of audience response and media effectiveness, according to Norman Cash, of TVB. See . . .

REVEALING TV'S REAL IMAGE . . . 24

A Washington perennial, network option time, is back on FCC's agenda as a result of a federal court ruling. Next step—up to FCC, which has stated it will reconsider its 1960 action cutting time to 2½ hours. See . . .

OPTION TIME REMANDED . . . 46

The people who pay media bills—advertisers—have another responsibility, too, according to Roy Larsen, of Time Inc. That duty is toward media and the public, he told Advertising Assn. of the West. See . . .

ADVERTISER RESPONSIBILITY . . . 32

Want to know whether your cigarette commercials are reaching cigarette smokers? Pulse tv audience profiles provide a way of measuring audiences qualitatively, showing what the program delivers. See . . .

SMOKING OUT THE SMOKERS . . . 38

Legislative moves to reorganize the FCC are moving along House and Senate channels. Almost parallel bills received House committee and Senate subcommittee approval. Final action within month predicted. See . . .

FCC REVAMPING MOVES ALONG . . . 50

Don't go telling Robert Sarnoff, NBC board chairman, that television is all violence and cowboys. He states the case for tv culture as provided by networks in 'Saturday Evening Post' piece on network service. See . . .

FCC, FAA disagree on tall-tower issue

Counsel for aeronautical interests argued before FCC Friday (June 29) that Federal Aviation Agency determination that tall tower is potential air hazard forecloses any ruling by commission that grant then would be in public interest.

This position was taken in oral argument on application of WHAS-TV Louisville to build tower 1,860 ft. above ground (which would be tallest man-made structure in world). Broadcast Bureau took position that application should not be denied because of air issue but because new facilities asked by ch. 11 would infringe on “uhf island” in Lexington, Ky.

At present time, bureau pointed out, Lexington has two operating uhf stations (ch. 18 WLEX-TV and ch. 27 WKYT [TV]) which do not face Grade A or B coverage competition from any vhf. Proposed WHAS-TV tower would put Grade B Signal into 85% of Lexington coverage area, bureau stated.

Consequently, it was maintained, advertisers will buy “bonus” Lexington coverage provided by WHAS-TV and local stations will suffer economically.

WHAS-TV counsel argued that Lexington is not uhf preserve but receives vhf signals from both Louisville and Cincinnati. Station said it would not compete for local revenues with WLEX-TV and WKYT nor affect national billings they now have. WHAS-TV said that it had sought acceptable tower site for several years and was not trying to “straddle” Louisville and Lexington.

On air issue, WHAS-TV maintained that opponents’ case is based on “assumptions, co- incidental combination of calamities and illegalities.” Tower site is not in any anyway, is easily seen under visual flight and does not interfere with instrument flight, station said.

Attorney for Commonwealth of Kentucky, WLEX-TV and WKYT also argued against application and in support of initial decision which recommended WHAS-TV tall tower be denied.

Double subcarrier test termed success in Chicago

Two-week initial period of operating double-subcarrier multiplex system (one stereo subcarrier and one background music storecasting system plus regular main-channel fm program) has proved to be technical and commercial success, Frank Kovas, president of WKFM (FM) Chicago, announced Friday.

He said nation’s major fm set makers who have been in market since June 18 to test WKFM’s double subcarrier operation are reporting success in re- design work on their new stereo multiplex receivers to be offered this fall. Motorola Thursday (see early story, page 71) unveiled its am-fm set line that has double subcarrier multiplex reception components already included (cabinet models at high end of line). FCC new stereo rules took effect June 1.

Mr. Kovas said WKFM is using commercial prototype equipment made by Sherwood Electronics Lab there.

Organizational setup revised by Ampex

New organizational setup integrating two operating divisions of Ampex Corp. and centralizing research-advanced development and field sales-service, announced June 30 by Alexander M. Poniatoff, founder and board chairman, following board meeting. Transition will take about six months.

Ampex Instrumentation Products Co., manufacturers of recording devices for industry and defense, and Ampex Video Products Co., manufacturers of videotape television recorders for broadcast and closed-circuit applications, will be combined into Northern California operations group under direction of Robert Sackman, Ampex vice president, and currently acting manager of Ampex Instrumentation Products Co.

Operations of Ampex in Southern California continue under direction of Erwin Tomash, Ampex vice president and manager of Ampex Computer Products Co. in Culver City, Calif.

“To accommodate a greatly expanded program of research and advanced development,” said Mr. Poniatoff, “these activities within Ampex are being combined in a single expanded corporate group under the direction of Arthur H. Hausman, Ampex vice president and director of research. Consolidated sales for this fiscal year are expected to be at the highest level in our history.”

Also announced were establishment of a new corporate product planning group, and formation of corporate reliability group.

Issue of common stock filed by MPO Videotronics

MPO Videotronics, New York, one of largest U. S. tv commercial producers, has filed with Securities & Exchange Commission to register 60,000 shares of common stock to be offered to public through underwriters headed by Francis I. duPont & Co.

Company showed net earnings for five months ended March 31, 1961 of $89,723 or 22¢ per share as against $49,980 or 15¢ comparable period previous year.

MPO said it is entering 8mm continuous sound projector field, encouraged by progress made in development by Fairchild Camera Corp. (Broadcasting, May 8).

Judd L. Pollack, president, owns some 13% of outstanding stock. He and four vice presidents draw equal annual salaries of $41,600 each.

Keating introduces bill covering federal practice

Sen. Kenneth Keating (R-N. Y.) has introduced bill ($ 2189) to establish Office of Federal Administrative Practice that would make studies and recommendations regarding whole range of administrative procedures.

Bill would also set up Hearing Commissioner Corps and set standard qualifications for agency hearing examiners.

Sen. Keating said proposed office, charged with responsibility for coordinating and simplifying agency procedures, would do more effective job than “separate agency czars” that President’s reorganization plans would create.

Argentine scramble

Argentine government reports 1,010 applicants are seeking 26 new television channels in country’s interior. Channels have been put up for bid.

At present, only five Argentine cities, including capital, Buenos Aires, have television.

RCA opens powerful satellite detection unit

RCA over weekend announced operation of one of most powerful transmitters at U. S. Navy’s new satellite detection station near Wichita Falls. Its 560-kw output generates radio wave
WEEK'S HEADLINERS

Henry G. Fownes Jr., vp and New York office manager of McManus, John & Adams, elected senior vp and general manager of new tv-radio division, responsible for coordination of broadcast activities in all agency's offices. Mr. Fownes joined MJ&A in 1950 after serving Benton & Bowles and Fennon Productions. He became MJ&A radio-tv director in 1953 and manager of New York office in 1955. At same time, agency announced appointment of Robert L. Garrison, senior vp and group head, Bloomfield Hills, Mich., office, who moves to New York as manager in charge of all account operations. Robert S. Marker, vp and director of creative services, Bloomfield Hills, named senior vp in charge of coordination of creative effort in all offices, while Robert E. Britton, vp and director, media-research-marketng, Bloomfield Hills, becomes senior vp assuming responsibility for this department in all offices.

Rep. Bob Wilson (R-Calif.), named chairman of Republican Congressional Campaign Committee, devoted to election of Republicans to House. He continues congressional service. He is partner in Champ, Wilson & Slocum advertising agency, San Diego, Calif.

For other personnel changes of the week see FATES & FORTUNES

No censorship at VOA, Murrow says on ABC-TV

News from United States is broadcast by Voice of America without censorship, regardless of its content, Edward R. Murrow, director of U. S. Information Agency, said in July 2 interview on ABC-TV network's Issues & Answers. "We must operate on the basis of truth in our open society," he said, explaining VOA is "only a small segment of the communications that go out of this country."

Broadcast was taped June 30, originating in studios of WMAL-TV Washington. Interrogators were Lew Shollenberger, ABC Washington correspondent, and Edward P. Morgan, ABC commentator.

Asked about domestic censorship problem, as raised recently before newspaper editors and publishers by President Kennedy, Mr. Murrow said only voluntary censorship would work in peacetime. He said President has never told VOA not to use particular news items. "I would be astounded if he did," Mr. Murrow said.

Easier announcement rule asked by west coast firms

Golden West Broadcasting Co. (KMPC Los Angeles, KSFO San Francisco) Friday asked FCC to exempt sports programs from proposed requirement of announcing when station officers and employees have financial interest in product or service being promoted.

Golden West principals Gene Autry and Robert O. Reynolds also own Los Angeles Angels and have interest in San Francisco Giants games. All sportscasters support home team and all games broadcast promote team, interest and attendance, GW maintained.

McClatchey Newspapers, commenting on same FCC proposal said contemplated announcement of interest should not be required "in connection with station identification announcements in which the ownership of another business by the licensee is merely mentioned."

Chun King special

Chun King Corp., heavy radio and tv spot advertiser, has bought Chun King Chow Mein Hour, one-hour special on ABC-TV, Sun., Feb. 4, 1962. Agency: BBDO, N. Y.

KETV names H-R-P

Ch. 7 KETV (TV) Omaha has named Harrington, Rigter & Parsons as exclusive national representative effective Aug. 1. Announcement was made by Eugene S. Thomas, vice president-general manager of ABC-TV affiliate.

Norman R. Cisna, assistant sales manager of NBC owned WNBQ (TV) Chicago, elevated to sales manager, succeeding George Diefenderfer who retires. Mr. Cisna formerly was with KMOX-TV St. Louis and CBS Spot Sales, Chicago. Mr. Diefenderfer has been Chicago broadcaster for 30 years and has been with NBC for 21 years.

Charles C. (Bud) Barry, vp for tv programming and talent at Young & Rubicam, named director of radio and tv department, succeeding Mort Werner, who has resigned. Mr. Barry has been with Y&R since July, 1959. Before that time, Mr. Barry briefly served as president of NTA Television Network, and from 1956-1959 was vp in charge of tv at Metro-Goldwyn-Mayer. He also served as network executive in years previous.

Naomi Andrews, CBS Radio sales promotion and advertising copy chief, named to newly-created post of director of advertising. Mrs. Andrews, who joined CBS-TV in 1948 as manager of sales promotion services, went to radio division in 1956. In her new post, she reports to W. Thomas Dawson, vp, information services, CBS Radio.

Emission, power described as being equivalent to 10 high-power commercial tv transmitters.

Also announced by RCA: development of experimental thin-film transistor and of new solid-state semiconductor rectifier. Resistor may eventually be used in thin-screen, wall-type tv receivers, and was produced by thin-film technique of evaporating materials upon insulating base. Rectifier is capable of handling high voltage required to power most electronic systems.

Census Bureau to select locations for uhf tests

FCC announced Friday (June 30) that U. S. Census Bureau will select sample locations for uhf receivers to be used in commission's $2 million uhf experiment.

Receivers will be strategically placed and changed regularly for observations and measurements of transmissions with project scheduled to begin this fall. Experiment is designed to determine if uhf is feasible in New York City.

Gammons testimonial

Testimonial luncheon for Earl H. Gammons, Washington consultant and former CBS Inc. vice president, will be held July 20 at Mayflower Hotel. Among those paying tribute to veteran broadcaster, whose birthday is July 23, will be many figures in public life as well as broadcasters with whom he has worked. Frank M. Russell, Washington consultant and for 30 years NBC's Washington vice president, is chairman of arrangements committee. Working with Mr. Russell on arrangements is Theodore F. Koop, Washington vice president of CBS Inc, and Sol Taishoff, BROADCASTING.

...At your service!

Service is the watchword of CBS Television Stations National Sales (formerly CBS Television Spot Sales), now the national sales organization for the CBS Owned stations exclusively. Only the name has changed. These five major-market stations are being sold now by the same full-strength staff of sales specialists in six regional offices...backed by the same array of experienced research, promotion and sales service people. What results is a finely-tuned sales force with the knowledge and the time to be an "extra arm" to advertisers and agencies—to render total service to sponsors seeking even greater efficiency from television’s sight, sound and motion.

An unbeatable combination—the sales impact you get from the CBS Owned stations (WCBS-TV New York, WBBM-TV Chicago, KNXT Los Angeles, WCAU-TV Philadelphia and KMOX-TV St. Louis) plus the service-in-depth you get from CTS National Sales (with offices in New York, Chicago, Los Angeles, Detroit, San Francisco and Atlanta).
A solid play in Michigan’s Golden Triangle stakes you to a lively market—Lansing, Jackson and Battle Creek! WILX-TV cracks all three with a city-grade signal and scores big in a lush outstate area.

Operating with a 1,008 foot tower at 316,000 watts. Let this one outlet give you all three markets.

A calendar of important meetings and events in the field of communications

*Indicates first or revised listing.

**JULY**

July 6—Deadline for comments on FCC proposal to reserve a vhf channel in New York and Los Angeles for educational use.

July 9-13—National Assn. of TV & Radio Farm Directors, summer meeting, Washington, D. C. Speakers include Agriculture Secretary Orville L. Freeman, NAB President LeRoy Cole, FCC Chairman Newton N. Minow and Commissioner George Larrick, Food & Drug Administration. Frank Welch, John Dusean and James T. Ralph (assistant secretaries of agriculture) and Harry Caldwell, chairman of the National Agricultural Advisory Committee, NARFED will also meet President Kennedy at the White House.

July 9-21—NAB Seminar, Harvard Graduate School of Business Administration, Harvard campus, Boston.

*July 10—Revised deadline for comments on FCC rulemaking in matter of broadcast announcement of financial interests of stations and networks and their principals and employees in service and commodities receiving broadcast promotions.

July 10-12—National Assn. of Television & Radio Farm Directors convention, Shoreham Hotel, Washington, D. C.

July 10-23—Three week summer workshop on Television in Education, U. of California at Los Angeles.

July 16-18—South Carolina Assn. of Broadcasters, summer convention. Ocean Forest Hotel, Myrtle Beach. Speakers include FCC Commissioner Robert T. Bartley and Howard G. Cowgill, former chief of the FCC Broadcast Bureau.

July 24—Deadline for submission of briefs to the FCC in Boston ch. 5 re-evaluation. This is the proceeding for reconsideration of the 1957 grant to WHDH Inc. due to ex parte contacts made by principals of WHDH Inc. and Massachusetts Bay Telecasters Inc. The third applicant is Greater Boston Television Corp. Reply comments are due 10 days after July 24. Oral argument before the FCC on en banc is scheduled, but no date has been set.

July 30-Aug. 5—American Women in Radio & Television, first mid-career seminar, Syracuse U., Syracuse, N. Y.

**AUGUST**

Aug. 1-4—Advertising Age Summer Workshop on Creativity in Advertising, Palmer House, Chicago. Participants include Norman (Pete) Cash, TVB; Marion Harper Jr., Interpublic Inc.; Leo Burnett, Leo Burnett Inc.; Fairfax M. Cone, Foote, Cone & Belding; Edgar Kobak, management consultant.

Aug. 7-11—American Bar Assn., 84th annual meeting, 15 principal hotels and Kiel Auditorium, St. Louis. To be addressed by President Kennedy and numerous other top government officials, including special presidential assistant James M. Landis and chairmen of “big six” regulatory agencies, including FCC and FTC.

Aug. 25-26—Arkansas Broadcasters Assn., fall meeting, Sam Peck Hotel, Little Rock.

**SEPTEMBER**

Sept. 24-26—Louisiana Assn. of Broadcasters, annual convention, Buena Vista Beach Hotel & Motel, Biloxi, Miss.

**OCTOBER**

Oct. 3-4—Advertising Research Foundation conference, Hotel Commodore, New York City.

Oct. 8-18—International seminar on instructional television, sponsored by Purdue U. in cooperation with UNESCO and the U.S. National Commission for UNESCO. Dr. Warren F. Selbert, Purdue professor, is seminar director; James S. Miles, Purdue Television Unit, is associate director. Purdue U., Lafayette, Ind.

Oct. 12 — Seventh Wisconsin FM Station Clinic, Center Building, U. of Wisconsin, Madison.

Oct. 25-28—Sigma Delta Chi, 52nd national convention, Hotel Fontainebleau, Miami Beach, Fla.

Oct. 30-31—IRE, Radio Fall Meeting. Hotel Syracuse, Syracuse, N. Y.

**NOVEMBER**

Nov. 5-8—Broadcasters Promotion Assn., annual convention. Waldorf-Astoria Hotel, New York City.

Nov. 14-16—IRE, Mid-America Electronics Conference, Kansas City, Mo.

BROADCASTING, July 3, 1961
"Even your commercials are interesting"*

**BELL TELEPHONE HOUR**

"We beg you to continue bringing your program to us. We think it is the best, the most worthwhile show on TV! We love the commercials, too."—COLORADO

"Your program last Friday was the most beautiful I have ever seen. There are few really good programs of late and yours is a joy. Even your commercials are interesting."—NEW JERSEY

"Thanks, thanks and forever thanks for last week's 'Telephone Hour.' Not only the performers made the evening a memorable one. The whole program was beautifully synchronized and sustained—even the commercials presented with a grace and charm that made them part of the whole artistic achievement."—CALIFORNIA

"I want to express my appreciation to you for your wonderful program. I only wish there were more programs like yours to view on television. Also, I must say that the lady who does the commercials has such a pleasant voice and seems to have such a pleasing personality. I want to rush to the phone and call my family when she says, 'Isn't there someone, somewhere, you would like to call tonight?""—INDIANA

"A sincere compliment to you for your wonderful show! I even appreciate your advertising—it has dignity and appeals to an adult, which is more than I can say for most television advertising."—MINNESOTA

*The commercial is the payoff . . . N.W. AYER & SON, INC.*
'Bright reflection' of Chicago

EDITOR: The special report June 19, was one of the most interesting and informative articles on Chicago I have ever read. All of us in this office feel it is one of the most precise, accurate, and bright reflections on our city we have seen in recent years.

It is this type of report that makes Broadcasting such an excellent publication for those of us concerned with tv and radio. Charles Vance, Mayer & O'Brien, Chicago.

EDITOR: Congratulations on the excellent June 19 "Special Report"... We are going to be able to make some effective use of the data contained here. This is another example of outstanding performance by your fine publication... — Jim Hanlon, Manager, Promotion & Research, WGN Inc., Chicago.

An elder statesman warns

EDITOR: I note your comments concerning the speech and policy of the new chairman of the FCC, and I write to tell you that it may be popular with the broadcasting industry, but the people, so far as I can learn, are strongly behind Mr. Minow. I think you would be doing the broadcasters a real favor if you printed some of the comments in support of his position as to the large amount of crime, violence and sex that is pictured on television sets.

I know personally of a considerable number of parents who have gotten rid of their television sets to keep their children from being filled with stories of violence and crime that are pictured on television.

I was in Washington the other day and in talking with senators and congressmen, found that most of them personally agreed with Mr. Minow, but, of course, they don't like to get in bad with the television owners in their own districts and states. However, it is only a matter of time until they will realize that the people are far more numerous on election day than these broadcasters can possibly be with all their programs of attack on Minow if they attempt that.

My own thought is that the big television chains better reform themselves or they will be brought under the regulation of the commission by an act of Congress. I realize fully that the law provides that there shall be no censorship of programs, but it also provides that licenses shall be granted in the
Troubled waters...

“I listened with considerable interest to your public service program when the DC Junior Bar Association presented a discussion regarding Potomac River pollution. That kind of program, which avails civic leaders an opportunity to participate and have access to broadcast facilities, is an outstanding contribution to the city and an excellent leadership contribution on the part of WWDC. Indeed, it brings to your station much goodwill and public understanding of a problem surrounded with considerable urgency of action. My heartiest congratulations.”

WILLIAM H. WATERS
The Chesapeake & Potomac Telephone Co.
Washington 1, D.C.

...or troubled world

“Recently, your station in cooperation with the Office of Civil Defense of the District of Columbia conducted an all-day broadcast from a Family Shelter in the District of Columbia. On behalf of the Arlington County Civil Defense Organization, we wish to thank you for this civil defense public service to the Washington Metropolitan Area. The broadcast was well planned and executed. Those of our residents who listened should be able to use the information to good advantage in furthering their Civil Defense Home Preparedness.”

A. T. LUNDBERG
Director, Office of Civil Defense
Arlington County, Virginia

...the station that keeps people in mind

The man driving to work compares fishing notes with Art Brown. The housewife fixing dinner adds an extra bit of garnish for Carroll James. They don’t have Art or Carroll as car or table companion. Instead, they have an object called a radio. From it, all manner of magic flows.

Art Brown and Carroll James are but two of our performing crew. Like their colleagues, they are real “pros.” Radio is their business—and their reason for being. It shows through in everything they do. They’re proud—they’re imaginative—they’re persuasive. They’ve helped make us Washington’s most listened-to station.

When next you plan for the rich Washington market, the station that keeps people in mind is the station for you to keep in mind.

WWDC
Radio Washington

public interest, convenience and necessity. I think the courts will stand behind the commissioners if they refuse to renew licenses, or even suspend some of them because of the excess of this kind of program . . . Sen. Clarence C. Dill, Hutton Bldg., Spokane 4, Wash. (Sen. Dill, during his term in Washington, was co-author of the Radio Act of 1927 and the Communication Act of 1934 which set up the FCC. He is now in private practice.)

Questions Minow’s answers

EDITOR: . . . My deep appreciation for your editorials as well as your general theme throughout Broadcasting on Mr. Minow and his general downgrading of broadcasting and everyone connected with it. It is just wonderful how a man who has so little experience in broadcasting has been able to come up with all the answers.—Norman A. Thomas, Norman A. Thomas & Assoc., P. O. Box 428, Chattanooga, Tenn.

‘Let Americans decide’

EDITOR: [Re FCC Chairman Minow’s views] . . . I do not feel it just that the “New Frontiersmen” should employ their power to attempt to mold America in their own image. We are who we are, not who they want us to be . . . and tv, which has risen from nothingness to a vast intercontinental voice and vision instrument, has, in spite of its (and our) imperfections, come about in a truly democratic style in the tradition of free enterprise. Bureaucracy did not create the stations or the programs. Let them man the mechanics, and for all of our faults, let us as Americans decide our own program fare.—Martin P. Blakely, Sioux Falls, S. D.

Ammo for radio salesmen

EDITOR: Please send 200 reprints of the very excellent MONDAY MEMO (June 12) by E. G. Neale Sr., entitled “Radio hasn’t come back—it’s never been away!”—Max Busch, CBS Radio, New York.

EDITOR: Would like to order 300 reprints of the June 12 MONDAY MEMO—Winston K. Marks, Manager, KBOY-AM-FM Medford, Ore.

Our Spanish readership

EDITOR: It might interest you to know your story on Miss Teenage America contest franchises drew an inquiry from Madrid, Spain.—Dana C’Celle, Miss Teen Age America, Southland Center, Dallas 1, Tex.

Custer’s lasting stand

EDITOR: Easterners know little more about Los Angeles except “crowded freeways” and “smog.” While we agree that these two ingredients are factors in our market your May 29 article relegated them to their proper places. You made a concise yet comprehensive presentation of the important features of the Los Angeles market . . . the most important radio market in the country.—Frederick D. Custer, General Manager, KPOL Los Angeles.

EDITOR: Send 50 reprints . . . —Bob Kennedy, KRCA Hollywood.

EDITOR: Send 500 reprints . . . —Jack O’Mara, KTTV (TV) Hollywood.

[Reprints of the special report on the Los Angeles market are available at $5 each or $15 a hundred]

Reminder: it’s everywhere

EDITOR: In your May 29 editorial, “How about giving tv a chance?” television [is referred to as] the “predominant communications medium.”

On reconsideration, I’m sure you would grant that radio is not only the predominant communications medium but the greatest mass medium available.—Terry F. McAuley, 760 Yale Ave., University City, Mo.

Early WORM heard the bird

EDITOR: . . . Heard a blooper on a sports show yesterday, an area radio station . . .

“. . . Southern California, the nation’s top-rated college baseball team . . . is scheduled to take on the Leghorns of Texas.”

. . . Such a “fowl” thing to say about our Longhorn friends!—Neal B. Bunn, General Manager, WORM Savannah, Tenn.

On television, too

EDITOR: I appreciate your mention of our internship program with WMIL Milwaukee (THE MEDIA, June 5); the article, however, should have included mention that we are engaged in a similar program with WMIL’s sister station, WXIX-TV Milwaukee . . .—Raymond T. Bedwell Jr., Radio-TV Dept., Marquette U. School of Speech, Milwaukee.

Plea for national anthem

EDITOR: Having spent several weeks in the hospital listening to radio and tv, I did not once hear our national anthem. It seemed to me that we in radio must alert the American citizen to the fight for democracy. If radio and tv would play the national anthem at noon, this would help more than all the speeches, debates, forums, etc. Detroit stations are now doing this and I would hope others can too.—Jack M. Roberts, WMZK (FM) Detroit.

Self-hatred is no asset in advertising: adapt or get out

Too many top-level agency people display obvious manifestations of self-hatred.

Example: the writer who is unhappy with himself because he feels, after all, that he really is cut out for "better things" than writing advertising copy.

Second example: the researcher who wants to go back to the university to study "significant things."

This self-hatred is projected by thousands of agency people throughout our society. This is a bad thing—an unnecessary thing. It probably accounts for at least part of the so-called bad image of advertising people in the eyes of their non-advertising neighbors. It's as if they believe people like Vance Packard.

If the people who produce advertising feel unhappy about it, ashamed by it, basically cynical about it, this cannot fail to influence attitudes toward advertising on the part of people outside the advertising fraternity. This is destructive. And it is irresponsible. It requires a level of toleration which I, for one, find difficult to maintain.

Time to Stop • This self-hatred should be stopped. Advertising men should proudly, but modestly, carry their heads high and cease and desist from the obvious manifestations of their own cynicism and self-punishment.

I'd like to quote Art Tatham—in a bulletin to our organization—in this regard:

"We believe that an advertisement is an organism of communication designed to achieve a commercial purpose, usually the making of a sale. We believe that the prime criterion of the merit of any advertisement is its ability to accomplish this prime purpose. . . .

"To be good creative people in advertising, we must be able and willing fully and wholeheartedly to accept this belief and all its implications."

No Apology • "We must also believe in the worthwhileness of advertising. We must be able to dedicate our talents to the advertising purpose and to do so proudly, not apologetically.

"We must realize and accept the fact that the goal which the creative advertising person seeks is not to express himself, but to give expression to the client's product! The creative person who is not able to accept these fundamentals should get out and stay out of advertising."

If the strident voices of the self-doubters can be silenced by their own inclinations, however, this would have a salutary effect, through time, on the total advertising fraternity. Moreover, it is their responsibility to be quietly self-respecting.

One small way of trying to help these self-deprecating souls to help themselves—to remove this unfortunate communication network—is to foster self-understanding among the miscreants about some of the reasons lying behind their behavior.

Reasons Why • The beginning of re-education is understanding. It is my hope to speculate briefly on some of the reasons why some of this self-hatred among advertising men may have arisen. My obvious purpose and my hope are that these insights might be of some value to those in the fraternity who are unhappy with themselves and who are cynically sowing seeds of contempt for all of us who work in advertising.

What are some of these underlying reasons for self-hatred among advertising people?

One reason involves the fact that the business attracts unusually talented and bright people. This usually means they are people who have many skills and diverse interests. It is only natural that many among this group feel that they could be doing "other things."

The point: the words "other things" should be substituted for "better things." It should be made clear if the self-deprecators and critics want to do different things they are not necessarily better things. And they ought to get on with doing them, if they are as pluralistically talented as they imply in their salon broadcasts.

Pioneer Mores • Another explanation may be that we Americans, who take our traditions from New England and the prairie, have more or less unconsciously always been suspicious of such things as the luxurious, opulent life which advertising helps to promote. I am suggesting that unconsciously, perhaps, our puritanism is showing and we have not recognized it for what it is. It's as if they feel guilty for not living the "stark life."

Producing ideas rather than things is another source of discomfort, I hunch. We are a production-oriented society and we value concrete, material, tangible evidence of our own worth. Many agency people really feel they are "not working when they are thinking."

And we Americans have always been suspicious of salesmen. This certainly stems from our agrarian and colonial values-system. We don't mind a sharp horse trader (David Harum), but we do dislike a "snake-oiler." Too many self-hating advertising people are unaware of the fact that everyone everywhere uses persuasion as a legitimate tool of effective human relations.

We too often assume "the grass is always greener" and believe that advertising agency operations are "different" from other economic or academic activities.

Idealistic • We are a nation of reformers—and we continuously postulate utopian ideals. This high-mindedness is moral, but occasionally unrealistic and demanding.

Conclusion: If we have the courage to look into ourselves and really examine some of our tacitly-accepted values, we might find that being a member of the advertising fraternity is to be a useful, productive, moral and creative individual—and we might begin to act like it. This is our responsibility!

Dr. Donald L. Kanter is executive director of creative research for Tatham-Laird Inc., Chicago. His administrative responsibilities include development of advertising campaigns through research and evaluation of those campaigns. Before his association with T-L he was with Social Research Inc. and in charge of motivational research for Gould, Gleiss & Benn, both Chicago. BROADCASTING, July 3, 1961
IS FCC MAKING FM BASIC MEDIUM?

Plan broadens service to local, regional and 200-mile areas
Major spectrum change would speed fastest-growing service
Question of duplicate fm programs on am outlets is raised

A complete overhaul of the fm broadcast band, fastest growing part of the spectrum by number of stations, has been proposed by the FCC. The action projects the first major spectrum change since the television band was unfrozen in 1952.

Speed-up procedure designed to give this aural service a powerful shot-in-the-arm was announced June 29 by the commission.

More important in some respects is a second FCC proposal, put in form of a question:

- Should duplication of am programs on fm stations be curtailed?

The proposed spectrum change would provide three main types of commercial fm stations ranging from local to regional and then to 200-mile protected service areas (see table page 25).

Here the commission issued a “notice of inquiry, notice of proposed rule-making, and memorandum opinion and order.” This is an expediting technique that does not include an oral hearing but instead invites comments by Sept. 5, with 30 days for added comments.

But in the program-duplication proposal the FCC simply invited comments, stating that no rules will be adopted without further proceedings (CLOSED CIRCUIT, Feb. 20). This is touchy business since it involves basic regulatory philosophy with possible censorship implications. It was not stated however that the commission might prefer to take fm grants away from am-fm operators who don’t do any original fm programming.

There was one obvious conclusion drawn from the FCC’s notice:

- More and stronger fm signals would be made available, giving even sparsely populated areas access to this relatively noise-free medium.

And behind it all, it appeared, is staff-level belief that fm should become the basic aural medium.

A scanning of the FCC’s notice indicates there is no intention of—

- Abolishing the 41-year-old am broadcast service, or
- Yanking any of the existing fm stations (unless something is done later about duplicate am-fm operations).

This new plan would provide the biggest shove for fm broadcasting since the commission gave its blessing to this static-free, technically superior (in many cases) medium back in the mid-40s. At that time fm was given 100 channels (88-108 mc) between television’s channels 6 and 7. Eighty of the 100 channels (92-108 mc) were set aside for commercial use, the other 20

35 witnesses air million words of plaints, proposals

Sylvester L. (Pat) Weaver Jr., board chairman of McCann-Erickson Corp. (International) cites large number of dramatic, music, opera, ballet and special events programs on NBC-TV during his stewardship.

H. William Fitelson, general counsel of the Theatre Guild says that while ratings may have their faults “no one has yet devised a better method” of measurement and suggests that they treat all programs alike.

Robert Montgomery, veteran performer and producer thinks today’s programs consist largely of “blood and thunder and sudden death” stories. He suggests limiting network control of production.

(For complete story on FCC program hearing in New York see page 40)
IS FCC MAKING FM BASIC MEDIUM? continued

(88-92 mc for education).

Fm had been first authorized in 1940 on the 40 mc band. Its development was slowed to a walk by World War II.

After the war the commission gave its blessing and encouragement to fm applicants. They applied by the hundreds but many became disillusioned when they were unable to attract enough listeners and began falling off in bunches as the public embraced the new television medium.

But in the mid-50s fm began to catch hold as television became an established medium. Much of its growing popularity came from specialized program service such as long-hair or background music rather than the fancy overtones and fidelity that 200 mc channels permitted.

Fm's growth has been steady in the last five years and there are few available channels left in the big metropolitan markets, the northeastern and mid-Atlantic areas, some midwestern spots and the West Coast.

Fm Looks Better The FCC indicated it is taking a dimmer view of fm broadcasting as the years pass. It is constantly bogged down with fm applications and often can grant only daytime facilities in this crowded band. Because of this jam, it's felt fm can serve local outlets better than crowded am stations.

And the commission added significantly: 25-million people now have no nighttime primary am service and probably never will.

It's time for complete checkup of fm broadcasting, the staff feels, because new technical information is available and perhaps a way can be found to cut out a lot of unavoidable tape involved in processing of applications.

The new table is essentially different from the allocation formula used in television, being based on protected coverage without assigning specific channels to the nation's cities (as in the case of tv). However the commission wants to reassign fm stations so there isn't a lot of wasted spectrum space resulting from unnecessarily wide separation of stations.

In its notice the FCC specified these four basic proposals:
- An overall plan of new fm station assignments based on minimum mileage separations with respect to existing stations, and also to some extent on maximum separations.
- Three classes of commercial fm stations instead of two, as now, plus two types of educational stations.
- Particular channels for the different classes of fm stations, with protection to existing stations.
- An inquiry into such technical topics as signal ratios, polarization, directionalizing and receiver efficiency.

While these technical details are important, the perhaps sinister matter of am-fm duplication will bring close industry scrutiny. Here are the commission's words:

"In an effort to speed the development of the fm service by permitting economical fm operation, the commission has up to now permitted fm stations to duplicate, without limitation, the programming of am stations, usually am stations under common ownership. Many, perhaps a substantial majority, of fm stations operate on this basis today.

Aided Growth "Probably this has contributed to the growth of the medium for the reasons intended, and also it permits am stations to reach an additional fm audience with a service often of higher quality technically; but at the same time a question exists as to whether duplication, or at least unlimited and total duplication, is an appropriate use of fm facilities or amounts to waste of a valuable frequency band.

"Comments are invited as to whether complete or partial duplication should

Fm's vital statistics

The FCC's notice of a proposed reshaping of the fm band sets up these basic facts:
- 1,060 commercial fm station authorizations (close to 870 stations actually operating).
- Of stations authorized, 110 are Class A (low power), 950 Class B (up to 20 kw and higher).
- Of 3,200 am stations, 2,907 have 1 kw or less power (many 250w stations may increase to 1 kw).
- By states, California has the most fm stations, 142. Other leaders—Ohio 90, New York 79 and Pennsylvania 78. There are no fm stations authorized in four states—Montana, North and South Dakota, and Vermont.

Day and night fm propagation is uniform.

BROADCAST ADVERTISING

Will research reveal tv’s real image?

TVB STUDIES EFFECTIVENESS; NAB WANTS TECHNIQUE, RATINGS PROBE

Television again is looking at its image but this time the mirror is basic research. Holding up the glass is Television Bureau of Advertising which, through its president, Norman E. Cash, sounds a note of urgency:

"A massive and continuing program of basic research in the field of mass communication is urgently needed now."

The statement is prompted by release today (July 3) of a report covering a TVB-commissioned basic research program conducted at Pennsylvania State U., and the first research substance to be given wide circulation since the program went into effect more than two years ago. It's conservatively estimated the cost of TVB's basic research soundings so far amounts to some $100,000.

The new report—initially and quietly given limited exposure to a selected group of advertising agency executives at the American Assn. of Advertising Agencies' convention this spring—is being released at a time when tv's "numbers" (nose-counting) are coming under the attack of other media, government and tv critics.

Collins' Call It follows by little more than a month a major proposal of NAB President LeRoy Collins for a research center on or near a university and operated by broadcasters themselves. This center, he reasoned, would get "the most pressing problems of the industry for assignment to the finest research specialists in the nation" (Broadcasting, May 15).

While both NAB and TVB seek bold moves in research coverage of the television medium, there appears to be a lack of desire by either to consolidate their resources. Additionally, each would seem to be exploring dissimilar paths: NAB apparently embracing the need for research in the areas of ratings, broadcast techniques and the influences of certain programming among other things; and TVB obviously moving out from its "nose-counting" activities to studies of media effectiveness.
be permitted for any FM station and, if only partial duplication should be permitted, what maximum percentage of program time should be permitted for this kind of operation.

In asking for comments on polarization the commission noted the growing use of auto FM receivers having vertical or whip antennas. At present horizontal polarization is standard but circular or elliptical polarization is permitted. Vertical is considered more effective for autos.

Comments are sought on FM receiving sets in relation to their efficiency in picking up and separating signals, with special attention to the efficiency of low-cost sets.

The commission took note of this FM administrative advantage—FM probably will never develop all the assignment problems now associated with AM, but a tendency in that direction has appeared. Contours, populations and service problems lead to hearings.

The assignment table is designed on the theory that existing stations are to be protected on a uniform basis regardless of the facilities they use or which are proposed by new stations. This is in accord with television separations. The staff proposes use of VHF propagation curves as a basis for station separation. A new study of co-channel ratios and possible use of offset carrier techniques as well as cross-polarization is suggested.

Proposed Revision • Occasion for all these sweeping proposals to re-make the FM broadcast band was a cluster of three applications. FM Unlimited, Chicago firm, proposed a complete revision of assignments and rule-making. This was granted to the extent of a call for comments and proposed rule-making.

Charles River Broadcasting Co. proposed to delete the basic FM area split in assignments. This was denied. And the request of Joseph D. Worth for a flat 75 kw ceiling on Class B stations outside Area 1 was also denied.

The FM area formula specifies a 20 kw maximum power limit on stations in the northeast (New England south to Washington, D.C., and Hagerstown, Md.) This two-area formula would either be abandoned entirely or else the northeast boundaries would be extended into the midwest under FCC's new allocation plan.

Special provisions are suggested for Alaska and Hawaii. Currently Alaska is assigned 100-108 mc, Hawaii 98.1-107.9 mc. Each would have 10 channels for high-power Class C stations, under the plan. FCC made clear it is thinking in terms of development of "a vast number of local outlets, removing the need for, and it is to be hoped, actually replacing marginal AM operations."

The new Class B stations would have a 50-mile protected service radius, with 20 kw power, that would usually cover the growing urbanized areas around cities.

An important phase of the FCC's notice centers around directional antennas and their place in the new allocation. The notice mentioned the use of directional to avoid wasting signals over water and their place in separation of stations. About a dozen FM stations use directional antennas. A few are employing power approaching 100 kw and even higher.

After skimming over the commission's notice, one communications engineer observed, "This makes FM assignments valuable." He added, "Get in while you can."

The urgency of a continued, massive research program is underlined by a bureau observation that "larger budgets, increased competition, narrowing profit margins demand greater accuracy in recognizing and making each decision in this complex age of possibilities, and insist upon finer measures of this accuracy." While a commercial's creation may be complex, its effectiveness measure is still more so, TVB concludes, because this measure must provide the guides for the creation of the next advertisement.

The Pennsylvania State research already has one significant by-product—that of techniques used in testing for media effectiveness. Along this line, Penn State found that closed-circuit TV provides a new way to speed up research. Reason: it permits the study of many things all at one time.

Other important findings:

• Many of the tests made previously of either advertising or media are misleading. Reason: These tests did not fit the medium used. To explain further: The researchers feel that it is important to use a visual form of a test to measure a medium that is visual.

• When two elements of a commercial are used together—that is picture and supered names, for example—the results are better than when either is used alone. But, the researchers now know, it doesn't necessarily follow that when elements are added, the communication will be improved over and above that much. And, in fact, too many additional details (or information) in the commercial may reduce the communication.

• Combinations of the different elements in the message (or communication) must be tested. This process, they say the Penn State people, "outlaws many previous tests that had assumed combinations of sight and sound (or copy and sight) were equal to the sum of their parts."

Helping to place previous testing and research in perspective: The Penn State researchers have compiled a bibliography of inter-media research and described it as "the most extensive yet assembled." More than 3,000 titles are included. Copies have been requested by the U.S. Office of Education and the Institute for Communications Research at Stanford U.

TV basic research is but begun, TVB makes it plain, noting there "would need to be more systematic study both of the effects of communication variables and of conditions of use in terms of desired objectives."

The important decisions made as a result of the Penn State project:

• From the preliminary testing, it was decided to limit for now all experimental work to only the medium of television because it embodies the
Proof of tv’s effectiveness TvB’s aim

MILLION DOLLAR, FOUR-PART PROGRAM CONTINUES

A heated warfare among competitive national advertising media—among which television is but one—is in the background of the urgent note sounded by Norman E. Cash, president of the Television Bureau of Advertising.

But to say Mr. Cash seeks more firepower under his command and is throwing “basic research” into the fray would be missing a point of issue. TvB has a warning for the tv business man. And it amounts to this: “Research terms are difficult to understand,” he seems to be saying, “but the Pennsylvania State U. report is one more door unlocked on the way to a more stable advertising dollar in television.” Why? First, a look back:

Television Bureau of Advertising as early as 1955 set forth a massive research program (the investment reportedly comes to nearly $1 million over the six and a half years). The concept encompassed four parts, some in operation concurrently.

In one phase, TvB set out to document whom tv reaches. The bureau did this by publishing summaries of rating services and various analyses on how tv reaches the people (and who those people are). For example, the bureau circulated such reports as a spot sampler, of a seasonal analysis, of Market Research Corp. of America studies on liquid bleach, automatic washer owners, of Pulse studies into appliances, frozen foods and automobiles, and of Nielsen studies (“heavy and light driving” homes, filter and king-size cigarette smoking homes, new and used cars, etc.)

Another phase took in the question of how much it costs the tv advertiser to reach people. In this category, TvB began publishing spot and network gross billing figures (including brand advertising breakdowns) along with some analyses and cost per thousand studies. Both phases—who is reached and the cost of reaching that person—are identifiable as “nose-counting” or documenting in numbers.

What Happens When • By early 1958, the bureau researchers were in still the third phase of what happens when the tv advertiser reaches these people. Out came reports on the Edsel (via neighbor samples), on the Buick (via immediate recall) and thousands of success stories. But the bureau felt, these three phases but scratch the surface. It was decided to launch a broad investigation of why or how tv makes people do things.

The latter conclusion brought up the fourth phase. The facets: A Pulse study showing how time is spent, on “E-motion” which indicates why people turn to television, an image study on specific effects of tv’s role and still two other inter-related studies: (1) A cash-award competition for exceptional research plans (plans and new ideas which can point the way for others), and (2) the basic research project at Penn State that already has compiled what has been done so far in this field and determining what is valuable.

Still other benefits will come from Penn State, as they will from other facets of the fourth phase.

That briefly is the historical background of tv’s research. But now for the urgency:

The day may not be far off when each of the highly competitive but powerful national advertising media will reach its limits in the amount of documentation available on the numbers (and types etc.) of people an advertiser can expect to reach with a given message. It’s at this point that a differential—that is, how effective the medium is once it reaches the person—could make the difference as to which vehicle the advertiser will select to invest his money, and how much of a budget it can expect.

Television can be ahead if it can button down the answers “soon” to a few basic questions of why people will or will not do certain things when tv reaches them, if it can remove most of the unpredictable, and if it can show advertisers what they can do to make their commercial use of the medium more effective and thus increase their sales.

Seen from this viewpoint, the stakes appear high and the urgency great.

elements of virtually all the mass media, including print, the spoken word, pictorial and other non-word signs and symbols.

Perception was the area chosen for the first study.

It’s apparent the research group at Princeton will continue to concentrate on perception as a means to a better understanding of why people act as they do as a result of viewing television (commercial) messages. As the word perception implies: it’s what one viewer as distinguished from another sees in a particular communication that would appear important to the buying decision.

The actual testing at Princeton included the showing of whole messages or commercials, and then the respondent’s perception compared with what actually was contained in the commercial, and later, a simplified message (printed name, spoken name, picture and combinations). This message was sent on closed circuit into a number of different classrooms at the same time, each room receiving a different combination of the elements making up the communication.

Further Study • TvB phrases the lessons learned this way: “There are many more things to be known before the effectiveness of any advertising or advertising medium can be adequately measured. The maze of possible factors, the importance of their control, the variation in results with changes in tests, the way factors work alone and in combination . . . all attest to the need for further study.”

Mr. Cash noted the report found “most communications research is . . . inadequate, limited and superficial,” and in the early findings now in hand a “maze” of opportunities for a greater effectiveness in communication both in advertising and in other (governmental and educational) fields would appear to be opening up.

Closely related to the process of learning more about the problems in this area is TvB’s competition—now closed—which has nearly 150 people who have recommended plans and ideas as designs for future tv-communications research.

A governing committee and a group of prominent educators are associated with the competition and also have connection with the Pennsylvania State U. project.

The governing committee has Mark A. May as its chairman. He is professor emeritus of psychology at Yale U. and chairman, U. S. advisory commission on information. Others: Leon Arons (as secretary), TvB’s vice president for research; C. R. Carpenter, psychology professor at Penn State; John B. Carroll, professor at Harvard U.’s graduate school of education; Joseph T. Klapper, a communications research consultant for General Electric Co.; Paul F. Lazarsfeld, chairman of Columbia U.’s department of sociology;

Wilbur Schram, a Stanford U. professor in communication research; Milton Sherman at Marplan, research affiliate of McCann-Erickson, and the late Samuel A. Stouffer, professor of sociology at Harvard.

The group of educators-researchers: Philip H. Coombs of the Ford Foundation; Roy M. Hall, assistant commissioner for research, U. S. Office of Education; Marion Harper Jr., board chairman of Interpublic; Ralph Hetzel, vice president of Motion Picture Assn. of America; Arno H. Johnson, chairman of the Advertising Research Foundation and an economist with J. Walter Thompson; Thomas B. McCabe, president, Scott Paper Co., Porter McKeever, director of information for the Committee for Economic Development; Frank Pace Jr., chairman of General Dynamics Corp., Gilbert Seldes, director of the U. of Pennsylvania's Annenberg School of Communications, and John F. White, president of the National Educational Television & Radio Center.

Now it's CBS Television Stations National Sales

A newly-named department will now handle national spot sales for CBS-owned tv stations. In effect, the change today (July 3) amounts to CBS Television Spot Sales becoming CBS Television Stations National Sales, a name which Bruce R. Bryant, vice president and general manager, feels accurately classifies the station representation function in “selling television advertising to national accounts.”

Mr. Bryant explained that national selling means “a great deal more than offering a list of spot announcements in a delivery-service function” and that a spot campaign has become a major expenditure which takes in program purchases, announcements and participations and involves a careful study of markets, business trends and competition.

CBS-owned tv stations—WCBS-TV New York, KNXT (TV) Los Angeles, WBBM-TV Chicago, WCAU-TV Philadelphia and KMOX-TV St. Louis—will continue to be represented by the Sales Arm which will have six regional offices (New York, Chicago, Los Angeles, San Francisco, Detroit and Atlanta).

Rep appointments...

- WMIL Milwaukee: Bob Dore Assoc., N. Y., as national representative.
- WITN (TV) Greenville-Washington, N. C., and WRRF those cities: Venard, Rintoul & McConnell, N. Y.
- KDEO San Diego; KFXM San Bernardino, and KAFY Bakersfield, all Calif.; Robert E. Eastman & Co., N. Y.

First ‘VIP’ in Blair’s new Chicago building

First agency executive to receive “VIP” treatment (“very important presentation”) at the new Chicago office of the John Blair station representative organizations is Harold Tillson (r), manager of the media department of Leo Burnett Co. there. On the giving end June 27 were (1 to r): Sherwood (Skip) Hinman, Blair-Tv; Arthur Stringer, vice president, Blair Television Assoc., and Harry Smart, vice president, Blair-Tv. Blair’s $6 million 11-story glass and aluminum structure at 645 North Michigan Ave. already houses midwest offices of McGraw-Hill and as of July 15 also will house the Chicago office of The Caples Co.

ADVISORY AD GROUP
Proposes publication of self-regulation manual

Publication of a self-regulatory manual covering the advertising and media industries was proposed June 29 at a Washington meeting of the Advertising Advisory Committee of the Dept. of Commerce.

Secretary of Commerce Luther H. Hodges took part in the meeting, attended by a score of advertising and department officials. William Ruder, special assistant to Secretary Hodges, said the department will cooperate in the project provided it is “a completely factual presentation of what is being done and if the contents are approved.”

The manual is designed to serve as a basic reference work on the subject of self-regulation by broadcasting, print media, agencies and advertisers. A study of these self-disciplinary projects was presented May 30 at the Advertising Federation of America convention in Washington by Earl W. Kintner, former chairman of the Federal Trade Commission (BROADCASTING, June 5).

A threefold base was laid for the manual by the committee—help business make more effective use of advertising; create a better understanding of self-regulatory processes in advertising, media and related business organizations, and provide businessmen with information necessary to participate in self-regulatory machinery.

Secretary Hodges said the department welcomes the counsel of the advertising advisory group, headed by Frederick R. Gamble, president of American Assn. of Advertising Agencies. The secretary was asked to review a provision in the defense appropriation bill restricting advertising by defense contractors and subcontractors. The committee will meet again in late September.

Agency appointments...

- Food Fair (shopping center chain), New York, appoints Newhoff-Blumberg, Baltimore, to handle advertising and pr for its new Reisterstown Plaza shopping center, that city.
- New Jersey State Democratic Committee, Trenton, appoints Guild, Bascom & Bonfigli, N. Y., as agency for the gubernatorial campaign of Judge Richard J. Hughes. Media plans have not been set.
Over one-half the viewers who watch news in the 3-station Atlanta market see it on WSB-TV. The latest Neilsen survey (March 6-April 2) shows Channel 2's eight daily newscasts with a 54% composite share of audience. This dominance by WSB-TV comes from years of consistently offering the best, fastest, most accurate newscasts. Put your product on top in the nation's 24th market... put your advertising on WSB-TV... Atlanta's top station!

BROADCASTING, July 3, 1961
COSTS FOR LONGER BREAKS

No definite 40-second pattern emerging as several stations reveal rate plans

There were some definite answers last week as to how tv stations will price the 40-second station breaks as they become available from the networks (Broadcasting, June 26).

WWJ-TV Detroit, WTVJ(TV) Miami and the Crosley Broadcasting Corp., on behalf of its five stations, announced rate card revisions towards this end.

Edwin K. Wheeler, WWJ-TV general manager, said that its 40-second prime-time rate, effective last Saturday (July 1) is $900 which also becomes the rate for 60-second announcements. The 20-second charge remains at $700.

The Crosley plan becomes effective in the fall when the network 40-second break is initiated. It covers WLWT(TV) Cincinnati; WLWC(TV) Columbus, Ohio; WLWD(TV) Dayton, Ohio; WLWI(TV) Indianapolis, Ind., and WLWA(TV) Atlanta.

Robert E. Dunville, Crosley president, said that the 40-second break rate would be 65% above the basic 20-second rate-the 30-second rate would be 40% over the 20-second charge.

Mitchell Wolfson, president of Wo- metco Enterprises, announcing the 40-second rate for WTVJ, also noted that the door would not be closed to advertisers already with commercials of shorter duration. "WTVJ will designate across-the-board positions in which announcements of specific denomination will be available, will expand its already successful scheduling of sponsored audience features in announcement time periods and will price the new 40-second availabilities at a rate between 130% and 140% of the twenties," Mr. Wolfson stated.

The WTVJ plan will allow 20-second and 10-second spots only at 8 p.m. and 10:30 p.m., Monday through Saturday. On days when the network permits 42 seconds between programs, the remaining 10 seconds of break position will be employed for public service purposes.

Mr. Wolfson explained that the sudden appearances of 20-second availabilities would appear to exclude the traditional 10-second advertisers, but that WTVJ was aware that some campaigns are ideally suited to the 1D format and that some sponsors have "small fortunes" invested in 10-second commercials. "We feel we have an obligation to these clients, hence our setting apart special strips in prime time for their use," he said.

WTVJ's 8:30 p.m. and 9:30 p.m. positions, Sunday through Saturday, will be sold as two 20-second commercials only. When one position is unsold, it will be used for station promotion. In no event will WTVJ permit any break position to be occupied by more than two commercial units. The 40-second commercials will be available during all time classifications.

Example of the sponsored audience feature in announcement time periods is WTVJ's Weather Eye, a complete 30-second weather program including opening and closing sponsor billboards, weather news and a Phillips 66 commercial. Program will be of 42-second duration as availability open in the fall. Extension of this type of show, Mr. Wolfson said, will be News Break, with a composition like Weather Eye and to be expanded to 42-seconds in the fall.

Mr. Wheeler, commenting on WWJ-TV's plan, said the new rates reflect an equitable value to the advertiser and a satisfactory return to the station. He termed the price differential between 20 seconds and 40 seconds as realistic "since it offers exclusivity and provides greater scope in which to develop copy points." Mr. Wheeler also declared WWJ-TV will continue its long-standing policy that precludes triple spotting.

Crosley's Mr. Dunville pointed out that the 40-second commercials would help to dispel images of "over-commercialization" among viewers.

"The tv viewer would prefer seeing and hearing a longer commercial message for one product in the station break period, rather than trying to assimilate several messages which are perhaps confusing and which at least tend to leave the viewer with the idea of over-commercialization," he said.

Mr. Dunville said the new rate structure could result in less revenue for Crosley but that the reduction in commercials will meet with the viewers "overwhelming" approval. Also, he declared, the advertiser will profit because of the reduced time cost for his more effective commercial.

"The 40-plus second break is a forward step for the industry," Mr. Dunville said.

FAAG makes advertising, public relations awards

The First Advertising Agency Group presented its 1961 annual advertising and public relations awards under business and consumer advertising classifications last week in San Diego, Calif.

The FAAG award recipients for ra-

Zsa Zsa on Lestoil: 'Darlings, it's the greatest!'

Lestoil (all-purpose liquid cleanser), which kicks off a new spot television campaign beginning today (Monday), to introduce its two latest products—Sparkle Scent Lestoil and Pine Scent Lestoil—has none other than Zsa Zsa Gabor as its spokes- woman. And while she may not be the "typical" housewife, the Hungarian-born beauty does demonstrate an interesting if not unusual sales approach (see photos above). The minute television commercial was produced by The Sackel Jackson Co., Boston. Story line deals with "hard working" Zsa Zsa, Lestoil and the concern of the servants for the tired Miss Gabor.
THE DIFFERENCE IS THE MUSIC. Great popular music, attractively arranged to appeal to adult listeners and higher income families, is played around the clock.

NEWS ON THE HOUR—Headlines on the Half Hour—and commercials only on the quarter hour, is the effective music and news format that produces maximum sales and inquiries for advertisers. For all the facts, call WEBSTER 8-2345 or write Coast Radio Broadcasting Corporation, 4628 Wilshire Blvd., Los Angeles 5, Calif.

dio and television:

Advertising’s responsibilities to media

TIME’S LARSEN SAYS THEY’RE MORE THAN JUST PAYING THE BILLS

Advertising has more responsibilities toward media and toward the public which listens, watches and reads the ads and editorial contents presented by America’s radio, television, newspapers and magazines than paying its bills for time and space promptly, Roy E. Larsen, chairman of the executive committee of Time Inc., told the Advertising Assn. of the West last Monday (June 26).

Keynote speaker at AAW’s 58th annual convention in Seattle, Mr. Larsen said that the growth of U. S. media into what he called “the greatest free communications system in the world,” has been made possible by advertising. And he said, “It is advertising that has brought mass production and mass distribution to the communications industry.”

The advertiser helps to set the standards of the communications media. Mr. Larsen said that it’s advertising’s responsibility to “demand that the important news and information of our times be communicated effectively.”

“I do not mean to say that every media buyer must appoint himself a judge of editorial or programming policies, or that temporal or immediate conditions should determine the placement of every advertising campaign. One or two or three advertisers cannot determine how well our communications will work. But the cumulative effect of all advertising can—and will.

“The support of media through advertising, like the support of education by the public, is long-range. It affects our children and our grandchildren. The support we give to a good educational system is an investment in the future. The support that advertising gives to a good communications system is an investment in how well informed our citizens will be and how high their standards will be in the future.”

Truth & Taste — Mr. Larsen noted that one of the best replies for advertising’s critics is to produce “better and more effective advertisements.” In that respect, Donald S. Frost, vice president of Bristol-Myers Co., said in a Monday afternoon address, advertising’s public responsibility is not confined to questions of “truth and taste.” Advertising, he said, is also obliged to respect and demonstrate its respect for the consumer’s intelligence.

This, Mr. Frost asserted, means advertising that does not “bore, brag or berate—that does not shout when it should speak, that does not boast when it should convince, that does not exhort when it should explain.” It also means advertising that “not only says what it means but means what it says,” advertising that is believable and does not inflate the insignificant “ . . . advertising that you and I and the family next door are going to read, heed and be guided by.”

Emerson Foote, president, McCann-Erickson Inc., a Wednesday speaker, told the AAW that it is possible that by 1971 the average family will have an income of more than $10,000 a year with a gross national product of $800 billion and an annual national advertising expenditure of $25 billion.

To handle its obligations in 1971, advertising “will have to perform at a distinctly higher level of effectiveness and responsibility,” Mr. Foote declared. “It must shake off almost completely certain bad habits from its adolescence. It must develop a new respect for the consumer whom it exists to serve.”

Lack of consumer respect is one of many reasons advertising is now in trouble, Mr. Foote noted, “A consumer must not and cannot be thought of as someone to be badgered into buying something by endless repetition of not-too-pleasant, not-too-tasteful and not always truthful harangues.”

Need For Understanding — At a Tuesday session on advertising education Don Belding, consultant to Foote, Cone & Belding, stressed the need for an understanding of the American economic system and the part advertising plays in its operation by the adult public, by the teachers in our schools and colleges and by their students.

Mr. Belding expressed concern about students who will soon be going overseas in great numbers. “What will they say about advertising when the Communist youths laugh at it in their presence? I’m concerned about the teachers or businessmen who say that advertising is an economic waste. . . . I’m concerned with the social science teachers who state that advertising, by urging people to buy more than they need, causes distress and misery. I’m concerned with advertising leaders who have backed away from responsibility. I’m concerned that the teachers of advertising in our secondary schools, colleges and universities do not get the full support they must have from their own deans and from the advertising industry. All these concerns point to a new need for understanding of risk capitalism, our free enterprise competitive economic system and the place that advertising plays within it.”

Mr. Belding praised the American Academy of Advertising, national professional organization for college and university teachers of advertising, for its work in raising the quality of advertising education. The history of AAA since its organization at the 1958 convention of the Advertising Federation of America was traced by Billy I. Ross, U. of Houston, dean of AAA for the past year. AAA now has 239 members, he reported—187 educators and 52 interested practitioners of advertising.

AAA is endeavoring to stimulate the teachers of advertising to do a better job, but professional advertising men and women can do this better than other teachers can, Mr. Ross stated. Meetings of AAA will be held concurrently with

those of advertising organizations whenever possible, he said. "We think that we need to get off the campus and that you need to come on the campus," he told the AAW.

Brand Names • "The brand images built by advertising become intangible assets of far greater value to the advertiser sometimes than his tangible assets," John P. Cunningham, board chairman, Cunningham & Walsh, told a Wednesday session.

He added that the values of these images are so great with some companies that all their plants and equipment could be destroyed overnight, but the companies could be rebuilt and business resumed because of the "respect that resides in millions of minds for their brand names."

He concluded, "If, overnight, such brand names as Jello or Revlon or Ford or Colgate or Goodyear were completely wiped out of people's minds, thousands of machines and men would stand idle."

"That is the power of creativity."

Enforce Codes • FCC Commissioner Frederick W. Ford cautioned the advertising men to be ever mindful of their own codes and those of the broadcasting industry. Speaking at the Wednesday session, he urged advertisers to insist that stations they use subscribe to the industry's codes.

Adherence to them is essential to assure that advertising and broadcasting are kept free and unshackled from government intervention. "If the fear of government intervention is unreasonably over-emphasized, people will lose their initiative and their capacity for good showmanship," Commissioner Ford said. "Without the personal discipline that must accompany freedom in this respect, however, restrictive measurements will undoubtedly follow."

The over-abundance of commercials on many stations today should be a matter of concern to advertisers as well as broadcasters, the commissioner stated. He said the present significance of the 40-second station break controversy is not important but that if further increases are made, it will be a matter of concern as related to overall time devoted to commercial copy.

The commission's concern, he said, rests with the creation of a proper relationship between program material and the portion of air time devoted to commercial copy.

On the same day Commissioner Ford spoke to the western advertisers, he also addressed the Washington State Assn. of Broadcasters meeting in Seattle.

The AAW also announced the following awards in radio and television:

the network, but it is dropping Miss Shore for the adventure film that moves from the current Saturday, 7:30-8:30 slot to Sunday, 9-10 p.m. Agency: Campbell-Ewald, Detroit.

Hertz Rent-A-Car, N. Y., has bought alternate-week minutes in Dick Powell’s Mystery Theatre, beginning this fall (NBC-TV, Tues., 9-10 p.m. EDT). Agency: Norman, Craig & Kummel, N. Y.

General Mills, through Knox Reeves Adv., Minneapolis, has bought NBC-TV’s All-Star Scouting Report, two 15-minute programs preceding all-star baseball games on Tues., July 11 at 3:30 p.m. EDT, and Mon., July 31 at 2:30 p.m. EDT.

Mars Inc. has signed to partially sponsor four ABC-TV programs next fall. The programs are Bugs Bunny (Tue., 7:30-8 p.m. EDT), Cheyenne (Mon., 7:30-8:30 p.m. EDT), The Hathaways (Fri., 8-8:30 p.m. EDT), and Leave It to Beaver (Sat., 8:30-9 p.m. EDT). Agency: Needham, Louis & Brorby, N. Y.

Procter & Gamble and American Tobacco have signed as sponsors of The Joey Bishop Show, beginning on NBC-TV Wed., Sept. 20 (8:30-9 p.m. NYT). Mr. Bishop plays a legman for a public relations firm in the weekly series produced by Belmar Productions in association with NBC. Agencies: Benton & Bowles N. Y. for P&G and SSC&B, that city, for American Tobacco.

The Seven-Up Co. has bought a 10-week schedule of CBS Radio newscasts, features and dramatic shows. Agency: J. Walter Thompson Co., Chicago.

Bristol-Myers’ Mum Deodorant has bought five program units a week in CBS Radio’s Art Linkletter’s House Party as well as network news shows. Agency: Doherty, Clifford, Steers & Shenfield, N. Y.

SMOKING OUT THE SMOKERS

Pulse profiles give complete unknowns on audiences including potential and actual users of products

NBC-TV’s Wagon Train delivered more cigarette smokers to its sponsor, R. J. Reynolds, than any other night-time cigarette tv program on the air, according to the Pulse “Tv Audience Profiles” report covering cigarette sponsors in the 1960 autumn period.

ABC-TV’s Maverick (R. J. Reynolds) delivered the highest concentration of male cigarette smokers in its audience, an analysis of tobacco-sponsored programs showed. The ABC-TV Untouchables (Liggett & Myers) and the CBS-TV Twilight Zone (also Liggett & Myers) were tied for concentration of female cigarette viewers.

The extensive Pulse profiles are compiled three times a year, the first having appeared last January. A February-March report has just been published and a third, compiled in the spring, will appear later in the summer. The reports provide an analysis of all U. S. network tv programs in terms of 36 separate product-use, and demographic classes such as age, sex, home ownership, family income, education and occupation.

Pulse data are based on 1,750 personal interviews in U. S. households. The figures provide basic information answering the question—what kind of viewers?

Another breakdown of the first profile report shows that CBS-TV does the best job of delivering female viewers who are cosmetic purchasers to daytime tv network sponsors.

The extensive Pulse compilations provide the answers to literally thousands of marketing questions based on network viewing, according to Pulse, including the cost-per-prospect efficiency of programs. Since the tv population amounts “to virtually all the entire population” in the opinion of Pulse, the marketing material is deemed true for the entire country.

Following are rankings of the 10 leading nighttime network tv programs having cigarette sponsors by number of male viewers (over 18), shown by total cigarette-smoking viewers delivered and by concentration (number of cigarette-smoking viewers per 100 persons viewing the programs):

38 (BROADCAST ADVERTISING)

BROADCASTING, July 3, 1961
Why is approximately 80% of the local TV money in the Des Moines market invested on **KRNT-TV**?

**KRNT-TV** makes cash registers ring!

The quality of our quantity of audience is apparent to local advertisers who live here and who must prosper here. Their cash register must ring — they have no alibis! Their cash register is their copy tester!

The believability of the exclusive KRNT-TV personalities (we have more than all other stations) is shown by the cash register and by the Central Surveys.

Month after month, year after year, KRNT-TV ratings are high. Highest Newscast ratings in the nation! Highest sportscast ratings! Highest local personality ratings!

If you want to find out more about this unusual station, we suggest you check any business man in your line of work in Des Moines. Ask him about KRNT-TV. You, too, can get outstanding results by advertising on...

Better programming still a year away

THAT'S CONSENSUS AMONG MORE OPTIMISTIC OF FCC'S WITNESSES

Wait till '62-'63. With that hopeful slogan the current phase of the FCC hearing on TV practices came to an end in New York Thursday.

It had lasted for eight days over a two-week period during which time 35 witnesses delivered a million words of testimony, enough to fill approximately 2,000 pages of transcript. For the most part, the creative people of TV who testified—writers, producers, directors and performers—denounced the medium that made their opinion worth subpoenaing. But in the midst of all the funeral tones a few up-beat notes were heard.

Veteran performer Garry Moore predicted that "quality material" would be back on the air by the 1962-63 season. News and public affairs producers Fred W. Friendly, Irving Gitlin and John Secondari followed another to the stand to testify that creative freedom was supreme in their areas and that the future augured well for the same sort of "unrestricted" programming in other creative areas.

Terrific, Says Como • NBC personality Perry Como declared that "TV has done a terrific job," and Pulitzer Prize winning writer Tad Mosel expressed belief that "TV has its cycles just like other mediums." He prophesied the imminent demise of violence and rebirth of fine drama.

Producer Albert McCreery saw a reversal of the action-adventure and western trend by the '62-'63 season; and former NBC executive Sylvester L. (Pat) Weaver predicted improved TV service in the very near future.

Almost all the witnesses were agreed that come-what-may there is a great public appetite for fine programs and enough available talent around to create it.

The evidence wasn't overwhelming, conclusive, nor convincing but a hint of things to come.

It's too late for next season, network schedules are locked-in, they said, adding that programming-in-balance and "over-emphasis on violence" will still be with us with the big change coming a season later.

At the close of the hearings, FCC Chief Counsel Ashbrook P. Bryant (see story below) expressed the hope that no "retaliatory action" would be taken by television people against those witnesses who specifically named names in criticizing various aspects of TV practices (Closed Circuit, June 26). At a future date—probably by late fall or early winter—the commission study group will hold its next phase of the hearing.

Details have not yet been determined.

A running account of the final sessions (June 26-29) follows:

Can Reject Sponsors • Garry Moore, CBS-TV performer and first witness to testify June 26, said his contract with the network permits him to reject certain types of advertisers which would detract from the program's "image." He cited deodorants specifically and said that, on certain occasions, he has turned down network requests to place this category of sponsor on his programs (The Garry Moore Show and I've Got A Secret).

Under questioning, he conceded that he had had "some differences" with the network on the number and spacing of commercials on the variety show, because, in its early years, seven commercials were carried on the program. He added that only five commercials are carried now, but acknowledged it was because the show "now has a track record."

Quality Ahead • Mr. Moore said there has been "a sameness" to TV programming in recent years and pointed to a preponderance of westerns and action-adventure series on the air, and added: "I sense a genuine concern on the part of network management to produce more live drama. It won't happen right away—I'll be as dreary as ever next season. But within the limits of talent available, I believe you will see more 'quality' material on the air by 1962-63."

George Schaefer, president, Compass Productions, New York, told the hearing there was a "considerable" audience for "serious" TV drama, and estimated that Hallmark Hall Of Fame, which his company produces, reached an audience ranging from 10-million to 30-million viewers, depending on the production shown. Mr. Schaefer said there was "a huge void" on TV because of an absence of "good drama and good music" in the medium, and attributed this condition to "a lack of courageous sponsors."

Taboos Cited • Audrey Gellen, a producer for Talent Assoc.-Paramount Ltd., said it was difficult to obtain top writers for serious TV dramas because of sponsor taboos. Miss Gellen claimed many sponsors are "afraid" to underwrite plays with political and racial themes and stated that du Pont expressed considerable apprehension of Talent Assoc.'s productions of both The Member of the Wedding and The Lincoln Murder Case.
Como most casual of FCC hearing witnesses

Perry Como testified to a standing-room only audience that was mostly made up of teenage girls and Federal Court House employees.

Attired in a bright yellow basque shirt and checkered sports coat he was the most casually dressed of all the witnesses at the hearings. During most of his testimony he chewed gum and made little physical and verbal asides to the audience.

At one point when FCC assistant counsel James Tierney remarked that, "I don’t want to put words in your mouth," Mr. Como quickly replied, "I wish you would."

Before taking the stand Mr. Como was overhead telling Mr. Tierney, "I'm a dope about these things, please don’t make me look like more of one than I am." Throughout his interrogation he pleaded ignorance. After he left the stand Mr. Como was mobbed by his squealing fans.

“Of course, we did have discussions about what we could do. But basically the atmosphere was friendly.”

Mr. Coe testified there is a "large minority" audience for tv drama, and offered the view that the decline of such programs is traceable largely to the rating system. The action-adventure and westerns have garnered large ratings, he said, and blamed cancellations of *Playhouse* and another of his programs, *Mr. Peepers*, on the "rating system."

Need ‘Strong’ Producer • Albert McCleery, a CBS-TV producer, testified that "you don’t run into trouble with sponsors when you have one strong man to whom responsibility is dele-

Dave Garroway admits his doubt of the value of program ratings.

BROADCASTING, July 3, 1961

Producer Herbert Brodkin sees “continual” problem of interference.
gated." He indicated the producer of the show should be the individual with the final word, but said that today decisions seem to be made by "a committee" of the networks and agencies. Mr. McCleery said he had encountered difficulty with sponsors only rarely, but pointed out he had operated under the principle of preparing productions that would preserve "high standards and a sense of responsibility."

Mr. McCleery echoed the sentiments of other witnesses who had pointed to an "imbalance" of programs on the networks—a preponderance of westerns and action-adventure shows and a scarcity of serious drama programs. But he expressed the view the 1962-63 season would show a reversal of the trend because networks and advertisers are becoming "sensitive" to the criticism leveled by the government and other opinion-making organizations. He offered one suggestion:

"I think the credits at the end of each show should list the names of the account executive at the agency, the advertising manager of the sponsor and the programming executive at the network who selected the show. I think you would have better shows on tv if these people responsible for programming were named. I think their pride would be hurt if their name were associated with a mediocre show."

Fight Among Networks • Irving Mansfield, president of Impa Productions, a tv packaging company, attributed the "imbalance" in programming to "a fight that is going on among the three networks to become bigger," and added: "Each one is striving to become bigger than the other and the result is this 'imbalance.'"

Mr. Mansfield agreed with other witnesses that the ratings are virtually "all-important." But he said he felt a show did not necessarily have to be among the top ten to be successful, indicating that the show may have other values to a sponsor than wide circulation.

Ratings Best Yet • H. William Fitelson, general counsel to the Theatre Guild and managing director of its radio and tv departments, said while ratings may not be the best method of measuring numbers of viewers, "no one has as yet devised a better method." He added that they are "just as fair and unfair to one program as the other," and at best they might measure quantity but not quality of an audience.

Mr. Fitelson feels that there is great public interest in tv and thus "programming should be designed for the entire public not just the largest segment of it."

In this connection he suggested: full disclosure be made of the names of all people who, directly or indirectly, own stock in tv stations and networks; a national, government-controlled, non-profit and non-commercial network be created; and that legislation be passed to restrain networks from "producing or owning interests in production." (News, special events and public-affairs programs excepted.)

In explaining his network "restraining" proposal, Mr. Fitelson said, "The networks control the marketplace and they control production as well."

Garroway Sees Dilemma • Performer Dave Garroway, a long-time host of NBC-TV's Today, said he believes broadcasters are faced with a dilemma: on the one hand, they must program in the public interest and they also must operate as a free enterprise entrepreneur (for profit). He expressed the view that a program such as Today can meet this challenge but he doubted the program's formula could be widespread. In reply to a question, Mr. Garroway said he was "dubious" about the value of ratings.

Ralph Nelson, a Hollywood tv producer-writer-director, recounted several episodes to indicate networks and advertisers are interested mainly in action-adventure rather than quality drama shows. He stated he had completed a series pilot called "Mr. Doc." for CBS Films, and was told agencies rejected the program because it had "no sex and violence." Mr. Nelson, who is now associated with Four Star Productions, told of another setback. Last winter he was advised by Four Star executives that a Dick Powell Show would be produced for the fall for NBC-TV as "a great, dramatic program," and he was told to round up "the best available writers, producers and directors" for this series. Several weeks later he said he learned there was a change in plans. NBC-TV, he was advised had insisted that the Dick Powell Show be a dramatic series with action-adventure stories patterned along such motion pictures as The Maltese Falcon and The Treasures of Sierra Madre." Mr. Nelson indicated he was "disappointed" and said he could not induce top writers

Minow appears on one of tv's fertile gardens

Much in demand as a guest star, FCC Chairman Newton N. Minow (l) appeared Wednesday on his third network show in two months on NBC-TV's Today. He exempted the program from his "wasteland" category and praised it as being generally informative and worthwhile.

The chairman was interviewed in Washington by NBC White House correspondent Ray Scherer (r) and from New York by NBC Newsman Edwin Newman. Asked if he approved of the congressional bills designed to replace the rejected presidential plan, Mr. Minow replied, "Oh, yes. They go a long way towards unshackling us from dreary and dismal red tape and I'm very satisfied with them."

Mr. Minow said President Kennedy had liked the chairman's State of the Airwaves message to the NAB convention and pointed out that the President reappointed him to a full seven-year term on the commission the day after the reorganization plan failed. Mr. Scherer characterized this as a "vote of confidence" from the White House.

Chairman Minow said he hoped the program improvements he has recommended will become evident on the networks the season after next and that local stations will incorporate some of them before then.
“In the studio or on the road, our picture quality is consistently tops—we’re ready to shoot anything with RCA TV Tape Equipment. We’ve used our mobile Recorders under all conditions—yet we get studio-quality pictures every time. Clients rave about the lifelike quality of our tapes!”

The mammoth 40-foot mobile unit pictured here can make studio-quality tapes while traveling at 60 miles per hour. Designed and equipped by RCA for Video Tape Unlimited, it includes four cameras, two TV tape recorders, switching and special effects, and control equipment. Specially-designed platforms at front and rear of the bus carry two cameramen. Cameras also may be set up on the roof so that shooting is possible from any vantage point. Completely self-contained—this mobile unit has everything a well-equipped TV unit should have—including power generator.

Why is RCA equipment the big choice among producers and broadcasters who demand the very best? There are several reasons:

RCA TV Systems are matched—electrically and mechanically. RCA makes it practicable to get everything from a single, reliable source. RCA equipment uses easy-to-find tube types, standard parts. RCA equipment is designed, built, and operated in accordance with proved broadcast procedure. And RCA equipment is backed up by top engineering counsel and service everywhere.

See your RCA Representative or write to RCA, Broadcast and Television Equipment, Dept. X-22, Building 15-5, Camden, N. J.
and directors to contribute to this series.

Richard M. Saul, acting chief of the Complaints and Compliance division, FCC, testified FCC Chairman Minow's recent talk criticizing TV as "a vast wasteland" drew "the largest volume of mail from a single speech made by a commission chairman." He said that as of June 23, 4,278 pieces of mail had been received. Of this total, 98 percent expressed agreement with chairman Minow's views, according to Mr. Saul.

"They Make Cheese" • Perry Como, star of NBC-TV's Perry Como Kraft Music Hall and president of his own TV packaging firm, Roncom Productions Inc., testified that NBC doesn't have any proprietary or equity interests in his program. He said he never had any differences with anyone, "as far as what we can do on the TV show." About his sponsor the entertainer said, "They make the cheese and we put on the TV show." Mr. Como, who was accompanied by his lawyer, declined to comment on diversity and balance on TV on the basis he doesn't have the time to see enough prime time shows.

Mr. Como, in a brief statement, also said he was "sicken by" the way TV has been "picked on and re-picked on" by other witnesses who testified in the two-week hearings. He asserted "TV has done a terrific job," and suggested that so-called intellectuals that don't like it can just flip the little dial and it's all over.

Interference • Mr. Como was followed to the stand by Herbert Brodkin, a producer of 21 Playhouse 90 plays and now head of his own production company. He said producers of fine TV plays face a "continual" problem of interference because network programming and agency people, among others, "all seem to think they know more about what makes a good play."

The producer recalled that when producing the Alcoa-Goodyear Playhouse, he would save the "toughest plays" for the weeks Alcoa sponsored the program and would schedule the superfluous dramas for the Goodyear weeks. "Alcoa was most cooperative, most intelligent, most enlightened sponsor," Mr. Brodkin declared. "Goodyear was just the opposite." He went on to say that the more realistic the play, the harder it was to get it approved and "the more we fought, the more we accomplished."

He singled out Hubbell Robinson, Tom McAvity and Charles Underhill, who formerly were in charge of programming for CBS, NBC, and ABC, respectively, as knowledgeable men who taught creative people to "give a little, roll a little and come back strong."

Montgomery Comment • Robert Montgomery, veteran performer and producer of the former Robert Montgomery Presents program (NBC-TV), was highly critical of today's programming, insisting it consists largely of "blood-thunder and sudden-death" stories. In this connection, he voiced the view there is a "causal relationship" between crime and violence on television and the acts and attitudes of teenagers.

Mr. Montgomery said that since networks control the contents of prime time on television, they also dictate what is placed there. In essence, he said, networks control both prime time and the contents of these segments. He suggested there may be two solutions—a broad experiment of pay TV and government inquiry leading perhaps to prohibiting networks from control of production, with the exception of news and public affairs programs.

Doubts Advertiser Control • Sylvester L. (Pat) Weaver Jr., board chairman of McGann-Erickson Corp. (International) and former NBC chairman, echoed other witnesses' views on the decline of quality programs but differed with many when he asserted: "Advertiser control is not a factor" in television. Advertisers, he said, did control radio programming, and, at the outset, attempted to gain control of TV programming but were resisted by the networks.

Without being explicit, Mr. Weaver indicated networks abandoned their earlier goals of providing a broad base of entertainment and information and succumbed to the "Hollywood B picture" trend. He insisted that viewers "want to be sold on the better not the worse" and claimed that "they will respond to adult appeals, although not all the time." As examples, he cited the large number of dramatic, music, opera, ballet, special events and other varied programs carried on NBC-TV during the seven years (1949-56) of his stewardship.

Mr. Weaver said he was optimistic about the future, and expressed the belief that improved television service will emerge as a result of "the public outcry of the last few years; because of the increasing knowledge and bitterness of many artists who have not been given a place to work in television, because of the interest of the FCC and Chairman Minow's declaration that the public that owns the air can be considered in the future as an interested party."

FCC: survey local program needs

THAT'S ORDER IN DENYING ELIZABETH FM

An applicant for a new FM station in Elizabeth, N. J., was denied a construction permit by the FCC last week on the ground no survey had been made to determine local needs and that programming proposals were "prepared by individuals totally without knowledge of the area they seek to serve."

In ruling the "public deserves something better," the commission denied the application of Suburban Broadcasters whose principals, Patrick Henry, David Larsen, Stewart B. Kett and James B. Glenn Jr., also have applied for new FM stations in Alameda, Calif., and Brevyn, Ill. Identical programming proposals were used in all three applications, the commission said. The Illinois application was dismissed. Mr. Henry owns KJAC (FM) Alameda.

A commission hearing examiner had favored a grant to Suburban and stated in his initial decision that Elizabeth programming needs may be served in the same manner that such needs are served by FM stations generally. The FCC decision took a completely opposite view.

Satisfy Community Needs • The commission stated that it has generally presumed that an applicant would satisfy the programming needs of the community it seeks to serve and that he would have knowledge of such needs. Such an assumption cannot be used, however, when it is demonstrated that the applicant has taken no steps to familiarize himself with the community needs, the FCC continued.

While recognizing a need for the first Elizabeth service which Suburban proposed, the commission said that a local outlet for community self expression must also be provided and that Suburban has made no inquiry into the characteristics or particular needs of Elizabeth.

"The evidence admits of no other conclusion than that Suburban's program proposals were not designed to serve the needs of Elizabeth," the commission stated. "The applicant has made no showing as to Elizabeth program needs and a determination of whether Suburban's program proposals would be expected to meet such needs is rendered impossible. In essence, we are asked to grant an application prepared by individuals totally without knowledge of the area they seek to serve. We feel the public deserves something more in the way of preparation for the responsibilities sought by applicant than was demonstrated." The decision was issued on a 4-2 vote with Commissioners Rosel H. Hyde and John S. Cross dissenting. Commissioner Frederick W. Ford did not participate.
"Now...we take you to the State Capitol for the crucial Sales Tax Vote!"

The important tally was beginning... the state legislature was about to dip into the public's pocketbook. Interest was at fever pitch. As the legislators went into overtime session, WFAA took its listeners direct to the State Capitol for an on-the-spot count with Southwest Central's full time Austin correspondent, Clyde Butter. The measure fell by one vote! Now... a new fight is shaping! And a new opportunity for Southwest Central WFAA 820 to give the full report first and first hand. It's YOUR opportunity, too. The opportunity to place your message where it can reach the news-interested, highly informed audience which depends on Southwest Central. Call your Petryman now for your schedule on WFAA 820... the most listened-to spot on the dial... WFAA 820, where listeners are buying.
OPTION TIME REMANDED

FCC gets its wish as court sends case back for reconsideration, while present rule remains

Network option time, the networks' time honored method of assuring station clearances, was officially back before the FCC last week when the U. S. Court of Appeals in Washington remanded, at the request of the commission.

Next step will be up to the FCC, which already has announced that it will reconsider its 1960 order reducing the allowable option time in the four daily time periods from 3 to 2 1/2 hours (BROADCASTING, May 8). Earlier, the commission had asked the court to remand the case so it could reconsider (BROADCASTING, April 24).

Last week's court action was taken by Circuit Judges Warren E. Burger, E. Barrett Prettyman and David L. Bazelon. The court, in making the remand, retained jurisdiction.

The original commission order was appealed by independent KTIV (TV) Los Angeles on the grounds option time is a violation of the antitrust laws—a view shared by the Dept. of Justice. In reducing by one-half hour the allowable time an affiliate could pre-empt to its network in any given time segment, the FCC ruled that option time is "reasonably necessary" for network operations and that such operations are in the public interest.

In asking for the remand, the commission first said that its 1960 order, which went into effect last Jan. 1, would be vacated. The networks objected to this, however, and in its May notice of further rulemaking, the commission announced that the new rule would remain in effect pending reconsideration.

Comments Are Coming • Following the court remand, the FCC now is in a position to set a deadline date for comments on these two issues:

• Whether time optioning is in the public interest.

• If option time is found contrary to the public interest, how should a rule be written to prohibit the practice?

Respondents were ordered not to discuss the question of whether option time is in violation of the antitrust laws. The commission, however, was pressed by the House Antitrust Subcommittee to make a ruling on this question when FCC Chairman Newton N. Minow testified before that body three weeks ago (BROADCASTING, June 19). Chairman Minow promised that the FCC would consider this question and Justice Antitrust Chief Lee Loevinger said his department would take further steps if the commission does not declare the practice illegal.

Also due to play a major role in option-time reconsideration by the commission is the program incentive plan of CBS and non-standard reimbursement contracts of all three networks. Government officials have openly expressed the view that such plans are designed to skirt option-time limitations and the commission already has started an investigation (BROADCASTING, May 29).

The commission has announced firm plans to expedite its reconsideration of option time and warned that filing dates, which have been awaiting the court remand, will be followed strictly. This date now is expected in the immediate future. Also, the commission stated in its May order, no reply comments will be accepted and that oral argument will be held after the comments are in.

RKO seeks more time on pay-tv experiment

Pay tv in Hartford is not just around the corner. It will be at least a year before the first coin will be dropped into a decoder.

This was made apparent in a petition for an extension of time to the FCC by RKO Phonevision Co., the only company authorized to date to conduct an over-the-air pay tv experiment (BROADCASTING, Feb. 27). The company asked that its authorization be extended to start July 1, 1962 instead of the current deadline, Aug. 23, 1961. Phonevision said it has gone forward with plans for feecasting over ch. 18 WHCT (TV) Hartford "with all possible speed" despite pending court action by theatre and other interests to prevent the test (BROADCASTING, March 27).

Zenith Radio Co., which is cooperating with RKO General in the proposed three-year experiment, will have completed the coding transmitting equipment by the end of 1961, the petition stated. "However, because of the lead time required for tools that must be obtained from outside suppliers, Zenith will not be able to start delivery of the decoders before May 1, 1962," the company reported.

Other Problems • Programming problems present another roadblock, Phonevision admitted. It said it was anxious to be able to present prospective subscribers a firm and specific schedule of a reasonable number of committed programs covering the initial period of the trial.

Teco Inc., the programming arm of the Phonevision organization, has advertised RKO that it is "in the process of concluding an exhaustive and comprehensive survey of program availabilities ..." the company reported. Preliminary negotiations with U. S. and European motion picture producers have been conducted; surveys have been made of Broadway and off-Broadway stage productions and a study of educational-pay-tv possibilities are being explored—not only in the Hartford area, but in colleges throughout New England and the Middle Atlantic states, RKO said. Operas, symphonies and specialty artists are also being considered.

The company told the FCC that in view of the progress it has made and the problems with which it is forced to deal that it feels it has established "good cause" for the requested time extension.

Procedures in ch. 5 case questioned by WHDH-TV

Ch. 5 WHDH-TV Boston last week asked the FCC to clarify and modify its May order setting out steps to be followed in further consideration of the ex parte tv case (BROADCASTING, May 29).

WHDH-TV, which received the ch. 5 grant in 1957 over three other applicants, maintained that there are serious procedural defects in the commission's plan as well as a fundamental question of fairness. In its May order, the FCC directed WHDH-TV, Greater Boston Tv Corp. and Massachusetts Bay Telecasters Inc., the three remaining ch. 5 applicants (DuMont had dropped out) to submit briefs "pursuant to the commission's decision of July 14, 1960 . . ." which vacated the WHDH-TV grant. These briefs are due July 24 with oral argument to be held later.

The Boston station said that under the court remand of the case, the FCC must consider its original 1957 grant as well as facts disclosed during the remand hearing. There is no basis for restricting further FCC action to accepting the 1960 decision without question and disregarding the 1957 grant, WHDH-TV maintained. The two decisions are equally binding on the commission, the station said.

Rule would limit owners of vhf-tv translators

Rulemaking which would deny vhf-tv translator licenses to broadcasters seeking merely to extend their coverage areas beyond their established bounds was proposed by the FCC last week.

The proposal, on which Commissioner John S. Cross dissented, would provide in substance that vhf translator licenses will be granted only to stations wishing to fill in "white" areas; areas which are for some reason islands of no

reception within the boundaries of the stations‘ service contours. The commission’s reason for the proposal is its belief that VHF translators are becoming “another weapon in the competition between TV licensees rather than an instrument to be utilized by people living in areas receiving little, if any, TV service.” Unrestrained translator licensing could also result in programming duplication, the commission said.

The commission emphasized that the proposal would not, however, place any further restrictions on the operation of VHF translators. Comments are due Sept. 15.

**USIA BUDGET**

Senators pleased by Wheeler’s testimony about TV service

Like any commercial television producer, Romney Wheeler, director of the U.S. Information Agency’s television service, has found it’s easier to ask the sponsor for a bigger budget if his shows are getting demonstrable results.

Mr. Wheeler testified last week before a Senate Appropriations subcommittee, headed by Sen. John L. McClellan (D-Ark.), asking for restoration of $18,400 cut from his budget by the House. The agency is asking $2,258,500 for television activities for the 1962 fiscal year.

Mr. Wheeler reported that some USIA programs, broadcast across the Iron Curtain, had drawn howls of rage from communist leaders.

He said USIA “drew blood” from the communists with a film on Commander Alan B. Shepard’s space flight, which was broadcast from West Berlin ad received on sets in East Germany. Mr. Wheeler said an East German commentator got on the air a week later and called the film “dirt propaganda.”

He also told the senators of Castro, Cuba, and Communism, a “hard-hitting” film on the perversion of the Cuban revolution, which was acquired from WPIX-TV New York, and of an agency-produced film dealing with disenfranchised refugees of that revolution. Both films received wide distribution in Latin America, where, Mr. Wheeler said, local stations accept virtually everything the TV service makes available.

To the subcommittee members who had been questioning USIA officials for almost a week in hopes of turning up examples of how the agency had “shown up” the communists, Mr. Wheeler’s testimony was particularly reassuring. Senator John Stennis (D-Miss.) turned to USIA Director Edward R. Murrow and asked if he didn’t think the TV service was asking for too little in the way of funds.

Mr. Murrow agreed that the television budget would provide “a puny effort”—about enough to finance a half-hour western series on network TV for one season. But he noted that the service was established only two years ago, and was due for “rapid expansion.”

The senators were advised the budget would be revised upwards. The $2.4 million supplemental budget request the agency will seek (Broadcasting, June 26) contains $531,000 for stepped-up television activities in Latin America and Southeast Asia.

**FCC-FAA members discuss tall towers**

Two representatives of the FCC General Counsel’s Office met last week with members of the Airspace Utilization Div. of the Federal Aviation Agency to discuss a new FAA rule which in effect gives the aviation agency the final word on height and placement of broadcast towers (Broadcasting, June 19).

An FAA spokesman said the discussions were “in-house—ina government” in nature. Daniel Ohlbaum, assistant general counsel and John O’Malley, the FCC representatives at the talk, were equally loathe to disclose the essence of the discussions. Jurisdiction over tall towers has been a bone of contention between broadcast and aeronautical interests for several years. In the past the FCC has vigorously defended its prerogatives, citing provisions of the Communications Act as reserving final say-so on towers to the FCC.

**Court doesn’t consider MCA’s plea against FCC**

The Court of Appeals in Washington last week refused to consider an appeal by MCA Inc. and its vice president, Taft B. Schreiber, against an FCC subpoena requiring submission of records and oral testimony on the company’s TV programming.

A three-man court consisting of Circuit Judges David L. Bazelon, Warren E. Burger and E. Barrett Prettyman ruled that it did not have jurisdiction and dismissed the appeal. At two separate appearances in Los Angeles hearings, Mr. Schreiber had refused to submit the records and answer questions of FCC counsel (Broadcasting, March 13).

The next step in the legal battle is up to the commission and/or the Justice Dept. It was speculated that court action will be instituted in Los Angeles against MCA and Mr. Schreiber under Sec. 409 (g) and (m) of the Communications Act. The latter would constitute a criminal action which calls for a fine of from $100 to $5,000 and a prison term of not more than one year. Sec. 409 (g) action would be a move to force the witness to appear and answer questions.

Mr. Schreiber was prepared to testify last March on a confidential basis but the commission refused to accept this condition. The dispute arose in the FCC’s 2½-year-old program inquiry which was in session in New York last week (see story, page 40).

**FCC to reverse examiner in Moline ch. 8 case**

The FCC on June 28 issued staff instructions which look toward granting the application of Moline Television Corp. for a new to station to operate on ch. 8 in Moline, Ill.

The step, which does not yet constitute a grant, would reverse an April 28 initial decision by Hearing Examiner Charles J. Frederick, which favored Community Telecasting Corp., one of four other applicants competing for the same facilities. The other three are Illiway Television Inc., Midland Broadcasting Co. and Tele-View News Inc. Oral argument of the case took place on June 2.

Principals of Moline Corp. include Francis J. Coyle (12.5%), Victor B. Day, David Parson, ex-WGN head Frank P. Schreiber (each 10%), Richard Stengel (9%), Charles C. Agnew, L. S. Helfrich and Samuel M. Gilman (each 5%), with the remaining interests being divided among 15 others.

**JFK pushes satellite research**

**SPACE COUNCIL TO MAKE COMMUNICATIONS STUDY**

A top-level study of ways to develop a communications satellite system as early as possible was ordered June 24 by President Kennedy. The study will be conducted by the Federal Space Council, headed by Vice President Johnson.

This will be the first major inquiry by the White House into the problems involved in setting up this revolutionary use of satellites as space relay stations.

Heretofore policy problems have been studied mainly by National Aeronautics & Space Administration, from a technical viewpoint, and the FCC, from the standpoint of ownership and operation. FCC has been represented as leaning toward ownership and operation of a space relay system by a group of international communications firms.

The President’s letter ordering the inquiry did not make any recommendation looking toward private operation and ownership. President Eisenhower on the other hand had recommended a private system.
The godlessness of communism is chillingly plain. So what’s the point? Simply that they compete with us in selling morality of government to the world. The danger is that we may not understand their concept of morality ... and thus expect them to apply our concept of morality to their actions.

Here is the “morality” that faces us.

“We, of course, say that we do not believe in God... We say that our morality is entirely subordinated to the interests of the class struggle.” ★ ★ ★

★ ★ ★ "When people talk to us about morality we say: For the Communist, morality consists entirely of compact united discipline and conscious mass struggle against the exploiters. We do not believe in eternal morality, and we expose all the fables about morality . . ."

Only through knowing the hard-core of communism, factually documented, will we be able to understand it, and take steps not just to contain it, but to offer something better to the world: Freedom.

We believe this “sales campaign” should begin at home. It’s not enough to know what we are against. We must know why.

This series of advertisements coincides with prime time announcements on WKY Radio and Television — telling more facts about communism.

SENATE SUBCOMMITTEE, HOUSE COMMITTEE APPROVE SIMILAR BILLS

Congressional action to revamp the FCC along lines recommended by the agency hit full stride last week.

The Senate Communications Subcommittee on Wednesday held a brief hearing on the reorganization measure that was drafted in cooperation with the FCC (Broadcasting, June 12); then promptly sent it on to the parent Commerce Committee. The measure (S-2034), introduced by subcommittee chairman John O. Pastore (D-R.I.), is expected to be reported to the floor this week.

The House Commerce Committee, meanwhile, approved a virtually identical bill (HR-7856), Wednesday, only two days after it was introduced by the committee chairman, Rep. Oren Harris (D-Ark.) (At Deadline, June 26).

With this kind of drive evidenced by the congressional committees directly concerned with regulatory-agency matters, observers at the FCC and on Capitol Hill predict enactment of reorganization legislation within a month.

Rep. Harris junked his earlier FCC-reorganization proposal (HR-7333) after representatives of the FCC, NAB and other interested groups told him at a hearing last month (Broadcasting, June 19) they preferred the Pastore bill.

Both Senate and House measures, which would allow the commission to delegate any of their tasks and to exercise discretion in granting review and permitting oral arguments, are designed to give the commission some of the flexibility intended for it by the ill-fated Presidential reorganization plan.

Two-Step Appeal • Essentially, they would set up a two-step procedure for appeals. Parties would have the right to file exceptions to initial decisions and to have those exceptions considered by some review authority. If still unhappy, litigants could apply for review by the full commission. The commission, however, need not grant review, as it now does. And if it did, it would not have to hear oral arguments.

Both bills omit the most controversial feature of the President's plan—that permitting the chairman to assign personnel, including commissioners, to delegated tasks. That function would remain with the commission.

But, as FCC Chairman Newton N. Minow observed in his testimony before the Pastore subcommittee Wednesday, the commission could, under both bills, delegate the assignment responsibility to the chairman.

The commission has already given the chairman this job in many non-adjudicatory matters, he said, "and undoubtedly would delegate further authority to assign staff personnel to hear adjudicatory cases" if the Pastore bill were enacted.

With most of his colleagues sitting around him during his testimony, Mr. Pastore's determination to push his bill along the legislative path was

Sen. John O. Pastore (D-R.I.), subcommittee chairman, drives home a point as Sen. Strom Thurmond (D-S.C.) observes the proceedings.

Robert M. Booth Jr., FCBA president, strikes a prayerful pose.
The FCC fielded practically a full team for the Senate Communications Subcommittee hearing on Wednesday. Clockwise from the front they are Commissioners Robert E. Lee, T.A.M. Craven, Robert T. Bartley (partly hidden), Rosel H. Hyde, John S. Cross, Chairman Newton N. Minow, Associate General Counsel Henry Geller and General Counsel Max Paglin. Absent was Commissioner Frederick W. Ford who was out of town.

Mr. Marks agreed with Sen. Pastore's view that the commission has the authority under present law to appoint such an administrator. But, he said "experience shows" that the commission is reluctant to take action of that nature "unless directed to."

CBS, in a letter to the subcommittee, went along with most of the proposals in the bill, but recommended that three commissioners, or "a majority less one," be permitted to call up a case for review. Under the Pastore and Harris bills a majority of the commissioners would be required.

Industry group meets FCC on 'plugola' rules

A special committee representing the networks and NAB met with FCC staff last week in an effort to clarify ambiguities in the commission's rulemaking requiring disclosures of financial interests held by broadcasters or employees in products promoted over the air (Broadcasting, June 10).

Current deadline for comments is July 10 but, as a result of last week's conference, this date will be extended. The meeting was described as exploratory with the industry men seeking a fuller explanation of just what is wanted by the commission. As presently drafted, the rules and cited examples cover many more situations than the commission actually intended, according to industry views.

The commission asked that suggested revisions be submitted, which the broadcasting representatives agreed to provide by July 14. Meeting with FCC Broadcast Bureau Chief Kenneth Cox and others were Douglas Anello, NAB chief counsel, Leon Brooks of CBS, Howard Monderer of NBC and ABC's Mort Weinbach, Dave Stevens and Al Schneider.

AT&T won't appeal WSAZ-TV rate case

AT&T has announced it will not appeal the initial decision of FCC Hearing Examiner Herbert Sharpman finding the company liable to reimburse charges of $14,541 asked by WSAZ-TV Huntington, W. Va. for alleged overcharges on summer programs feeds (Broadcasting, May 22).

AT&T's acting general attorney George E. Ashley said in a letter to the FCC that instead of appealing the WSAZ-TV case, the company will revise its tariff schedule to eliminate any possible question to how much will be charged for any specific service.

Mr. Ashley said "Our decision not to appeal has been made reluctantly, because we believe very strongly that the initial decision is erroneous. It is contrary to long-established methods of administering the company's applicable tariffs."

A spokesman for the FCC Common Carrier Bureau, under whose jurisdiction the case falls, said that as few as three or four broadcast stations would be affected by this decision.

The charges were made by AT&T on network pickups from Columbus, Ohio, to Huntington in 1958 and 1959.
A television station cannot legally prevent operators of community antennas from picking up their programs unless they are protected by copyright or an exclusive license.

This was the position taken by a San Francisco federal district court judge in a precedent-setting ruling handed down June 27.

The ruling came in a suit which was originally filed by three Salt Lake City television stations—KJWT, KSL-TV and KUTV—to enjoin two Idaho firms from intercepting and distributing their programs without their consent.

Not Unfair • In denying a move by the stations for summary judgment, Federal Judge William T. Sweigert held that Cable Vision, Inc., which operates a commercial community antenna service in Twin Falls, Idaho, and Microwave, Inc., a microwave relay service, were not engaging in unfair competition.

The stations had asked for immediate issuance of an injunction on grounds the interception of programs for sale to subscribers would constitute a misappropriation of the fruits of their financial investment, skill and labor.

At present Cable Vision maintains two high-gain antennas for picking up the signals of three Idaho television stations. However, it and Microwave have announced plans for installing additional facilities to receive broadcasts from the three Salt Lake City stations, some 200 air miles away.

Cable Vision serves its Twin Falls subscribers by means of a coaxial cable. Subscribers are charged about $100 to have their television sets hooked up with the cable, and they pay an additional monthly rate of $4 to $5 for the antenna service.

KLIX-TV Buys Service • By arrangement with the Salt Lake City stations, station KLIX-TV of Twin Falls pays from $3.85 to $5 an hour for permission to rebroadcast their signals.

On the evidence presented so far, Judge Sweigert said, there was no clear showing that Cable Vision and Microwave were improperly enriching themselves by picking up programs beamed from Salt Lake City.

"The stations," he said in a 34-page opinion, "are in the business of selling their broadcasting time and facilities to sponsors to whom they look for profits. "They do not and cannot charge the public for their broadcasts which are beamed directly, indiscriminately and without charge through the air to any and all reception sets of the public as may be equipped to receive them."

The two Idaho defendants, on the other hand, have nothing to do with sponsors, program content or arrangement of programs, the judge continued. The firms, he added, are only in the business of selling antenna service to a part of the public which the stations' programs were intended to reach but which cannot receive them under ordinary circumstances.

Must Show Exclusivity • Judge Sweigert went on to say that when the case eventually goes to trial—no date has been set—the stations may back up their injunction demand by showing that their programs are protected by a copyright or an exclusive license arrangement.

He observed that the stations had conceded the question of whether they have a common law copyright to programs which they themselves create is a subsidiary issue in the case.

The issue, however, was not sufficiently documented by the stations to justify a determination of the point by summary judgment, he said.

A full examination of the issue would require detailed identification and description of those particular programs involved in the stations' claim of common law copyright, the opinion elaborated. It said the necessary documentation would have to deal with the manner in which the programs were created, produced and arranged as well as all contracts pertaining to the programs and the stations' rights to them.

The judge commented that the problem presented by the case "is one of first impression and of great importance in the field of television."

Serve 700 Communities • He noted that community antenna systems now serve some 700 communities in more than 40 states and have a viewing public of about 2,000,000 subscribers. He placed the investment cost at more than $100,000,000.

In pressing for summary judgment, the stations placed their main stress on the question of whether their broadcasts, regardless of program content or copyright, could be picked up without their consent.

They rested their case largely on a U.S. Supreme Court ruling of 1918 holding that International News Service was guilty of unfair competition when it picked up and distributed news originally gathered by Associated Press.

Judge Sweigert concluded, however, that the law of the supreme court decision could not be applied to the pending suit because the two cases have significant differences.

Differences • "In the first place, Associated Press and International News Service were identical businesses engaged in the keenest competition to supply news to their respective members for sale to the public," the judge explained.

In the pending case, he said, the stations and the companies operating the antenna system are not engaged in the same kind of business. "They operate in different ways for different purposes."

The judge said further that, as distinguished from two press services competing for the same newspaper readers, operation of the Idaho antenna system does not interfere with the profits the Utah stations derive from sponsors.

"On the contrary, the practice may enhance plaintiffs' possibilities of profit in that field by extending the reception of plaintiffs' programs," he said.

In his view, the judge said, the only interference involved in the present
case is interference by the Idaho companies with the TV stations’ asserted right to charge for any rebroadcast or other relaying of one. He said the function of selling rebroadcast rights “is not only subordinate to, but inconsistent with” the primary purpose of a television station.

Rejects Argument - Judge Sweigert went on to reject the stations’ argument that the Twin Falls TV station will not continue to pay for rebroadcasting their programs if operators of the community antenna system are permitted to pick up the same programs.

He said the argument “begs the very question” of whether the Salt Lake City stations, apart from copyright or exclusive license laws, have a property right sufficient to support a requirement of consent by either KLIX-TV of Twin Falls or the defendants before they rebroadcast.

“We conclude, therefore, that the consent and payment arrangement which these plaintiffs have with KLIX Twin Falls, is not a solid base upon which to rest, in whole or in part, their claim of unfair competition,” the opinion stated.

Turning to another aspect of the case, Judge Sweigert noted that the Salt Lake City stations conceded that owners of TV sets in the Twin Falls area either individually or in groups could put up their own antenna and receive the Utah broadcasts without infringing any of the stations’ rights.

“The fact that owners, unable or unwilling to undertake the difficulties and expense of such construction, prefer to use the similar antenna service provided by defendants does not change the essential situation,” he commented.

Principal Same - “Defendants’ antenna service facility is simply a more expensive and elaborate application of the antenna principle needed for all television reception. It does not otherwise differ from what the owners could do for themselves.”

By agreement between the two sides in the case, argument on the motion for a summary judgment were heard last December in San Francisco. The ruling was filed in the federal district court for Idaho at Boise, where the case was initiated.

Each of the Salt Lake City stations brought a separate suit against the defendants in the case, but the three suits have been consolidated for court action.

Idaho Microwave received authorization from the Federal Communications Commission in December, 1959, to construct the additional facilities needed to pick up the Salt Lake City broadcasts.

The FCC later stayed the authorization pending further hearing.

W. L. Reiker is the owner of both Idaho Microwave and Cable Vision.
THE JURY’S VERDICT

THESE TWELVE men and women, selected at random from the thousands of agency executives who make the wheels go round in broadcast advertising, all concur on one decision:

BROADCASTING Yearbook – whose 27th annual edition will be out September 1 – is the most essential single reference volume of its kind published anywhere. As you may read in their individual opinions, rendered below, certain key words are significantly repeated over and over – “invaluable”… “most useful”… “great help”… “handy”…

(Matter of fact, in a recent survey of decision-makers at the Top 50

PACKED (as usual) WITH MORE FACTS THAN ANY OTHER SOURCE BOOK:

• Complete directory of all U.S. television and radio stations.
• Lists of station and network personnel; ownership and facilities information. • Broadcast regulations, code. • Facts, figures, history of the broadcasting business. • Directory of TV-radio agencies, suppliers, services, trade associations, professional societies, allied organizations. • Data on Canadian, Mexican and Caribbean broadcasters, foreign language stations within the U.S. • “The Dimensions of Broadcasting” – key facts about television and radio.

AND hundreds of other reference sections covering virtually every up-to-date aspect of the broadcasting business – all assembled in a single definitive volume to answer thousands of basic questions for thousands of agency, advertise and station users. In all, more than 600 pages crammed with current information! It’s the ideal place to present your own facts, amplifying those which broadcasting’s busy people will be checking, month after month, in the 1961-62 BROADCASTING Yearbook.
IS UNANIMOUS...

gencies — where nearly 11½ billion dollars of TV and radio business is
retested annually — BROADCASTING Yearbook is adjudged first choice
by more than 2-to-1 over the next-best reference yearbook of broadcast
media facts! And by 3½-to-1 over the No. 3 annual!

BROADCASTING Yearbook for 1961-62 will again offer the most
comprehensive round-up of information on today's broadcast media
available anywhere. Like previous editions, it will enjoy a full and useful
life in offices of agencies and advertisers throughout the nation . . .
ending up dog-eared and thumbmarked 12 months later when next year's
volume appears.

Philco-NBC hassle thrown back to FCC

COURT CALLS FOR HEARING IN LICENSE-RENEWAL CASE

Philco Corp. last week won a major battle in its four-year fight with NBC-RCA when the U. S. Court of Appeals in Washington ordered the FCC to hold an evidentiary hearing on the 1957 renewal of license for NBC's WRCV-TV Philadelphia.

A unanimous three-judge decision, written by Circuit Judge Henry W. Edgerton, found that the commission erred in several areas and quoted the language of the agency itself to cite reasons why Philco should have been given a hearing. The license period in question expired last summer and Philco has filed a competing application with NBC's current application for renewal of WRCV-TV on ch. 3.

The required hearing on last week's remand can be consolidated with other hearings already scheduled concerning the WRCV-TV license, the court stated. This includes the Philco-WRCV-TV comparative hearing as a part of NBC plans to transfer the Philadelphia station to RKO General Inc. (BROADCASTING, May 1).

Philco originally protested the WRCV-TV 1957 renewal without a hearing but was dismissed as a party without standing by the commission. Philco appealed to the court which remanded the case to the commission, saying the protest did have standing, but without passing on the sufficiency of the protest. The commission subsequently held oral argument and in July 1960 again dismissed Philco's protest on its merits as being legally insufficient to warrant the requested hearing.

Immediately following the court's reversal of the commission last Thursday (June 29), there was speculation that an appeal would be made by either NBC-RCA or the FCC to the Supreme Court.

In its protest which won a reversal of the commission, Philco charged that NBC lacked character qualifications; monopolistic trends of RCA; preferential publicity for RCA on NBC stations, among others.

"We think the commission should have held the hearing," the court stated. "We think it was error to divorce the alleged background [of NBC-RCA] from Philco's allegations of current monopolistic and other improper conduct." The court said the commission is not foreclosed from further action because it already had considered the pleading involved and that charges of new misconduct against RCA-NBC gave new significance to the protest.

Another Error • The commission erred again, the court said, in failing to consider Philco's charges that NBC gave preferential publicity to RCA. This and other errors were compounded by the FCC's belief that the earlier court remand concerned only Philco's standing to protest, the reversal stated.

Further, Judge Edgerton said, unfair or harmful competition by NBC-RCA against Philco might be found to show that NBC lacks character qualifications and preferential publicity also is linked to the character of NBC.

Pointing out that the FCC ruled Philco charges were insufficient because Philco "failed to adopt as its own and offer to prove," the court ruled that the Communications Act does not "require formal offers of proof." Conversely, the court said, "we think the protest allegations present misconduct with the particularly the statute requires."

A protest need not plead his evidence, the appeals court continued, and cited several previous opinions setting precedents.

Circuit Judges Charles Fahy and George T. Washington joined in the opinion.

SEC reverses stop order on Hazel Bishop stock

The Securities & Exchange Commission relented last week and lifted the stop order it had imposed on an issue of 1,274,823 shares of common stock of Hazel Bishop Inc., New York (BROADCASTING, June 26).

The cosmetics manufacturer and distributor submitted amendments to its prospectus offering the shares by 1.12 of its stockholders. The addenda disclosed fully those deficiencies in the company that had been objected to by the SEC in its June stop order.

Among statements offered in the amendment, HB conceded that its advertising expenditures have declined steadily since 1957. The company said in its current fiscal year it intends to spend about $1.5 million on advertising. This amount is substantially below that spent in any of its last five fiscal years, HB said.

In the amendments are certain restrictions imposed on the sellers (among which are company officers). The shares will be offered through brokers at prices current in the market at the time of sale. This may affect the market price of the stock for an indeterminate time, the company admits.

Hill okays JFK's FTC reorganization

President Kennedy finally had his way with Congress last week in his efforts to reorganize the regulatory agencies. The Senate on Thursday voted approval of his Federal Trade Commission plan.

Since the measure was previously approved by the House, it will go into effect on July 8.

The FTC will now be able to delegate any of its functions to commission panels, individual employees or employe boards, and Chairman Paul Rand Dixon will be able to assign commission personnel to delegated tasks.

Senate approval of the measure had been in doubt right up to the 47-31 vote. Two previous reorganization measures had been killed—one for the FCC in the House, one for the Securities & Exchange Commission in the Senate. The Senate Government Operations Committee had recommended a similar fate for the FTC plan.

The Senate followed up its action on the FTC by voting approval of the President's proposal to reorganize the Civil Aeronautics Board, thus giving him a reorganization-plan batting average of .500.

FCC sets WINS license renewal for hearing

$10 MILLION SALE TO STORER WILL NOT BE AN ISSUE

In a brief, 30-word announcement, the FCC stated last week that it has instructed its staff to prepare an order designating for hearing the renewal application of WINS New York.

Not mentioned in the order is the fact than an application also is pending for the sale of WINS by J. Elroy McCaw to Storer Broadcasting Co., for $10 million (CLOSED CIRCUIT, June 26). The proposed transfer—while very much in evidence—will not be an issue in the hearing.

While the hearing issues have not been set, WINS was the subject of a lengthy and controversial investigation early last fall by the FCC, principally on payola matters. The conduct of the commission's investigator was questioned and he was subsequently vindicated in an FCC meeting. Also playing a role in the investigation were certain documents of the House Legislative Oversight Subcommittee.

A former WINS disc jockey has admitted accepting payola and currently is under indictment in New York for alleged commercial bribery. A second WINS operation under an FCC cloud is the station's past programming.

In addition to WINS, Mr. McCaw owns KTVR (TV) Denver, KTVW (TV) Tacoma-Seattle and 50% of KEA Centralia, Wash.
How to survive your season in the sun...

TO HELP YOU have a wonderful time during your season in the sun, the following do’s and don’t’s are worth remembering.

Do get your suntan gradually. Never expose more than a few minutes at first. Increase sunning five minutes daily thereafter. Use a protective cream or lotion. Should you get a severe burn with blisters, have your physician treat it.

Do take it easy. If you suddenly plunge into strenuous activities, you’ll risk muscular aches and pains and perhaps a strain on your heart. Pace yourself. Stop when you begin to feel pleasantly tired.

Do be a careful camper. If you plan a camping trip at some faraway place, take along adequate first-aid supplies—plus a few household remedies.

When building a fire outdoors, keep it small, watch it constantly and have pails of water or sand nearby. Never leave a fire until it is out completely.

Don’t take chances in the water. Always follow a most important rule of water safety... never swim alone. And when toddlers are around water, watch them constantly. Even if you think you’re an expert swimmer, be extra careful in strange waters.

Stay out of water during thunder storms. Learn rescue breathing. This simple technique—when applied promptly and properly—can save many lives.

Don’t be a risky boater. Know and obey all the marine “rules of the road.” Provide life jackets for every passenger at all times. If possible, stay with any small craft that upsets, and signal for help.

THE LIGHT THAT NEVER FAILS
**KDUB-TV, ET AL, SOLD**

Multi-station Texas deal brings over $4 million

Sale of Texas Telecasting Inc. stations (KDUB and ch. 13 KDUB-TV Lubbock, ch. 12 KPAR-TV Sweetwater-Abilene and ch. 4 KEDY-TV Big Spring) by W. D. (Dub) Rogers and associates to the principals of KSYD Television Co., Wichita Falls, Tex. for in excess of $4 million was announced Friday (June 30), subject to usual FCC approval. Mr. Rogers, under the agreement, will continue with the new owners as general manager for an extended period. His future plans envisage continued service in television.

The transaction has been under negotiation for several months and was handled by Hamilton, Landis & Assoc.

Principals in KSYD-TV are Sydney A. Grayson, president and general manager and a 15% owner and Nat Levine, secretary-treasurer, 22.37%. Other stockholders are Irving and Murray Gold, 11.18% each; Lee Pension Fund, 22.37% and 17.89% KSYD-TV treasury stock.

KDUB-TV, primary affiliate of CBS-TV, began operation in 1952 and operates with full power. KDUB, which began in 1955, is on 1340 kc with 250 w full time. KPAR-TV began operation in 1956 with 145 kw visual and 72 kw aural and is also affiliated with CBS-TV. KEDY-TV began operation in 1956 with 12.9 kw visual and 6.88 kw aural and is affiliated with CBS-TV. KEDY-TV is operated under lease with option to purchase 50%. Texas Telecasting also owns 50% of KVER-AM-TV Clovis, New Mexico.

Mr. Rogers owns approximately 40% of Texas Telecasting and Vernice Ford approximately 30%. Other owners are W. W. Conley, 5.04%, W. H. Shipley, 4.75% and 14 others own no more than 2.8%.

Mr. Rogers is immediate past chairman of the NAB Television Board and is president of Television Pioneers and...
former chairman and one of the founders of TVb and chairman of TV Stations Inc., film-buying company. In making the announcement, Mr. Rogers said that “broadcasting is the business I know and I am going to stay in it.”

Changing hands

ANNOUNCED • The following sales of station interests were reported last week subject to FCC approval:

• WNTA-TV Newark-New York: Sold by National Television Assoc. to Educational Television for the Metropolitan Area for $6.2 million. Howard Shepard, former board chairman of the First National City Bank, New York, heads the educational group. WNTA-TV is ch. 13, Howard E. Stark was broker (see story page 62).

• KDUB-AM-TV Lubbock; KPAR-TV Sweetwater-Abilene and KEDY-TV Big Spring, all Texas: Sold by W. D. (Dub) Rogers to principals of KSYD Television Co., Wichita Falls, Tex. (Sidney A. Grayson, president and general manager), for amount in excess of $4 million. Hamilton, Landis & Assoc. was broker (see separate story, page 58).

• KQBY San Francisco: Sold by Sherwood R. Gordon to Atlass Broadcasting Inc. for $750,000. Principals of Atlass Broadcasting are Frank Atlass and his sister Patricia. Mr. Atlass was formerly with WIND Chicago and is head of Atlas Productions, Beverly Hills, Calif. KQBY operates on 1550 kc with 10 kw. Broker was Edwin Tornberg & Co.

• WAIR-AM-FM Winston - Salem, N. C.: Sold by Forsythe Broadcasting Co. to Jon and Nancy Holiday and Joseph Mullen for $246,775. Mr. Mullen is president of WHYE Roanoke, Va. Mr. Holiday is vice president and general manager of that station. WAIR operates on 1340 kc with 250 watts. WAIR-FM is on 93.1 mc with 34 kw. Broker was Blackburn & Co.

APPROVED • The following transfers of station interests were among those approved by the FCC last week (for other commission activities see For The Record, page 81).

• KJAX Santa Rosa, Calif.: Sold by Lew L. Gamble and Joseph Gamble Stations Inc. to KJAX Inc. for $225,000. John K. Withers, president of KJAX Inc. has interest in KBST Big Spring, Tex.

• WBRY Waterbury, Conn.: Sold by WBRY Broadcasting Corp. to Crystal-Tone Broadcasting Co. Inc. for $200,000 and agreement not to compete in radio within 50-mile radius of Waterbury for five years. Gustave Nathan is president of the buying company.

• WCBB (TV) Augusta, Me.: Educational TV construction permit for ch. 10 sold by Bates College to Colby-Bates-Bowdoin Educational Telecasting Corp. for $128,740. In sale application Bates stated other two colleges wished to participate in station operation and that Bates felt this would strengthen the station and its operation, “financially and in other respects.”

• KTRC Santa Fe, N. M.: Sold by Radio De Santa Fe Inc. to Santa Fe Broadcasting Inc. for $100,000, including $10,000 for agreement not to compete for five years in radio within 50 miles of Santa Fe. Carl S. Godwin is president of purchasing company. Chairman Minow did not participate.

Sarnoff answers the sharpsshooters

'POST' ARTICLE GIVES FACTS AND FIGURES ON TV SHOWS

Television’s critics were met head-on by Robert W. Sarnoff, NBC board chairman, in the lead article of the July 1 Saturday Evening Post. Mr. Sarnoff produced an analysis of NBC-TV programming that showed newspaper public affairs-education, or “cerebral programming,” far ahead of other types.

The article, as told to Stanley Frank of the Post staff, was written before FCC Chairman Newton N. Minow made his “vast wasteland” speech to the NAB convention May 9, according to a subsidiary article summarizing the Minow views.

Mr. Sarnoff took the principal arguments offered by television’s detractors and matched them against performance, the “inassistable drain on creativity” and the need to give a mass audience what it wants. His views appear under the heading, “What Do You Want From TV?” He said in effect that what the public wants it will get, equated against the problem of mass appeal vs. specialized programming.

His pet peeve, Mr. Sarnoff said, “is the exaggerated emphasis put on the Top Ten rated shows by the trade press, advertising agencies and sponsors, a practice that spawns a rash of bad imitations patterned on a few formats and themes which happen to be popu-

FAMOUS LAST WORDS:

“... and to think I had a chance back in ’55 to buy that station for as little as $200,000 . . .”

ARE YOU GOING TO BE ONE OF THOSE SAYING THE SAME THING ABOUT TODAY’S RADIO AND TELEVISION STATION BUYS IN 1965?

Not if you start looking now through . . .
lar at the moment.”

All surveys show that average viewing time is increasing slightly, he said, “an indication that the customers are satisfied with the general run of programs today.” The great majority unquestionably wants diversion — westerns, mysteries and adventure yarns, he added, noting that viewers must recognize the need to exercise selectivity when flipping the dial “because TV cannot cater to eggheads and western fans in equal measure.”

Mr. Sarnoff spoke in a caustic way about those who want culture from TV and then don’t bother to hunt for such programs in program listings or to tune-in when they find them.

He gave this breakdown of NBC-TV programs for February, 1961, which he called a routine month without an unusual run of big news or public-affairs specials — news-public affairs-education 23.9%; games, quizzes 17.9%; variety shows 14.9% drama 12.7%; westerns 6%; situation comedy 5.4%; audience participation 5.4%; sports 5.4%; animation 5.1%; children’s 2.8%; opera 0.5%.

He’d like to see more controversial questions debated, more experimental drama, more classical music, fewer action shows “that are carbon copies of a handful of prototypes.” As to balance, he felt TV is guilty on only one serious count — excessive violence, especially in action show watched by children.

**Palmer Enterprises realigns top echelon**

A reorganization of Palmer Enterprises (WHO-AM-FM-TV Des Moines and WOC-AM-FM-TV Davenport, Iowa), following the recent (May 27) death of Dr. B. J. Palmer, was announced last week (CLOSED CIRCUIT, June 26).

Assuming the presidency is Dr. David D. Palmer (son of Dr. B. J. Palmer), who had served as vice president and treasurer. At the same time, Paul A. Loyet, resident manager of WHO-AM-FM-TV Des Moines and vice president of Central Broadcasting Co. (licensee of WHO) was re-elected. William D. Wagner was re-elected secretary of both corporations.

Dr. Palmer also announced the retirement of Ralph Evans, executive vice president of Palmer Enterprises, Herbert C. Hender, a board member of both corporations, and Wilfred C. (Woody) Woods, assistant manager of WHO-AM-FM-TV. A successor to Mr. Woods, a 25-year veteran in the company, will be named shortly, according to Dr. Palmer, who also announced plans to designate an additional executive for the Davenport operations.

Recurring reports of the sale of any or all of the Palmer broadcast properties were denied by Dr. Palmer.

**New D.C. law firm announced**

Morton H. Wilner and Philip Bergson, associates in the Washington law firm of Lyon, Wilner & Bergson, last week announced formation of a new partnership with Arthur Scheiner and Gilbert B. Lessenco. The new firm is Wilner, Bergson, Scheiner & Lessenco.

Mr. Scheiner, who has practiced law for the past seven years, previously was chief of the rules and standards division of the FCC. Mr. Lessenco has been associated with Messrs. Wilner and Bergson for the past six years.

The new firm is located at 1343 H St. N.W., Washington 5, D. C.

**Collins opposes government intervention in radio-tv**

NAB President LeRoy Collins last week reaffirmed his belief that “honest self-evaluation” is essential to broadcasting progress, but he said it was equally essential radio and television remain free of “government thought control.”

Gov. Collins was the keynote speaker at the dedication of a new headquarters building for WGN-AM-TV Chicago.

The NAB president said that more than any other influence, “broadcasting has broadened enormously the horizon of enlightenment and entertainment of the American people.” He said he has criticized shortcomings as well as praised virtues of broadcasting “because I want broadcasting to do better.” Gov. Collins said “I believe deeply that — with any individual, with a business, with any organization, with any government — honest self-evaluation is essential to progress.”

Broadcasters “cannot wear blinders,” Gov. Collins said, “and make the kind of track record of which we are capable.”

Reviewing America’s tradition of free enterprise and the basic concept that the people are capable of deciding their own destinies (“Government is their instrument, not the other way around”), Gov. Collins said that if the people “are to be allowed to make those decisions, then the means of communication — the one ingredient which is essential to the free exchange of ideas — must remain independent of any government thought control.”

Citing the multiple pressures centering on broadcasting from all elements of society, Gov. Collins felt it understandable that there should be “some” people “who would seek to relieve broadcasting of those problems by governmental intervention.” But he cautioned that it is incumbent upon all in private business and government “to remain ever alert and resistant to such efforts no matter how well-intended.”

---

Gov. LeRoy Collins (center), NAB president, was the principal speaker at last Tuesday’s dedication of the new $3.5 million WGN-AM-TV Chicago “Mid-America Broadcast Center.” Here he talks with J. Howard Wood (I), president of WGN Inc. and publisher of the parent Chicago Tribune, and Ward L. Quaal, executive vice president and general manager of WGN Inc. The new WGN studio-office-headquarters building is a two-story structure containing some 100,000 square feet of floor space, situated on a 13-acre site.
“Sylvania GB-5749 cuts costs 50%!"

Paul F. Rex, Chief Engineer, WISR, Butler, Penna., says—"Sylvania Gold Brand 5749 has solved our limiter amplifier problem. Proper operating curve adjustments are now routine—with unselected tubes—at less than one-half our former cost.

"Now we enjoy excellent fidelity—no thumps—with 15 to 17db of compression. This means good high level audio at the receiver. We recommend Sylvania Gold Brand Tubes for those tough problems." If, like WISR, you have a critical tube job—replace with Sylvania Gold Brand Tubes.

ETV GROUP BUYS WNTA-TV

Commercial broadcasters put up $2 million of the $6.2 million purchase price

WNTA-TV Newark-New York (ch. 13) was sold last week to a New York civic group that plans to use the station as an educational outlet. The sales price was $6.2 million in cash. Station broker Howard E. Stark handled the transaction on behalf of educational group.

In a joint effort approved by the Dept. of Justice, commercial broadcasters are contributing an estimated $2 million toward the purchase price. The three tv networks (which own New York stations) will donate approximately $500,000 each while independents WOR-TV and WNEW-TV, both New York, have pledged $250,000 apiece. The remaining New York station, WPX-TV, reportedly will offer assistance when WNTA-TV switches to etv.

Balance of the $4.2 million needed will be met through grants from philanthropic groups with public support expected to meet operating costs. Purchasing organization — Educational Tv for the Metropolitan Area (ETMA) — is headed by Howard Sheperd, former board chairman of the First National City Bank.

Negotiations for WNTA-TV have been in process for several weeks following the announcement of licensee National Telefilm Assoc. that it planned to sell the station. ETMA hopes to receive FCC approval prior to the first of the year and transfer ch. 13 to etv programming on Jan. 1 with call letters WMET (TV).

Opposition to the transfer is expected to be lodged by New Jersey Gov. Robert Meyner, who is battling to retain ch. 13 as the lone vhf facility allocated to New Jersey. He has appointed a committee whose goal is to maintain ch. 13 in the state. The FCC currently is accepting comments on rule-making to assign a vhf channel to etv in New York and Los Angeles, with the deadline for submitting statements this Thursday (July 6).

WNTA-TV now is telecasting on a curtailed eight-hour day and ETMA plans to take station off air for brief period pending change-over to educational tv programming.

Airborne group refuses WXIX-TV's etv offer

Offer of a Milwaukee uhf station to provide educational tv during hours it is not normally on the air on a free, experimental basis was refused last week when the program source turned down the plan. Had permission to re-broadcast been granted, the station would have been the only outlet providing etv service to that area.

WXIX-TV Milwaukee wanted to carry programs of the Midwest Program on Airborne Television Instruction, which transmits educational materials to students by means of airplane. The station had sought and received encouragement from Milwaukee area representatives of the etv system and had offered to set up the equipment and run summer-session programs without cost. If the experiment proved successful, WXIX-TV planned to continue the service and charge MPATI only operating costs.

MPATI gave as its reason for turning down the request that WXIX-TV was a commercial station and that the educational group's contracts have royalty and copyright provisions that call for noncommercial broadcasting. The station agreed to run no commercials during the educational hours but MPATI still declined the offer.

FCC, etv group, co-sponsor uhf exhibit

A two-week exhibit of uhf equipment and components will be jointly-sponsored in Washington by the FCC and the Greater Washington Educational Tv Assn. The exhibition will be held in the Dept. of Commerce lobby, beginning July 15.

It is being held to acquaint the general public with the plans of GWETA to serve Washington and its environs with educational programming on ch. 26, for which it received a grant a fortnight ago (BROADCASTING, June 19). Particular emphasis will be given to motivating a massive conversion program to receive uhf since the Nation's Capital presently has only vhf service.

Actual uhf pictures will be shown through two special transmitters which will rebroadcast on uhf channels the signals of Washington's four commercial vhf stations. Robert G. Weston, engineering assistant for Commissioner Robert E. Lee, is handling the details of the exhibit.

Among equipment manufacturers who will display equipment at the exhibit are Zenith, Victor Inc., Technical Appliance Corp., Entron, General Electric, Blonder-Tongue, Westinghouse, JFD Electronics Corp., Sylvania, Legum (Admiral), Jerrold and Channel Master.

Virginia's story

The Virginia Assn. of Broadcasters has published a survey in pamphlet form under the title "Broadcasting in Virginia" which details the importance of the broadcasting industry in informational and public affairs field. The report, based on returns from questionnaires sent to every station in the state, covers the spectrum of Virginia broadcasting from its history through its programming to its place in national organizations. Replies were received from 57 radio and 8 television stations, representing 60% radio and 76% television returns.

Stations participating in the report indicated the amount of their programming that was devoted to religion, general public service announcements (such as highway safety or fire prevention), news, sports, politics, and classical music. They also detailed the national organizations such as networks or industry groups to which they belonged.

Mutual adds another station

Mutual has announced the signing of WPEO Peoria, Ill. as an affiliate and said this addition gave it outlets in 88 of the nation's top 100 markets, compared to 80-81 for each of its three network competitors. Mutual's count showed that among the top 100 markets MBS had gained three during the past year, while CBS Radio's affiliations in the same 100 rose from 77 to 81. NBC Radio's remained at 81 and ABC Radio's dropped from 84 to 80. WPEO, a 1 kw daytimer on 1020 kc, is a member of J. W. O'Connor group of stations. It brings Mutual's total of directly linked affiliates to 422.

Kansas radio directory

Kansas congressmen, senators, state officials and organizations are receiving a special directory of Kansas radio and tv stations that includes beeper-phone listings to be used by these news originators on appropriate occasions. The directory was compiled by the Kansas Assn. of Radio Broadcasters and also includes station addresses, names of managers (with home phone numbers) and program and news directors.

This label is your passport to priority on 10,000 flights daily

Ever wonder how the loading crews at the airport handle shipments bearing the red, white, and blue Air Express label? Gently — with real kid-glove handling. Fast, too. In fact, of all packages, they're first on, first off. Special Air Express trucks (there are 13,000 of them) come and go throughout the day. Their job is to pick up and deliver door-to-door at both ends of the flights. Does this give you any ideas about your own shipping problems? Then call Air Express and find out how little it costs to put this skilled shipping team to work for your company. Once you do, you will always think Air Express first! Call now.

TV PROGRAMMING'S WESTWARD MOVE

CBS-TV's Lansbury: Hollywood is becoming the capital

“Hollywood is on its way to becoming the tv program capital of the nation, for live as well as filmed programs,” according to Bruce Lansbury, CBS-TV director of daytime programs, Hollywood.

With the move of Brighter Day from New York to Hollywood, starting this afternoon (July 3), CBS-TV is now originating the majority of its live (and taped) daytime program fare in Hollywood, which is now the source of 16½ hours a week compared to New York's daytime output of 15 hours of CBS-TV daytime shows.

“The reason is simple,” Mr. Lansbury observed last week. “It's more efficient and more economical to put on programs here than in the East. We have the best crews in the business at Television City in Hollywood, crews that have handled such top dramatic shows as the Playhouse 90 and Climax series. We have the finest stages for television, the best facilities that money can buy.

“In New York, nothing was built for television originally; it all had to be adapted for tv from original construction for some other purpose. Out here, our facilities were built for tv and for tv only. In New York, studies are in one part of the city; props and scenery are stored away across town. Cartage charges are enormous. In Hollywood, the studios, wardrobe, props, shops—all the basic services right down to the Mimeograph machines are under one roof.

“There's more talent out here too,’’ Mr. Lansbury went on to claim, “and the trend is all to the West. Nothing is happening in New York. So the actors, writers, directors, producers—all the creative people—are coming out here and they're coming out to stay.’’

Asked why, if Hollywood facilities and personnel for television are so superior to those available in the East, CBS-TV has not moved all of its live programming to its West Coast headquarters, Mr. Lansbury said that this is exactly what is happening, so far as CBS-TV is in control of the situation.

“The with the exception of Captain Kangaroo, the only daytime programs we have left with New York origins are those that are owned and produced by advertising agencies. Everything else—everything we control—comes from Hollywood.”

The CBS-TV Hollywood-originated programs now include four half-hour Monday-Friday game shows: Video Village, Double Exposure, Your Surprise Package and Face the Facts; Art Linkletter's House Party and a court show, The Verdict Is Yours; also each a half-hour a day five days a week; the afore-mentioned Brighter Day, 15 minutes a day, Monday-Friday, and a Saturday morning half-hour children's program, The Magic Land of Allakazam.

Mr. Lansbury said, all of the game shows and some of the other programs are produced and taped on a six-day schedule. “This lets us get a backlog of programs on hand in case of emergency or to give vacations to the performers and crews without interrupting the broadcast schedule. In five weeks, we get one week ahead. We couldn't do it in New York. The stages and other facilities needed just aren't available there.”

Daytime programs are important in terms of employment, Mr. Lansbury noted. They employ more than 300 people in Hollywood regularly, he said, with an annual production budget in excess of $3 million. Face the Facts alone uses 30 actors a week, he said, adding, “and that's just for one game show.”

With its facilities and its trained crews, Hollywood can handle visits from big programs like the Ed Sullivan Show or the Garry Moore Show for a week or two of Hollywood originations without the need for bringing in extra people, Mr. Lansbury said, noting that this is another money-saving advantage the CBS-TV Hollywood set-up has to offer.

BEETTER PROGRAMS

Storer Jr. says its cause was those payola scandals

The payola scandals of last year may be credited with an assist in the improvement in programming at the Storer stations, George B. Storer Jr., president, Storer Broadcasting Co., stated Tuesday (June 27) in Los Angeles.

Mr. Storer was in Los Angeles for the first anniversary of KGBS Los Angeles with that call, with 50 kw power and with a "beautiful music" program format. The station, formerly known as KPOP, was purchased by the Storer organization in 1959.

Shocked "when we learned that some of our disc jockeys, our friends and longtime employees, were guilty of wrong practices and at best dubious morals," Mr. Storer said the SBC management began examining its own operations to see where things went wrong in the past and to prevent any repetition in the future. The result of this analysis was the installation of a quality control set-up like those used in manufacturing to catch faulty products before they leave the factory.

At SBC, the quality control process began with taping all broadcasts and selecting tapes at random for study to make sure none of the FCC rules and regulations were violated, nor any of SBC's own rules. But the tapes revealed more than that kind of information, Mr. Storer reported. They also showed differences in program quality from station to station, with some dee jays obviously more adept at selecting recordings for their programs than others. One result, he said, was the appointment of Visilco Liappus of WGBS Miami as music programmer for all
Ingredients for Instant Broadcasting

The AUTOMATIC TAPE CONTROL system records and plays back spots, programs, special effects, music... anything up to 31 minutes in length... on tape contained in plastic magazines. Your staff members record whenever convenient. The tapes can be stored in the control room ready for use. The operator simply slips the magazine into a playback unit, presses a button and the material is on the air. The tape cues itself automatically ready for reuse or storage. On all ATC units, there is provision for a second auxiliary control tone which can be used to automatically start other equipment. You get the maximum use of your broadcast personnel at a minimum amount of trouble and expense. And ATC gives you true fidelity in reproduction with a frequency response of ± 2 db from 70 to 12,000 cps; ± 4 db from 50 to 15,000 cps. Signal-to-noise ratio is 55 db, and wow and flutter under 0.2% rms.

AUTOMATIC TAPE CONTROL, INC., a company owned and operated by broadcasters who understand a broadcaster's real problems, introduced the original automatic tape control system in 1958. Formerly distributed exclusively by Collins Radio Company, there are more than 4,000 units in use in over 600 radio and TV stations and in major radio networks. From this head start, ATC has devoted itself exclusively to the design and manufacture of automatic tape control systems.

NOW COMPLETE AUTOMATION AVAILABLE

ATC 55, our newest development, permits the automatic use of 55 consecutive magazines without reloading or resetting. Used in sets of two or more, ATC 55 allows completely automated broadcasting twenty-four hours a day.

ATC is made by the originator and largest manufacturer of automatic tape control equipment... more than 4,000 units in use in over 600 radio and TV stations.

‘Dr. Fox, call surgery’

Can a straightforward report on health and medicine conducted by a prominent physician be a successful radio program? WCCO Minneapolis has discovered over the past two years with *Doctor’s House Call* that it can indeed. Conducted by Dr. James Roger Fox of the medical faculty of the U. of Minnesota, and chairman last year of the American Medical Assn.’s tv-radio committee, *Doctor’s House Call* does not claim to be an exhaustive odyssey into the world of ills and ailments, and each broadcast pointedly suggests that the listener consult his physician. Already 260 taped five-minute episodes of the program are available for placement on radio stations of the sponsors’ choice. Syndicated by Prestige Productions Co. of Minneapolis, the program will be sold in the upper midwest by this firm and in the rest of the U.S. by Signal Productions of Hollywood.

Audience response to the program, run twice daily over WCCO, has been good. The series averages 300 letters a week, all of which are guaranteed answers by the AMA, which has backed the program in concept and execution to the hilt. The association has endorsed and will act as co-sponsor of the series, and permits mention of its name on each broadcast. Further, all programs are reviewed prior to broadcast by the AMA.

*Doctor’s House Call* does not claim to be an exhaustive odyssey into the world of ills and ailments, and each broadcast pointedly suggests that the listener consult his physician. Already 260 taped five-minute episodes of the program are available for placement on radio stations of the sponsors’ choice. Syndicated by Prestige Productions Co. of Minneapolis, the program will be sold in the upper midwest by this firm and in the rest of the U.S. by Signal Productions of Hollywood.

So far, the series has been sold to 24 U. S. stations, radio outlets of the Armed Services network, plus Hong Kong and Australia.

the company’s “beautiful music” operations, including KGBS.

Asked about violence on television, Mr. Storer said that there appears to be a conflict between what the public watches and “what it thinks it ought to watch.” Asked anyone what’s wrong with television and the answer inevitably will be ‘too much violence,’” he said. “Yet the rating reports in city after city show that the programs with the biggest audience are those with plenty of violence.”

Admitting that tv programming has room for improvement, Mr. Storer stated he would fight to the end any attempt of the FCC to control the program content of either television or radio.

Screen Gems plans its first live tv show

Screen Gems Inc., New York, last week announced the sale of the first live tv show ever produced by the company, *Showdown*, to CTV, a new Canadian network scheduled to go on the air in September. The program, a musical game show, will be carried on eight stations associated with CTV on Fridays, 7:30-8 p.m.

Lloyd Burns, SG vice president in charge of international operations, said *Showdown* is the first of an assortment of new properties planned for Canadian production by Screen Gems. The game program will be produced live in Toronto in cooperation with CFCF-TV and fed to other stations of CTV. Mr. Burns also reported that CTV has bought *Top Cat*, an animated cartoon series produced for SG by Hanna-Barbera Productions.

‘Continental Classroom’ will be back on NBC-TV

NBC-TV’s *Continental Classroom* will be returning for its fourth year on the network next season with a new course in American Government. The two-semester course, taught by Dr. Peter H. Odgaard, professor of political science at California U., will be televised in color and carried nationally by some 170 stations Monday through Friday from 6:30-7 a.m., NYT, starting Sept. 25. The program, which is expected to cost about $400,000 in overhead lines, will be financed by NBC.

In the previous three years of its existence, *Continental Classroom* was presented on NBC by Learning Resources Institute of grants totaling $1.6 million from the Ford Foundation and $100,000 a year gift from several giant corporations. LRRI ended its association with NBC-TV on May 26, the date of its concluding telecast for the past season, in a dispute with the network over transmittal methods. The institute will offer its own college credit courses, *The College of the Air*, on CBS-TV next season (weekdays, 1:05-1:30 p.m., NYT).

In addition to the course in American Government, NBC will present this past season’s *Continental Classroom* course in Contemporary Mathematics, in color tape telecasts in the 30-minute preceding period (6-6:30 a.m., NYT) also beginning Sept. 25. The educational programs are expected to attract a weekly audience of 1.2 million people, and more than 300 colleges and universities are expected to offer the courses for full academic credit.

‘SEA HUNT’ RERUNS

Ziv-UA series already sold in 50 markets by Economee

Ziv-United Artists, which has sold four-year productions of *Sea Hunt* in almost 200 markets on a first-run basis, now has placed the series in rerun status. Pierre Weis, vice president and general manager of Economee Div., has announced reruns of *Sea Hunt* sold in more than 50 markets (see list, page 69).

Mr. Weis reported 156 half-hour episodes of the program are available to stations through Economee. He noted that first-run episodes of the fourth year of *Sea Hunt* continue until April 1962 in most markets, and until the fall of that year in other markets.

**Program notes...**

**Warriors pact** • WCAU Philadelphia has signed a five-year exclusive contract to broadcast the professional basketball games of that city’s Warriors of the National Basketball Assn. Bill Campbell, WCAU sports director, will handle the play-by-play of the estimated 40 games to be broadcast. WCAU previously held the broadcast rights for the Warriors’ games from 1955-1959.

**Housewife program** • *Hints ‘n’ Helps for Homemakers*, a 15-minute “coffee klatch” on film, is being offered to tv stations by Association Telefilms, N. Y. The 15-week series includes housecleaning hints, recipes and pointers on housebuying and remodeling. Each film also includes trailer announcement advising the series may be shown in clubs, home economic classes and churches, free of charge.

**School-age program** • *Update*, a new weekly tv news program designed for juniors and high school students, will be presented by NBC-TV (Sat., 12 noon NYT) starting Sept. 16. The program will discuss current national and world affairs.

**Space merger** • WPIX (TV) New York and the National Film Board of Canada will co-produce for tv *Universe*, a documentary film dealing with the exploration of space beyond the solar system. Reportedly, it marks the first time that the National Film Board and an American tv station have joined forces for a tv production.

**Second year** • Screen Gems’ syndicated property *Tightrope*, on CBS-TV during the 1959-60 season, has been sold in Mexico City for the second year, under the sponsorship of Telas Junco Deportes Televisores. The series, which stars the Latin American luminaries, as well as in England and Japan, will be dubbed into French shortly. The series is also in 95 U. S. markets.
On the rocks • KDKA Pittsburgh will present a five-part documentary beginning today (Monday) entitled "Re-development on the Rocks," which deals with a 12-year program in suburban McKees Rocks that seemingly has never even begun. The segments will be presented on the nightly Program PM series and will feature various city and governmental officials and their roles in the 12-year project.

New host • Durward Kirby will host CBS-TV's Candid Camera next season, succeeding Arthur Godfrey who earlier announced his intention to leave the program. Mr. Kirby begins his assignment Sunday, Oct. 1 (10-11:30 p.m. EDT), when Camera starts its second season on the network.

Space show • KBTO El Dorado, Kan., presented a special two-hour show, Men in Space, the story of the successful Russian and American launchings of men in space. The station obtained a 45-minute documentary from Radio Moscow and a one-hour long program from the Voice of America to prepare its show. KSAC, U. of Kansas station, duplicated the show at a later date.

Producer alliance • The Alliance of Television Film Producers last week added three new production organizations as members bringing the total ATFP membership to 18. New members are: Bing Crosby Enterprises, producer of the new Ben Casey series; Bellman Enterprises, producing the Joey Bishop Show, and Calvada Productions, producing the Dick Van Dyke Show.

Summer showcase • WKBW-TV Buffalo, N. Y., has announced the debut of a new public affairs show, WNED-TV Summer Showcase, an hour-long program every Sunday (3-4:30 p.m.) dealing with the accomplishments of that city's etv station. The new show was designed for summer viewing but WKBW-TV reports it will carry the show for a longer period.

Falls' safety surveyed • As an aftermath to the recent tragedy in which four persons lost their lives as their boat was crushed going over Niagara Falls, WGR-TV Buffalo presented a special program, "Lifeline for Niagara." By use of film, video tape and eye-witness account, the presentation gave a survey of accidents over the falls, and demonstrated both the lack of, and need for safety precautions.

Firms merge • Merger of United Film Service Inc., Kansas City, and Motion Picture Advertising Service Co., New Orleans, two pioneer movie theatre screen advertising firms, has been announced. Kansas City production unit of the new company will enter tv commercial production field. W. J. Scroggin will head unit.

This is the PLUS factor that makes WOC-TV more exciting — more interesting — more effective than the competition. Yes, more local programming for homemakers, for sports fans, for youngsters . . . . all this in addition to NBC, top ABC shows and the best of the syndicated shows.

These are the people that buy products in the nation's 47th TV market. More than 2 billion dollars in retail sales ring on the retailer's cash register. Over 438,000 TV homes are within the 42 counties of WOC-TV's coverage area.

And to help you get the maximum number of these dollars WOC-TV specializes in effectively co-ordinating and merchandising your buy at every level — the broker, wholesaler, direct salesman, key buyer as well as the retail outlet.

Your PGW Colonel has all the facts, figures and other data as well as day by day availabilities. See him today.
Official syndicates five off-network shows

**BUYS THEM FOR $2 MILLION FROM SHARPE AND LEWIS**

Official Films Inc., New York, last week bought five off-network programs, totaling 263 episodes, for a price estimated at more than $2 million. The series are being placed immediately into syndication to stations by Official.

Seymour Reed, Official president, reported the company acquired the programs by purchasing five tv-film production companies owned controlled by Hollywood producers Don W. Sharpe and Warren Lewis. The properties in the transaction are 114 half-hour segments of *Peter Gunn*, which is ending a three-year run (NBC-TV and ABC-TV) on Sept. 25; 34 half-hours of *Mr. Lucky*, 34 half-hours of *Yancy Derringer*; 39 one-hour *Wire Service* programs and 42 half-hour segments of *dupont Theatre*.

Under terms of the transaction, Official has exchanged an undisclosed number of shares of its stock for all of the stock of the five privately-held Sharpe-Lewis companies. The board of directors of Official Films will be increased from six to seven to include Mr. Sharpe.

Mr. Reed noted that the acquisition of the off-network programs marks the second phase of Official Films’ expansion program. Earlier this spring Official earmarked $1 million for new production and the establishment of additional offices abroad (BROADCASTING, May 15).

**Berlin salutes Berlin**

The people of Berlin, Maryland, are squarely behind the people of Berlin, Germany, in their determination to keep the city free from Communist rule. That was the message Mayor William Hudson, of the Maryland Berlin recorded for Mayor Willie Brandt, of the German city of the same name over the facilities of WDMV Pocomoke City, on the eastern shore. The recording was airmailed to Germany and the message broadcast repeatedly over the Pocomoke City station to the people of Worcester county, which includes both Pocomoke and Berlin. WDMV is owned by Ernie Tannen with Curt White general manager.

**Nine School Bell awards go to radio-tv outfits**

School Bell awards for distinguished interpretative reporting on education were presented last week to 23 winners in the fields of broadcasting and publishing at the annual convention of the National Education Assn. in Atlantic City, N. J.

Broadcasters were selected for nine awards. They were: CBS-TV for *A Question of Chairs: The Challenge of American Education*, an hour-long dramatic program produced by Don Kellerman; *The Donna Reed Show* for the episode, “Higher Learning,” sponsored by Campbell Soup Co. on ABC-TV; *The General Electric Theatre*, CBS-TV, for the episode, “The Drop-Out,” sponsored by the General Electric Co.;

Other awards went to KOOL-TV Phoenix, KOLD-TV Tucson and the Arizona Network which links the two stations for six public service programs presented under the title, *Let’s Talk About Schools; KREX-TV Grand Junction*, Colo., for the weekly series, *Know Your Schools; WRC-TV Washington* for the *Teen Talk* series; WJR Detroit for coverage of education through its news department, editorials and public service programs; WABC-TV New York for *Education Tailor-Made; and KYW-AM-TV Cleveland* for a series of radio and television editorials about schools.

**ITC reports big sales**

Independent Television Corp. reported last week that Whiplash and *Super-car*, its two new first-run tv film series are chalking up impressive sales in top markets across the country in the little more than a month since they were simultaneously released. Whiplash,
which was filmed on location in Australia, has been sold in 48 markets and to Miles Labs. and Procter & Gamble among other advertisers.

*Supercar,* which deals with the Space Age and employs a new process which reportedly gives model miniature characters a dimension of reality, has been sold in New York; Chicago; Pittsburgh; Detroit; Tampa, Fl.; Eugene, Ore.; and Youngstown, Ohio.

**Ziv-UA buys Perelman stories**

Humorist S. J. Perelman has sold tv rights to his *Acres and Pains* to Ziv-United Artists as a prospective network series. He will continue actively as a writer on the tv adaptation.

*Acres and Pains,* which contains more than 20 short stories, is an autobiographical account of the author’s career as a gentle man farmer in Bucks County, Pa.

**Film sales…**

*Sea Hunt* (Ziv-UA reruns): sold to WCBS-TV New York; KNXT (TV) Los Angeles; WCAU-TV Philadelphia; WHDH-TV Boston; WIBK-TV Detroit; KTNT-TV Tacoma-Seattle; WFMY-TV Greensboro, N. C.; KFMB-TV San Diego; WGAN-TV Portland, Me.; WVL-TV New Orleans; KSL-TV Salt Lake City; KOIN-TV Portland, Oregon; WGN-TV Chicago; KOA-TV Denver; WGR-TV Buffalo; KVAR (TV) Phoenix; WTA (TV) Pittsburgh; WTVN (TV) Columbus; KSD-TV St. Louis; KRON-TV San Francisco; WDAF-TV Kansas City, Mo.; WFLA-TV Tampa; KTSN-TV El Paso; WNDU-TV South Bend; WNEM-TV Saginaw-Bay City, Mich.; KREM-TV Spokane; WCKT (TV) Miami; WMAL-TV Washington, D. C.; KGMB-TV Honolulu; WRGB (TV) Schenectady; KVIO-TV Tulsa; WITI-TV Milwaukee; KPRC-TV Houston; WKY-TV Oklahoma City; WBRE-TV Wilkes-Barre; KCRA-TV Sacramento; KMJ-TV Fresno; WLOF-TV Orlando; WTVW (TV) Evansville, Ind.; WOC-TV Davenport, Iowa; WFMJ-TV Youngstown; WSAU-TV Wausau, Wis.; WBTW (TV) Florence, S. C. and KEYC-TV Mankato, Minn. Now in 50 markets (see story, page 66).

Post-1948 feature films (Screen Gems): sold to WKBN-TV Youngstown, Ohio; KHVH-TV Honolulu; WBRE-TV Wilkes-Barre, Pa. and KOIN-TV Portland, Ore. Now on 34 stations.

15 Special Features (Seven Arts Associated): sold to KXNO-TV Yakima, Wash.

**Criminals take night off to watch tv ballcasts**

Television is frequently associated with crimes. Usually the association is unfavorable. Often tv is held up as an unfavorable Fagin, inciting the criminally-minded to evil deeds, instructing them in criminal techniques.

But not always. Sometimes tv stands out as a crime deterrent. Take San Francisco on the nights of June 2 and 3, when the San Francisco Giants were playing the Los Angeles Dodgers in Los Angeles, and the games were being televised for Bay Area viewers by KTVU (TV) Oakland-San Francisco.

Larry Sullivan, writing in the *San Francisco Examiner* for June 5, reports that both nights "were relatively slow ones on the crime front. Restricting the count to what Nelder [Al Nelder, assistant to Chief of Police Tom Cahill] calls 'street crimes,' meaning such offenses as robberies, strong armings, muggings and assaults, there were only two violations during the hours Friday night's game was on tv. Saturday night was even quieter. No crimes were committed during the game telecast and only one crime—a stabbing—marred the following hours of the night and early morning. By comparison, the count on the previous Saturday, when there was no baseball on tv, reached six.

"Added to our findings in the case of the first two games [also between the Giants and the Dodgers, played in Los Angeles and televised by KTVU], this, says Nelder, 'is evidence that baseball tv is a deterrent to crime, if only to the degree that a strong man can't watch the game and slug a victim at the same time.'"

**WAVE-TV viewers brew 28.8% more COFFEE and TEA —toast 28.8% more toast, and enrich it with 28.8% more "spread"**

That's because WAVE-TV has 28.8% more viewers, from sign-on to sign-off, in any average week. Source: N.S.I., Dec., 1960.

THE KATZ AGENCY, National Representatives
The politicians can't say 'no' to a lady

It isn’t strictly a man’s world—producing a network-television public-affairs program—particularly when you happen to be blonde, talented and a bit dramatic as is Peggy Whedon of ABC-TV. In fact, it’s actually an advantage, Peggy admits, in these days of the New Frontier and “younger-thinking, gallantry-practicing” administrators who “haven’t learned how to say no to a lady.”

So it comes as no surprise in some quarters that her show, Issues and Answers (ABC-TV, Sunday, 4:30-5 p.m. EDT) has frequently produced front page news; boasts eight Cabinet interviews and is among the few remnants of ABC-TV News’ old regime, prior to the department’s reorganization by James C. Hagerty, the network’s new vice president in charge of news and public affairs.

From Peggy’s boss, Robert Fleming, ABC Washington Bureau chief, comes more plaudits: “We think a discussion program does not need to subject guests to a district attorney’s cross-examination to produce maximum information. Because we want a thorough presentation we find it valuable to have a competent, intelligent and informed producer. I would not go so far as to say that a man could not do this, but I’ve been pleased with Peggy’s guidance in the production of Issues and Answers. I think she does her job well and guests on the program have uniformly agreed.”

Charm and Judgment • It’s all a tribute to the lady’s charm, news judgment and knack for juggling a 15-man staff, a husband, two teenage children and six telephones in a hectic seven-day week. But she loves every minute of it.

In her 12-year broadcasting career Peggy Whedon has been taken for virtually everything except a television producer, a mistake easily made. She hardly looks the part. But her identity is mistaken no more, though occasionally she runs into problems with “over-protective” female secretaries on Capitol Hill and in Washington diplomatic circles. But she is a crafty tactician. Her greatest success has come from back-stage maneuvering rather than front-stage cavorting where she seemingly should be.

As for Issues and Answers, it keeps her virtually on a “24-hour standby,” but as Peggy says, “most of the tension is self-imposed.” Nothing in the way of a crisis has developed since the show went on the air last November, although there were a few anxious moments once when Sen. Hubert Humphrey (D-Minn.) played a practical joke by calling in sick an hour before show time. “But he showed up.”

“Our formula for success,” comments Mrs. Whedon, “is quite simple: we know what our subjects won’t discuss and what they will. We concentrate on the ‘will’ and the results couldn’t be better.”

Lean Days • While she is the main

Peggy Whedon referees one of the most controversial ‘Issues and Answers’ with Sen. Barry Goldwater (R-Ariz.) (left) and Sen. Jacob Javits (R-N.Y.) in the starring roles. The show will be repeated Aug. 4.

CKLW-TV Detroit; WMAR-TV Baltimore; WKRC-TV Cincinnati; WHCT (TV) Hartford; WLCW (TV) Columbus, Ohio; WSEE (TV) Erie, Pa.; WSPD-TV Toledo; KRTN-TV Des Moines; WAVY-TV Portsmouth, Va.; WHIO-TV Dayton; WLWI (TV) Indianapolis; and KPRC-TV Houston. Now in 83 markets.

70 (PROGRAMMING)
MOTOROLA MOVES CLOSER TO COLOR
Shows prototype of set planned with three-gun tube

Motorola Inc., the major tv set maker who earlier this year said it was waiting for a single-gun picture tube before it entered the color set market (BROADCASTING, Feb. 27), disclosed in Chicago Thursday the prototype of an “advanced design” color set it will market if and when tube makers produce for the manufacturing market a new three-gun picture tube that Motorola’s laboratory has developed.

The new Motorola tube is a 23-inch, 90 degree rectangular version of today’s standard 21-inch, 70 degree color tube. But because of kinks somewhere behind the scenes, a working model of the new Motorola set didn’t quite make the distributor convention and won’t be ready for “several more days,” Motorola spokesmen explained.

Why does Motorola like its new tube better? Because it is shorter and coupled with new color circuitry by Motorola engineers will permit a more compact piece of furniture for the modern home, therefore is more salable, according to Executive Vice President Edward R. Taylor. He described the current tube as “old fashioned” with its “long ostrich neck.” Motorola will not manufacture its own new tube, but will make all technical information available to those who do, he said.

“We got tired of waiting for tube manufacturers to come up with the kind of design needed to make color receivers salable,” Mr. Taylor said. “Therefore we took the initiative ourselves to accomplish something that the industry told us was several years away.”

Once such a tube is available commercially, he said, Motorola’s color set could be ready for the consumer market within a year. The price would be the same as other current manufacturers, he said, since no price breakthrough is involved in the innovation.

Motorola unveiled a complete 1962 line of tv, radio and phonograph models for the 1,200 distributors attending. Mr. Taylor predicted a bright year for both Motorola and the industry, expecting unit sales of tv sets to hit the 6.25 million mark this year, up from last year’s 5.8 million total. “This translates into nearly $1.5 billion for the consumer economy,” he said.

Bright sales picture also was painted for sales of stereo phonographs this year. Motorola in addition introduced its first am-fm clock radio, plus various other am-fm sets to meet every listening situation or need. The tv line also featured models with fine cabinets by Drexel.

The higher end of the new cabinet line of Motorola is also equipped for stereo-multiplex fm reception.

Fast new process for post-synchronization

Instant Sync, a new process for the post-synchronization and dubbing of tv tape and motion-picture films has been developed by Lenbeck Inc. The new process is more economical and it can re-dub a four-minute segment of film or tape in approximately six minutes, according to Lenbeck.

The electronically-triggered Instant Sync machine allows the producer of a tv taped show to re-dub voices in the studio without picking up outside noises or musical sound. It’s being offered on a rental-royalty basis with charges determined by the amount of footage used. Dennis Gunst originated the process, and Jean Lenauer and Myer P. Beck, respectively, are president and vice president of Lenbeck Inc. Their offices are at 729 Seventh Ave., New York.

Motorola returns to tv

Motorola Inc., Chicago, will return to network television in the fall after a seven-year absence. Company, while showing the prototype of the color tv receiver it plans to ultimately manufacture (see story this page), said that it will co-sponsor one-hour specials on CBS-TV in the fall. Bing Crosby and Jack Benny already have been signed for the specials and negotiations with Bop Hope are in progress. Motorola will continue its co-op spot radio campaign with dealers. Leo Burnett Co. is Motorola agency.

Melpar acquires Tv Assoc.

The acquisition of Television Associates Inc., Michigan City, Ind., by Melpar Inc., Washington area electronics firm, has been announced. Television Associates, doing an estimated $1.5 million worth of business yearly, is headed by tv pioneer Capt. William C. Eddy. The transaction involved an undisclosed transfer of Melpar stock for outstanding stock of Television Associates. Final approval is due at the August meeting of Melpar stockholders.

BROADCASTING, July 3, 1961
Gen. Sarnoff's view of the 'world of the future'

A world of the future—where people can view TV programs simultaneously in Cairo, Tokyo and Chicago; where language will be instantaneously translated and where other planets will be no less familiar to Americans than foreign countries—was described last week by Brig. Gen. David Sarnoff at the National Press Club in Washington, D.C.

The RCA board chairman emphasized his agreement with President Kennedy that first priority should be given to the development of U.S. communications satellites. He said "the much-debated question of satellite ownership is . . . far less important at this time than the adoption of the right system at the earliest possible moment." He added that no matter who owns the satellites all companies licensed by the U.S. in the field of international communications should have access to them on "reasonable and non-discriminatory terms." In later remarks, Gen. Sarnoff said that companies that have an interest in the satellites themselves must have the facilities to pick up and transmit messages and to receive and deliver them if they are to make the satellite franchise meaningful. He favored free competition, particularly in ideas and inventions.

Gen. Sarnoff said he did not think satellite operation would call for extensive frequency reallocation because satellites use higher frequencies than broadcasting.

The steps leading to establishment of a U.S. base on the moon, as planned by RCA, were described by Gen. Sarnoff. A "moon camp," run by remote control, would be sent to the moon before the astronaut left Earth. The camp would be equipped with laboratory equipment, emergency survival tools, an exploration tractor and a re-entry capsule for the return trip, as well as food, water and power.

Gen. Sarnoff exhibited a mock-up of a pocket-size color TV set with combination am-fm radio which he said "will probably be the reporter's best friend in the '70s." He pointed to "formidable advances in micro modules" and the increased trend toward transistorizing equipment as a key to electronic progress.

Color TV, in which RCA has pioneered, is "catching on," the general said, as is evidenced by the entry of many major set manufacturers into the field in the past year. He said the price of color TV sets is lower than that of black and white sets in the years of television's development.

18 new-type RCA cameras ordered by ABC-TV

Eighteen new "Big Eye" television cameras made by RCA, reported to be the first all new studio cameras since the advent of TV, have been ordered by ABC-TV. The new camera utilizes a four and one-half inch image orthicon tube instead of the three-inch tube now in common use.

Frank Marx, ABC engineering vice president, noted that ABC-TV will be the first network to have and use the new camera.

Technical topics...

New tubes - General Electric Co., Los Angeles, has introduced two new television tubes—ZL-7802 and ZL-7803—designed for more efficient video taping and special application colorcasting, respectively. The ZL-7803 produces a flatter field and provides, GE says, an excellent landing, shading and match in color cameras using three image orthicons. The ZL-7803 provides high quality in the taping of studio pick-ups without the necessity of using more expensive color tubes.

Automation - KIRO Seattle, Wash., plans to automate its broadcast operations with a remote control system made by Continental Electronics Manufacturing Co., Dallas. The station also is buying a 10 kw Continental transmitter to use as stand by equipment and for Conelrad broadcasting.

Stock purchase - Rohn Manufacturing Co., Peoria, Ill., has announced the purchase of the assets of Alprodo, Memphis, Tenn. The rigid-tube product line of towers and allied equipment of Alprodo will continue to be manufactured and sold by Rohn.

New product - Prodelin Inc., Kearny, N.J., designer and manufacturer of antennas and transmission line systems, is now producing a new foam polyethylene insulated, aluminum sheathed, coaxial transmission line called Spiral-O-foam. It is designed for low-loss broadband performance. More information is available by writing to the company at 307 Bergan Ave, Kearny, N.J.

Multiplex generators - RCA has made the first shipment of its multiplex generator units to WQXR-FM New York; WDTM Detroit; KLSN Seattle; KIXL Dallas, and WUPY Lynn, Mass. The generator, which may be used with any standard RCA FM transmitter, will be ready for volume shipment in October.

Sound from Goldwyn - Samuel Goldwyn Studios, Hollywood, notes it has developed a lightweight, portable magnetic tape recorder for use both in studio and location sound recording. Goldwyn officials claim it gives "absolute fidelity without weight."

Restraining order - Admiral Corp., Chicago, has obtained a restraining order from the U.S. District Court in New York to stop distribution in this country of Japanese-made transistor radios bearing the name of "Admiral." The order prohibits Mar-Lin Enterprises Inc., New York, from importing the sets. Admiral also is seeking treble damages for trademark infringement. The American firm's trademark is registered in Japan as well as other foreign countries. Admiral has been fighting the Japanese-imports and conducting a "Buy American" campaign for two years.

Tv set shipments down 6%

Shipments of home TV sets by manufacturers in 1960 totaled 5.6 million units valued at $775 million, a drop of 6% in quantity and 5% in value from 1959, according to the U.S. Census Bureau. The production of home radio receivers (except radio-phonograph combinations) totaled 9,763,000 units. Of these, 584,000 were am-fm and fm-only. The radio-phonograph combinations included 256,000 with am-fm tuning. Auto radios totaled 5,959,000 units. The output of clock radios (am and am-fm) totaled 2,569,000 units.
BBG'S CHAIRMAN CHANGES HIS MIND

CBC-TV affiliates can't carry shows from second network

Dr. Andrew Stewart, chairman of the Canadian Board of Broadcast Governors reversed fields in testimony June 20 before the Parliamentary Committee on Broadcasting. The previous week he had proposed that Canadian Broadcasting Corp. affiliates be allowed to use non-reserved CBC network time to carry programs of the new CTV Network. But Dr. Stewart changed his mind after CBC President Al Oiumet appeared before the committee. Now, Dr. Stewart would forbid CBC stations from carrying any CTV Network programs.

In his appearance before the Parliamentary Committee, Mr. Oiumet claimed that CBC stations carrying TV programs of a competitive network would split the CBC network.

Dr. Stewart also told the committee that applications for temporary networks of independent tv stations should be heard by the full BBG or its executive committee if the network applied for would be of two-to-six months in duration. Temporary network applications for less than two-months duration would be handled by the chairman or his representative.

C CBC Opposes • The request of CHCH-TV Hamilton, Ont., that it be allowed to drop its CBC-TV network affiliation brought strong opposition from the government-owned network at the BBG public hearing which opened June 20 in Ottawa.

Mr. Oiumet asked that the CHCH-TV application be deferred for a year as it would leave 50,000 homes out of CBC-TV's coverage. He felt that CHCH-TV would actually become a third Toronto station since it is only 40 miles from Toronto. He intimated that national sponsors might drop CBC-TV in the heavily populated Toronto-Hamilton area if the station severed its network affiliation. Last year, he said, one network sponsor dropped out when CHCH-TV was permitted to carry a hockey broadcast instead of the regular network program. CBC operates CBLT (TV) Toronto.

Ken Soble, CHCH-TV's president, told the board that six stations in the Toronto area were CBC-TV affiliates, all carrying the same programs. This practice, he said, gave viewers little choice in programs. He said that dropped CBC-TV programs would not harm his area as it would be adequately served by Toronto, London and Kitchener stations. CHCH-TV would produce new live programs, which would also be sold to other independent stations. He said he had no present plans for joining the new CTV Network.

Mr. Oiumet also opposed the request of CJSS-TV Cornwall, Ont., to drop out of CBC-TV. The station claimed heavy financial losses because of its network affiliation.

In a third dissent, Mr. Oiumet opposed the licensing of a second French-language television station in Quebec City, applied for by CJLR Quebec. Mr. Oiumet said CBC wanted to open its own tv station at Quebec City. CJLR spokesman Jacques Laroche told the BBG he would develop local live shows and carry programs from CFTM-TV Montreal (independent Montreal French-language station).

Changing Hands • The BBG also heard testimony from applicants desiring to purchase several radio properties:

Ontario Prime Minister Leslie Frost was one of a group of ten applying to purchase CKLY Lindsay for $47,500.

Frank Griffith, CKNW New Westminister, B. C., heads a group planning to purchase CJOB-AM-FM Winnipeg, Man., for $875,000.

Lloyd Moffat, CKY Winnipeg, wants to buy CKLG North Vancouver, B. C., for $222,000. He also wants to sell CKY to Lions Gate Broadcasting Ltd., purchaser of CKLG for $428,000. Mr. Moffat stated he would operate both stations as one entity with separate rate cards. He is also treasurer of CJAY-

RFE begins 12th year

Radio Free Europe will start its 12th year of broadcasting to East Europe tomorrow (Tuesday) with the largest audience in its history, according to John Richardson Jr., president of the Europe Free Committee.

Since RFE first came into being, registered radio sets in the area it serves have increased from 4.2 million to more than 11.8 million. It has been estimated that a radio set is now owned by more than half of the total number of families in Czechoslovakia, Hungary, Poland, Bulgaria and Romania.

Eee Yii, Eee Yii,
Ohhhh

You'll find more than just a moo-moo here and a quack-quack there in the growing Greenville-Washington Market. In 1959, one-half of the state's Billion Dollar Farm income was in this market dominated by WNCT and WITN. Take a close look at all the fertile facts before planning your next campaign. Avails and details are yours for the asking.

Strange buys Dominion

Dominion Broadcasting Co., Toronto, Ont., program and commercial radio and television advertising producers, founded 30 years ago by Hal Williams, has been sold to Strange Enterprises Ltd., headed by Cy Strange, radio account executive of the station representation firm Stovin-Byles Ltd., Toronto. Dominion Broadcasting will continue in business at a new address, 12 Shuter St., Toronto, with Cy Strange as president and Hal Williams as chairman of the board.

Abroad in brief...

Rep appointment - CKOY Ottawa, Ont., appoints All-Canada Radio & Television Ltd., Toronto, as exclusive representative.

New home - CFCF-TV Montreal (ch. 12) moved to a new building constructed at a cost of approximately $1.5 million on June 9. The station has been on the air for four months, and had operated from temporary quarters. The station is owned by Canadian Marconi Co. and Richard Misener is general manager. Its national representative in the U.S. is Weed Television Corp. Charles Michelson Inc., New York, is U.S. program buying representative.

Gamble terms British ad tax ‘discriminatory’

Advertisers in the U.S. must regard the 10% tax now in effect on all television advertising in the United Kingdom as inherently a discriminatory tax.

This is a "message" Frederic R. Gamble, president of the American Assn. of Advertising Agencies, has for AAAA members upon his return from a five-week, seven-country tour during which he visited eight principal cities of Europe. Mr. Gamble met with a group of newsmen at 4A offices in New York last week.

Mr. Gamble outlined a three-part report which he delivered earlier to the AAAA board of directors. The report dealt with general observations of advertising organizations and the economy of Europe, with progress made in preparation of the AAAA's second international meeting (April 23-May 4, 1962) and with the TV advertising tax in the UK.

Discriminatory Aspect - Mr. Gamble outlined the problem of the tax, which went into effect on May 1, 1961, as one of discrimination that is not recognized as such in the United Kingdom. There is but limited opposition, he found, with the Conservative, Labor and Liberal parties supporting the tax and the government pleased with its collection. It is collected from the 12 programmers licensed to program commercial TV in the UK (a licensed private monopoly that is highly profitable, he emphasized, referring to the now widely quoted remark of one programmer that a license is tantamount to "authorization to print money.")

He thought authorization of a second commercial TV service in the country conceivably would reduce profits of the individual programmers and thus work toward deleting the tax. He said the levy was passed on to the advertiser, that commercial TV people in the UK do not hesitate to "push up" rates, and that the agency commission becomes reduced in the proportion to the higher costs forced by taxation.

But, Mr. Gamble warned, there would appear little likelihood that commission rates might be raised on the program companies, that advertising in general is handicapped by not being "well regarded" in the UK and that knowable Britons have mixed reaction ranging from a feeling that once imposed the tax will never come off to a prediction that it will be repealed at the year end. It is estimated the tax will bring in at least $20 million in yearly revenue.

The international conclave in the U.S. in the spring will run concurrently with the 4A's annual general conference, and foreign delegates will meet in New York, White Sulphur Springs, W. Va., and in Washington, D.C. About 90 delegates from abroad are expected to attend.

Canadian Version of RAB Formed

Radio Sales Bureau to give stations aid in time sales

Formation of Radio Sales Bureau, sponsored by the Canadian Assn. of Broadcasters, was announced last week. The new sales organization will have functions similar to the Radio Advertising Bureau in the U.S. with the prime purpose of rendering sales assistance to radio stations at the local level.

Appointment of Charles G. Hoffman as president of the new bureau was also announced. He will headquarter in Toronto.

The new sales organization follows almost two years of research by a committee of the CAB under Allan Waters, owner of CHUM-CHUM, Toronto, Ont., and CAB vice-president for radio.

Mr. Hoffman has had experience in radio as executive vice-president for a number of years of the Bureau of Broadcast Measurement, Toronto, an industry-supported audience research organization. He has also been director for four years of the Canadian government's International Trade Fair, and has been in personnel selection work.

In announcing the appointment, Mr. Waters stated that "the bureau will include top level meetings with leaders of Canadian industry in an effort to learn how radio can best serve their interests; meetings with advertising agencies to determine how radio can earn a greater share of the responsibility for selling to Canadian consumers; and meetings with heads of individual Canadian radio stations to help them create more aggressive and meaningful sales campaigns at both the local and national level."

Don Jamieson, CJON-AM-TV St. John's, Nfld., and president of CAB this year, stressed that the aims and objectives of the bureau will be directed along every avenue where it is felt radio can offer tangible benefits.

Bill Byles, president of Stovin-Byles Ltd., Toronto, and of Station Representatives Assn., stated that a complete program of information will be undertaken to bring an entirely new group of advertisers into the pale of successful radio users.

Each CAB member station will be able to call on the Radio Sales Bureau for ideas to help realize the full potential of his local market, and to use the resources of a full staff of researchers and creative idea men to help solve any sales problems. There will also be a department to assist stations in the selection and training of sales personnel.

The bureau will serve as a clearing house for the exchange of successful sales and promotion ideas from member stations.

Mr. Hoffman

TV Winnipeg.
CJBV Vernon, B. C., and CJOIC Lethbridge, Alta., asked permission to sell to Selkirk Holdings Ltd., for $438,200.
**FATES & FORTUNES**

**BROADCAST ADVERTISING**

Jim Beach, formerly vp in charge of ABC-TV central division, Chicago, to Foote, Cone & Belding there as broadcast supervisor. He will work on Johnson's Wax account among others. Mr. Beach had been with ABC since 1953.

Stanley E. Perlmeter named executive vp of Bozell & Jacobs, Omaha, Neb. He has been assistant to president since 1957 and vp since 1952. Albert R. Busch Jr. and Richard Sullivan named vps of Bozell & Jacobs, Omaha. Mr. Busch has been account executive with agency for past five years. Mr. Sullivan formerly was creative director and has held similar positions with Allen & Reynolds, Omaha, and W. D. Lyon Co., Cedar Rapids, Iowa.

**AAW officers**

Lee Fondren, station manager and director of sales for KLZ Denver, elected president of Advertising Assn. of The West for coming year at annual AAW convention in Seattle (see story this issue). Other AAW officers are: Robert Hemmings, Smith & Hemmings, Los Angeles, senior vp; Josephine Brooker, Buttreys Dept. Store, Great Falls, Mont., vp at large; Walter Terry, Johnson & Lewis, San Francisco, secretary; Herbert L. Price, Newspaper Agency Corp., Salt Lake City, treasurer.

Harry B. Wasserman, vp and director of sales, Bymart-Tintair, N. Y., named vp senior brands manager, Lanolin Plus, that city.

Sylvester J. Cleary, formerly marketing coordinator at The Mennen Co., Morristown, N. J., promoted to merchandising manager. He is succeeded by Donald L. Gallagher.

Wilson Goss elected vp of Joseph F. Cavanaugh Ltd., Milwaukee and general manager of new Dallas offices. Hilery

**Which agency has the best-groomed men?**

We assume Norman, Craig & Kummel wins heads down. Judging by the amount of hair tonic these fellows sell over WICE radio — and figuring on a proportionate use of free samples back at the shop — NC&K gents must look handsome all day — and without grease.

We wish they'd send us a complimentary bottle. After 24 hours of broadcasting pop music, news, public service shows and fine commercials like NC&K's, we don't always look so good. Ahh, but that's the price we pay for being the live-wire station in Providence.

Try us soon. For hair slickum or whatever.

**Maxon appoints four new vps**

Announcement has been made by Maxon Inc., Detroit, of the appointment of four new vps. They are: Perce C. Beatty, media director, Detroit; William M. Lewis, broadcast production head; Dorothy Adams, account supervisor; Thomas P. McGuire, media director, all New York. Lou R. Maxon, agency president, made the appointments.

Mr. Beatty  
Mr. McGuire  
Miss Adams  
Mr. Lewis

**Which agency has the best-groomed men?**

operator of station and wholly-owned
subsidiary of Storer Broadcasting Co.
Mr. Campbell previously was vp, RKO
Teleradio Pictures in charge of Pacific
Coast sales for RKO radio and tv prop-
erties.

Robert E. Mitchell, formerly vp and
general manager of WINZ Miami, ap-
pointed general sales manager of
WGBS, that city. Norman Palmer,
national sales manager of WGBS-AM-
FM, named local sales representative
for WJW-AM-FM-TV Cleveland.

Heyward L. Siddons appointed pro-
gram-sales coordinator for Protestant
Radio & Television Center. Mr. Sid-
dons formerly was tv program director
for KOA-AM-TV Denver and later, ac-
count executive with National Telefilms
Assoc.

Ogden L. Prestholdt named director of
CBS Radio's newly formed Engineer-
ing Dept. He formerly was manager of
radio frequency measurements and
analysis for CBS-TV. Other appoint-
ments: Henry Korke to head special projects; Arthur G. Peck, direct-
or of network operations, appointed
director of broadcast operations; Mason
Escher promoted to manager of tech-
nical services; and Harry Gleaser
named manager of broadcast operations.

manager of WHO-AM-FM-TV Des
Moines, Iowa, retires.

Robert F. Hefflin, formerly assistant
treasurer, Century Chemical Corp.,
N. Y., joins Adam Young Co., that city, in
similar capacity.

John D. Gibbs, general manager of
KQV Pittsburgh, elected vp of licensee
Allegheny Broadcasting Inc., subsidiary of
ABC-Paramount Theatres Inc. Mr.
Gibbs has been associated with station
for 16 years, joining as news reporter
in 1945. Before becoming general man-
ger in March 1960, Mr. Gibbs was
program and sales coordinator.

Oliver Allen named coordinating di-
rector and production manager of
WOAK Atlanta and WRMA Montgomery.
Mr. Allen formerly was program
director of WRAP Norfolk, Va.

Bob Martin, program director of
KPHO-TV Phoenix, assumes additional
duties of director of programming, suc-
ceeding Al Rau, who becomes executive
in Phoenix publishing firm. Mr. Martin
previously served as manager of KPHO
radio.

William R. Furnell, formerly of
KCRA-TV Sacramento sales staff, joins
Robert E. Eastman & Co., national ra-
dio representative, San Francisco, in
same capacity. Jack Kabateck, who
was with Torbert, Allen & Crane, station
representative, San Francisco, joins Los
Angeles office.

William P. Hessian Jr. joins KPIX
(TV) San Francisco as account execu-
tive, replacing Robert M. Miggins,
promoted to assistant sales manager. Mr.
Hessian formerly was sales manager at
KSBW-AM-FM-TV Salinas, Calif.

these two agreements, for international
purposes there is no distinction between
class III-A and class III-B regional
tions, both receiving same degree of
tection.

sta-

pro-

New

note to Sec. 3.183(b) provides that,
agreement contemplated by NARBA
concerning standards for groundwave measurements has not been reached, and there
are no arrangements with any North American country other than Canada for reciprocal consideration of such measurements, except where Canada is involved
there will be no use of groundwave measurements to establish that interference
toward foreign country or station therein
is less than that indicated by applicable
ground conductivity maps. Where Canada
or Canadian station is involved, measurements will be referred to Canadian government and considered by commission if regarded by Canada as acceptable to establish
lesser degree of interference.
since

New rules contain substantially same provisions as now concerning consideration of
application by class IV stations on local

chs. to operate with up to one kw power
daytime, even though under NARBA ceiling on class IV stations is 250 w both daytime and nighttime. Such applications will
be considered where proposed operation
would not cause objectionable interference
to foreign station and where applying station is not located within certain areas
near Mexican border or in Florida close to
Cuba.
It should be noted that rule amendment
permitting 5 kw daytime operation on six
Mexican I-A chs. involved does not and is^
not intended to imply that increase in
power to 5 kw is in any way automatic,
or that any right or privilege to use of 5kw is conveyed to existing or prospective
licensees. Operation with power in excess
of 1 kw may be granted, but only on basis
normal application reached for processing
and processed in accordance with normal
procedures, giving full weight to any interference which may be caused to or received
from existing and proposed operations on
same and adjacent chs. Action June 21.

Routine roundup
Changes Reflect NARBA and U. S.
Mexico Am Agreements
By report and order, commission
amended, effective July 5, parts 1 and 3 of

ACTIONS ON MOTIONS
By Chairman Newton N. Minow

Rule

its rules to bring their provisions concerning am bcstg. in conformity with 1950
North American Regional Bcstg. Agreement
(NARBA) which became effective April 19,
1960, with respect to Canada, Cuba and
United States, and 1957 United StatesMexican bcstg. agreement, which entered
into force June 9, 1961. Principal changes
are:
Present Sec. 1.352, which provides in
general that applications for facilities inconsistent with
or U.S. -Mexicanagreement will be placed in pending file
without further action, is amended to provide that such applications will be dis-

NARBA

missed without consideration (or, if not already filed, will not be accepted for filing),
except where inconsistency is only with
respect to country which has signed but
not ratified NARBA (Bahama Islands and
Jamaica, and Dominican Republic), in
which case they will continue to be handled
generally as they are at present. Applications for facilities which would cause objectionable interference to duly notified Haitian

station will also be handled as at present.
Sec. 3.28 is amended along same line.
Notes to Sees. 3.25, 3.26, and 3.27 are
amended to reflect provisions of
with respect to specific negotiated assignments which are not provided for under
general terms of these agreements for
channels involved.
Sec. 3.25(d) is amended so as to reflect
two changes resulting from U.S. -Mexican
agreement: (1) except in certain areas near
Mexican border, U. S. class II stations on
Mexican I-A chs. other than 540 kc (daytime only) may now operate with up to 5
kw power, instead of present ceiling of one
kw; (2) except for specific U. S. class II
unlimited-time assignments set forth in the
agreement, there will be no U. S. unlimited
stations on Mexican I-A channels even outside of continental U. S.
New subsection 3.25(e) is incorporated,
to provide for dual status of 540 kc, on
accords priority for
which the
class I-A stations to Canada and U. S.Mexican agreement accords similar priority
to
protection)

BROADCASTING,

July 3, 196t


This new Collins designed and manufactured AM transmitter features unparalleled accessibility: the RF and audio chassis swing out and the power supply tilts up to expose all components. Its bold, clean-cut appearance is in keeping with its advanced interior. It's the new Collins 1,000/500/250 watt 20V-3 AM Transmitter.

COPPER RADO COMPANY • CEDAR RAPIDS, IOWA • DALLAS, TEXAS • NEWPORT BEACH, CALIF.

features: stable crystals to eliminate crystal skew • conservatively-rated components • thermal time-delay circuitry • automatic voltage sequencing • air forced directly on tubes • For information, contact your Collins sales engineer, or write direct.

Don't let the nylon and lipsticks fool you—
Americans are eating better
at much lower cost

Food Costs Have Advanced Much Less Than All Prices;
The Labor Cost of Food Has Dropped Substantially

_Food Prices Are Up Less Than Consumer Price Index_

The United States Department of Agriculture reports that 1960 retail food prices—of those foods purchased for preparation at home—were about one-sixth higher than the average in 1947-49, but the Consumer Price Index—the average of prices paid by consumers for all goods and services—was up by more than one-fourth.

"Declining food prices moderated the rise in the Price Index during part of this period," USDA reports in a new publication called FOOD COSTS. "The slower rise in retail food prices than in the Price Index resulted entirely from the decline in farm prices, since charges for marketing these products increased at a faster rate than the Price Index."

In 1949, the food marketing bill, covering all charges for marketing food products originating on American farms and sold to civilian consumers in this country, totaled 9 billion dollars. In 1960 the total marketing bill was 30 billion dollars. The 31 billion dollar increase was broken down this way: 7.5 billion dollars covered additional marketing services performed—the "built-in mail order" features; 15 billion dollars for the rise in cost levels; and 8.5 billion dollars for the added volume of foods handled. The actual quantity of food handled increased 53% from 1940 to 1960 while the population increased only 35% during this same period.

_Consumers Spend Less Of Their Income For Food_

In 1960 consumers spent an average of $394 per person for food, up from an average of $319 per person in the 1947-49 period. However, the 1960 expenditure represented only 29% of the disposable income available to consumers, compared with 26% of disposable income used for food in 1947-49. "Thus," says USDA, "the food bill did not rise as much as disposable income, though consumers were shifting to more expensive foods and were buying more marketing services. Retail prices did not increase as fast as disposable income per person."

In 1960 a factory worker was getting a great deal more food for an hour of his toil than he did in 1947-49. In 1960, for example, an hour of factory labor, on the average, would buy 8.1 quarts of milk, compared with 6.5 quarts for an hour of labor in 1947-49. An hour of factory labor in 1960 bought 2.5 pounds of choice grade beef, up from 1.9 pounds in 1947-49. Twice as many eggs could be purchased for an hour of labor in 1960 than in 1947-49.

_Consumers Get More Variety, Have Much Less Work To Do_

Because of many technological advances in farming and in food processing and distribution American consumers today have the greatest variety of foods in human history, and there is much less work involved in preparing these foods. More foods are packaged for shipment to all areas of the country. Seasonality is no longer a limiting factor for most types of foods. The variety of foods is available in many different package sizes to meet varying consumer needs. Many products today are ready for immediate cook-

ing when the homemaker gets them into her kitchen, reducing the number of hours of food preparation in the home.

Dairy farmers are proud to point out that milk and such milk products as butter, ice cream, and cheese are the original convenience, no-waste foods, with just about as much "built-in mail order" as anyone could possibly want. About all a mail order could do to make milk consumption easier is to drink the milk herself! The dairy industry provides these easy-to-use products at bargain prices, too, no matter how you make the comparison. Dairy products provide 28 percent of our total food supply, on a retail weight basis, but consumers pay only 19 cents out of the market basket dollar for these dairy foods. Being tops in nutritional values as well, dairy products provide to consumers just about as great a bargain as has ever been found in the food markets.

_Those "Hidden" Purchases Run Up The Food Bills_

As many a puzzled male shopper has learned, it often takes a map to find one's way through the modern food super market which has grown to rather tremendous proportions. Part of this growth has come through the sale of many non-food items which, much too often, are charged against the family grocery bill. Thus the "food" budget may be covering purchases of lipsticks, nylon hose, kitchen utensils, and encyclopedias which are great food for the mind but seldom easy to digest at the dinner table.

Because the American people today can buy a huge variety of healthful foods at a relatively low cost in terms of total income available, many more families today have income that is used to buy newspapers and magazines, radio and television sets, as well as better housing, more cars, more education for their children, and a host of other products of the factories and the service industries. Most of the people throughout the world today are still struggling merely to earn enough food to avoid hunger or even starvation.

Dairymen are proud of the role they have played in providing for Americans an agricultural abundance that no other nation in history has ever been able to match. That we do have some problems in balancing production and consumption of foods and fiber cannot, of course, be denied, but surely it is much more pleasant to face the problems of abundance than to have to meet the problem of how to avoid starvation for millions of people. Today starvation is a very real problem in Red China, for example. America is using its abundance to help the less fortunate people in our own country as well as those in other nations. That we have the resources to give this help should make all of us very grateful to live in this free land.

OUR RESPECTS to William Turney Orr, Warner Brothers Pictures
We've reached the peak of action-adventure shows

The chances are that we've reached the peak of action-adventure shows on television and that a trend toward another type of tv entertainment will show up in the next year or two, William T. Orr, vice president in charge of production for Warner Brothers Pictures, said last week.

"There are cycles in all forms of entertainment," he observed. "If one type scores a big success, it's pretty sure to be imitated closely and widely. But once the public gets too much of it and becomes surfeited they stop watching and the producer knows it's time for a change."

"At one time there were lots of live psychological dramas on tv (and I don't recall any of our lawmakers complaining about too much public exposure of our psyches). Variety shows were tremendously popular, but they've faded away until only the best is left. Now we've a lot of action-adventure films, but the picture will change of its own accord before the legislators get around to acting. You can't legislate public taste and you don't have to."

Six Years of WB-TV • For the past six years Mr. Orr has headed Warner Brothers television activity. It began with the 1955-56 season, when Warner Brothers Presents went on ABC-TV for an hour each Tuesday evening. This fall, Warner Brothers will have nine shows on the air, all on ABC-TV. "We have a fine relationship," Mr. Orr commented. "It happens that all of our programs which have been seen on tv to date have been on this network, although we are not exclusively pacted to them."

Warner Brothers and ABC-TV may claim to have had more than a slight influence on program trends during their six-year association. Warner Brothers Presents was a three-in-one affair with segments of the individual series rotating in three-week cycles. One of them, Cheyenne, was more popular than the other two, which were first diminished, then dropped. Other westerns were produced by Warners for ABC-TV--Sugarfoot, Colt .45, Maverick (which broke up the Ed Sullivan-Steve Allen feud by taking the play away from both of them), Lawman and Bronco.

Then came 77 Sunset Strip as the first of a procession of action adventure shows that today includes Surfside 6, The Roaring 20's and Hawaiian Eye. Meanwhile, ABC-TV rose from a poor third to first in overall evening audience and no one questions that the programs created under Mr. Orr's supervision had more than a little to do with it.

William Turney Orr was born Sept. 27, 1917, in New York City. He attended the Coburn School for Boys at Miami Beach, Fla., Rumsey Hall in Connecticut and Philips Exeter Academy. But in the mid-30's Bill left Philip's Exeter and New England and his next academic appearance is as a student at Ben Bard's School of Drama in Beverly Hills, Calif. After what he calls some "undistinguished roles in some undistinguished films," he got a part in "Meet the People," a musical revue, where he was seen by a talent scout and signed to a long term contract with Warner Brothers. For the next year he worked all day at the studio, appeared on the stage each night and lost 15 pounds.

Actor-Officer-Producer • Bill spent four years of World War II in the Army Air Force. He went in as an actor assigned to the AAF radio unit, attended Officer Candidates School in Miami Beach ("It took a war to get me back to Florida") and wound up his military career as a producer of training films and documentaries for the Air Force at the Hal Roach Studios.

In 1945, Bill married Joy Page, step-daughter of Jack L. Warner. "I had some trepidation about returning to Warner Brothers, but after I missed out on two jobs I was up for at other places I went back. I was a trainee, I guess, although they never did say exactly what my job was." After eight months he quit and went to New York, where he acted in vaudeville and night clubs and his wife did a couple of Broadway plays.

But vaudeville was dying and after a year the Orrs returned to California and Bill went back to Warners as a talent coordinator, "a job I dreamed up for myself to help new talent get the best advantage. From coordinator Bill was promoted to executive in charge of talent for the studio and then made assistant to Stephen Trilling, Mr. Warner's executive assistant for production. In the summer of 1955 he was put in charge of the studio's then embryonic tv activities. On March 1, 1961, supervision of all theatrical motion picture production was added to his responsibilities. Meanwhile, in November 1959, Mr. Orr had been elected a vice president of Warner Brothers.

A Great Job • Six years of television have not dampened Bill Orr's interest in the medium nor his enthusiasm about it.

"Despite all the criticism of television," he said soberly, "I feel that in general the American public has been presented with a wonderful variety of entertainment, information and education. In contrast to the countries with government-controlled programming and small audiences, we attract viewers with entertainment and they're there, available for the more serious kind of program. When you look at the tremendous volume of programming that's been put on tv in a few short years, you have to admit that a great job has been done. It took a lot of people with a lot of dedication and sweat to do it, but the results are worth it."

The Orrs and their three youngsters--Diane, 12; Anthony, 11; and Gregory, 6, live in Beverly Hills. With a pack of synopses to be read each evening, Bill has given up bridge and poker ("A gang from the studio used to have a weekly poker session and I tried to play and read synopses at the same time but it got to be too expensive.")

"If children are being hurt by tv, they're not like my tribe," Mr. Orr commented. "My youngsters are not hurt at all, so far as I can see, but they're certainly better informed because of tv. I'm sure my six-year-old knows more about jets and missiles than I do. As for crime shows, they're not up late enough to see them, and I doubt that they'd watch them if they were up. A few weeks ago, when I wanted to catch Maverick, I found one set tuned to Dennis the Menace, one to Shirley Temple and a third to a ballgame. Fortunately for me we have four sets."

WB's Orr Can't legislate public taste

BROADCASTING, July 3, 1961 93
Circus maximus

WE'VE always said that government couldn't do as good a job of programming as private broadcasters can do, but now we're not so sure. The FCC road show that closed last Thursday in New York after a smash run of nearly two weeks was as slick a piece of theatrical planning as is apt to be seen anywhere this season. It was carefully staged to make the good guys look their best and the bad guys look their worst—the good guys being writers and producers and the bad guys being television networks, advertisers and agencies. Not by accident did the good guys get the fattest parts and therefore the biggest newspaper notices.

And to avoid any possibility that the audience would misunderstand who were the heroes and who the villains, the FCC reserved the curtain line for itself. In a closing statement read by the trial attorney and previously authorized by the commissioners, the FCC warned it would brook no retaliation against the witnesses. Thus the hearings ended with the audience convinced (or so the FCC must hope) that broadcasters, advertisers and agencies are waiting for the chance to shoot any writer in the back the minute the sheriff is out of sight.

In the flood of testimony delivered to the FCC in New York there were sensible criticisms and perceptive observations. But they were lost in the emotional outbursts that attracted all the attention. It was not an exchange of views. It was a series of monologues presented in an order to guarantee that the least rational got the most publicity. The FCC may say that the testimony will fall into perspective when the whole record is compiled, but that argument is fatuous. The whole record will never be read by anyone but a few FCC functionaries and network lawyers.

The New York road show may have been the best device to obtain maximum dramatic effect, but it was not the way to conduct a serious study of the intricacies of television network program practices. The prize the FCC was after was headlines, not information. And the FCC got its prize.

Television may have deficiencies, and indeed it does, but it is not an animal to be baited by every bureaucrat who happens to be given a spear.

Dawdling with survival

WHILE Congress, the FCC, pressure groups and the nation's press waste appalling amounts of time, taxpayer's money and white space in aimless debate over crime and violence programming on the air, "crimes" of vastly greater import are being perpetrated by government in communications.

Both the executive and the legislative branches are dawdling in areas that could affect survival of our democracy in the struggle against communism.

One is the failure of the executive branch to move swiftly in space communications because of intra-government bickering over who should control satellite communications. The other is congressional inertia in providing the USIA with adequate funds and means to counter the communist propaganda campaigns throughout the world.

In space communications, the Soviet dictatorship can be presumed to be moving ahead full-tilt while our FCC, our Justice Department and our State Department argue over who should control the satellites that will be used as relay stations in space for telephone, telegraph and ultimately television. Last week President Kennedy asked the Federal Space Council, headed by Vice President Johnson, to undertake a policy study into how a satellite system can be made operative swiftly. He asked for recommendations on "the nature and diversity of ownership and operation," obviously not even excluding government ownership.

We'll string along with Brig. Gen. David Sarnoff, RCA chairman, who told the National Press Club last week that the satellite ownership issue is far less important now than the adoption "of the right system at the earliest possible moment."

Satellite development should not become embroiled in intra-government rivalry, budget controversies or congressional justifications that inevitably would beset it if government assumed operation. Besides, it isn't the American way.

There is the concurrent task of allocation of frequencies for space communications. This vital problem now is being thoroughly studied so that the U. S. position may be established by October 1962, preparatory to the 1963 space conference of the International Telecommunications Union in Geneva, when we again battle it out with the Soviet. Heading our allocations team is FCC Commissioner T. A. M. Craven, an eminent engineer and a tough negotiator. But before that ITU meeting convenes the policy on ownership and operation of our satellite system must be resolved. The Soviet doesn't have that problem because everything is done by the Kremlin dictatorship.

The USIA crisis is not new. USIA has never been popular with Congress. That, however, does not lessen the seriousness of our plight in the propaganda war nor mitigate the need for more extensive and effective Voice of America operations. With 660 external broadcast hours per week, we are in fourth place—behind the Soviet with 1,000 hours, Communist China with 680 hours and, even more embarrassing, the United Arab Republic with 670 hours.

USIA wants $2,400,000 more to step up its broadcasts to Latin America, to Southeast Asia and to Africa, as well as to dispatch "packaged" programs to be broadcast by local stations. The amount involved wouldn't buy annual sponsorship of a prime half-hour on one of our tv networks with top talent.

We wonder how Chairman Dodd of the Senate Juvenile Delinquency Subcommittee, Chairman Minow of the FCC, the sundry tv writers, directors and producers and the redoubtable pundits of the press equate their silly railings about tv programming with the stark realities of the communications problems that could involve the fate of the nation and of mankind.

We confess agreement with Chairman Minow on one count. Space communication is the FCC's most important problem.
CREATIVITY... wfmy-tv creates sales in the nation's 44th market*

This intricate mosaic based on the sculpture of Queen Nefertite is an example of one of the oldest known forms of art... the creation of a design from many small pieces of stone.

For the creation of sales, depend on WFMY-TV to bring together 2.3 million viewers and produce results for you in the nation's 44th TV market.*

"NOW IN OUR 12TH YEAR OF SERVICE"

Represented by Harrington, Righter and Parsons, Inc.
All TTC stations base their operations on deep, penetrating news coverage...especially on the local level. Now 54 men and women in the 7 TTC newsrooms are united into a team by this new TTC red-phone hookup. With stations on each coast and in Mid-America, TTC newsrooms will get first hand reports--first--from any area.

- The point of all this is not just to trumpet about what big operators we are in news. The point is that a large part of the selling force of TTC stations is generated by this news policy...and we can prove it.

- TTC stations will continue to concentrate on substance in programming, because we believe real substance is the only quality that will continue to support broadcast sales long after the fads have faded out.

Channel 4, Dallas-Ft. Worth

MAXIMUM POWER TV-Twin to KRLD radio 1080, CBS outlet with 50,000 watts.
**Tv allocations outlook**

It becomes more and more evident that tv's eventual operation will be dual vhf-uhf system, retaining all 82 channels (12 v's, 70 u's). Although official announcement can't come until after New York City uhf experiments, slated to end in 1962, there's sufficient basis now to conclude that all-uhf system is impractical and that vhf's 12 channels cannot accommodate full competitive nationwide service of caliber envisaged in law. End result, insiders believe, must be intermixed service except where uhf islands exists.

If this philosophy holds, eventual structure will be vhf's doing regional or "area" coverage jobs, while uhf's, in increasing numbers, will be employed for local or immediate market service and for constantly expanding noncommercial educational service.

**Key to development, of course, will be all-hand receiver, which manufacturers are reluctant to turn out in great numbers until demand creates a market.**

**Budweiser back**

National Telefilm Assoc., which has been beset by many financial and organizational woes in recent months, is sighting at least one "silver lining." Word is that its successful half-hour series, The Third Man, will go into second-year production and distribution with Anheuser-Busch Inc. (Budweiser Beer), St. Louis, again bank-rolling program on national spot basis in more than 100 markets. Agency is D'Arcy Adv., St. Louis.

**Minow's man**

Dean Roscoe Barrow was retained again by FCC as consultant to network study staff (see Week's Headliners, page 10) at direct behest of Chairman Newton N. Minow. Chairman obtained approval of other members on proposal despite questions in some quarters on necessity and wisdom of move.

He will be paid $50 per day while actually on FCC job, plus either $15 or $25 per day subsistence allowance when away from his home. Under law, consultant on intermittent basis, as he will be, can work maximum of 130 days in any given year. If this is exceeded, however, commission can in certain circumstances place Dean Barrow on temporary employe basis, as was done during his previous tenure. He will spend considerable portion of remainder of summer at FCC and serve on part-time basis after resumption of fall school term.

**Three-year rule**

Temperament of FCC these days is such that even though rule isn't on books, it would take long hard look at any sale by station owner who has held license less than three years, unless there are extenuating circumstances. Notion is that FCC by majority vote would set such station sale for hearing if there were not overweening reasons, such as death, sickness, financial plight, etc. FCC has considered, but not acted on, proposal that no transfers be approved unless licensee has held facility for statutory three-year period.

**New plans for Texaco?**

Benton & Bowles and Texaco are reviewing that advertiser's tv future. Account is new at B&B and bills some $12 million in tv (see page 30). Only definite decision thus far: Texaco will stick with Huntley-Brinkley on NBC-TV. Program already has been renewed for next season. But other—and new—tv routes can be expected (at one time Texaco was sponsor of original Milton Berle Show on tv and Ed Wynne's Firechief program on radio).

**Rogers to NAB?**

Sale by W. D. (Dub) Rogers of his major interest in Texas Telecasting Inc. (Broadcasting, July 3) has given rise to speculation as to next connection. Forty-one-year-old broadcaster, who has been prominently identified with national tv affairs (last past chairman of NAB Television Board, president of Television Pioneers and one of founders and former chairman of TvB) is among those reportedly being considered for executive vice presidency of NAB, newly created post under President LeRoy Collins.

Because of NAB rules, no broadcaster involved in station ownership can qualify for NAB employment, hence Mr. Rogers wouldn't be eligible until FCC approves sale of Rogers' properties to principals of KSAY Television Co., Wichita Falls, Tex.

Among others mentioned for NAB's No. 2 post are Dwight W. Martin, vice president and treasurer, WDSU Broadcasting Corp., New Orleans, present chairman of NAB Television Board, and Tom Bostic, mayor of Yakima and president-general manager of KIMA-AM-TV. Like Mr. Rogers, they are presently identified with ownership.

**Macbeth repeat**

Two-hour color film production of "Macbeth," televised on Hallmark Hall of Fame by NBC-TV last November, probably will be shown again in this country next season either as repeat on Hallmark program or in "art" movie houses. Tv repeat would virtually kill domestic market for distribution of film in movie theatres. But Hallmark, which put up half of original production money (see story, page 75), may push for it because of initial tv success (it won Hallmark five Emmy awards). Shakespearean conflict created is whether resulting good public relations from tv repeat is worth chance to recoup investment via theatre exploitation.

**Program protection**

Although broadcasters were rocked by sweeping conclusions of U. S. District Judge William T. Swigert in denying motion for summary judgment sought by Salt Lake City tv stations against catv in Twin Falls, Idaho (Broadcasting, July 3), ray of sunshine was seen by some observers. This is judge's implication that where programs are copyrighted, tv stations can impose requirements for permission or payment. If tv stations really want to deny programs to catv operations, this reasoning, they can copyright couple of local programs. As practical matter antenna operator then would be forced to seek pickup approval for whole schedule, it is asserted.

Broadcast attorneys are still studying ruling in Idaho signal rights case and have not decided yet exactly what next step might be. Decision invited tv station plaintiffs to seek injunction in trial, but warned they would have better case if program was copyrighted or shown by exclusive license.

**American Motors spot**

Odds are high that American Motors Corp. will increase its media budgeting for spot tv on behalf of Rambler cars for new model year. In past year, Rambler has been in and out of spot tv and has been using spot radio but agency, Geyer, Morey, Madden & Ballard, can be expected to recommend to clinent substantial boost in spot tv spending.
3 more TV markets will soon premiere these and over 200 other fabulous COLUMBIA POST-48's

This past week three more stations—KOIN-TV Portland, Oregon, WBTV Charlotte and KHVH-TV Honolulu—joined the rapidly growing list of stations that have acquired over 200 Columbia Post-1948 feature films for telecasting in their markets. Already viewers in markets such as New York, Chicago, Los Angeles, St. Louis, Philadelphia, Youngstown, Buffalo, etc., have greeted enthusiastically the telecasting of the first of these features. These great film masterpieces can work wonders in your market too! Call or write to Screen Gems, Inc., 711 Fifth Avenue, New York City. Plaza 1-4432.
WEEK IN BRIEF

The love lives of agencies and advertisers have been unusually fast and loose in the past six months, with the result that many millions in billings, big and little accounts, have changed agencies. See . . .

AGENCY SWITCHES IN MILLIONS . . . 27

Network television attracted 33 new converts during the past season and their combined gross time expenditures exceeded $5 million, it's shown by a special BROADCASTING survey. See . . .

NETWORK TV WINS 33 . . . 29

Not a minute of broadcast time would go unnoticed if the FCC adopts its rulemaking proposed last week for its program reporting forms. Broadcasters win some concessions, much paperwork. See . . .

CLOSER TAB ON EVERY MINUTE . . . 48

Tv holds its first place in hearts of food advertisers, with $4 million gain in network and spot for first quarter, Tvb figures show. The 1960 national-regional total: $277 million. See . . .

BIG FOOD ADVERTISERS IN TV . . . 38

Wempco keeps making and breaking new sales records in nine midwestern states by using regional radio to advertise Zonolite insulation products. The firm's also having tv successes. See . . .

HOW RADIO LIT A LIGHT . . . 40

It costs a lot to bring a jungle to Brooklyn and get top actors to people it, Talent Assoc.-Paramount Ltd. found in producing “The Power and the Glory” for CBS-Tv. The bill: $725,000. See . . .

WHERE THE MONEY'S GOING . . . 74

The star of the FCC's recent station renewal hearing in Kingstree, S. C., never took the stand, but if Charlie Walker had he might have captured bureaucratic hearts, had he run true to form. See . . .

HE LEARNED HIS LESSON . . . 60

Television didn't lie in presenting Samuel Yorty, the successful candidate in the Los Angeles mayoralty elections, and that's the reason he was elected, says his pr counsel, Irvin L. Edelstein. See . . .

BEST TV CANDIDATE WINS . . . 86

McCann-Erickson says it has found how to measure a tv station's audience outside its metropolitan area by projecting average viewing in such areas from that in metropolitan areas. See . . .

FRINGE VIEWING FORMULA . . . 32

The FCC's proposal to take ch. 10 in Miami from National Airlines and give it to L. B. Wilson Inc. because of the airine's off-the-record FCC contacts gets appeals court backing. See . . .

COURT BACKS FCC ON CH. 10 . . . 58

The FCC's muscle-bulging contest with the newest challenger in the who-has-authority-over-the-tv-towers field, the Federal Aviation Agency, continues. Three-member unit to make stand. See . . .

FCC TO BUCK ON TOWERS . . . 61

FCC Chairman Minow's plan to charge broadcasters for the privilege of doing business with that government agency is finding few champions where it counts: the White House and the Hill. See . . .

BROADCASTING, July 10, 1961
Most advertisers know KMTV is the only Omaha television station that also delivers Lincoln, Nebraska’s second largest market. We make this point again and again because it appeals to tightfisted timebuyers who like the idea of covering the greatest single concentration of Nebraska money and people with one buy.

The current Lincoln Nielsen (Mar. 61) proves our point again. It says KMTV leads the other Omaha stations in 187 quarter hours. Another Omaha station leads in 49. Another in only 39. The current Omaha Nielsen (June ‘61) tells a similar story: KMTV delivers more television homes in more quarter hours than any other Omaha station. Get two Nebraska markets with KMTV. Ask Petry. Ask anybody about KMTV-3, exclusive NBC for Omaha-Lincoln.

And remember. Omaha + Lincoln = KMTV.
WSTV Inc. challenges CATV use of signal

All-out legal battle is seen in filing by WSTV Inc. of $1 million damage suit against CATV system in Clarksburg and Fairmont, W. Va.

WSTV owns ch. 9 WSTV-TV Steubenville, Ohio, and ch. 12 WBAY-TV Clarksburg-Fairmont among other stations.

Suit, filed in U. S. District Court in Fairmont Thursday, charges cable company “plucks” ch. 9 signals from air without permission for rettransmission for fee over closed circuit. WSTV claims such action illegal interference in its contractual arrangements with NBC, CBS and film services. It alleges that CATV actions interfere with ability of WBOY-TV to render proper service to its community, including outlying areas not served by antenna company.

In many cases, plaintiff declared, antenna company has disconnected built-in antennas in subscriber’s TV receivers so it’s impossible for them to receive ch. 12 off air. It claimed also that electrical leakage from CATV cables disturbs ch. 12 reception in Clarksburg and Fairmont.

Both Clarksburg and Fairmont CATV is part of Fortnightly Corp. group, Fortnightly is headed by N. W. Levin. Clarksburg system feeds 8,300 customers: Fairmont, 5,000.

Both systems are also defendants in suit brought by United Artists charging unauthorized use of its film product. This suit is pending in New York federal court.

WSTV’s move came two weeks after ruling that TV stations have no inherent property right in their TV signals. This viewpoint was expressed by federal judge in suit by Salt Lake City TV stations against Twin Falls, Idaho, CATV operation (BROADCASTING, July 3).

FCC sets new deadline for Hartford pay TV

Deadline for beginning pay TV tests in Hartford, Conn., were extended by FCC to July 1, 1962. Commission, in announcement Friday, said request for extension by RKO General Inc. (BROADCASTING, July 3) included information warranting time extension. Previous deadline for commencement of Payvision trial was Aug. 23. Basic problem, RKO said, is lead time required by Zenith to tool up and begin production of decoders.

Delay in start of Hartford pay TV test will not affect TelePromTer Corp. plans for testing its Key TV system this year, according to President Irving B. Kahn.

He said development of TelePromTer system, which is distributed by cable and, therefore, not subject to FCC approval, is ahead of schedule.

New York test

WDHA (FM) Dover, N.J., was set to begin stereophonic multiplex broadcast test in New York metropolitan area Sunday (July 9), 1-6 a.m. WDHA claims to be first FM station in New York area to begin testing new Zenith-GE system approved by FCC last April. Station is using prototype generator. It operates on 105.5 mc.

• WTVI (TV) Fort Pierce, Fla.: Sold by Gene T. Dyer to Atlantic Broadcasting Co. for $175,795. Atlantic Broadcasting is headed by Isadore J. Fine, who with other Atlantic stockholders, owns KFEO-AM-TV St. Joseph and KLIK Jefferson City, both Missouri.
• WJPR Greenville, Miss.: Sold by Emmett Holmes McMurray Jr. and Frank Wilson Baldwin to Bruce H. Gresham and J. C. Noble for $165,000. Mr. Gresham has interest in WGCM Gulfport, Miss.
• KDLK Del Rio, Tex.: Sold by Don R. Howard to James D. Patterson and associates for $112,500.
• KOFA Yuma, Ariz.: Sold by T. R. Williams and associates to Paul C. Schafer and group for $105,000. Mr. Schafer controls KDOT Reno, Nev.

ANA opposes tax ban on defense contractors

Assn. of National Advertisers went on record Friday in opposition to defense appropriations bill language prohibiting defense contractors from using federal funds for advertising. In letter requesting permission to testify before Senate Defense Appropriations Subcommittee, ANA said present regulations covering amount of advertising by contractors provide “highly effective protection” for taxpayers.

ANA claimed proposal would cripple our economy and would destroy our mass communications structure during full or partial mobilization.

Bill (HR 7851), which has passed House, will be subject of Senate Defense Appropriations Subcommittee hearing today (Monday).

TvB approves pay plan

Television Bureau of Advertising and other media associations Friday (July 7) endorsed new method of payment to media beginning today by Geyer, Morey, Madden & Ballard Inc., New York advertising agency (see page 37). Norman E. Cash, president of TVB, said in letter to agency that he applauds “instant cash payment” plan as positive step to bring more efficiency into advertising for benefit of advertisers.

Option time comments

Comments in FCC’s reopened option time rulemaking are due Sept. 7, agency announced Friday (July 7). Reply comments will not be accepted. Oral argument will be held Sept. 28 on comments received.

more AT DEADLINE page 10
Robert Carley, president, Fitzgerald Adv., New Orleans, joins Young & Rubicam, N.Y., as vp and account supervisor. Mr. Carley, who went to Fitzgerald in 1953 as account executive, became account supervisor in 1956. In that post he was responsible for agency’s marketing and creative plans functions for Wesson and Snowdrift brands and for firm’s management contact. Wesson and Snowdrift moved to Y & R earlier this year. (See story on account changes, page 27.)

Ted Cott, vp in charge of National Telefilm Assoc. broadcast division since 1957, has resigned following sale of W N T A - T V Newark - New York to civic group that will use station as educational tv outlet (Broadcasting, July 3). His future plans were not announced. He began his career in 1933 with New York-owned WNYC as producer, and from 1939-43 was freelance producer for radio network programs. He served as vp for programming and operations for WNEW New York from 1944-50 and was with NBC as vp in charge of NBC Radio until 1955. Mr. Cott served for two years as vp and general manager of now-defunct Du Mont Broadcasting Corp. from 1955-57.

Joe Evans, managing director of Storer Broadcasting’s WSPD-TV Toledo, named general manager of Storer Programs Inc., subsidiary which will handle distribution, production and sales of tv programs. (See story page 80.)

Jules Herbeuveaux, vp, central division sales, NBC Radio in Chicago, assigned to staff of NBC senior executive vp and will work on special projects, effective July 31. He will operate out of Chicago, and report to David C. Adams, NBC senior executive vp. Mr. Herbeuveaux joined NBC in Chicago as musical director in 1927 and left company briefly in early 1930’s but returned in 1934 as production manager and program manager. He was named manager of television for NBC central division in 1940 and was elected NBC vp in 1955. Harry E. Hobbs Jr. has been named to replace Mr. Herbeuveaux with title of central division sales manager, NBC Radio. He joined NBC in October 1955 and has been eastern sales manager of network since 1958. Earlier, he had been sales manager of Air Features Inc. and account executive with Henry I. Christal Co., station representative.

Mort Werner, senior vp and director of radio-tv for Young & Rubicam, appointed N B C vp, programs, tv network, effective July 17. He succeeds David Levy, who is being reassigned to another tv programming post at network. Mr. Werner has been with Y & R since 1959 and earlier had been vp in charge of broadcast activities for Kaiser Industries Corp. From 1951-57, Mr. Werner was with NBC-TV as executive producer of various programs. Charles (Bud) Barry has been named by Y & R to replace Mr. Werner (Week’s Headliners, July 3).

Dean Roscoe L. Barrow of U. of Cincinnati College of Law, head of FCC’s 1955-57 special study of network tv practices, named special consultant to FCC Friday July 7 on continuing study of network matters. Dean Barrow, who organized and directed network investigation which culminated in omnibus report (Broadcasting, Oct. 7, 1957), will rejoin staff this week. Several FCC actions have been taken as result of Barrow report and continuing study still is underway, with latest round of hearings concluded 10 days ago in New York (Broadcasting, July 3). Dean Barrow will review progress of study staff and make specific recommendations for future development of study.

George T. Shupert appointed director of tv sales for 20th Century-Fox Television, effective Aug. 1. Former president of ABC Films, which he established in 1953, Mr. Shupert joined MGM as vp in charge of tv. He started in tv at Paramount Tv Productions as assistant to Paul Raibourne, head of Paramount’s video activities, and has also served as sales vp of Peerles Tv Productions and vp and general manager of United Artists Tv Corp. Mr. Shupert is former president of American Television Society and of Radio & Television Executives Society. As director of tv sales for 20th Century-Fox, he will headquarter in New York after month in Hollywood to familiarize himself with studio’s tv production operations.

For other personnel changes of the week see FATES & FORTUNES

KTAG-TV protest denied in KPAC-TV relocation

Protest by KTAG-TV (ch. 25) Lake Charles, La., against February 1960 action permitting KPAC-TV (ch. 4) Port Arthur, Tex., to relocate its transmitter midway between two cities and increase antenna height and power was dismissed by FCC Friday (July 7).

Commission earlier had refused to accept protest because it was not notarized until after expiration of time limit but court of appeals remanded case (Broadcasting, Dec. 5, 1960).

Court said FCC has discretion to accept late oath. Chairman Newton N. Minow and Commissioners Robert E. Lee and Frederick W. Ford dissented, favoring consideration of appeal on ground uhf station would face new competition from KPAC-TV under new facilities.

Lewine heads NATAS

Robert F. Lewine, vice president for programs, CBS Films Inc., was elected president of National Academy of Television Arts & Sciences, succeeding Harry S. Ackerman, vice president of Screen Gems. Also elected: Bud Yorkin, independent tv producer, executive vice president; Loren L. Ryder, Ryder Sound Services, secretary, and Thomas W. Moore, ABC-TV vp, treasurer.

BROADCASTING, July 10, 1961
"A man who assumes a public trust," said Thomas Jefferson, "should consider himself public property." This is the spirit in which the radio and television stations of the Jefferson Standard Broadcasting Company accept their responsibility to the public. For six straight years, WBTV has opened the Charlotte United Community Appeal drive with a star-studded telecast in prime evening time. WBT Radio originates and supplies to fourteen major U. S. radio stations an alert refutation of Radio Moscow propaganda. WBTW created and telecast an illuminating program on the medical use of hypnosis. Such programming responsibility is standard with the Jefferson Standard stations. One reason why each is the audience leader in its area. One reason why...
These numbers vividly sum up the picture of television leadership today. What stands out clearly is that one network has consistently delivered the largest nationwide audiences night and day throughout the past season—namely, the CBS Television Network. What stands out less clearly are the runners-up. That’s because one network ranks second at night, but third during the day. While another network ranks second during the day, but third at night. When
It comes to choosing the network which can present his product most effectively, the most important thing for an advertiser is to know where he stands—clearly. It's as simple as that.

*13% larger national nighttime audiences than Network X; 12% larger than Network Y; 16% larger national daytime audiences than Network X; 91% larger than Network Y; 85% more national nighttime half-hour "wins" than Network X; 33% more than Network Y; 17% more national home hours of viewing (Monday through Sunday, 7 am to 11 pm) than Network X; 32% more than Network Y; more of the Top 10, Top 20, Top 30 and Top 40 nighttime programs and more of the Top 10 and Top 20 daytime programs than the other two networks combined.

(Audience data: HUTI. Nielsen, 1 Oct-30 June, 61, AA basis. Evening: 6-11 pm. Day: Mon.-Fri., 7 am-6 pm.)
An invitation to the man from Cunningham & Walsh

Sir, be our guest in the Tidewater! Get behind the counter, the gas pump or the bar. We guarantee that our 50,000 sailors and 750,000 civilians will run you ragged. Gosh, what spenders!

After a nice quiet (free) luncheon at WHIH, we’ll spend just five minutes explaining to you why WHIH is considered the live wire station down here.

Wouldn’t you like your clients to sell more cookies or gasoline in this recession-resistant area? Of course you would. Then be our guest.

DATEBOOK

A calendar of important meetings and events in the field of communications

*Indicates first or revised listing.

JULY

July 9-12—National Assn. of TV & Radio Farm Directors, summer meeting Shoreham Hotel, Washington, D. C. Speakers include Agriculture Secretary Orville L. Freeman, NAB President LeRoy Collins, FCC Chairman Newton N. Minow and Commissioner George E. Dick, Food & Drug Administration. Frank Welch, John Duncan and James T. Ralph (assistant secretaries of agriculture) and Harry Caldwell, chairman of the National Agricultural Advisory Committee.

July 9-21—NAB Seminar, Harvard Graduate School of Business Administration, Harvard campus, Boston.

July 10—Revised deadline for comments on FCC rulemaking in matter of broadcast announcement of financial interests of stations and networks and their employees in service and commodities receiving broadcast promotions.

July 16-18—South Carolina Assn. of Broadcasters, summer convention. Ocean Forest Hotel, Myrtle Beach. Speakers include FCC Commissioner Robert T. Bartley and Howard G. Cowgill, former chief of the FCC Broadcast Bureau.

July 21—Deadline for submission of briefs to the FCC in Boston ch. 5 re-evaluation. This is the proceeding to reconsider the 1957 grant to WHDH Inc., due to ex parte contacts made by principals of WHDH Inc. and Massachusetts Bay Telecasters Inc. The third applicant is Greater Boston Television Corp. Reply comments are due 10 days after July 24. Oral argument before the FCC en banc is scheduled, but no date has been set.

July 20-Aug. 5—American Women in Radio & Television, first mid-career seminar, Syracuse U., Syracuse, N. Y.

AUGUST

Aug. 14—Advertising Age Summer Workshop on Creativity in Advertising, Palomer House, Chicago. Participants include Norman (Pete) Cash, TVB; Marion Harper Jr., Interpublic Inc.; Leo Burnett, Leo Burnett Inc.; Fairfax M. Cone, Poate & Belding; and Edgar Kobak, management consultant.

Aug. 5-6—Georgia Assn. of Broadcasters, annual summer convention. Speakers include Frank Fletcher, immediate past president of Federal Communications Bar Assn. King & Prince Hotel, St. Simon’s Island, Ga.

Aug. 7-11—American Bar Assn., 84th annual meeting, 15 principal hotels and Kiel Auditorium, St. Louis. Will be addressed by President Kennedy and numerous other top government officials, including special presidential assistant James M. Landis and chairmen of "big six" regulatory agencies, including FCC and FTC.

Aug. 11-12—Texas Associated Press Broadcast Assns., fourteenth annual meeting, Hotel Luling, Odessa, Tex.

Aug. 23-26—Arkansas Broadcasters Assn., fall meeting. Sam Peck Hotel, Little Rock.

SEPTEMBER

Sept. 16—YPI Broadcasters Assn. of North Carolina, annual meeting and news seminar. Hotel E. Lee, Lincolnton, N. C.

Sept. 24-26—Louisiana Assn. of Broadcasters, annual convention, Buena Vista Beach Hotel & Motel, Biloxi, Miss.

OCTOBER

Oct. 3-4—Advertising Research Foundation conference, Hotel Commodore, New York City.

Oct. 8-12—International seminar on instructional television, sponsored by Purdue U. in cooperation with UNESCO and the U. S. National Commission for UNESCO. Dr. Warren F. Seibert, Purdue professor, is seminar director; James M. Miles, Purdue Television Unit, is associate director, Purdue U., Lafayette, Ind.

Oct. 25-28—Sigma Delta Chi, 52nd national convention, Hotel Fontainebleau, Miami Beach, Fl.

Oct. 30-31—IRE, Radio Fall Meeting. Hotel Syracuse, Syracuse, N. Y.

NOVEMBER

Nov. 2-4—Assn. of National Advertisers, annual national meeting, The Homestead, Hot Springs, Va.

Nov. 5-8—Broadcasters Promotion Assn., annual convention, Waldorf-Astoria Hotel, New York City.

Nov. 14-16—IRE, Mid-America Electronics Conference, Kansas City, Mo.

Nov. 15-17—Television Bureau of Advertising, annual meeting, Statler-Hilton Hotel, Detroit.
This is a new dramatic approach to documentaries, featuring actual on-the-scene filmed highlights in the lives of famous people of our time. Thirteen hour-long specials starring such renowned figures as Lindbergh, Al Smith, General MacArthur, the Duke and Duchess of Windsor, De Gaulle, and more. The memorable events of their lives become a panorama of living history...a commentary on the forces that have shaped our destiny. Only the vast film libraries of Hearst Metrotone News could provide such a wealth of exclusive footage. To round out the picture, new footage will come from Hearst Metrotone cameramen throughout the world. Family albums and home movies will be combed. Add to all this the brilliant touch of the noted writer John O'Toole, and you have a true "PERSPECTIVE ON GREATNESS." Dramatic entertainment of real prestige and stature. An ideal showcase for important local advertisers. With this practical bonus: a single, compact, easily stored source of material on famous people—complete shows to run at a moment's notice when needed.
Storer

TELEVISION

OPEN MIKE®

Incendiarists

EDITOR: ... The article entitled "Cremators turn on the created" was superbly and objectively written (Broadcasting, June 26). But shouldn't the headline have read: "Cremators turn on the creators?"—Lewis H. Averell, President, Averey-Knodel Inc., New York.

Long, long ago

EDITOR: You may have older readers... but I don't think you have a more appreciative or more grateful subscriber. Hal Gold thought you might be interested in the enclosed candid shot which, to the best of my recollection, was taken by Paul Sullivan when we were both on the staff of WLW Cincinnati. As near as we can figure out with a magnifying glass, the issue is July 1939.—Charles W. Godwin, Vice President-Station, MBS, New York.

Radiomen's thanks

EDITOR: Every radio man in the entire U.S. should take time to write and thank E. G. Neale Sr., president of Neale Adv. Ass., Los Angeles, for the wonderful Monday MEMO in the June 12 issue on radio. ... On behalf of the fine station for which I work, thank you! ... I'm thoroughly convinced radiomen need more confidence in radio.—Walter H. Stumper, Commercial Manager, WAPO Chatanooga.

The Chicago story

EDITOR: The June 19 issue of Broadcasting performs a real service for Chicago in providing a complete and intriguing story of our city. Reprints of the article are now being requested, which is a good indication of our reaction to the time and energies spent in arranging this detailed coverage.—Thomas H. Coulter, Chief Executive Officer, Chicago Assn. of Commerce and Industry.

Who took the creativity out of broadcast selling?

When it comes to sales techniques, I think the broadcast media representatives could take a few pointers from their brethren who sell food items to supermarket operators.

In the economic jungle of food sales, the salesmen are mercilessly separated from the order takers. The real salesmen survive (and prosper) because they not only know their products, but the supermarket operator's problems and objectives as well.

All too often the broadcast sales rep makes his presentation in a vacuum. He doesn't know what the agency is trying to accomplish nor how. And right here is where many commercials begin to fall short of their potential effectiveness.

Get the Answers • If I were a rep, I would try to get from the timebuyer (and perhaps the account man) answers on (1) the general marketing objectives and how broadcast fits into the marketing plan; (2) the kind of commercials that are to be aired (and can I see or hear them?); (3) the special timely sales points or features of the product.

At Johnson & Lewis we know one rep who did a lot of thinking and planning and as a result he is doing a fine job for us, for our client and for his stations.

In April, we set up a series of temperature "packages" for our client, the Blitz-Weinhard Co. of Portland, Oregon. When the temperature reaches a certain point, the stations who have our schedule begin running our special temperature commercials. People drink more beer when the weather is warm, so the tie between the temperature and our client's product is a natural one.

There's nothing new about temperature commercials, they've been used over the years by a variety of companies. But the rep didn't merely come into the timebuyer's office and ask for a schedule of Blitz-Weinhard beer commercials. He asked a lot of questions and did a lot of research, and at no time did he have any assurance that he was going to be rewarded for his efforts. One of his big problems was, for example, determining the temperature variances in our marketing areas.

The Order Followed • When he had thoroughly researched his proposal, he presented us with a plan that was complete in every detail: The number of spots in each recommended "package," the number of "packages," a list of his stations in our markets, the costs, and even a recommended letter of instructions to the stations. All we had to do was sign on the dotted line. We signed, and a few days after his presentation all the stations (most of them were his stations) had their schedules and the copy. The product, the medium and the elements are meshed and working together. This thoughtful, constructive selling is sadly lacking in the media business.

If these temperature packages work for beer, why won't they work for soft drinks? Why won't they work for fuel oil dealers in the fall and winter? Or gas companies and appliance stores who sell heaters?

My big question is, "Who took the creativity out of broadcast selling?" Occasionally, I overhear conversations between broadcast reps and our timebuyers. (My office is located near theirs.) Unfortunately, the only things I've overheard are two ageless paraphrases of: "But we haven't had an order from you in the last six months!" and "The station manager thinks you don't like me or something!"

Compare this plaintive pàp with the edict laid down by the sales training manager of a large canned foods company when he said, "Boys, one thing I want you to know right now. You don't sell our product to the grocer. You give him ideas that help him sell our products."

Knowledge Is Power • Every rep worth his coverage map should know as much as possible about the agency's clients and the agency's basic creative philosophy as well. How else can he effectively coordinate the time he has for sale with the product and the way it is to be presented to the consumer? (Maybe you like a liver bile commercial with your Wheaties, but not me!)

It stands to reason, too, that the advertising agencies who take the greatest pains to prepare highly creative selling commercials also welcome new and different media plans. I know that at Johnson & Lewis we believe radio and television should be used in a very special way. Our philosophy is that to lick 'em, you don't join 'em. To have our client's commercial stand out from the music, news and sports and the little B's that get into the bloodstream faster than the little A's, we don't write commercials that have the same threshold of interest as these things.

We welcome the offering of good time slots for the client's commercials, but the welcome is always much warmer when they are tied into a sound idea for moving the merchandise!

Everyone's Job • Advertising agencies unquestionably share much responsibility for the lack of creative selling in the broadcast business. Too often the media department personnel are not asked to sit in on planning sessions. As a result, they are sometimes as much in the dark about over-all objectives as salesmen. However, many agencies (and I'm happy to include ours) are breaking away from the traditional departmental lines of organization where media has been told, "Here's what we're going to do. You buy the space and time." More and more media people are being asked to contribute their ideas in initial planning stages. The client's dollars we're spending are profit dollars. Therefore, he should expect everyone connected with the spending of these dollars to be fully informed.

A recent study in one of the advertising trade magazines showed that 87% of agency media people believe that media salesmen should be given more information on client objectives.

The key to creative selling, however, is simply this: when are 87% of the salesmen going to ask for the information?
When the heat's on, radio sells heavy! Summer fills the beaches of Connecticut — Madison, Guilford, Saybrook, Hammonasset. Big-Buy WELI reaches Connecticut's vast playtime audience as no other medium can! For your WELI Plus-Radio* Plan, ask your H-R man! In Boston call Eckels.

GREATEST IN THE NATION!

WCCO Radio
listeners per quarter-
other station of the

TOP ACCEPTANCE! Check any market in the nation—even such giants as New York, Chicago and Los Angeles. You won’t find a station of the CBS Radio Network that matches the enormous WCCO Radio audience—60,000 in-home families per quarter-hour. What’s more, this is a far bigger audience than that of all other Minneapolis-St. Paul stations combined (59.2% share of audience)! It’s yours to sell at the Twin Cities’ lowest cost-per-thousand—less than one-third the average of all other stations. Great record . . . great buy . . . with great acceptance!

There's a new generation of watchers, too.

Post-war families... younger, larger families... bigger spenders... with an obvious TV preference for ABC programs.

You don't have to slide slide rules or compute computers to find out who are the biggest spenders in America.

If you're the head of the household, if you're under 40, if there are five or more in the house, you're the biggest spender in America. You have to be. Maybe not on Minks-and-Mercedes... but in the Super-Market.

How does ABC-TV rate with such families?

First.

Currently, ABC has 23.1% (per average minute) of the homes where the head is under 40. Net Y has 19.8%. Net Z, 17.5%.*

Currently, ABC has 26.2% (per average minute) of the homes with 5 or more in the family. Net Y has 21.0%. Net Z, 18.2%.*

It would be strange were it otherwise... considering ABC's leadership in programming for the new generation of watchers.

Over the entire spectrum of communications—entertainment, sports, comedy, news, public interest—no network communicates as freshly, as dramatically, as vigorously as ABC-TV. The Real McCoys... The Untouchables... The Flintstones... ABC's Wide World of Sports... ABC-TV News Final... The Churchill Series... these are pointedly superior cases in point.

Another thing about those big spenders. You not only reach more of them on ABC. You reach them more economically.† Makes ABC your best buy in network television. Right? Right.

AGENCY SWITCHES TOTAL MILLIONS

- Top 10 accounts alone involve $75 million in six months
- 40 big broadcast advertisers play game of musical chairs
- Texaco joins Schlitz, Chesterfield, Hunt others in changes

In a six-month period of account switches involving some 40 major radio-tv advertisers, the top-10 account shifts alone represented nearly $75 million in annual billings.

This staggering total of billing dollars was compiled as the Madison Ave. malaise of moving about by clients continued through the very last day of June—announcement on June 30 of stable Texaco Inc.’s shift of $14.5 million in yearly billing and some $12 million of that in radio and television from Cunningham & Walsh to Benton & Bowles (see story, page 30).

A compilation by Broadcasting of the top radio-tv account switches during the first half of 1961 (see chart, page 28) showed the following other nine “leaders” by approximate billing:

- Schlitz brewing, $16 million; Chesterfield, $10 million; Hunt Foods, $9 million; Lever Bros. (partial), $6 million; American Airlines, $6 million; Bulova, $4 million; Congoleum-Nairn, $3.1 million; Schick, $3 million; General Time (Westclox division), $3 million.

Two other advertisers, though not in this hypothetical top 10, also have spent considerable sums in broadcast advertising from time to time. These are Pittsburgh Plate Glass, $2.5 million, and Philip Morris (partial), $2.2 million. (A full capsulated description of each major account switch is printed below.)

Among the highlights and trends in radio-tv account changes during the January-June period:

- An obvious movement from the smaller or regional agency to the larger, greater billing agency. As explained by one agency consultant, this swing is hastened by today’s desire of an advertiser to obtain the “total marketing” service provided by the larger, New York- or Chicago-based agency.

Some of these changes included such advertisers as American Dairy Assn. leaving Campbell-Mithun, Chicago, for Compton Adv. in New York; Congoleum-Nairn transferring its business from Keyes, Madden & Jones to J. Walter Thompson; Elden Industries moving from Guild, Bascom & Bonfigli to Kenyon & Eckhardt; General Insurance Co. of America switching from Cole & Weber to Lennen & Newell; Tidy House detergent (Pillsbury Co.) from Guild, Bascom & Bonfigli to McCann-Marschalk, and Squirt from Honig-Cooper & Harrington to Donahue & Co.

- The rise in new business of such smaller agencies as McCann-Marschalk and the apparent business attrition at such agencies as Kenyon & Eckhardt—though at K&E the trend now is of increasing the annual billing of current advertisers.

- The ever-present exception to the rule or trend: A General Time (Westclox division) account moving the other way, from the large agency (BBDO) with multi-services to the smaller advertising company (Hicks & Greist).

Fitzgerald Woes • Perhaps the most stunning example of the regional advertising agency suffering from Madison Ave.’s continuing pastime of account switches: The Fitzgerald Agency in New Orleans which last year billed some $14 million from its accounts but because of a $9-million walkout of Hunt Foods followed by other defections has now been humbled to an agency that can boast only an estimated $2 million a year.

For many the first half of 1961 has been a boon for the big-size agency operation: Young & Rubicam, which though it lost the $6-million American Airlines, picked up Hunt Foods’ $9 million in billing; J. Walter Thompson, which suffered a $16 million loss in Schlitz’ move to Leo Burnett, easily countered by gaining additional Lever Bros. business (Handy Andy, Spry, Air Wick and Dinner-Reddy) amounting to some $6 million, the $10 million-plus Chesterfield account (from McCann-Erickson) and another $3.1 million from Congoleum-Nairn and $2.5 million from Pittsburgh Plate Glass.

Benton & Bowles would appear to be well out in front for the first six months. Texaco’s $14.5 million business must be added to still another $2.2 million worth of Philip Morris (ASK Division and Benson & Hedges), for a total of some $16.7 million and perhaps more in potential, while losing only the $3-million Schick account. Another gainer: Sullivan, Stauffer, Colwell & Bayles, up $4 million with Bulova and Lever’s “All” detergents (another $4

Fourth of July holiday fails to slow commission’s pace

Last Thursday (July 6) was a busy day at the FCC.

At its regular meeting (a day late because of July 4 holiday), the commission took these significant actions:

- Adopted and issued for rule-making its revised program reporting forms, including separate sections for tv and am-fm (see page 48).

- On a 4-3 vote, sent a pre-hearing letter on the application for approval of the sale of WMGM New York to Crowell-Collier (see page 66).

- Sent similar letter on renewal application of WINS New York, stalling proposed sale to Storer Broadcasting Co. Two commissioners voted to set the case for immediate hearing (see page 66).

- Named three-commissioner committee to take whatever steps are necessary to preserve FCC authority over location of broadcast towers following staff report on tall tower rules of Federal Aviation Agency (see page 61).

On the same day, the commission received a unanimous court of appeals decision affirming the FCC’s course of action in the Miami ch. 10 ex parte case (see page 58).

| million), or a total of $8 million. |

**On The Other Side** • Feeling the pinch in the January-June period are McCann-Erickson which gained nearly $1 million with its Scripto addition but dropped other accounts. Chesterfield ($10 million) noteworthy among them: and Cunningham & Walsh whose sudden walkaways include Texaco, Sears Roebuck (may build up to $4.5 million this year), Revell Inc., and Smith-Corona.

To spotlight the sudden shifting on Madison Ave.: exactly a month ago an observer predicted in print that few additional agency shifts would occur among stable, or "profitable" companies. An example given was the same Texaco Inc., now a newcomer to B&B's client list.

Here is a recap of all major and some other radio-tv account shifts (for still others, see table, at left):

**JVT's Fate** • J. Walter Thompson, win ups and downs in major accounts this year, picked up $10 million in billing ($7 million broadcast) from McCann-Erickson when Liggett & Myers moved its Chesterfield, Oasis and Duke brands to JVT in May.

Philip Morris maneuvered about $4 million of its business among three agencies. The largest plun went to Leo Burnett, which picked up about $3.4 million for Alpine cigarettes from Doyle Dane Bernbach. Other portions of the account were Benson & Hedges to Benton & Bowles from DDB and Ronson lighter from Norman, Craig & Kummel to DDB.

The defection of Hunt Foods & Industries (Wesson Div. and Blue Plate Div.), New Orleans, to Young & Rubicam, Los Angeles, from Fitzgerald Adv., New Orleans, was a $9 million loss for the southern agency. Together with the loss of a group of smaller accounts in recent months, Fitzgerald's billing dipped from about $14 million in 1960 to slightly more than $2 million in mid-1961. Coincidentally, Fitzgerald's president, Robert Carley, joined Y&R last week (WEEK'S HEADLINE, page 10).

After a search of several months, listening to presentations from many agencies, American Airlines steered its $6 million account to Doyle Dane Bernbach. Y&R lost the business.

Vic Tanny Enterprises, aiming for broader coverage because of its expansion program, appointed Kastor, Hilton, Chesley, Clifford & Atherton, New York, as agency for all its advertising except the western region, which remained at Stahl & Lewis Adv., Hollywood. The budget is about $2 million, largely in spot tv, with KHCC&A obtaining the major share.

Lehn & Fink Products, New York, assigned four of its beauty products to
Network tv wins 33 new advertisers

FIRMS WIDENING DISTRIBUTION ADD $5 MILLION TO MEDIUM'S TOTALS

A total of 33 advertisers, with combined gross time expenditures of an estimated $5.1 million, used network tv for the first time during the 1960-61 season, according to a compilation by Broadcasting magazine.

Of the 33 new-to-network companies, one spent more than $1.5 million in the medium; four spent more than $300,000; three spent more than $200,000; four spent more than $100,000; six spent more than $50,000; 12 spent more than $25,000; and only three new advertisers spent less than $25,000.

Leading new network tv advertiser in 1960-61 was Mead Johnson Co., Evansville, Ind., which spent $1.63 million in gross time expenditures on behalf of its Methylcel dietary for weight control product. Mead Johnson was followed by Food Manufacturers Inc., Hackettstown, N. J. and Houston, Tex., with $383,500 billings from M&M candies and Uncle Ben’s Rice; Continental Wax Corp., Mt. Vernon, N. Y., at $337,447; McCell Corp., New York, at $320,165; and Better Vision Institute, New York, with billings of $313,971 for the Ophthalmic Industry Assn.

Some of the advertisers who used network tv for the first time this past season were attempting to introduce new products to a large segment of the consumer population. These include Photocopy Equipment, Hammons Snow Grip Spray, Metrecal and Aerosol bombs.

Going National - Other advertisers used network tv to focus wide-scale public attention on products that formerly had little appeal, but which, in our affluent society, are within almost every household’s means. Examples of such products are bowling equipment, outboard motors, home furnishings, air conditioning, typewriters, bubble bath and expensive imported toiletries.

Many of the new advertisers go in for heavy spot tv schedules, but for a particular campaign felt that network tv had more to offer. Some like Miller Bros. Hats, for Adams hats, formerly limited their advertising to other media like radio or print.

The estimated network tv gross time billings were taken from lists compiled by Leading National Advertisers-Broadcast Advertisers Reports and released by the Television Bureau of Advertising. They cover the period from Sept. 1, 1960 to May 1, 1961.

New Network Users - The 33 advertisers new to network tv in 1960-61 season (including their gross time expenditures, and agencies that handled their business) are:

Dr. Pepper, Dallas (soft drink) — $52,000. Agency: Grant Advertising Inc., Dallas, Tex.

J. H. Filbert, Baltimore (Mrs. Filbert Maragrin and mayonnaise) — $10,970. Agency: Young & Rubicam Inc., N. Y.

Hammons Products Co., Stockton, Mo. (Hammons Snow Grip Spray) — $24,000. Agency: Potts-Woodbury Inc., Kansas City, Mo.

Kiekhaefer Co., Fond du Lac, Wis. (Mercury Outboard Motors) — $31,000. Placed direct.

N. Y.
N.E. Mutual Life Insurance Co., Boston—
$60,223. Placed direct.
Phillips Petroleum Co., Bartlesville, Okla.—
(Phillips 66 Gasoline & Motor Oil)—$244,056.
Agency: Lambert & Fasley, N. Y.
Plasti-Kote Inc., Cleveland (Aerosol Products)
J. Nelson Prewitt Inc., Rochester, N. Y.
(Matey Bubbling Bath)—$228,000. Agency: Hanford & Greenfield Div. of Hutchins Advertising,
Rochester, N. Y.
Retail Clerks International Assn., New York—
$179,000. Placed direct.
S. & N. California Renault Dealers, San Francisco
and Los Angeles—$41,740. Placed direct.
Smith-Corona Merchant Inc., New York (type-
writers)—$35,856. Agency: Placed through Cunn-
ingham & Walsh, N. Y. (before leaving agency
in June, 1961).
(Ebonite bowling equipment)—$29,000. Agency:
John C. Dowd Inc., Boston.
West Bend Aluminum Co., (outboard motors)
—$51,000. Agency: Pigeon Savage Lewis Inc.,
Minneapolis.

B&B acquires Texaco account

Texaco Inc., New York, the nation's fourth-largest oil company, sixth-biggest manufacturing corporation and heaviest advertiser in the oil industry, shifted its consumer advertising account on June 30 from Cunningham & Walsh to Ben-
ton & Bowles, both New York. The move is effective Oct. 1.

Texaco billed an estimated $14.5 million last year, which with discounts amounted to approximately $12 million. Most of those billings were placed in tv, with the company's 1960 gross time expenditures in network tv alone com-
ing to $12,161,822. In the first four months of this year, Texaco has spent more than $4 million in network tv. Billings involved in the company's spon-
orship of the Metropolitan Opera broadcasts on radio (now in its 21st year) were not included. These are handled by an independent radio pack-

Cunningham & Walsh controlled all of the oil company's consumer account since January, 1957, and previous to that time, it had handled a part of the account for a number of years. The loss of the account was the second ma-
or blow to C & W in a short period of time. Last month Smith-Corona Mar-
chant Inc., which had been a client for 26 years, pulled its approximately $1.5 million in billings from the agency.

Benton & Bowles got the Texaco ap-
pointment without making any formal presentation. Agency staffers, however,
were told in an inter-office memo, that the decision was made only after the
agency had been subjected to a thorough department-by-department analysis con-
ducted by Texaco.

No reason was given for the account
switch.

Texaco, which ranks first as a profit-
able firm among all domestic oil com-
panies, has gross assets of $3.6 billion, and is said to be prepared to spend $3 billion for expansion in the next five years.

The G. M. Basford Co., New York, which handles Texaco's industrial ad-
vertising, was not effected by the change.

Storer Tv Sales expands

Storer Television Sales Inc., newly
formed station representative located in
New York and Chicago, has opened four additional regional sales offices, it was
announced June 30. New offices are in Atlanta, Detroit, Los Angeles and San Francisco. Storer represents its own WAGA-TV Atlanta; WJW-TV Cleveland; WJDB-TV Detroit; WITI-
TV Milwaukee, Wis., and WSPD-TV Toledo, Ohio.

They're playing our song

Ping-ping-ping Wham! Zzzzzzzzz! 
RrrRrrRrr! Whap-a-tap, whap-a-
tap! Zing-a-zing-zing!

Whatever that seems to be, it's really
"Music to Improve Your Home By," the theme song of a new
30-second radio commercial com-
posed for the Bank of America by its
agency, Johnson & Lewis, San Fran-
cisco, to promote the bank's Time-
plan Home Improvement Loans. The
spot is currently in a five-week run in
major California markets.

Using no musical instruments of
any variety, the jingle is orchestrated for
power saw, hand saw, hammer-
on-nails, hammer-on-wood, plane and
wood file. Adapting himself to the
tenor of the instrumentation, the
conductor calmly proceeds to wave
a wooden mallet in place of the usual
baton.

The commercial starts with the
"instruments" coming in one at
a time. As they begin to establish a
Latin American beat, a voice is
heard, calling out: "Hey Sam. What's
going on around here?" Sam replies:
"Oh, hi! I'm just making a few
improvements around the house. Got
a Timeplan Home Improvement
Loan last week—from the Bank of
America." That's all the words. The
rest is rhythm.

"We trust," said a spokesman for
Johnson & Lewis, "that a good many
Californians will say, 'Listen, dear,
they're playing our song.'"
IT'S A BIG BALL PARK...

... And it's big league television. WHO-TV tags viewers in 57 Central Iowa counties. Annual retail sales in this area exceed $2 billion (and of these, 75% are made outside Metropolitan Des Moines).

The vast viewing area outside Des Moines contains a large percentage of America's richest farmlands. Iowa has more top farm-income counties than the second- and third-place states combined. In fact, 83.4% of all Iowa farms are in the U.S.D.A.'s high-income groups.

Your messages on WHO-TV reach these high-income farmers, and you also get Metropolitan Des Moines—Iowa's largest metro market—as a bonus!

Ask your PGW Colonel for the facts on WHO-TV and the $2 billion Central Iowa television market.

FRINGE VIEWING FORMULA

McCann-Erickson claims method can measure viewing in counties outside station's metropolitan area

McCann-Erickson Inc., New York, claims to have solved the problem of calculating the ratings of TV stations and programs to cover viewing in areas outside as well as inside the metropolitan counties of television markets.

An announcement from the agency today (July 10) said a mathematical formula devised by its media research department after a year of work represents "a major breakthrough" in the field. The agency said it has tested applications of its formula over the past four months and found its estimated ratings of total audiences were "essentially accurate." Specifics of the formula are confidential, an agency spokesman said.

A 37-page report on McCann's project, called "Television County Rating Indicators, a New Dimension in Media Measurements," gives details of the undertaking. At the outset, it defines the problem that has faced advertising agencies and advertisers planning to use television in this way:

"Circulation figures for magazines and newspapers are available on a county basis. Since these data can be related directly to an advertiser's sales territories, comparison of advertising weight delivered and allocations of advertising costs by marketing area can be made with considerable accuracy."

"The same precision has not been available heretofore for television. Currently ratings—the basic measure of television circulation—are available for individual stations only in the metropolitan counties of a television market, covering only a fraction of a station's zone of influence."

**Figure for Each** - The need therefore, McCann stresses, was a rating figure for each station in each county in which some viewing of the station exists.

The report refers to various approaches used in the past to cope with the problem but calls these attempts "rule-of-thumb methods, which everyone recognizes are inadequate." For example, contour maps are said to be "simply measurements of the signal strength of a station, which ignores viewing habits." Coverage levels are described as merely measurements of the proportion of TV homes in a county which have been exposed to each station over a period of time, but can "easily mask the true value of relative popularity of different stations."

McCann notes that normal application of the coverage concept, using a 50% cut-off, can penalize some stations unfairly because projecting metro-county ratings to non-rated counties "assumes fallaciously that similar viewing habits exist throughout a television station's zone of influence."

McCann hails its TV County Rating Indicators as "the new and exclusive . . . solution," and claims it is a formula which "projects an average rating level for every TV station where any viewing of the station occurs." The indicator, McCann explains, is an index which re-

---

'Controversial topics' for coffee TV campaign

J. A. Folger & Co. is getting ready to launch a controversial campaign for Folger's Coffee with a series of 20-second TV spots to be used throughout the 10 western states, including Alaska and Hawaii, plus British Columbia, starting in August.

The TV spots, created by the Folger agency, Fletcher Richards, Calkins & Holden, San Francisco, and produced by Playhouse Pictures, Hollywood, deal with such controversial topics as Red China ("Folger's taste good whether it's served in a plastic cup, a paper cup or a cup of red china"), four letter words ("pure, good, rich, best"), Moscow ("I get red in the face when I think that people in Moscow can't get Folger's"), crime ("it's a crime if you don't drink Folger's"), nudity ("... and that's the naked truth"), United Nations ("coffee from many nations united into a superb blend") and psycho-analysis ("anyone who doesn't drink Folger's ought to have his head examined").

Each spot opens with the coffee bean standing beside a can of Folger's and in front of an easel bearing the title card of the spot. The bean announces the topic and flips the cards, revealing one reading "mountain grown." This is the second card in each spot in the series, emphasizing the salient sales point that Folger's coffee is mountain grown coffee. The bean then proceeds with his lecture, always concluding with the words "the coffee that speaks for itself." At that cue, the lid of the can opens and the can says "Folger's." Simultaneously, the words "When I say coffee—I mean Folger's" appear below the can in the picture.

The seven 20-second commercials are augmented by three 10-second spots, also featuring the bean and the can and the concluding sequence but lacking the controversial angle. Instead, the 10-second animated sequences open with wordless action, such as the bean getting entangled in the mike cord and winding up in a snarled mess of wire, or amorously embracing the can or looking the other way and bumping into the can painfully.

Robert Pritkin of Fletcher Richards, Calkins & Holden was copywriter for the series and Jack Keeler, also of the agency, was art director. Pete Burness of Playhouse Pictures was animation director. Mel Levin was the voice of the bean, Candy Candido, that of the can.

Nielsen's below-the-surface look at New York

During an average week, 99% of New York tv homes use their sets. A. C. Nielsen Co. unearthed this statistical claim in a Nielsen Station Index special tv report released today (July 10).

In its first study "below the surface of rating levels," the company has compiled several thousand facts about the New York television audience for a report titled "The Distribution of tv Viewing."

Calling its comprehensive report on New York station audiences a new kind of local study, the Nielsen rating service said that information of this scope had heretofore been available only on the national level. The report provides a complete profile of the audience each of the seven New York tv stations attracts during (1) an average day, (2) a typical week and (3) a typical four-week period. The full report is furnished only to NSI subscribers.

To determine what kind of homes make up the individual station audiences, Nielsen reported audiences by family income, education of the head of the house, occupation, family size, age of housewife, age of head of house, geographic area (New York City and remainder) home ownership and volume of tv viewing.

Prime Time For All • Among the questions answered for advertisers in the report is one about the problem of the "light viewing" home. Tv advertisers assume that since homes differ in the amount of time they spend viewing tv, the "light viewing" home is a harder target. The NSI study shows that 9 to 10 p.m. is the prime viewing hour even for those light viewers. It also shows that 32.1% of the prime time audience of one station comes from this light viewing group while the seven station average is only 19.7%.

Nielsen came up with more surprises in the weekly and four-week cumulative (unduplicated) audiences reported in the study. It has been maintained that daytime tv is viewed largely by the same people. The study shows that although only 9% of New York tv homes use tv on an average day between 6 and 10 a.m., in four weeks these early morning viewers include 71.4% of all New York tv homes. Some of these homes are infrequent morning viewers. The one-third of the viewers who do the most tv viewing account for over two-thirds of the viewing done during these hours.

Data for this NSI special report were drawn from the tuning records of a 220 home sample distributed (according to tv home density) among the 17 counties comprising metropolitan New York. Home-by-home tv viewing records were obtained via the Nielsen Instantaneous Audimeter technique which keeps a minute-by-minute record of tv use while also retaining the identity of the reporting homes. The survey period was from Mon., March 6, through Sun., April 2, 1961.

Nielsen said the following questions and answers are general examples of its analysis of tv activity:

Q. Nationally a greater proportion of the larger families watch tv, as a general rule, than is the case with smaller families. Is this so in New York?

A. Yes. In all day parts in March, on the average day, the level of tv use among larger families was in every case substantially higher. Between 5:30 and 7 p.m. for example, the tv usage by large families (that is four or more persons) averaged 51.3%. Tv families of one to three persons, however, were only using their set to the extent of 37.8%.

Q. Do all stations show this same pattern?

A. One non-network station accounted for 14.7% of all large-family tv viewing between 5:30 and 7 p.m. and was the leading station in this group. Among smaller families the tuning to this station was only 5.4%, a third as much.

In brief, the dual significance of the NSI study lies in its value to advertisers, who can buy New York tv more intelligently—they can schedule to reach their potential customers, and as a sales tool for stations to demonstrate what kinds of homes tune in and to point out specialized audiences.

reflects the average rating level for a station in each non-rated county reached, relative to known metro-county rating.

The indicator, McCann reports, was developed from an analysis of each station's share of viewing households, and the agency adds: "Thus, for the first time, a station's total audience for any time period, as reported by the rating services, can be broken down for each individual county within the station's zone of influence."

In developing the formula for constructing the Tv County Rating Indicators, McCann examined metro-county ratings in overlapping tv markets. This provided a source for examining "outside" station ratings within the "inside" or metro counties of another market, the report states.

Development of Formula • The mathematical formula, devised by McCann's media research department, was developed and implemented by Robert Coen, McCann's manager of media research, working with a staff of 10 employees.

McCann ascribes these benefits deriving from the use of Television County Rating Indicators:

- When network station line-ups are planned, the problem of which of several possible markets to add can now be resolved more precisely.
- When spot tv plans are implemented, a more efficient buying schedule can be constructed because share of audience delivered by stations can be compared.
- It permits a more realistic measurement of the weight of advertising in each area of a market.
- This sharper definition of a station's zone of influence helps in planning new product introduction and market testing.
- It makes possible more precise measurement of the total delivery of a combined media schedule—television and print advertising—on a county-by-county basis.
- It provides a "completely equitable" scheme for allocating tv costs to a marketer's sales territories.
KSL-TV is “loaded for sales” with more homes per average quarter-hour than any other station in the entire Mountain West, according to the latest ARB and NSI rating services.*

But ratings are only half of KSL-TV's “effective sales” program. Commercials are directed to an audience who have named KSL-TV FIRST in local acceptance due to its balanced programming of quality CBS productions with highest rated syndicated shows and finest local presentations. Commercials are backed by a strong, non-triple spot policy; a single, non-discriminatory rate card for all advertisers; and national award-winning merchandising program personalized to your clients needs. Sell a billion dollar market . . . KSL-TV’s market.

The most effective advertising buy in the Mountain West.

KSL-TV
SALT LAKE CITY, UTAH

* ARB-April 1961 shows KSL-TV delivers 700 more homes per average quarter-hour than station “B” and 3,400 more homes per average quarter-hour than station “C.”

* NSI-April 1961 shows KSL-TV delivers 200 more homes per average quarter-hour than station “B” and 4,300 more homes per average quarter-hour than station “C.”
This unique bank of ultra-violet lights is being lowered into a B-52 radome (bubble-shaped housing for radar equipment). The lights provide void-free fiberglass reinforced plastic skins for the radomes. They contrast dramatically with the old hand-operated gas lamps of the last century.

Public service in step with the times

Television is seen and heard in every type of American home. These homes include children and adults of all ages, embrace all races and all varieties of religious faith, and reach those of every educational background. It is the responsibility of television to bear constantly in mind that the audience is primarily a home audience, and consequently that television's relationship to the viewers is that between guest and host.

Through the years, machines have been redesigned and improved to render more efficient service to users. Similarly, WGAL-TV, alert to its responsibilities, has kept pace with the times in order to fulfill the current needs of the many communities it serves.
Is glamor radio’s missing ingredient?

STATISTICS DON’T IMPRESS AGENCY CREATIVE HEADS

A radio rep firm is alarmed over a just completed research project that turned up bad news about radio’s image among executives in the creative departments of advertising agencies.

Adam Young, president of Adam Young, Inc., who ordered Trendex to survey top agency creative directors for their reasons why national spot radio’s share of the advertising dollar is declining, saw the disheartening responses and said: “Radio’s image is bad. Agency people—creative people—are just like consumers, apparently. They tend to make the emotional buy, not necessarily the most logical buy.

“We can quote outstanding numbers until our comptometers get hot. We can print radio success stories until the presses run hot, but we won’t get agencies to buy a medium they believe to be a has-been—lacking in excitement and glamour.”

Executives at 40 leading ad agencies that maintain New York offices were surveyed by Trendex researchers, and 29 agencies furnished usable responses.

Among the conclusions: Agencies have not taken full advantage of the selling power of radio because they have not fully tapped commercial approaches. The agencies said they would welcome creative radio use ideas, but rarely get them. And radio sellers are failing to suggest new ways of using radio, specifically programming approaches and commercial innovations.

Ideas Lacking • Every respondent answered in the negative when asked if he was regularly approached by radio salesmen with creative ideas to assist him in using radio advertising. A majority of 72.4% said they would welcome such ideas; a significant 42.9% agreed that agencies thus far have not taken full advantage of the selling power of radio, and 53.6% agreed that one of radio’s strongest points is its ability to reach the most people at the lowest cost.

The rep firm said several patterns emerged from the question, “What is the most important reason why radio is not used in more campaigns?” The comments have been grouped under such labels are “television is the fad,” “sight and sound are superior to sound alone,” “radio is undersold, underpromoted, deficient in programming,” and “misconceptions.”

Mr. Young said his firm is going to take a “long, hard look” at the present concept of radio selling, and he indicated some basic changes in the firm’s operations may result from the study. He said:

“Creative people have been largely ignored because they do not have primary responsibility in media decisions.

GMM&B Adv. inaugurates ‘instant cash payment’

Radio and television stations are expected to take special note of a “money move” being initiated by Geyer, Morey, Madden & Ballad Inc., New York, an advertising agency. Sam Ballard, president, is announcing today (July 10) that GMM&B is making “instant cash payment” to stations and newspapers for advertising placed by the agency on behalf of its clients.

“We are instituting a sight draft method of payment whereby the cooperating media, in effect, pay themselves as soon as they have computed the monthly net amount due on each client’s advertising,” Mr. Ballard explained. “We provide the envelope sight drafts; the publisher or station makes them out in the net amount due, inserts a copy of his invoice, deposits them in his bank like a check—and can mark the account ‘paid in full’ in the same time it would normally take to mail the invoice to us under the standard billing procedures.”

Mr. Ballard noted that Sinclair Refining Co., which uses an extensive spot radio schedule, cooperated in testing the sight draft method. He added that stations and agencies had found this procedure “a great saver of time and effort.”

10-second protection

WABC-TV New York will protect the 10-second advertiser next fall when the new 40-second station break policy becomes effective, James E. Szabó, general sales manager of station, said June 30. Station will have 16 fixed prime-time 10-second positions but at no time will these be offered to any advertiser other than a 10-second sponsor, Mr. Szabó said.

Big food advertisers spent 53% in tv

NETWORK AND SPOT TV 1960 FOOD BILLINGS REACHED $277 MILLION

National and regional food advertisers in 1960 compiled $277,078,469 in network and spot tv gross time billings. A Television Bureau of Advertising study of the food and grocery classification revealed last week that the top 20 food advertisers invested more than half of their measured ad expenditures in tv during 1960.

TVB said tv continues to be the dominant food advertiser medium. TV's lead over other media last year was broadened, and new gains are shown in the expenditures during the first quarter of 1961. (TvB notes that the food and grocery category does not include many products sold in grocery stores such as beer, soft drinks, pet products, tobaccos, soaps, cleansers, waxes, etc.)

In the first quarter of 1961, the classification's billings rose from $77 million to more than $81 million. Together with talent expenditures, the billings average $1 million a day, TVB reports, adding that the top 20 advertisers in the category increased advertising expenditures overall by 3.4% in 1960, while their tv spending rose 5.7%. The same group upped its tv spending by 9.6% in the first quarter of 1961.

Sales Support • John Sheehan. TvB vice president, national sales, offered this explanation for food companies' emphasis on television: "It stimulates food sales at the lowest cost per thousand because it reaches most of the people in America quicker, more frequently, with greater effect, and at lower cost than any other marketing aid now available. Also, television is the sales support grocers and company salesmen prefer."

The top 20 food advertisers spent 53.1% of their measured media expenditures in tv.

How Trewax made a prize-winning commercial

There's a simple theoretical formula for producing an award-winning commercial: take an outstanding product and give it a spot that is just as good. If it is, it's bound to be a winner.

In practice, of course, there's a little more to it than that. The aims of the client, his distribution problems and the way the commercial fits into the overall marketing strategy must all be considered. And how much can be spent for the spot.

As a case in point, there's the one-minute tv spot produced by Tilds & Cantz, Los Angeles, for Trewax Gold Medal Floor Wax. The Second American tv Commercials Festival gave it an award as the best commercial for a product advertised in a single market. But when the agency went to work on the spot it wasn't thinking about awards at all.

The Job • "What we were thinking about," says Alan M. Berger, radio-tv director of the agency, who conceived and produced the award-winning commercial, "was that Trewax had just expanded its manufacturing facilities and now, after years of distributing its floor wax only through hardware stores, was ready to go after supermarket distribution. A major assignment for the tv commercial was to help get these stores to stock Trewax."

One way to get stores to stock Trewax is to get housewives to go in asking for it. And the best way to do that is by creating a commercial that is something other than the usual gleaming floor whose shine is always attributed to the advertised wax but often comes from adroit highlighting. Something else, but what? Then came the idea of letting the camera—and therefore the viewer—be the floor, walked on, spilled on, skated on, mopped and waxed.

The Spot • "This is a floor's-eye view," so the copy starts as the viewer looks up, apparently, at the feet of a man, a woman and two children. "It sees all the dull, yellow film left by the usual floor wax... hiding natural beauty. It feels the punishment of scraping feet..."

"... the damage of a hot cup of coffee" (as the coffee spills down).

"... and this soft, thin film of wax is easily ambitions" (in visible action as well as words). "Nothing left to protect the floor.

"But this" (as the camera shows a Trewax Gold Label can tilted to pour wax) "is Trewax... the very best protection you can give your floors."

"In fact, just one application of Trewax gives double the wear" (a child skates by to prove this statement; milk is spilled and mopped away, revealing the smiling face of a woman looking down at the floor, camera and viewer before the camera cuts to the can again)...

Trewax, the premium quality floor wax, with over 50% Carnuba, the world's hardest natural wax. Triple the coverage... double the wear... a Trewax floor needs only half the care.

Jon Ross, account executive on Trewax, helped develop the idea. Bill Frankle, copy chief, wrote the commercial copy. Mr. Berger took the script to KTTV (tv) Los Angeles, where, with the assistance of Jim Gates, KTTV director, the spot was put on tape. "We at T & C created the spot," Mr. Berger says, "but KTTV must share the credit because they make it all happen."

How It Was Made • For the floor's-eye view two inch-thick panes of plate glass, mounted on sawhorses, replaced solid flooring. Mir-
penditures in tv in 1960, compared with 51.9% in 1959, tvb continued. Total tv billings for the 20 leaders totaled $174,274,035 last year against $164,- 853,101 in 1959.

Coffee, tea and food drinks was the largest subclassification in the category,

**Source:** Network—Tv/BNA/Bar; Spot—Tv-Baroraugh.

Cereals were the second ranking subclassification in 1960 with network and spot billings of $41,631,164. Kellogg Co. was the leader with expenditures of $15,399,967 for cereals. Baked goods were in third place with tv billings of $31,764,697. Continental Baking Co. led this sub-group with a total of $6,228,055 in network and spot tv.

The Trewax broker had obtained 80% of the desired supermarket distribution (not entirely attributable to the advertising, since some chains were pre-sold on Trewax and stocked it as soon as it became available). Sales to the public seem good, although it’s too soon for actual volume tabulations. And, the spot won the award for best in its class.

“These fine results should be credited to three things,” Mr. Berger sums up, “an excellent product, some very potent advertising and a helluva good broker.”

How radio lit a light under Zonolite

BUILDING MATERIALS FIRM’S CAMPAIGNS TAKE SAG OUT OF SALES CURVE

It's summer and the weather is sizzling, but in Minneapolis the people at Western Mineral Products Co. (Wempco), a building materials company, are getting ready for winter. They're winterizing the cash register with regional radio. Eleven years of experience have shown them that's the way to do it, and this past winter provided the best proof yet: Wempco's sales hit an all-time high.

Wempco processes and distributes Zonolite, a vermiculite insulation-filler product of the Zonolite Co., Chicago. The Wempco territory covers nine midwestern states, an area where lumberyards and distributors have been following each other onto the Zonolite broadcast bandwagon since 1949. Now they're rallying again.

Snowballing • In the winters since Harvey Steiff, sales vice president of Wempco, first tried radio for the seasonal sales problem, the Zonolite budget has increased to the point that it is now 11 times as big as the first 75-station radio allocation in 1949. The dollars have multiplied on the cooperative route from manufacturer to distributor to dealer until now they must amount to some hundreds of thousands. The station count is around 200 radio and 45 tvs, and many of the cooperators have become steady local customers on their own, after being introduced to broadcasting by Zonolite and Wempco.

Sales charts have borne out Mr. Steiff's faith in broadcast advertising. Radio saved the day back in 1949, when he used it to turn a sagging sales curve inside out. In the intervening years, 13-week flights of fall radio have proved to be steady sales insurance with carryover results that last into spring (some areas have gone to 26 and 39-week campaigns but most rely on shorter schedules).

This past winter's experience shows why Wempco is sold on the strategy. Western Mineral had its biggest year ever at a time when building-material sales were soft in many parts of the Middle West. The Zonolite campaign went on in September and in October Wempco broke all sales records. November topped that.

Fall Buying Pattern • Now Harvey Steiff and his advertising manager, Truman Bjorklund, are mapping a 1961 campaign along the successful lines of seasons past. The new schedules will follow a joyful funeral held last fall by Wempco and dealers. They routed Cole Winter, notorious "heat thief in the attic," and laid him to rest under mounds of Zonolite.

Western Mineral's area is studied with successes from this campaign. A two-week test in Winona, Minn., by Standard Lumber Co. on hometown stations KWN0 and KAGE yielded a 350% sales increase over the same period in 1959, itself a record year. In the first three days of advertising last fall, Standard Lumber sold more bags of Zonolite than in the eight preceding months. Other stock moved faster because of the Zonolite traffic and about half the business was brand new.

In South Dakota, every radio station in the state was enlisted in the Zonolite drive. Building Material Distributors of Rapid City, S. D., lined up 10 radio outlets to dragnet Cole Winter in the tri-state Black Hills market, bringing Zonolite sales out of a slump back to 1959's high level.

A Denver jobber went on from a one-station campaign on KOA Denver to add 11 stations all over Colorado. Some 40 new dealers in that state joined the 1960 campaign.

Solid Front • In Casper, Wyo., all the lumbermen in town bought a Zonolite campaign on KTWO, KVOC and KATT.

Radio is the leader in the growing Zonolite co-op campaigns, but television is catching on. Mr. Steiff started experimenting in 1952 with demonstrations by strong local talent on KTSN-TV Minneapolis-St. Paul. He found "a greater response from Twin City consumers than any other medium we had used in the area." Wempco uses nighttime weather-news adjacencies on weekends, a time householder are likely to make the attic trip to check insulation.

Mr. Steiff used tv results from Minneapolis, Milwaukee and Omaha to persuade smaller-market jobbers and dealers to try tv. One early convert, the Robertson Lumber Co. of Grand Forks, N. D., started with KXIB-TV there during the station's first year on the air, achieving sales gains as high as 76%. Others have tried tv and come back for more until now the nine-state budget split is about 60% radio and 40% tv.

Zonolite campaigns always are conscientiously merchandised. Commercial talent tie-ins are made down the line through sales meetings to the point of sale. Stars of past Zonolite transcriptions—Bing Crosby, Danny Kaye, the Chordettes, Bob Crosby and others—were featured in entire campaigns and played no small part in influencing dealer participation. "The hardest job is always to sell your own people," Mr. Steiff says. National and local personalities are enlisted for sales pep sessions and contests generate more sales power. Some of the lumber dealers have become ardent sports backers and set up

[Image showing radio station sign and advertisement]

Standard Lumber Co. of Winona backed the radio campaign with a window display on the campaign to stop the heat thief and called attention to the Zonolite products recommended on the two local stations.

Agency head turns answer-man

Listeners of KMOX St. Louis', *At Your Service*, had the opportunity of putting an agency head on the spot during the program's "Sounding Board" segment. The guest was William Sanborn, president of Winius-Brandon Adv., St. Louis.

No holds were barred as the audience phoned in its queries on and complaints of what they understood to be agency practices.

Each of these objections Mr. Sanborn parried in turn. No amount of advertising, he asserted, could convince a shopper that an inferior product was good after trying it. Agencies are not in business to belittle people's judgment, and it is a matter of personal pride with an agency not to accept objectionable advertising or to deal with a disreputable firm. The same is true for unreasonable claims which are quickly rejected once an initial try has proven them wrong. As for the increased sound during commercials, Mr. Sanborn stated that the FCC has set a national volume level for all broadcasting, which prohibits the volume's going over a certain level.

Dr. Fuller and Zonolite followed up the live success with recorded celebrity voices and later switched to singing salesmen. Now the approach is hard-sell with sound effects. Last season's "heat thief" was run down with shots, sirens, screams and whistles. The technique is working well, according to Mr. Steiff, who thinks the company probably will stay with this style another season.

Popular broadcast times are morning farm shows, sports and newscasts.

The advertising agency for the Zonolite Co. is Fuller & Smith & Ross.

Tv gains in 1961, other media drop

The first half year has been easy on television, though hard on other advertising media. Tv gained 3% in revenues, grossing more than $670 million in network and spot, the Television Bureau of Advertising estimated last week.

Declines were in effect for all other major media as the result of the general economic slowdown, the bureau found.

Not only advertising gross but also viewing is up over last year's levels. In the September 1960 to April 1961 period, which approximates a tv season, the average U. S. tv home viewed 5 hours 32 minutes per day compared with 5 hours 27 minutes in the comparable period a year ago, and 5 hours 25 minutes in the 1958-59 comparable season.

TvB found the media trends this season to reflect those of the last economic recession in 1958 when other national media moved downward.

Newspaper advertising lineage, TvB noted, dropped nearly 10% in the first five months of 1961, with the loss in May alone at 11.5%; general magazines in the same period declined 10.8% in the number of ad pages while revenues went down 3.8%; net revenue estimates (McCann-Erickson-Printers Ink) for network radio showed a drop of 8% in the first four months, a decline of 7% for business papers, and 11% drop-off for outdoor advertising.

'Psy-Com' to test ad effectiveness

A new method for evaluating advertising effectiveness, called the Psychological Communications Index ("Psy-Com"), is offered to ad agencies and their clients by a new firm, The Psychological Research Co., 200 Fifth Ave., New York.

Dr. Harvey Queen, who formed the company, said the service involves a low-cost testing procedure that measures the degree to which an ad or commercial creates a favorable buying attitude toward a product or service. Combining a consumer and copy test in one study, the technique is designed to point out the company and product impressions an ad should create to produce the most favorable buying attitude. At the same time, the technique determines whether the ad actually does create those impressions that result in overall favorability.

Dr. Queen, most recently research director at Mogul, Williams & Saylor Inc., has also been supervisor of advertising research at Benton & Bowles and senior research analyst in the special projects division of Young & Rubicam.

What does WILLIAM A. WYLIE* say about BROADCASTING YEARBOOK?

"CONSTANTLY REFERRED TO..."

"Over the years I have constantly referred to BROADCASTING Yearbook for reference material ranging from station information to film syndicates to network accounts to station representatives. BROADCASTING is an invaluable reference."

Will YOUR advertising story be seen by top agency-advertiser people like this in the 1961-62 BROADCASTING YEARBOOK when it comes off the press on September 1? Guaranteed circulation: 18,000 copies. Same rates, same space sizes as every issue of BROADCASTING. Final plate deadline: July 29. Reserve the position you want -- TODAY -- before somebody else gets it! Wire or call collect to nearest BROADCASTING office now!

BROADCASTING
THE BUSINESS WEEKLY OF TELEVISION AND RADIO
1735 DeSales Street, N. W., Washington 6, D. C.

42 (BROADCAST ADVERTISING)
We were counting our blessings the other day and got as far as Winneshiek. We started with Allamakee, and went trippingly through Chickasaw, Keokuk, Muscatine, Poweshiek, and twenty-eight other fine old American names of counties in our primary radio service area. The count: 397,032 automobile registrations.

For all of WMTland—the 61-county area NCS #2 awarded us—the total is 613,991.

Statewide average is 2.2 persons per registered motor vehicle. Iowa's 112,000 miles of roads and streets support 33 million miles of travel every day, which partially explains what happened to us on the way to the studio this morning. We were struck—by out-of-home listening to WMT.

When you add all that traffic (8 out of 10 cars have radios, we read some place years ago) to the 470,000 radio homes in WMTland, more than half of which listen to WMT at least once in a while, you just can't avoid the conclusion:

We need more traffic lights.

WMT. CBS Radio for Eastern Iowa. Represented by the Katz Agency. Affiliated with WMT-TV, Cedar Rapids—Waterloo; K-WMT, Fort Dodge; WEBC, Duluth.

L & N to ask restraint in 40-second prices

AGENCY WANTS COST COMPETITIVE WITH NETWORK TV

Lennen & Newell, New York, revealed last week it is recommending that lengthened station breaks be priced "competitively" with network spot carriers and warned that spot tv spending will suffer if its cost-per-thousand advantage is vitiated.

L & N's views were in a letter sent to tv station representatives by Herbert Zeltner, vice president and media director. He noted that after studying the implications of the expanded station break for the past four months, L & N concluded triple-spotting will not become a serious or widespread abuse, spot tv can continue to be an effective vehicle, and, for the immediate future, the volume of spot tv will be "fairly unsettled" until advertiser practices and pricing arrangements evolve.

Mr. Zeltner said it will be "untenable" to maintain the price of a given length spot when the break expands from 30 to 40 seconds next fall. He said:

"Our reason for this contention is that under the present 30-second break structure, a 20-second announcement maintains obvious dominance of that break both from the standpoint of elapsed time and from the standpoint of assumed viewer reaction.

"Under the revised 40-second setup, this same 20-second announcement becomes simply one-half of an enlarged break. We maintain that even with identical audience levels, the value is somewhat depressed and recognition of this fact should be granted to advertisers and their agencies."

Price Warning • He noted there have been some proposals to price 30 seconds and 40 seconds at rates that are 100% and 200%, respectively, over the rates of 20 seconds, and added: "Tactical advantages because of the flexibility of spot can appear to shrink in importance when we realize that a fairly widespread use of the 40-second commercial could eat up the same amount of funds that a network participation would cost, offering completely national coverage."

However, first announcements of new rate cards with 40-second charges (Broadcasting, July 3) showed that six of the seven tv stations will charge considerably less proportionately.

Mr. Zeltner suggested that stations consider a price reduction of approximately 10% in 20-second announcements, saying that such a decrease, in the light of the longer break, would result in an overall increase in revenue of about 20% for the period if that period is completely sold. L & N's position on 40 seconds, Mr. Zeltner said, is that if the break is sold, the 10% discount would be in effect, permitting a 20% larger return to stations over present levels. If the entire break is not sold, he added, L & N recommends that present rates apply.

Mr. Zeltner suggested that consideration be given to plans which would assure non-pre-emptable locations for a volume of ID's. He stressed that L & N cannot and will not recommend the actual pricing practices of stations, but said the agency's suggestions were offered only as a guide to keep spot tv competitive with other media.

Whitebrook organizes international agency

The man who claims to have invented the television "fireside chat" technique for political hopefuls has formed an international advertising and public relations agency.

Lloyd G. Whitebrook, former executive vice president of Kastor, Hilton, Chesley, Clifford & Atherton, New York, and advertising consultant to such political figures as Adlai Stevenson, Robert F. Wagner and Averell Harriman, is now president of Communications Research & Advisory Corp., New York.

Mr. Whitebrook, champion of broadcasting's "tremendous impact" in political campaigning, merged his own advertising firm, The Whitebrook Co., with Kastor Hilton in 1955.

Communications Research is located at 60 East 42nd St., New York.

What radio should do, as Zeltner sees it

The radio industry was chided for its tendency toward "over-commercialization," "rate dealing" and "complicated rate structures" during a talk by Herbert Zeltner, vice president and media director of Lennen & Newell, New York, on June 30.

Mr. Zeltner, who incorporated his remarks in a speech at the initial meeting in New York of a continuing seminar being conducted by CBS Radio Spot Sales, said several remedies can be applied to relieve the medium's shortcomings. He urged that radio stations develop firm standards of commercial scheduling; guarantee effective airing of commercials; participate in an all-industry research project to determine the medium's commercial effectiveness; improve the level of promotion and trade advertising and provide information to agencies on all accounts using radio, possibly through a clearing house.

Mr. Zeltner, who also disclosed L&N's views on lengthened tv station breaks last week (see story, above), expressed the view that radio "can be a truly effective medium and it is up to the broadcasters to see to it that the abuses which exist are cleaned up completely and permanently." He was the first of a group of agency and advertiser executives invited to speak before CBS Radio Spot Sales personnel on "radio from the buyer's viewpoint."
Draw your sales areas as you will...

Nielsen Station Index now can match your other marketing data, area by area, with measurements of TV sales messages (yours and your competitors'). Whether your market is national, regional, or local, NSI now is more useful than ever as a source of the TV audience facts you need for appraising your present advertising and marketing efforts and increasing their effectiveness.

The reasons are demonstrable. NSI service now covers all TV viewing in the nation. It uses larger samples... measures even the least populous areas... reports each market season to season and the major markets every month... simultaneously measures all markets twice a year... and continues to use the superior techniques and quality sampling it pioneered seven years ago.

AAW-AFA merger study set

A committee to explore the feasibility of merging the Advertising Assn. of the West and the Advertising Federation of America into a new national organization of local advertising clubs was appointed by Donald Ostensoe as his last official act as AAW president. Incoming AAW President Lee Fondren, manager of KLZ Denver, promptly asked Mr. Ostensoe to the committee, which was asked to report its findings to the AAW midwinter meeting to be held in January in Fresno, Calif.

Dick Ryan, general manager, KLOK San Jose, Calif., a former AAW president, is chairman of the merger committee. Other members are: Robert Hemmings, Smith & Hemmings, Los Angeles; Clair Henderson, Rippey, Henderson, Bucknum & Co., Denver; John Hoefer, Hoefer, Dieterich & Brown, San Francisco; Thor Mhyre, Mhyre Outdoor Advertising, Billings, Mont.; Don Ostensoe, head of his own Portland, Ore., public relations firm; Pat Pafford, Pendleton Tool Co., Los Angeles (representing the Junior Ad Clubs); Herbert Price, Newspaper Agency Corp., Salt Lake City; George Weber, Cole & Weber, Seattle; Paul Willis, Carnation Co., Los Angeles; Howard Willoughby, Sunset Magazine, Menlo Park, Calif.

Two buy football

Pabst Brewing Co. and Phillips Petroleum have signed as major sponsors of American Football league games on ABC-TV, beginning Sept. 16. Agencies: Kenyon & Eckhardt, N. Y. for Pabst, and Lambert & Feasley, that city, for Phillips.

Business briefly...

Autolite will sponsor new ABC-TV fall entry, Straightaway, (Fri., 7:30-8 p.m. EDT) starting Oct. 6. Action-adventure series produced by ABC Films, stars Brian Kelly and John Ashley as automotive specialists. Agency: BBDO, N. Y.

Lestoil Products' Lestare Dry Bleach has bought co-sponsorship in 11-day TV coverage of the International Beauty Congress on KTTV (TV) Los Angeles. Co-sponsorship, running from July 12-28, consists of a total of 50 commercial minutes scattered through 12 separate remote pickups. Agency: Sackel-Jackson Co., Boston.

Dow Chemical Co., through MacManus, John & Adams, N. Y., has bought a CBS-TV special starring Judy Garland, to be presented Sunday, March 11, 1962, (9-10 p.m. EST). This will be Miss Garland’s third appearance on the network in a TV special.

Agency appointments...

- New York Herald Tribune appoints Papert, Koenig, Lois Inc., N. Y., as its agency. Although media strategy is not yet decided, spot TV and radio are likely to be used.
- Wagner Baking Corp. (Mrs. Wagner's Pies), Newark, N. J., names Smith/Greenland Co., N. Y., which will resign the Ward Baking Co., Farm House Div., to avoid conflict with the Wagner account.
- Italian Line, Atlantic carrier, appoints Kastor, Hilton, Chesley, Clifford & Atherton, N. Y., as agency effective Jan. 1, 1962. The account, which bills

**A closer tab on every broadcast minute**

SOME CONCESSIONS, BUT MUCH BOOKKEEPING IN NEW FCC PROGRAM FORMS

Every minute of broadcast time must be spelled out and identified by licensees in new program reporting forms adopted for rulemaking by the FCC last week.

Broadcasters won several concessions from the FCC in the new requirements for reporting programming, a revision of rulemaking first issued last February (Broadcasting, Feb. 27). The latest action was taken on a 6-1 vote, with Commissioner Rosel Hyde dissenting. Chairman Newton N. Minow held out for a series of questions on public affairs programming and Commissioner T. A. M. Craven concurred in the invitation for comments but reserved approval of the proposed questions.

Coincidently with the program rulemaking, the FCC proposed to amend its log-keeping rules to conform with the new program reporting requirements. It would impose brand new log-keeping methods and stations would be required to maintain logs for a minimum of three years as opposed to the current one-year stipulation. Comments in both rulemakings are due Sept. 7 with replies by Sept. 18.

Salient features of the new program reporting forms include:

- Separate forms for television and am-fm applicants.
- A "selected week" of actual programming of the applicants own choice, spelling out past programming as opposed to the composite and proposed weeks (new).
- A new definition of a "program" which would give credit for one-minute newscasts or public affairs discussions in a disc jockey show, for example.
- A requirement that the seller of a station provide a typical week's programming from the six months immediately preceding the sale application for comparison with that proposed by buyer.
- Questions on description of service area and community makeup are made more specific than those in the February forms.
- A new question requires explanation of the procedures whereby an applicant maintains regular supervision of station operations and policies.
- A provision giving credit for outstanding entertainment programs which also provide cultural or educational benefits.
- A breakdown of percentages of the seven program categories broadcast as to live, recorded and network under composite, selected and proposed weeks.
- A separate question relating to past and future programming designed for children (tv only).
- A question relating to the applicant's policy on sustaining programs, with the implication that such a policy gives the station more flexibility to experiment in programming and serving minority needs.
- The applicant's policy on broadcasting controversial issues.
- Maximum amount of commercial time during any one hour and total program interruptions during composite, selected and proposed week.
- Comparisons of "proposed" and "actual" program and commercial operations.

Included in the February proposal, but deleted from the new forms adopted for rulemaking last week, were questions on am-fm duplication and ownership by principals or employees of the applicant in products advertised or promoted by the station. Several of the categories covered in both forms have been simplified and made more specific in the latest proposal.

Additionally, the old form did not
over $500,000, is terminating a 12-year association with Cunningham & Walsh, N. Y. No media plans have been determined.

- McCulloch Corp. (motor-driven Family Karts), Los Angeles, appoints The Mack Agency, that city, to handle its product promotion. Mack will work in conjunction with McCulloch's national agency, Fuller & Smith & Ross.

Also in advertising...

New pr firm - New Los Angeles public relations firm, Taylor, Bergen, Lynn & Lee has been formed by four veteran publicists: Burns W. Lee, for 12 years head of Burns W. Lee Assoc., handling broad corporate public relations; Norman Lynn, founder of Lynn-Western, specializing in technical public relations and advertising; Robert W. Bergen, head of Bergen & Co., financial pr counseling firm; William F. Taylor, head of William F. Taylor Co., also in financial pr. New firm, which intends to offer specialized financial and corporate pr, publicity and product promotion, is located at 1830 W. Olympic Blvd. Telephone is Dunkirk 4-1213.

Counseling service - Three veteran advertising executives have opened a new advertising and marketing counseling service, Lomas, Foster, Rodin & Co., 9 Rockefeller Plaza, New York 20, N. Y. Principals include Stanley A. Lomas, president of Stanley A. Lomas & Co. and former vice president of William Esty Co.; Kendall Forster, former vice president and head of television at Esty, and Charles Rodin, creative consultant and formerly with CBS and Television Age.

Sales seminar - Sales, sales policies, programming and promotion were among the topics discussed at Peters, Griffin, Woodward's two-day seminar of tv sales managers, held at the rep's New York office. Those attending were: Arthur E. Muth, New York; William Tynan, Chicago; John Sias, San Francisco; William Walters, New York; W. Donald Roberts, Chicago; Charles R. Kinney, New York, and William Stubbs, Atlanta.

Agency formation - Public Relations International, 57 East Division St., Chicago 10, has been formed by two veteran public relations representatives, James J. and Dorothy McGuinn. Phone: Michigan 2-4615.

Rep appointments...
- WHTN-TV Huntington, W. Va., WUSN-TV Charleston, S. C., KBAK-TV Bakersfield, Calif., and WKOW-TV Madison, Wis.: Young-TV, N. Y., as national representative.
- WHNB Hartford - New Britain, Conn.: George P. Hollingbery Co., N. Y., effective July 15.
- WAYL-FM Minneapolis: Thomas F. Clark Co., Chicago as national rep.

Mr. Sleep continues

Mr. Sleep (sleeping pills), product of Jeffrey Martin Labs, N. Y., is continuing indefinitely its six-week-old saturation spot radio campaign in 350 markets, advertiser said June 30. Thirty-second and minute spots are placed through Smith/Greenland, N. Y.

recognize any program of less than 4½ minutes in duration while the new proposal gives credit for one-minute programs.

RadioTv Variations - Essentially, the radio format is a condensed version of the tv questions. Am-fm applicants are not required to give a description of their service area, program sources and competing media—questions asked of tv applicants. A radio-only question relates to the number of hours broadcast weekly with the specific number of interruptions of continuity per hour.

The questions, generally speaking, are much less susceptible to double meanings than those proposed in February. Many of the changes were made at the suggestion of an industry committee which held several meetings with commission staffers (Broadcasting, May 8). The commission stated that, "in the absence of the usual ambiguous circumstances," there would be no extension of the September deadline for comments.

Both the tv and radio forms begin with three pages of "general instructions and definitions" including a notice referring all applicants to the commission's program policy statement issued a year ago this month. The applicant's selected week would be taken from the first 12 months of the preceding license term. Each day of the week must be represented and no day may be the same as those in the commission's composite week. Variations are made for applicants seeking renewal and reporting for a period of less than three years.

All applicants for new stations, renewals, transfers and major changes in facilities are required to complete the forms.

A program is defined as "an identifiable unit of program material which is not an announcement (e.g., if, within a two-hour entertainment program, a station broadcasts a one-minute news."

McGee does reprise on FCC warning

Sen. Gale McGee (D-Wyo.) has placed himself alongside FCC Counsel Ashbrook Bryant in warning broadcasters not to seek "retribution" against dissenting industry witnesses who testified at the recently concluded commission program hearing in New York (Broadcasting, July 3).

Sen. McGee, a member of the Communications Subcommittee, told the Senate last week that Congress, in addition to the FCC, will be interested in the industry's reaction to the investigation.

"It is imperative," he said, "that any knowledgeable individual connected with any of the communications media should have "complete freedom to speak without fear of retribution ... ." He advised broadcasters that "there will be many watchful eyes observing the future conduct of contracting and talent arrangements in the television industry."
and weather report, this news and weather report shall be considered a one-minute news program.” Likewise, if a disc jockey interviews a group of students, etc., for five minutes such may be listed as five minutes of educational discussion.

Much of the criticism of the February forms centered around the strict 4½ minute limitation placed on an acceptable program length. Broadcasters claimed that this did not give them a chance to secure credit for much of their public affairs and talk programming. The new forms will give credit for such programming.

A Live Program - Live programming is defined as any local show which uses live talent half the time or longer, whether originating in the station’s studios or elsewhere. An identifiable unit of a disc jockey show (classified as recorded) utilizing live talent may be classified as live as may a “live” program filmed or recorded by the station for later broadcasting.

Questions on description and needs of area proposed to be served by applicants require much the same information as the February forms but they are more specific as to the information required. Also, the information required on “audience needs and interests” is much the same on both forms.

A section of the forms dealing with program types and sources is designed to require the broadcaster to account for programs and announcements he airs during every minute of the time he broadcasts. It requires that the amount of time be computed separately for program and non-program matter for composite, selected and proposed weeks. Program categories are religious, instructive, public affairs, agricultural, news, sports, entertainment and miscellaneous.

This additional information is required: “With respect to program matter analyzed in the categories of religious, instructive, public affairs and agricultural, provide the information listed below for each such program... (1) title and brief description, (2) whether live, network or recorded, (3) number of times program broadcast during week, (4) time of broadcast and length of program, (5) whether prepared by, or in behalf of, or in cooperation with an educational organization, (6)... whether program concerned with local affairs, (7) if a religious program, whether time paid for or carried sustaining.”

It was pointed out that if the applicant has any public affairs programming, it will show up under this category regardless of length or time carried. The questions are completely divorced from entertainment and straight news shows and gives the broadcaster a chance to

"Our news-coverage is planned with one goal in mind—to be the most comprehensive that men, money and facilities can bring to the people we serve. Result: our three-state area places unusual reliance on every WOW-TV newscast. Naturally we're happy that viewers value our news so highly—also that advertisers do, too."

**FRANK P. FOGARTY**
*Vice Pres. & General Mgr.*
*Station WOW-TV*
Leadership, with Reason

In television there are two sides to a standout news operation: First, getting the news. Then, presenting it.

On both sides WOW-TV has a prize-winning record, year after year. Its news-gathering starts with the complete four-wire UPI service, combined with three AP wires to give full perspective on world, national and regional events.

To these the station adds UPI facsimile, plus a special weather-wire, plus instantaneous videotape from CBS (Omaha’s only station with videotape).

Five newsmobiles, and six monitors connected with city, county and state safety headquarters, backed up by 110 regional correspondents, give on-the-spot repertorial coverage of the station’s entire area.

In news-presentation, these myriad sources provide the station’s 20-man news staff with a wealth of material that keeps Nebraska, Iowa and Missouri families abreast of the news, and well-informed on its significance.

In addition, WOW-TV has a previous citations WOW-TV has just received the Gold Frame Award of the Omaha RT Council, for “outstanding contributions to broadcasting” in news programs. Over 400 persons and 33 organizations participated in award-balloting.

To Blair-TVO Community-leadership in news and other local productions by great stations like WOW-TV is a constant source of inspiration. We are proud to serve more than a score of such stations in national sales.

Gavel for Cox

The FCC has passed some of its decision-making authority to Broadcast Bureau Chief Kenneth Cox in an effort to relieve the commissioners of the necessity of action on routine matters. Mr. Cox will henceforth be empowered to pass on matters not involving policy-making or departures from prescribed laws or rules.

In announcing the delegation, the commission expressed the hope that it henceforth will have more time to consider “major matters which require policy and other particular considerations.” Among the bureau chief’s new powers is the authority to set mutually exclusive applications for hearing, extend the time for replies to correspondence and to act upon applications for broadcast facilities (including modifications, renewals and transfers) when standards are met and upon which no objections have been filed.

Bureau Chief Cox’s new authority became effective last Thursday (July 6) and already has been used in a few uncontested cases.

Leadership, with Reason

In television there are two sides to a standout news operation: First, getting the news. Then, presenting it.

On both sides WOW-TV has a prize-winning record, year after year. Its news-gathering starts with the complete four-wire UPI service, combined with three AP wires to give full perspective on world, national and regional events.

To these the station adds UPI facsimile, plus a special weather-wire, plus instantaneous videotape from CBS (Omaha’s only station with videotape).

Five newsmobiles, and six monitors connected with city, county and state safety headquarters, backed up by 110 regional correspondents, give on-the-spot repertorial coverage of the station’s entire area.

In news-presentation, these myriad sources provide the station’s 20-man news staff with a wealth of material that keeps Nebraska, Iowa and Missouri families abreast of the news, and well-informed on its significance.

In addition, WOW-TV has a previous citations WOW-TV has just received the Gold Frame Award of the Omaha RT Council, for “outstanding contributions to broadcasting” in news programs. Over 400 persons and 33 organizations participated in award-balloting.

To Blair-TVO Community-leadership in news and other local productions by great stations like WOW-TV is a constant source of inspiration. We are proud to serve more than a score of such stations in national sales.

alterably opposed to the commission establishing guidelines for the programming of broadcast stations," he stated at that time.

New Logging Concept - The new rules and requirements on keeping station logs were described as a "must" if the new program forms are adopted. Much of the information required on programming is not now logged by licensees—a fact recognized by the commission after strenuous objections were raised. Much of the required information goes back over three years and at the present time stations are required to keep back logs only for one year.

The new rules would require that they be retained by the station for a minimum of three years or until told in writing by the commission that the logs could be destroyed in cases under a controversy.

Only TV logging rules are spelled out in the rulemaking but the FCC said that it intends to make similar changes in AM-FM log-keeping and invited comments on all three broadcasting media.

A large majority of the licensees presently use log books which would be made obsolete by the proposed new rules, a Washington lawyer stated last week. "This is a brand new method of logging which will require radical and expensive changes," he stated. The new rules would require the following entries, among others:

On and off time and length in seconds of each station identification announcement (length not now required); all commercial matter as either announcements or continuity; all non-commercial announcements with on, off and length; name and political affiliation of political candidates; time each program begins and ends, with classification, name and title.

Also, contingent on the result of rule-making to require identification on the air of any product promoted in which station personnel have an interest, such an entry would be required in the new log.

The required entry as to the classification of a program is a new concept, as is the requirement that children, instructive, public affairs, agricultural, and local news shows be so identified in the log. Each entry of a religious program would further have to be identified as to whether it is sustaining or commercial, and along with several other categories, whether prepared in cooperation with a local organization or dealing with local affairs—all new concepts in logging.

The new rules also specify that the beginning of a log day shall be 12:01 a.m.

**PROGRAM STANDARDS**

Ford says FCC will do what it can to help raise them

The FCC is determined to do its part to help broadcasters raise the programming standards of radio-TV, Commissioner Frederick W. Ford told the Washington State Assn. of Broadcasters on June 28.

However, Mr. Ford said, it is neither legally nor humanly possible for an agency such as the FCC to do the job by itself, so both broadcasters and the American public must rise to the challenge as well.

In the course of his speech, Commissioner Ford dwelt at length on the meaning of the often-used but hard-to-define phrase, "the public interest, convenience and necessity." He refused the idea that the FCC arbitrarily interprets the phrase to mean anything it wishes according to its whims of the moment by citing the commission's Report and Statement of Policy, recognizing that "... the public interest is what the licensee says it is, provided ... that his judgment is the result of a reasonable and bona fide effort to ascertain the program interests and needs of the area he is licensed to serve."

Although he expressed the view that it is impossible to devise a rigid definition of the phrase which would serve as a universal criterion in all matters concerning broadcasting, he pointed out that, in his opinion, certain considerations could be "identified as representing components of the public interest, convenience and necessity." "Programming," he said, "... must be imbued with an element of public service." He went on to emphasize that the Communications Act prohibits commission interference "with the right of free speech by means of radio communication." Freedom from governmental control or supervision of programs is thus an element of the public interest.

The commissioner stated that although Congress has in general avoided defining "the public interest, convenience and necessity," the courts have "repeatedly held that programming is a significant element in determining a station's performance in the public interest" and that "... the power to compare programming proposals of competing applicants, to consider programming in determining whether an existing station's service area should be infringed upon by a new station and to disqualify an applicant ... on the ground of program inadequacies, all have been affirmed as properly within the scope of the public interest ... standard." He went on to cite as ex-

**'Listener's Lobby' answers Minow's call**

The clarion call of FCC Commissioner Newton N. Minow to listeners to blow the whistle for the FCC if they feel a station is not serving them was answered last week by a Michigan corporation calling itself "Listener's Lobby."

The group, pledged "to improve the standard of quality of radio broadcasting," asked the commission to deny or set for hearing the license renewal of WXYZ Detroit, owned by ABC. It urged the hearing be held in that city. The station's license will be up for renewal October 1, 1961.

The petition's language was relatively restrained. Reports from the members of the group who had monitored the station were waspish.

 Listener's Lobby charged WXYZ "uses so-called 'formula' programming apparently dictated by the parent corporation . . . that its broadcast content is without merit or taste; that said station is listened to by teenage and sub-teenage audiences and petitioner aver that programming by WXYZ is harmful to the emotional and intellectual health of such persons; that WXYZ has neglected and refused despite promises to recognize its civic and public responsibility in the community and to broadcast programs which are of interest to all persons in this area."

The members who monitored the station were all women. Without exception they complained of the strain of performing such a public service. Their comments:

"The disc jockeys prattle incessantly—not always grammatically—too often in teen-age jargon."

Programs are "constantly interrupted by commercials ranging from singing jingles to sheer idiocy."

"What is euphemistically described as public-service programming are time and weather checks, repeated until meaningless."

"After two or three days of intermittent listening my awareness capacity became inured to vacuous sounds and prattle so that only by forcing myself mentally to listen could I know what was being transmitted."

"Someday without challenge WXYZ may have even an unadulterated all-commercial show. Commercials that other stations would not touch will be loudly presented by WXYZ."

"... low-grade, sexy, rock-and-roll recordings . . ."

"This newscast was presented for morons, not adults."

One monitor sounded an optimistic note, ending her report . . . "See you either at the hearing or the next Listener's Lobby meeting."

54 (GOVERNMENT) BROADCASTING, July 10, 1961
Agency X had a client who was a specialist. He specialized in a one-syllable word—NO! Hoping to increase his vocabulary, the agency invited him to a party. However, he hovered near the bar and fiddled with the bar equipment—in silence.

An adroit agency man, believing that actions speak louder than words, joined the fiddling. After a bit the agency genius pointed out that certain pieces exactly balanced others, as shown in the first three sketches. He asked the client to calculate the number of Martini glasses it would take to balance the julep cup. All Martini glasses being full except the one shown, the client was obliged to think.

Send us the answer* and win an exciting new prize. It may be round or rectangular, thick or thin, solid or liquid.

*If mathematics isn't your cup of tea, we suggest you demonstrate your capacity to achieve the necessary balance to the H-R man at your neighborhood bar.

A preview of future FCC rules?

The shape of things to come in practice before the FCC was previewed last week when the Federal Trade Commission issued its new rules of practice, effective July 21.

If there is a community of interest among federal regulatory agencies acting under the spur of the New Frontier this is what FCC applicants can look forward to in the near future, all premised on a speed-up of casework load:

- No automatic review of an examiner's initial decision unless one less than majority of the commissioners vote for oral argument.
- This is one of the most controversial issues in Rep. Oren Harris' bill to reorganize the FCC; it is virtually unanimously opposed by broadcast industry spokesmen.
- All hearings to be held at one place and to continue without suspension until they are completed.
- Negotiations looking toward a consent judgment to be held prior to the issuance of a complaint. After 30 days if no consent order is agreed upon a complaint shall be issued and a hearing held to its conclusion, with the complainant forfeiting his right to work out a consent order. Although the FCC does not deal in consent judgments, some of its penalty procedures could lend themselves to this treatment.
- The new rules of practice, replacing those in effect since 1955, are for the purpose of reducing delay by curbing dilatory tactics by respondents of FTC actions and by prohibiting overly deliberate prosecution and hearing of cases by the agency's own staff, it was said.
- "We have good reason to hope that our revised rules will help the commission to shake itself loose from a lifelong incapacity to act soon enough," Chairman Paul Rand Dixon stated. "By requiring litigants to present the issues of a case to the commission in the fastest reasonable time, we may be able to bring relief to victims of illegal actions while they are still in business."

Internal Opposition • Two of the commissioners objected to the rule which would bar the right of review by the commission of an examiner's decision. Commissioners William C. Kern and Sigurd Anderson charged that the changes are contrary to the spirit of due process and lacking explicit congressional sanction.

Chairman Dixon replied that the purpose of this is to stop appeals whose only purpose is to delay a final decision and waste the FTC's time.

The new review rule does not prevent a litigant from appealing an examiner's decision or a final FTC decision to the federal court. FTC Commissioner Philip Elman, one of those who worked out the new rules, stated that they were more advanced than those used by any of the other federal agencies.

The proposed changes will apply to any complaint to the FCC, and will not affect any cases pending under the old rules. The new rules will take effect on July 21.

FCC to reconsider sale of WAMV-AM-TV

Proposed changes from a classical music format to Negro and "young adult" programming following the sale of WAMV-AM-FM East St. Louis, Ill., brought sufficient protest to cause the FCC to reconsider its approval of the sale and to reopen the case.

The commission on June 1 approved the sale from Hess-Hawkins Co. to Stanlin Inc. for $350,000 without a hearing. The agency subsequently received protests from the East St. Louis Chamber of Commerce, the mayor, and others who said they didn't object earlier because the seller had stated the sale would not take place. In its order for reconsideration, the FCC said the sale will remain in effect pending further inquiry.

Principals of Stanlin Inc. include Lawrence R. Plocus and Simpson R. Walker Jr. (one-third each), who also operate WOBS Jacksonville, Fla. East St. Louis is already served by two other good-music stations—KADY and WED —and Stanlin does not believe the area can support three such stations with "the same type of music appealing to a small segment of the audience," the assignee told the FCC. But there are over 600,000 Negroes in the area and the population of East St. Louis is more than half Negroes, Stanlin claims.

The new ownership would employ a mixed staff of Negro and Caucasian announcers and would hope to appeal to "Negroes, teenagers and young adults." Stanlin plans a format it says has proved to have general appeal in Jacksonville, which also has a racially mixed population.

One telegram of protest charged that location of an integrated station in East St. Louis would stir up race problems and said the area "has been given a bad reputation" for racial difficulties. Stanlin maintained that such station operation tends to further racial understanding and to provide a general appeal mixed audiences. It cited its WOBS experience as evidence of this claim.

FCC turns thumbs down on WHAS-TV tall-tower bid

Efforts of WHAS-TV Louisville to construct 1,859-foot tower—higher than any man-made structure in the world—were derailed by the FCC last week. (BROADCASTING, July 3). The commission announced that it had issued staff instructions which would deny the station's application to increase its antenna height from 600 feet and move its transmitter from Louisville to Brownsboro, Ky., 19 miles northeast of the home city.

The WHAS-TV proposal had been opposed by aeronautical interests and the State of Kentucky on the ground the 1,859-ft. tower would be a hazard to air navigation. The FCC's Broadcast Bureau and two uhf stations operating in Lexington, Ky., objected because the new facilities would permit the ch. 11 Louisville station to place a Grade B signal over Lexington. An initial decision in August 1960 also recommended that the application be denied.

NAB wants to intervene in Wyoming CATV case

In a petition filed with the FCC a fortnight ago, the NAB asked to intervene in a case involving construction of a catv microwave-relay transmitter atop Copper Mountain in Wyoming.

The trade association held that Hearing Examiner Walther W. Guenther erred in rejecting as "of no legal significance" a protest by KWRB-TV Thermopolis, Wyo., that the relay transmitter might interfere with its service.

When the FCC asked Congress for jurisdiction over catv stations the commission indicated its belief that catv systems may have some effect upon the nationwide tv allocations plan, NAB said. It concluded, therefore, that the FCC should consider the possible impact of the Wyoming relay transmitter in its own system of tv allocations and priorities. NAB said it should be allowed to participate if oral argument is scheduled in the case.
RCA High-Power Transmitter-Antenna Combination—Extends Coverage—Improves Picture Quality

... says George McClanathan, Director of Engineering, KPHO-TV

"We've completely modernized our transmitter plant and stepped up KPHO-TV's sales power with a new high-power RCA transmitter. The improved facilities started paying for themselves at once—by increasing sales. And even though operating at maximum power, we are obtaining very low operating costs, because of the way we did it."

The new power amplifier is capable of 25,000 watts output. However, the new RCA six-bay superturnstile antenna needs less than 20,000 watts of this power to get full 100 kilowatts of ERP. This puts a very light load on the transmitter, which results in low operating costs, long life, and very reliable performance.

All reports on extended coverage show that KPHO-TV's signal is extremely good. KPHO-TV's programs originating in Phoenix, Arizona, are now being enjoyed as far west as Blythe, California; as far north as Page, Arizona; as far south as Nogales, Arizona; and as far east as Silver City, New Mexico. And 90 per cent or more of the reports show far superior picture quality.

Learn how an RCA modernization program can increase your station's sales while providing reduced maintenance and increased reliability. Your RCA Broadcast Representative will be glad to give you additional information about new transmitters and antennas that can bring your station up to date. There's a complete RCA line to choose from. Get the facts before you buy. RCA Broadcast and Television Equipment, Dept. AB-22, Building 15-5, Camden, N. J.
COURT BACKS FCC ON CH. 10

Order clears way for Miami tv award to Wilson; losers may undertake further legal moves

The FCC received a judicial A-OK in the Miami ch. 10 off-the-record case when a trio of federal judges last week unanimously upheld in substance the commission's 1960 decision ordering National Airlines (WPST-TV) to surrender its permit and awarding the vhf channel to L. B. Wilson Inc.

The appeals court, in an opinion written by Circuit Judge E. Barrett Prettyman, said the FCC acted correctly in making its findings in the ex parte case.

Concurring in the opinion were Circuit Judges George Thomas Washington and Charles A. Danaher.

Judge Prettyman also by indirection turned down an appeal by North Dade Video Inc., one of the original four applicants for the Miami tv station.

The FCC ruled that three of the four applicants in the Miami ch. 10 case were guilty of attempting to influence outside the hearing record, the outcome of the FCC's vote (Broadcasting, July 18, 1960). The commission's ruling came after a hearing on the ex parte charges before a special FCC hearing examiner. The commission vacated the 1957 grant to National Airlines and disqualified National, WKAT Miami and North Dade Video Inc.

The court told the FCC that it is accepting the 1960 order as a proposal, since the case has gone back to the commission on remand. This legal point—whether the 1960 order is binding or only an indication to the court of the FCC's intent—was one of the elements in the court battle that has been fought the last 12 months.

FCC Ready to Move • The commission is expected to issue a simple order invoking as a final decision the 1960 ruling. This will come when the FCC receives the court's mandate. This takes place usually 10 days to two weeks following a decision, unless further legal moves are undertaken by the parties.

In its 1960 decision the FCC gave National Airlines 60 days to surrender its permit and cease broadcasting. It also granted ch. 10 to L. B. Wilson Inc., the only applicant found guiltless of off-the-record maneuvering during the original consideration of the case.

The grant to L. B. Wilson Inc., owner of WCKY Cincinnati, contained a proviso that its initial license shall run only for four months. This was explained as an encouragement for other applicants to apply, since the commission could not reopen Miami ch. 10 to new applicants because of legal obstacles. The court upheld the FCC's position in this, despite an appeal filed by Elzy Roberts, former St. Louis broadcaster.

Because of the litigation, the commission said it would stay the effectiveness of its 1960 order until 15 days after the court issues its certification on the case.

Speculation centered last week on just what action National Airlines or North Dade Video might take to overturn the court's ruling. Both or either might ask the court to rehear the case with all nine D.C. Circuit judges sitting, or might ask the U. S. Supreme Court to review the findings of the appeals court. In either case some delay in the issuance of the court's mandate might be entailed, more so in the latter instance than in the former. WKAT earlier voluntarily dropped out of consideration.

Stiff Words • In a strongly worded opinion, Judge Prettyman wrote: "Surreptitious efforts to influence an

Tv violence: still a primary target for Dodd and friends

Senate hearings on the possible connection between television crime and violence shows and the rising juvenile delinquency rate is expected to resume in two weeks. That was the word last week from the Senate Juvenile Delinquency Subcommittee, which held six days of hearings last month.

Witnesses for the resumed hearings have not yet been lined up, but at least one cabinet officer—Secretary Abraham A. Ribicoff of Health, Education and Welfare—and clergymen representing the three major faiths are expected to testify.

There was no indication that the industry, which furnished a full complement of network executives at the hearing last month, will be asked to supply additional witnesses.

Although the hearing has been in recess two weeks, the firing at tv crime and violence shows hasn't abated. The National Council of Juvenile Court Judges, at its convention in San Francisco, adopted a resolution criticizing television shows "devoted to themes of crime, violence, brutality, sex and sadism." It said such programs are "dangerous to the welfare of our youth."

Sen. Thomas Dodd (D-Conn.), chairman of the Juvenile Delinquency Subcommittee, addressed the convention and, it is speculated, had a hand in drafting the resolution. It contained the assertion, first made in the statement with which he opened his subcommittee inquiry, that tv crime shows in prime time had tripled since 1954.

Before flying out to San Francisco, Sen. Dodd taped an interview on CBS Radio's Capitol Cloakroom, during which he warned he would press for federal regulation of the networks unless they demonstrated a willingness to reduce the number of crime and violence shows they carry. He set a six-month deadline for the networks to "clean up their own house."

Additional criticism of tv crime shows was heard last week from Washington, D. C. Police Chief Robert V. Murray, in closed-door testimony released by the House Subcommittee on District Appropriations. "A steady [tv] diet of crime and violence, rape and murder... is bound to have an effect" on youngsters, Chief Murray said. He added that crime shows often provide juveniles "with a blueprint for crime." He said "many" youngsters "followed out exactly what they had seen on television in the commission of crimes."

He learned his lesson—the hard way

The record has been closed in what may be a benchmark case testing the FCC's policy of holding license renewal hearings in the community served by the station—the hearing in Kingstree, S. C., last month on WDKD. (Broadcasting, June 5, 12.)

The deadline for proposed findings set for this week has extended by Hearing Examiner Thomas H. Donahue to July 27.

Of the many interesting aspects of the case, one enigma remains—the personality of Charlie Walker, the WDKD disc jockey, whose allegedly off-color remarks triggered the whole investigation.

Like Harvey and Rebecca, title characters in plays in which they never actually appear, Charlie Walker, central figure in the WDKD drama, never took the stand or visited the hearing room. Mr. Walker's attorney (and brother-in-law), LaNue Sam Floyd, was present throughout the proceeding. He said, "We didn't see how it could do Charlie any good for him to testify."

Witnesses mostly agreed on the character of Mr. Walker. All attested to his appeal and agreed he had a very large following. They said he would give freely of his own time to worthy causes and was a phenomenal fund raiser. But most said he lacked taste and restraint.

The pastor of a Methodist church in Kingstree testified: "Charlie Walker was a likeable fellow but it seems that when he got to the microphone, he just lost his head. He did a lot of good and he certainly had a big following. He could bring tears to your eyes when he talked about mothers. But the tragedy was that even in that he would inject something suggestive."

Charlie Walker is not in broadcasting at the present. He has a job driving trucks in a city many miles from Kingstree. He told Broadcasting, "I've got no halo around my head... I guess where there's smoke, there's fire. I've made mistakes and errors in judgment. But the American way is to give people a second chance. I've got radio in my blood and I'd like to get back to it. If sometime in the future some broadcaster would give me that second chance, I know he wouldn't regret it."

Mr. Walker admitted he was bitter about the station which submitted tapes of his program to the FCC. He said that the Lake City, S. C., station (15 miles from Kingstree) had either imitated him or condemned him since it first went on the air. "They said they did a righteous thing; I say it was selfish," Charlie remarked, "Their attitude was 'Let's get rid of Charlie Walker and sing hymns all the way to the bank.'"

He told of meeting FCC attorney Donald Rushford in Kingstree during the weekend recess of the hearing at a barber shop. "I had a lot of steam and hard feeling built up inside me about all this and my temper got the best of me," he explained when asked of reports that he had "told off" the attorney. "Afterwards I apologized and talked with him a little," he said. He claimed that neither the FCC nor WDKD seemed to care to have him testify. (FCC attorney Pat Valicenti said he had wanted Mr. Walker to testify but couldn't contact him official charged with the duty of deciding contested issues upon an open record in accord with the basic principles of our jurisdiction eat at the very heart of our system of government—due process, fair play, open proceedings, unbiased, uninfluenced decision. He who engages in such efforts in a contest before an administrative agency is fortunate if he loses no more than the matter involved in that proceeding.

"We do not have here an ordinary case of 'unclean hands,' in which countervailing considerations of public interest in the service involved might justify awards despite misbehavior. This case concerns corrupt tampering with the adjudicatory process itself. No public interest in service or capacity for service is paramount to the public interest in the integrity of the adjudicatory processes of government, the commission concluded. The order proposed to be adopted by the commission is well within its authority..."

Charges of behind-the-scenes contacts in the Miami ch. 10 case, as well as in half-dozen other TV cases, were initially made three years ago during the highly publicized hearings of the special House Legislative Oversight Committee. During those hearings, FCC Commissioner Richard A. Mack resigned after his name was linked with that of his long-time friend, Thurman A. Whiteside, a Miami attorney, who, it was alleged, was acting for National Airlines.

Both were tried on criminal conspiracy charges. The first trial resulted in a hung jury; the second ended in an acquittal for Mr. Whiteside. Mr. Mack was too ill to stand trial. Mr. Whiteside was found dead of self-inflicted gunshot wounds last May.

First of Half-Dozen * The Miami ch. 10 case was the first of a number of TV cases which involved charges that attempts were made to influence FCC commissioners.

The FCC is reconsidering the Boston ch. 5 case, after having been sustained by the courts in ordering the Boston Herald-Traveler grant to be vacated—although not absolutely disqualifying any of the original applicants from being considered in the new proceedings.

It has ordered a review of the move of ch. 2 from Springfield, Ill., to St. Louis, because of the role played by principals of KTVI (TV) St. Louis, now operating on ch. 2.

Several months ago, the commission instructed its staff to draft a decision which would revoke the grant of Miami ch. 7 to Biscayne Television Corp. (WCKT [TVI]) and disqualify not only Biscayne but also two other applicants. The commission has not acted on the Miami ch. 7 instructions yet; presumably it was awaiting the appeals court decision in the Miami ch. 10 case, particularly as it would relate to the form in which the final order should be issued.

Other ex parte TV cases under investigation include Jacksonville, Fla., ch. 12; Orlando, Fla., ch. 9, and St. Louis ch. 11.

**KERO-TV switch delay turned down by FCC**

Splitting 4-3, the FCC last week turned down requests by KERO-TV Bakersfield, Calif., to vacate the agency's order for a hearing to determine how soon the station must shift from ch. 10 to ch. 23 or to change the issues to determine whether KERO-TV must make the shift at all (Broadcasting, April 24).

The proposed change in channels would make Bakersfield an all-uhf market.

Commissioners Rosel H. Hyde, T. A. M. Craven and John S. Cross favored granting the station's request.

**KERO-TV last week opposed a request by the Broadcast Bureau that the FCC quash a deposition from an engineer on white areas and degradation of service that would be caused by the move. The station said the bureau had submitted engineering data by means of deposition and that KERO-TV should be granted the same privilege.**
again). He said he had told the station he could produce “as many people as they wanted” to testify on WDKD’s behalf. “I honestly believe that 99.1% of the people in the station’s area are on the station’s side,” he said.

He said there was absolutely no unpleasantness between him and WDKD licensee E. G. Robinson Jr. and called Kingstown residents “the nicest people in the world.” Mr. Walker’s wife still lives in Kingstown.

Early Fame • Charlie Walker had established himself as a “character” in eastern South Carolina back in 1952. A personality sketch of him appeared in the Charleston News & Courier on Aug. 17, 1952. It reported that he had appeared on a nationwide radio-television show in New York “as one of the country’s top disc jockeys . . . chosen because of his tremendous listening audience in his area, his good showmanship and his keen knowledge of music . . .”

The article also told of Charlie’s penchant for personal kidding about local people and places. “He has an opinion on everything from the quality of unmentionables to the high cost of living,” the newspaper article said.

“His listeners instantly recognize ‘Smooch-Me-Quick Crossroads’ as Lake City, where there is a Fairview Avenue called that because ‘There’s always a fair view. Nobody’s got shades over there.’ More easily recognizable are . . . Andraws, Salter Do Pot and Agony Alley,” the article related. Such nicknames were among those introduced by the FCC in the hearing.

“How Charlie Walker has gotten away with ‘murder’ in conservative, church-going Williamsburg [County] is still a source of wonder after three years. His remarks are enough to turn the wave lengths red. Perhaps people feel that he is essentially good. His jokes may be off-color but they never sting anyone. His respect for his mother is known among his friends to be remarkable. He puts in many a good lengthy word for worthy causes. He fills up his off-hours with reading and doesn’t even own a radio!” This 1952 estimate of Charlie Walker seemed still valid, judging from the testimony which was heard at length in 1961 in the Williamsburg County courthouse.

FCC TO BUCK ON TOWERS

Names Lee, Bartley, Ford to confer with FAA on jurisdiction over tall antenna supports

The FCC has decided to put up a fight for its jurisdiction over radio and tv towers. Last week it named three commissioners to act as a tall-tower committee to do what is necessary to preserve the FCC’s authority in this field.

Named to represent the FCC in meeting with the Federal Aviation Agency, were FCC Commissioners Robert T. Bartley, Robert E. Lee and Frederick W. Ford.

The commission acted after hearing a staff report on the FAA’s new tower rules, issued last month and effective July 15 (Broadcasting, June 19).

In the general discussion on the FAA’s regulations, it was pointed out that the FAA proceedings to determine whether or not a radio or tv tower is an aeronautical hazard are not subject to the Administrative Procedure Act. It was the consensus of the commissioners and the staff that the FCC has the final authority to grant or deny a broadcast application. The FAA, it was felt, should go to Congress for clarification of the jurisdictional conflict. The FCC, it was felt, cannot turn down an applicant without making its own determination that a tower is an air hazard.

Thirty-Day Rule • The FAA regulations, published in the June 14 Federal Register, call for broadcasters to file a request for clearance of all towers 150 ft. above ground at least 30 days before the same broadcaster files an application with the FCC.

The air agency established that any tower more than 500 ft. above ground, or more than 200 ft. above ground in a control zone, constitutes a hazard to air navigation.

The rules provide that the FAA’s own Obstruction Evaluation Branch will make a determination whether or not a structure is an air hazard.

Upon the request of an applicant, the FAA administrator may grant a public hearing. This is described as a fact-finding, non-adversary proceeding, with final determination up to the administrator.

In issuing its regulations last month the FAA said it intended to establish antenna farms for metropolitan markets, and would do so subsequently. It said it would coordinate this with the FCC. Towers and other structures in antenna farm areas would be exempt from the hazard criteria in the rules.

Opposition Cited • The greatest danger to broadcasters, according to those who have studied the import of the regulations by FAA, lies in the failure to permit tower applicants to oppose aeronautical objections or staff determinations with all the protection of the Administrative Procedure Act. The so-called public hearing is particularly unfair and unsatisfactory in this respect, it was stated.

The FAA rules state that a “no hazard” determination will be effective for only 18 months. This is wholly inadequate, it was pointed out, since few broadcast hearing cases are completed in this time; even an cases mostly take longer to be acted upon.

The FAA’s full-scale move into the radio and tv tower field first became known last September when the agency issued proposed regulations. Broadcast and other interests succeeded in winning the right to a meeting with FAA officials to discuss various elements of the proposed rules. This took place earlier this year. An FCC staff group also met with FAA staffers to attempt some method of ironing out the jurisdictional question.

Few revisions were made in the final rules, basically the FAA adhered to its major premise that it is the agency authorized to be the sole judge of what constitutes an aeronautical hazard.

Although the FAA and its predecessor the Air Coordinating Committee made air hazard studies of radio and tv towers for the last two decades or more, the results of these determinations were only recommendations to the FCC. Where objections were lodged to antenna sites or tower heights, the FCC would make this an issue in a hearing on the application and would make a final determination itself.

WITV (TV) doesn’t show for FCC license hearing

The contest for ch. 17 Fort Lauderdale, Fla., was a brief one. The hearing opened July 5 before FCC Examiner Asher H. Ende with WITV (TV) asking renewal of license and the Board of Public Instruction of Dade County seeking assignment of the channel.

Gericco Investment Co., licensee of WITV, did not send legal counsel or other representatives to the hearing, however. A notice sent by registered mail to Gericco was introduced into the record; counsel for the educational group waived proposed findings and Examiner Ende closed the record.

The FCC in its designation of hearing had found the Board of Public Instruction qualified to operate ch. 17.
GOV. MEYNER TAKES SWING AT FCC

Charges N. Y. scheme to take Jersey's only television outlet

The FCC is in collusion with the networks, "so-called educational interests" and New York television stations to perpetrate a wicked scheme designed to rob the state of New Jersey of its only tv station.

This charge was fired by Gov. Robert Meyner of New Jersey last week in response to the FCC's inquiry into how to bring an educational station to New York and Los-Angeles. The governor felt the terms in which the inquiry had been couched encouraged the pending sale of WNTA-TV Newark to New York City educational interests (with the three networks and two New York independent stations contributing to the purchase price) (BROADCASTING, July 3).

Gov. Meyner's petition, drawn by the state's attorney general, stated that the FCC "inquiry itself and the inclusion of ch. 13 [WNTA-TV] within it is illegal and without statutory and constitutional justification." He further termed the inquiry "a manifest attempt to deprive New Jersey of its sole vhf station disregarding completely the history and present allocation of that channel."

Referring to the "obviously questionable tactics" of the FCC, the educators and the New York tv licensees, Gov. Meyner said the use of the inquiry instead of separate rulemakings to (1) convert ch. 13 from commercial to educational and (2) shift it from Newark to New York City is a "potential mockery of the commission's duty to protect public interest."

The governor called the proposed sale a "conspiratorial action" by WNTA-TV, the National Educational Television network and five New York stations. He implied that the stations had contributed the money towards the purchase in order to buy off a commercial competitor and ease the pressure brought to bear on them by the FCC inquiry, promoted by NET.

Newark Speaks! • Leo P. Carlin, mayor of Newark, also filed on behalf of the city. Like Gov. Meyner, he submitted 10 brochures on the growth and attractions of the area. His petition to deny the WNTA-TV sale cited the history and industries of Newark and how the channel had been originally granted to serve that community. This it had done by programs of civic interest, presenting local and state officials and forums of interest to New Jerseyites until it was purchased by National Telefilms Assoc. and became essentially New York-oriented, the mayor claimed. Gov. Meyner leveled a similar charge and also showed the raise in time rates charged by the station after it had moved its antenna to the Empire State Bldg. and was allegedly concentrating on New York audiences.

Gov. Meyner told a news conference last week that a New Jersey citizens' group would like to operate ch. 13 as a commercial station, featuring some educational programming and emphasizing service to that state. A Newark newspaper article disclosed the plans Ed Cooperstein, former WNTA-TV producer-director, submitted to Gov. Meyner: in-school and informational programming from 7 a.m. to 3 p.m.; news, women's, civic and community programming from 3-7 p.m. and commercial entertainment programs from 7 p.m. to 1 a.m. Planned for weekends are "New Jersey sports," religious, music, discussion and cultural programming.

More Sanguine Views - Networks and television stations were less upset in their responses to the FCC inquiry.

CBS said that commercial tv serves educational needs to a large extent and cited informational programs broadcast during the past year. The network said this was a "persuasive reason for not taking precipitant action to require compulsory change" to channels reserved solely for education. CBS praised the pending WNTA-TV sale and suggested the FCC wait a reasonable period to see how etv works out in New York before proceeding in Los Angeles. It also suggested the FCC could provide a tv channel between chs. 6 and 7 and that those desiring to view could convert their receivers to pick up the station at a cost of about $25 per set.

NBC said such an FCC proposal might be inclusive of its dissatisfaction before commercial interests had established stations on the two cities' channels but that it would not be proper to take away channels to give to etv. The network cited the WNTA-TV sale as an example of how an amicable solution to the NY-LA etv problem can be worked out.

WPX TV (TV) New York expressed the hope that the commission would approve the WNTA-TV sale and thus render the inquiry moot as far as New York was concerned. It said it would hold suggestions pending FCC action on the sale application.

KTLA (TV) Los Angeles asked the FCC to allow WNTA-TV to serve as a test of the public's acceptance of educational fare in a major market before decreeing changes in Los Angeles. "Continuing public support for the venture is still to be measured," KTLA warned. In the interim, it said, it would be willing to share in a rotation of educational programs with the other commercial stations, as suggested by KCOP (TV) Los Angeles (BROADCASTING, May 16).

Move to halt bank loan charged in FCC case

Charges that an applicant for a Wisconsin station put unfair pressure on a bank to prevent it from making a loan to a rival applicant will now be aired as a character qualification issue in the hearing for the facility, the FCC has ordered. Commissioners Ford and Hyde dissented on grounds that no evidence backing the charges had been presented.

Beacon Broadcasting System Inc., Grafton-Cedarburg, Wis., claimed that an attorney for rival Suburban Broadcasting Co., Jackson, Wis., had phoned the state bank commissioner and had led him to believe that he represented the FCC in inquiring into the propriety of a $50,000 loan to Beacon by the Grafton State Bank. When the bank commissioner informed the president of the Grafton Bank he said the loan was being investigated by the FCC, Beacon charges. Samuel Miller, Suburban attorney, has denied that he attempted to make the bank commissioner believe he represented the FCC. A further charge by Beacon was that Suburban asked Benjamin Grob, an airport owner and substantial depositor in the Grafton bank, to remove his account if the bank lent Beacon the $50,000 and that Mr. Grob actually did shift the main part of his account when the bank went through with the loan. A loan to Beacon by another bank had been rescinded and Suburban had sought to raise the issue of Beacon's financial qualifications.
YOU MAY NEVER BE CHESS CHAMPION FOR 28 YEARS*—

BUT... WKZO-TV Is Your Best Move To Bigger
Audiences In Kalamazoo-Grand Rapids!

WKZO-TV reaches far more homes—monthly, weekly,
daily—than any other Michigan station outside Detroit.
It delivers more homes than Station B in 105 of 112
quarter hours surveyed, Sunday through Saturday, 6
p.m.-10 p.m. (NSI, see left). And WKZO-TV serves
both Kalamazoo and Grand Rapids—each is among
America's 55 fastest-growing markets in population and
households.

When you make your move in Kalamazoo-Grand Rapids,
make it with WKZO-TV! Then if you want all the rest
of outstate Michigan worth having, add WWTV, Cadillac,
to your WKZO-TV schedule.

“People,” a practical man about Madison Avenue once remarked, “watch TV programs, not organizations.”

We have no basic quarrel with the quotation, but before it gets into Bartlett we’d like to make a point or two:

Corinthian, an organization of stations in several markets, believes that its group set-up provides impetus for the kind of local programming that ties communities to stations. Indeed, people watch programs. Well-advised sponsors watch ownership.

Rough road ahead for Minow’s FCC fees?

THAT’S CONSENSUS OF WASHINGTON OPINION ON PLAN

The current proposal of FCC Chairman Newton N. Minow to have broadcasters and others who are regulated by the commission offset the agency’s entire costs through fees and stipends against gross revenues (CLOSED CIRCUIT, July 3) is in for rough sledding, several different sources in Washington indicated last week.

Chairman Minow first presented his plan to the commissioners in executive session 10 days ago. It was passed over at that time with brief discussion but is likely to be considered again this week. However, it is given little chance by informed sources for positive action in the near future for several reasons:

- The Kennedy administration currently has taken no position although the Bureau of the Budget has told the chairman it plans to issue a directive "very shortly" to supplant a 1959 budget directive under President Eisenhower. That order urged all agencies to "set forth some general policies for developing an equitable and uniform system of charges for certain government services. . . ."

- Commissioners are reluctant to take any action looking toward charging fees for their services unless the action is taken "across-the-board" by all government agencies.

- The FCC members also are cognizant of the overwhelming opposition against the fee proposal when it was issued for rulemaking once before—in 1954. At that time, the Senate Commerce Committee adopted a resolution telling the commission to take no further action pending action by Congress.

- A statement last week by Rep. Oren Harris (D-Ark.) that he is opposed to the FCC moving to charge fees "on its own" without authorization from Congress; that, outside of the commission, support for the charging of such fees is not very strong. Other members of Congress expressed outright surprise that the FCC should even consider such an action.

- A realization that the new fee schedule is radically different from the 1954 proposal in that the present schedule would recoup 100% of the commission’s congressional appropriations, nearly $12 million, plus $1.3 million real estate value. The older plan would have recouped expenses of processing applications, etc., only.

$6 Million Bill • Under the new plan, broadcasters would foot just under $6 million of the commission’s bill—an estimated $5 million of this to come from a levy of .4% on gross revenues of all stations. The balance of the media levy would come from application fees—$600 for new TV stations or transfers; $300 from am and fm applications, with applications for changes in facilities, translators, etc., to be billed $30 each. These levies would be made when an action is taken. No charges would be made against intervenors or for commission-instigated actions, with cost of such activities to be recouped by stipend against gross revenues.

This proposal was deemed "fairer, easier and more practicable" than charging an initial round-figure license cost only, which might run as high as $1,500 for aural stations—large and small alike. The recovery plan covers direct and indirect costs to the commission, including salaries, operation, depreciation, management, supervisory, administrative and enforcement, among others.

Despite the objections, the Minow plan is not without precedent. The independent offices appropriation act for fiscal 1951 authorized the agencies to charge fees to recoup their costs and 5 U.S. Code, Sec. 140 accomplishes the same purpose.

The Securities & Exchange Commission and the Federal Reserve Board currently charge users fees. Numerous bills have been introduced in past Congresses expressly charging the FCC and other agencies to begin such a practice. Rep. J. Arthur Younger (R-Cal.) introduced a bill (HR 1118) last January which would provide for the assessment of fees by the FCC and five other agencies.

Three firms get FCC printing contracts

Contracts for the reproduction of public documents and FCC hearings have been awarded to three separate Washington firms by the commission. All three contracts became effective on July 1.

Cooper-Trent Inc. received a three-year contract to duplicate and sell any horizontal directional antenna pattern filed with the commission, Form 402 microwave authorizations and other records. The Goetz Co. formerly provided these services to the public.

Seabrooke Printing Co. for the next three years will sell non-government frequency lists giving data about radio stations of different classes, including frequency, power and call letters. Stenographic reports of commission hearings again will be provided by Ward & Paul Inc. at a cost of 24¢ per page for hearings held in Washington. Charges for field hearings and daily copies are higher.
TWO BIG LICENSES ON THE LINE?

FCC points finger at WINS, Crowell-Collier

Allegations of impropriety were aimed at the licensee of one New York radio station and at the prospective buyer of another by the FCC last week.

Letters of inquiry, setting forth possible issues upon which the FCC might require hearings, were sent to WINS New York and to Crowell-Collier Broadcasting Co., which seeks to buy WMGM that city for $11 million. The letter to WINS’ licensee, J. Elroy McCaw, in effect, sets in abeyance FCC staff instructions to set the station’s license renewal for hearing (BROADCASTING, July 3). Sale of WINS to Storer Broadcasting Co. for $10 million is also pending, but is not touched upon in the FCC’s inquiry. The sales contracts for both stations terminate today (July 10) and there is speculation that last week’s FCC action might block one or both transactions.

WINS earlier last week requested the before setting a hearing saying that its FCC to send such a letter of inquiry answers might make a hearing unnecessary or at least reduce the number and complexity of the issues. The station promised a prompt reply.

Five commissioners voted to send the letter to WINS with Chairman Newton N. Minow and Commissioner Robert Bartley voting for an immediate hearing order. The double-barreled thrust of the WINS letter charged the station not only with retaining payola-taking employees but also in sharing their gains. The employees and dates of service at WINS: Mel Leeds (program director, 1957-1960); Alan Freed (disc jockey, 1954-1958); Ronnie Granger (record librarian, 1957-1959). The FCC stated that these employees received payments from record manufacturers and/or distributors for broadcasting certain material and the required announcements of this were not made. Furthermore, line charges and engineer’s salaries were paid directly to WINS by a record distributor for some of Alan Freed’s programs; WINS billed Mr. Freed for the expense of his remote broadcasting for a sum exceeding his salary.

The FCC said WINS received 10% of the profits of Mr. Freed’s promotions which were advertised over the station without making announcement of the stations’ interest and that WINS tried to induce Mr. Freed to make arrangements with record companies whereby they would pay the licensee directly for the broadcasting of records. WINS also encouraged Mr. Leeds to make a similar profit-sharing arrangement with record companies, the letter charges. WINS had been informed of Ronnie Granger’s payola activities, the FCC said. The agency also claimed that officers of the licensee solicited and accepted “gifts of substantial value” from recorders.

Issues in the possible hearing included whether the licensee had been “grossly negligent” in not curbing payola practices and whether it had made misrepresentations in its reply to FCC payola questionnaires. The FCC had uncovered the above charges through investigation.

Listener Grievances • An FCC spokesman said that the commission did not initiate an investigation of Crowell-Collier stations but received complaints unsolicited from all three cities where they are located (KFWB Los Angeles; KEWB Oakland-San Francisco and KDWB Minneapolis-St. Paul).

The FCC offered to make available to C-C on request tapes it possesses of broadcasts containing material “alleged to have been ‘vulgar, suggestive or in bad taste’.”

A promotion on both KEWB and KFWB warning citizens that an amoeba was loose in the city was characterized by the commission as “alarming announcements” (BROADCASTING, May 2, 1960). The FCC quoted newspaper stories relating the gleam shown by a C-C program director when the San Francisco police suggested the station “call off its amoebas.” The stations later tied in the amoeba scare with its anti-narcotics campaign, contrasting public concern over amoebas with its indifference to the narcotics menace, but in its letter, the FCC suggests that this step was taken as an afterthought. The FCC also criticized a promotion purporting to be announcements from outer space.

The commission invited C-C to submit affidavits from program directors telling if the news stories quoted “correctly characterized their statements to the press and the public reaction to the announcements” and documentation of the connection between the amoeba announcements and the anti-narcotics drive.

Four commissioners voted for sending C-C the letter of inquiry with Commissioners Robert E. Lee, T. A. M. Craven and John S. Cross voting to approve the sale. Chairman Minow stated that he would have preferred not to participate because his law firm once represented Loews Inc., WMGM licensee, but said he wanted to break the tie.

“It should also be noted for the record that I had no contact with the case and did not know of its existence while I was in the firm,” Mr. Minow stated.

Both recipients of the FCC inquiries have 30 days to reply.
**MORE THAN NUMBERS**

WJAR-TV has meant “television” to RHODE ISLANDERS since 1949. Penetration of the Must Buy Providence Market has been a matter of solid coverage, audience, and facilities.

J. S. “Dody” Sinclair, President and General Manager of WJAR-TV, highlights Providence market leadership as he pushes the button on one of the station’s two new Ampex VR 1000C Intersync videotape recorders. Jack Flynn, Ampex Eastern Sales Manager, looks on. Generally, the better the equipment, the better the station. Better stations in better markets get more business, can afford the best, most, first. And WJAR-TV is as well equipped as any Must Buy station in any Must Buy market.

SITUATION ‘FUZZY’

Soviet radio-tv tour postponed at last minute

NAB officials have learned something the State Dept. has known for a long time—dealing with the Soviet Union can be a frustrating experience, even on relatively minor matters. The officials' education on this aspect of East-West affairs was provided by NAB's participation in a U.S.-U.S.S.R. cultural-exchange program.

Several months ago the association agreed to a State Dept. request that it serve as host for a five-man team of Russian broadcasting-industry representatives who were to visit the U.S. for three weeks this summer. A U.S. team, according to the proposed exchange, was scheduled to leave for a three-week tour of the Soviet Union late in August.

NAB President LeRoy Collins was to head the U.S. delegation if he could fit the trip into his schedule.

So far, so good. But as the tentative date of the Russians' arrival in New York—July 6—drew near, there was no confirmation from the Soviet embassy that the team would arrive as scheduled, or who would be on it. State Dept.

officals, who had visas to issue, and NAB officials, who had tour plans to make, became edgy. Finally, last month, only a few days before a State Dept.-set deadline, the Soviets announced their team would arrive on schedule.

NAB, therefore, went ahead making final arrangements for the seven-city tour on which the Russians would be conducted. Plans were made for visits to the Midwest Program on Airborne Television Instruction, at Purdue U.; WTVJ (TV) Miami; WRC-AM-FM-TV Washington, D.C.; WFIL-AM-FM-TV Philadelphia; WGN-AM-TV Chicago; the National Educational Television & Radio Center, in Ann Arbor, Mich.; and the networks in New York. Dan Shields, assistant to NAB's vice president for television, and two U.S. Information Agency interpreters were assigned to accompany the Russians.

Then, after all arrangements had been completed, the Soviet Embassy announced the Russian delegation's trip was off, at least "for a couple of months." Vacation schedules and reassignment of some of the members to other positions were the reasons given.

In relaying this information last week, a State Dept. official said "it's hoped" the U.S. delegation will make its tour as planned. Scheduled to go are Robert Saudek, president of Robert Saudek Assoc.; John White, president of NRTC; and Henry Loomis, head of U.S.I.A.'s Voice of America. Their tentative itinerary includes radio and television stations in Moscow, Lenin- grad, Kiev, Tashkent, and Baku.

But, said the State Dept. official, "we're still waiting to hear whether the Soviets will accept our delegation on schedule."

"The situation," he said, "is fuzzy."

Fourth brings breather on FCC legislation

The Fourth of July holiday slowed down congressional activity on FCC reorganization last week (Broadcasting, July 3). But business is expected to pick up this week.

The Senate Commerce Committee was to have considered the reorganization bill (S-2034) introduced by Sen. John O. Pastore (D-R.I.), but Chairman Warren G. Magnuson was unable to gather a quorum. Committee approval of the bill is now expected within the next two weeks.

The House Commerce Committee has already approved the reorganization measure (HR-7836) introduced by its chairman, Rep. Oren Harris (D-Ark.). The bill's next stop—afer a committee report, now in preparation by the staff, is approved—is the Rules Committee, which directs the flow of legislation to the House.

The Senate and House measures are
The strong, clear and penetrating signal of WBEN-TV reaches the 2½-million people in Western New York with an impact that jars their pocketbooks and rings cash registers.

It's the most powerful selling medium in sight and sound generated by an audience loyalty that has been built through quality programming and dedicated public-service telecasting since 1948.

The 2½-million figure does not include the BONUS AUDIENCE in the Canadian Niagara Peninsula where Ch. 4 has better than a one-third share of the 800,000 TV-homes audience.

No other medium can cover as much selling territory for your product as quickly, as completely, and as economically in this rich, vital market — second largest in the nation's richest state.

Keep in mind, too, that your TV dollars count for more on Channel 4 — Buffalo.

practically identical. Both permit the FCC to delegate its functions and to exercise discretion in granting commission-level review.

Minow has a fan in former FCC staffer

FCC Chairman Newton N. Minow has received a put on the buck from an old fighter for better broadcast programming—Dallas W. Smythe. Prof. Smythe, one-time member of the FCC staff and considered largely responsible for the 1946 Blue Book, is now professor of communications at the U. of Illinois.

Mr. Smythe referred to Mr. Minow’s current campaign on programming as a hopeful sign. “... With a courageous chairman, the FCC seems to be about to use its legally delegated power to protect the public interest in the use of tv and radio channels,” he told an audience at the U. of Maryland June 29. He called on his listeners to support the FCC chairman, warning that until Mr. Minow’s words are implemented success cannot be certain.

The mass media are not living up to their responsibilities in the nuclear age. This is the theme sounded by Mr. Smythe in his lecture. Radio-tv, newspapers and magazines are not fully communicating the facts of international life to the American people, he stressed.

Tv presents so-called popular art in the prime evening hours, while the seemingly esoteric art forms are offered only on Sunday mornings or afternoons. Mr. Smythe declared. Under the slogan of giving the people what they want, popular tv’s production standards are low, he stated. He stressed that psychologists have demonstrated that tastes are cultivated and that if the radio or tv audience is given novel materials to watch for a long enough time, it will learn to enjoy them.

PLENARY SESSION

Administrative Conference committees named

The Administrative Conference of the U. S. held its first “plenary” meeting in Washington last month with Attorney General Robert Kennedy addressing the opening session. The 86-member conference was established in April by executive order of the President to assist in the improvement of administrative procedures in regulatory agencies.

Judge E. Barrett Prettyman of the U. S. Court of Appeals is chairman of the conference. FCC General Counsel Max Paglin is vice chairman and Web- ster Maxon, Dept. of Justice attorney in charge of the Office of Practices & Procedures, is executive secretary.

At the meeting, the conference adopted by-laws and approved nine standing committees as recommended by the 11-man council. The conference is under a mandate from the President to submit its final report by Dec. 30, 1962. Its members are from the agencies, private attorneys and college professors. Six members of Congress have also been appointed to the conference with floor privileges only.

The next meeting of the full conference was scheduled for Dec. 5 with the council to meet again Sept. 18. Members of the council, who were appointed by the President, are assigned to the various committees as liaison with the council.

A conference request for appropriations for fiscal 1963 has been submitted to the Budget Bureau which has not, as yet, taken any action.

Broadcasters face hike in press service rates

Broadcasters’ press service costs would be hiked under an initial FCC decision granting AT&T and Western Union rate increases for leased-line telegraph services.

The proposed action, announced last week, would authorize AT&T to raise its annual revenue by $2.7 million and Western Union, by $750,000. The FCC will issue its final ruling in the case sometime after Sept. 15.

In issuing its initial decision, the commission tentatively rejected a petition from NAB, UPI and the American Newspaper Publishers Assn. that leased-line telegraph rates be reduced to 1958 levels.

They maintained that AT&T had
THAT
WCKY
SURE
sews up
CINCINNATI!

Since it's hardly considered cricket to needle competition (ours or anyone else's for that matter) we won't quote that part of the nice letter from Northwest Airlines that compares WCKY sales results with other stations! But you will get the thread of the story if we just dot-dot-dot the parts that say: "... in the Cincinnati market, WCKY is our best sales tool ... never in our wildest dreams did we anticipate such response". That would seem to be enough to sew it up; if WCKY can move passengers half-way around the world, can you imagine how it moves toothpaste, cigarettes, coffee and what-you-sell in its own billion-dollar 68-county neighborhood. What's more, AM Radio Sales will show you that WCKY just costs a thimble-ful of money.

WCKY-RADIO IS SOME BUY!
50,000 WATTS—CINCINNATI
failed to justify the need for a rate increase and asked that special reduced rate classification for press users be reestablished. Special press rates were in effect from 1916 to 1943.

The commission asked the two companies to submit proposed tariffs implementing the initial decision by Aug. 15. Interested parties have until Sept. 15 to comment on the proposals.

SEC's whoa bring woes to documentaries firm

Broadcast International Inc., a New York company which supplies public relations "documentaries" to domestic and foreign TV stations (Broadcasting, April 10, Feb. 13), is in trouble with the Securities & Exchange Commission.

The agency last week suspended an offering of 60,000 shares of common stock at $5 per share on grounds the company's prospectus is false and misleading. The SEC said BI's financial statements were not prepared "in accordance with proper accounting principles" (the company showed some $31,-000 net profit for 1960). SEC also said the customers listed as active accounts are no longer dealing with the company; that BI overstated the number of programs which could be produced with the proceeds of the stock issue. The commission also branded as false the company's contention that it "represented" 150 broadcast stations.

The prospectus also failed to disclose a significant financial transaction by a person who holds controlling stock and falsely named as an officer a person who is not, the SEC charged.

L. Nicholas Dahlman is president and founder of the company, according to its prospectus. He owns the 120,000 shares outstanding other than the 60,000 shares in the suspended offering.

Broadcast International is entitled to request a hearing on whether the SEC suspension should be vacated or made permanent.

Proposed findings in Orlando ch. 9 case

FCC general counsel wants grant made invalid

"There is no doubt" that the FCC must declare invalid its grant of ch. 9 Orlando, Fla., to Mid-Florida TV Corp. (WLOF-TV), the commission's general counsel said last week.

Moreover, Mid-Florida should be "absolutely disqualified" from any further consideration for the TV permit, the FCC counsel stated in proposed findings submitted to Chief Hearing Examiner James D. Cunningham in the ex parte rehearing.

Mid-Florida countered that there is "not a scintilla of evidence" that any of its principals knew of admitted ex parte contacts by Orlando attorney William Dial with former FCC Commissioner Richard A. Mack. There is no reason for setting aside the June 1957 grant or for holding any further proceedings in the case, Mid-Florida maintained.

WORZ Orlando, competing applicant for ch. 9, supported the views of the general counsel's office and said the "conclusion is inescapable" that the grant is void and that WLOF-TV should be disqualified. The general counsel further said that there is no ex parte taint against WORZ and that that applicant is qualified to receive the grant.

A rehearing of the Orlando ex parte charges, first aired by the House Legislative Oversight Subcommittee in May 1958, was heard by Mr. Cunningham six weeks ago (Broadcasting, May 29).

Most of the testimony dealt with Mr. Dial's approaches to Mr. Mack, his (Dial's) employment by Mid-Florida on state matters and whether the winning applicant had advance knowledge of the commission action.

The FCC counsel charged that Mid-Florida "directly or indirectly" secured or aided in Mr. Dial's "improper" actions. John Kluge and Joseph Brechner, WLOF-TV principals, displayed a lack of candor in their testimony and "we submit that there is an overwhelming inference of culpability on the part of Mid-Florida ..." in having knowledge of the Dial activities, the FCC said. "The Mid-Florida explanation is not only transparent but ... is refuted by ... the testimony of its principals." Messrs. Kluge and Brechner's "certainty of recollection" in denying that they knew of or requested Mr. Dial to contact Mr. Mack "is in sharp contrast to the vagueness and even evasiveness in responding to questions on matters which were already the subject of documentary evidence or testimony," the FCC charged. Also, the findings continued, the denial of Donn Colee, former WLOF-TV vice president-general manager, that he had any advance knowledge of the grant were "wholly discredited."

The brief said that Commissioner Mack should have disqualified himself from voting in the case and that the ex parte contacts alone are sufficient to void the grant and disqualify Mid-Florida.

Not Impeached • WLOF-TV said that Mr. Dial's credibility as a witness was never impeached and that no motive was suggested, let alone established, for Mr. Dial to do anything but tell the truth. He denied ever telling Messrs. Kluge or Brechner that he was a longtime friend of then Commissioner Mack or that he had contacted the commissioner about the ch. 9 case. Likewise, the Mid-Florida principals denied any knowledge of the circumstances.

Mid-Florida emphatically denied that Mr. Dial was ever asked to contact Mr. Mack or to do anything concerning the case before the FCC. The first indication Messrs. Kluge and Brechner had of the Mack-Dial relationship was at the time it was made public on the Hill, the station findings said.

"We find it impossible to believe if Dial was to see Mack with the knowledge or consent of Mid-Florida, that he would not later have reported that he (Dial) saw him (Mack)," WLOF-TV said in pointing out that no such report of the meetings was made. It also was argued that Mr. Dial never told the commissioner that WORZ should not get the grant or that the Orlando attorney ever recommended Mid-Florida.

Also, it was argued, there is no evidence that Commissioner Mack ever did anything about the recommendations of Mr. Dial (principally that the FCC should investigate William Mur-

Breslin may have more time to study probation reports. Mr. Tripp was found guilty last May of 35 counts of commercial bribery while he was employed by WMGM New York. He faces maximum sentence of one year and $500 fine on each count for total 35 years and $17,500 in fines. At same time life of fourth grand jury of July 1960 (New York County) investigating perjury in connection with tv quiz shows which was to end June 30, was extended to Dec. 29, 1961.

Delayed ch. 6 grant cleared for New Bedford

Clearing the roadblocks, the FCC last week granted ch. 6 New Bedford, Mass., to E. Anthony & Sons, publisher of the New Bedford Standard Times and the Hyannis (Mass.) Cape Cod Standard-Times. Earlier a hearing examiner approved an agreement under which competing applicants Eastern States Broadcasting Corp. and New England Television Co. withdrew their applications in exchange for shares in the operation of ch. 6.

The commission also last week terminated rulemaking looking toward reassigning ch. 6 to Providence, R. I., and accepted the Anthony position that it could provide an acceptable signal to the Providence metropolitan area as well as New Bedford and southern Massachusetts. The agency said that this procedure would provide an earlier additional vhf service to the area than would be possible through a shift of the allocation to Providence—a proposal which faced serious mileage separation problems.

At the same time, the FCC announced plans to institute a new rulemaking shortly looking toward making Hartford, Conn., all uhf by deleting ch. 3 (WTIC-TV). This has been proposed by Springfield TV Broadcasting Corp. (WWLP [TV] Springfield, Mass.).

---

**Where all that money's going**

**COST BREAKDOWNS FOR ONE OF TV'S MOST-EXPENSIVE PROGRAMS**

The Talent Assoc.-Paramount Ltd. two-hour production of The Power and the Glory, scheduled for CBS-TV next season, is probably the most expensive program ever created for television. Originally budgeted, exclusive of time, at $560,000, it has already cost $700,000, and last-minute editing charges are expected to increase production expenditures to a total $725,000.

The Dale Wasserman dramatic adaptation of Graham Greene's novel, also is the first tv program to be taped and filmed simultaneously for both tv and feature-film showing. TA-Paramount hopes to release the 35mm film version of it in European movie houses early next year, and subsequently in American theatres if necessary to recoup its financial outlay.

The play was shot at NBC's Brooklyn studios in eight frantic days—last May 30-June 7—during which time the cast spent a grueling 130 out of a possible 192 hours on camera. Counting two hours daily for makeup and adding an average two hours a day more for traveling (mostly by rented Cadillacs), a scant 30 hours remained for sleeping.

Reason for the haste, as well as for a good many other factors, was the presence in the cast of one of the world's foremost actors, Sir Laurence Olivier. The English star was due to return home by the middle of June and the production was speeded-up to accommodate him.

$100,000 Star • Also in the cast are some of the finest Broadway and Hollywood talents available. They include Julie Harris, George C. Scott, Roddy McDowell, Keenan Wynn, Mildred Dunnock, Thomas Gomez, Fritz Weaver, Martin Gabel and Patty Duke. All of these high-priced personalities accepted less than their usual performing rates in order to work with Mr. Olivier. Total cast cost for the production was $175,000, with Mr. Olivier receiving $100,000 of that amount, and the rest of the cast dividing the remaining $75,000 between them.

Shooting the play on 35mm film as well as tapping added considerably to...
costs, and presented problems not common to productions which are targeted only for TV. Because *The Power and the Glory* also will be seen as a feature film, more lighting and larger sets were needed. Actually the entire production was shot with an emphasis on film techniques. (It is in monochrome, and color would have boosted costs still more.)

The play used 40 sets compared to an average 8 sets used by an ordinary TV production, and the 20 sets used by even the biggest TV shows. Burr Smith designed them and they were executed by Allied Scenic Assoc., Brooklyn, in a near-record 12 days. The sets reportedly are the most elaborate and expensive ones ever devised for a TV program, and compare favorably with the best Hollywood has offered in the past. They include a replica of an entire Mexican village laid out end-to-end, a section of a rural church, a dentist's office, a section of jungle, and a prototype of a mountain range.

To make the jungle authentic, TA-Paramount imported $15,000 worth of tropical foliage, which included live banana trees, from Florida. The mountain range was built out of styrofoam—a special Burr Smith formula that Mr. Olivier took back to England with him for use in his own productions. Styrofoam is said to be an extremely light substance that can hold considerable weight. Also included in the staging was a small army of live domestic animals consisting of 10 burros, 6 horses, 15 chickens, dozens of mangy-looking dogs, and some 20 pigs.

**Expensive Sets** TA-Paramount paid $160,000 for the studio facilities and for set changes. The production company paid an additional $120,000 for sets. This is an astonishing figure considering that the sets for the sumptuous Broadway production of "My Fair Lady" only cost about $88,000, and sets for one of the most expensive stage productions of all time, "Camelot," were approximately $125,000.

Actor George C. Scott rides through a miniature jungle created for CBS-TV's 'The Power and the Glory.' Tropical foliage was transplanted from Florida at a cost of $15,000 for the expensive production.

Renee Valente, TA-Paramount's production manager estimates above-the-line costs for the show at $436,500, and under-the-line costs at $288,500. She defines above-line as including expenditures for cast, costumes, director, writers, writers' pension, costume designers, wardrobe handlers, set designers, assistant director, production assistants, rights, music, composer, insurance, AFTRA pension and welfare. Included in Miss Valente's estimate for under-the-line costs are sets, studio facilities, editing, mimeographing, rehearsal costs, cast meals (which amounted to a high $2,000), makeup, payroll personnel, taxes, publicity and staff expenses.

According to Miss Valente, TA-Paramount supplied "every penny" of the program. CBS-TV will be involved only in the time sale to a sponsor, which she estimates will cost about $200,000 to $250,000. She says the program will be sponsored by a single advertiser and is set for a Nov. 26, 9-11 p.m., telecast.

Miss Valente points out that RKO

---

**'Macbeth' similar in production set-up**

Last year's highly-praised and expensive production of "Macbeth," which was sponsored by Hallmark Cards on NBC-TV, had a similar, but not the same production set-up as *The Power and the Glory*.

According to George Schaefer, producer-director of the show, "Macbeth" was shot with movie cameras as a technicolor film and shown on TV in film form. It was shot in seven weeks, five of them in MGM's Elstree Studios in London and two weeks on location in Scotland. Film techniques were used almost exclusively. Mr. Schaefer says it was scored, edited, lighted and directed strictly as a motion-picture film.

The production initially was estimated to cost $750,000 with Hallmark putting up $350,000 of that amount. Its actual cost, however, was considerably under that figure. Mr. Schaefer and the two stars of the play, Maurice Evans and Judith Anderson, worked on "deferred payments," which are contingent on box-office returns from the theatrical showings of the production. Thus, they have not been fully paid.

Mr. Schaefer explains that "Macbeth" has just been released for theatrical distribution by British Lion Films. It already has been shown in Edinburgh and Glasgow, Scotland, and in London. He estimates that it will take at least two years before the production's success as a theatrical endeavor can be determined.
Your car, madame...

But where is the car?
Here we are floating...

Magic, you say? Yes!
Camera and film magic!
Radio Pictures Corp., owner of movie and tv rights to the play (the film company produced a movie version in 1947 under the title "The Fugitive") was paid $13,750, and National Telefilm Assoc., who produced The Power and the Glory on its Play of the Week tv show in October 1959, was given $7,000. (Another production of the play was produced at off-Broadway’s Phoenix Theatre in 1958-59 season, with Fritz Weaver, who has about a five-minute bit in the most recent production, starring in the Laurence Olivier role.)

Hearst Metrotone makes hour-long documentaries

A series of one-hour documentaries spotlighting well-known individuals of recent history, Perspective on Greatness, is being produced by Hearst Metrotone News, New York, in association with BCG Films Inc., New York. The first program will be completed by July 15, according to Nat Gassman, BCG Films president.

The series will use film footage owned by Hearst Metrotone News and new material being shot by the news organization throughout the world. The first 13 programs under preparation will focus on such outstanding personalities as Charles Lindbergh, Conrad Adenauer, Mohandas K. Gandhi, Alfred E. Smith, Eddie Rickenbacker, Gen. Douglas MacArthur, Admiral Richard E. Byrd and the Duke and Duchess of Windsor.

Caleb Stratton, executive vice president of Hearst Metrotone News, will serve as executive producer on the series. BCG Films will distribute the series to stations.

'December Bride' sales reported at $700,000

CBS Films Inc. has done more than $700,000 worth of business on sales of its new syndicated, December Bride, it was reported last week. Since being put on the market nine weeks ago, the series has been sold to a total of 21 stations. Included in these are WABC-TV New York, WBKB (TV) Chicago, WBNS-TV Columbus, Ohio, KONO-TV San Antonio, Tex., WMAL-TV Washington, D. C., WKST-TV Youngstown, Ohio, and WITN (TV) Washington, N. C.

Altogether, 157 episodes of the comedy series are being offered for sale. The series was for several seasons a network show on CBS-TV, and was one of four such programs (Angel, Wanted—Dead or Alive, and Deputy Dawg) which CBS Films placed in syndication last May.

Ziv-UA acquires 'Laura' for new tv program

Ziv-United Artists has purchased the television rights to the Vera Caspary novel Laura, produced in 1944 as a motion picture.

As a tv production, Laura will be a "sophisticated comedy-drama series," retaining the roles of columnist and police lieutenant played in the movie by Clifton Webb and Dana Andrews. An actress to play the title role has yet to be selected.

This is the second property Ziv-UA has acquired in two weeks. The production firm announced earlier the acquisition of tv rights to S. J. Perelman's Acres and Pains (Broadcasting, July 3).
An ‘important part’ of viewers’ lives

Sixteen months ago WISH-TV Indianapolis started an exercise-beauty-grooming program called the Debbie Drake Show. Today, the program is syndicated to more than 65 markets and five tv stations, which have completed a six-month cycle of the 15-minute, five-times-a-week program, signed for a repeat schedule.

Charles McGregor, president of Banner Films Inc., New York, which is distributing Debbie Drake, pointed to another index of the program’s success: it is more than 90% sponsored in the markets in which it is running. Generally, the program is sponsored by a local supermarket or a company manufacturing food products. Among the advertisers are Foremost Dairies, the Kroger Co., Serta Mattress, Lite-Diet Bread Co., Merita Bread and Luzianne Coffee.

Available at present are 130 segments of the series, but WISH-TV is continuing to produce episodes which will be available at a later date. The station produces the program on tape but it is transferred to film for showing on outlets to which it is syndicated. Banner film started syndicating the series last October after its initial success on WISH-TV.

The format is simple: Miss Drake, a physical culture specialist, does various exercises and provides tips on beauty and health (she has been referred to as the “female Jack La Lanne”). The program is aimed primarily at housewives and is slotted early morning times. Mail pull from stations indicates that many viewers consider these exercises “an important part” of their lives.

Miss Drake is available to appear in commercials and is featured in some of them. Otherwise, sponsors buy into the program on a spot basis. Miss Drake also does personal appearances and, according to Mr. McGregor, she has caused “minor riots” on some visits.

In addition, the name of Debbie Drake may find its way to other media. Negotiations are underway for a syndicated newspaper column and a book by Miss Drake.

Program notes...

Actors eligible • A total of 4,125 actors and 1,525 extras have qualified for health and welfare benefits under the Screen Actors Guild and Screen Extras Guild contracts with the producers of tv films and theatrical motion pictures, Byron Ellerbrook, administrator of the plan, reported Thursday (July 6). Since the first of the year, more than $200,000 has been paid in hospital, medical and life insurance benefits to approximately 500 actors and extras. Eligibility is achieved by earning $1,000 in a four-quarter period in work for producers who are signatories to the plan.

Fall tv series • First installment of Hazel, new Screen Gems tv series, went into rehearsal Friday (July 7), with filming scheduled to start tomorrow (July 11). Harry Ackerman is executive producer, William Russell, director, and James Fonda, producer of the series, which premieres on NBC-TV Sept. 28, Thursday, 9:30-10 p.m., with Ford Motor Co. as sponsor. Whitney Blake is completing casting of series’ permanent roles in addition to Shirley Booth, who stars in the title role, along with Don DeFore and Bobby Buntrock.

Canon 35 • The controversial Canon 35 was the subject of a special half-hour editorial delivered on WOW-AM TV Omaha by Frank P. Fogarty, executive vp of the Meredith Broadcasting Co., June 30. Mr. Fogarty asked for restraint and consistency in the imposition of Canon 35, referring specifically to a recent ruling by a county judge banning cameras at the recount of Omaha’s mayoralty votes and noting that there was no rule banning cameras in the recount of gubernatorial votes two years ago.
read any good books lately? If you're planning a Detroit radio schedule for fall, this one is for you!

"The Total Story" shows what WWJ means by "Total Radio," gives you a buyer's-eye view of WWJ's imaginative programming which ranges from popular music to symphony concerts, from play-by-play sportscasts to lively talk on the "Hour of Information" and "Phone-Opinion." And for good measure, there's a WWJ coverage map which shows at a glance the big, prosperous area served by Detroit's basic station.

You'll agree that "The Total Story" makes good sense, that "Total Radio" means greater impact on listeners, more attention to your sales message. If you don't have a copy, or if you'd like extras, just phone your PGW Colonel or write the station.

Storer forms program syndication firm

Storer Broadcasting Co. last week announced the formation of a new subsidiary company, Storer Programs Inc., which will handle distribution, production and sales of television programs. The first property acquired by the new unit is Divorce Court, consisting of 168 hour-long taped programs, for which Storer paid in excess of $1.5 million to the Times-Mirror Broadcasting Co., Los Angeles, owner of KTTV (TV) there. Storer officials indicated that Divorce Court is the first of several programs its new unit would buy for distribution to local TV stations. The subsidiary also will arrange for independent productions by outside companies, with Storer Programs Inc. selecting properties, financing their production and handling syndication, distribution, exploitation and sales. Storer Programs has obtained all rights to Divorce Court, which now is being shown on 28 TV stations, and will place 130 programs into immediate syndication.

Joe Evans, managing director of Storer's WSPD-TV Toledo, has been named general manager of Storer Programs. Offices will be opened in New York, Chicago and Los Angeles. Mr. Evans will report to Terry H. Lee, regional vice president for Storer Broadcasting.

Storer, foundation join in patriotism series

The Freedom Foundation at Valley Forge, Pa., is joining with Storer Broadcasting Co. and the latter's seven radio

The story was different in Breckenridge

If it can be done in Seattle, Wash., it can be done in Breckenridge, Tex.

That was the reasoning of KSTB in the Texas city as it explored ways and means of pinpointing its audience's music tastes (OPEN MIKE, June 12). Earlier, a telephone survey had been considered but was discarded on grounds phone calls might elicit impulsive answers.

Then a staff member with excellent recall powers remembered an article of nearly two years ago which explained a massive scientific study of the radio audience by KING Seattle (BROADCASTING, Oct. 12, 1959). The Seattle analysis included a 100,000-piece mailing that showed area listeners wanted their music sweet and rhythmic and not in the rock and roll vein.

KSTB General Manager Hugh McBeath and Program Director Charles Wallace analyzed the KING report. They decided the KING formula, with adaptations for differences in size and type of market, would fill the bill. These steps followed:

1. Promotional announcements were aired. Example: "Very soon KSTB will give its listeners a chance to tell us exactly what type of music they want to hear."

2. Announcements then invited listeners interested in participating in the "KSTB Music Survey" to submit postcards. This tended to insure cooperation from listeners who wanted to voice an opinion.

3. Ballots and instruction sheets were sent to these people. Included were typical song titles under each music classification. The self-addressed, stamped card in the packet also sought other information such as sex, general age bracket of participant, etc. Gifts of normal value were offered to the first 25 listeners returning cards.

The postcards came back "in stacks," KSTB reported. And the station found that the present music preferences in Breckenridge differ greatly from those in Seattle. Here is how KSTB broke down the polling results:

1. Current hits including those with "wild rock and roll" beat—67.3%.

2. Top 100 tunes excluding those with "wild rock and roll" beat—21.15%.

3. Familiar standards—8.6%.

4. All Gold Records (million sales) with no rock and roll or fast beat—1.9%.

5. Familiar and unfamiliar arrangements with "modern sound" (jazz)—0.96%.

One result of the survey: KSTB has completely changed its music policy with a "new sound" based on its listeners' preferences.
NBC makes 'Today' changes; Chancellor host

Several major changes are in the works for NBC-TV's morning show Today.

According to William R. McAndrew, executive vice president of NBC News (which has taken over production of the show), the program, under the new title of The Today Show, will be presented live, beginning July 17, so that late news developments may be covered and discussed as they happen.

John Chancellor, NBC News' Moscow Bureau chief, will replace Dave Garroway as permanent host, and Frank Blair, Today's news reporter, will join Mr. Chancellor and a yet-to-be-selected woman panelist in guest interviews and special features.

Mr. Garroway, host of Today since it began in 1952, and a former WMAQ and WNBQ (TV) Chicago personality is expected to return after a vacation to serve the remaining three years of his NBC-TV contract in a role as yet undecided.

stations to jointly produce a series of 15 one-minute program capsules, "Voices of Freedom." The series consists of excerpts of famous documents of American freedom and patriotism voiced by leaders in several fields.

All U.S. radio stations will be invited to carry the series upon completion in September. Each monthly release will be provided on tape at 7½ inches per second, at a prepaid charge of $2 per month, refundable upon return of the tape. John C. Moler, managing director of Storer's WIBG Philadelphia, created the idea and will produce the series.

Screen Gems division expands in New York

Elliot, Unger & Elliot, New York, commercial production division of Screen Gems Inc., has been carrying out an expansion plan, involving facilities and personnel. The expansion is attributed to the firm's entrance into production of industrial and business films and a "continuing increase" in tv commercials.

Now under construction is the fifth sound stage EUE owns in New York. On the administrative side, the production firm's New York sales and service staff has moved to larger quarters at the Columbia Pictures Building and added seven employees, including Philip Frank, one-time commercial producer with Screen Gems, who joins EUE as executive producer and sales representative.

Since leaving Screen Gems in 1954, Mr. Frank has been an executive with George Blake Enterprises, Caravel Films, MGM and MPO Productions.

Tribune network expands news

The Herald Tribune Radio Network announced last week it has added interpretive, background news on the hourly newscasts of the four suburban stations belonging to the network. The newscasts utilize reports from the New York Herald Tribune correspondents throughout the world, background information from such columnists as Walter Lippman, Roscoe Drummond and Joseph Alsop, and the newspaper's financial, sports and women's news reporters.

These special reports vary from two-and-a-half to four minutes in length and are broadcast by newsman-commentator Michael Griffin from 7 a.m. to 5 p.m. daily except Sunday. Local newsmen follow with national and local news. The stations belonging to the Herald Tribune Network, all located in New York City suburbs, are WVIP Mt. Kisco, WVOX New Rochelle, WGHQ Saugerties and WFYI Mineola.

A sales point we'd like to drive home: KOIN-TV consistently captures the widest audience in Portland, and 33 surrounding Oregon and Washington counties. The reason...carefully planned programming that holds a winning grip on the hearts of Northwest people.

Worth; WOW-TV Omaha, Neb.; KLYD-TV Bakersfield, Calif.; WCAU-TV Philadelphia; WTAE (TV) Pittsburgh; KLZ-TV Denver; KGMB-TV Honolulu; WSOCTV Charlotte, N. C.; KSD-TV St. Louis; WOC-TV Davenport; WSB-TV Atlanta, Ga.; WJAR-TV Providence; KLKJ-TV Henderson, Nev., and KSYD-TV Wichita Falls, Tex. Volume I now in 94 markets. Volume II in 20 markets.

Four one-hour off-network programs (MCA TV): Sold to WGN-TV Chicago; WHP-TV Harrisburg; WLBZ-TV Bangor, Me.; KGZ-TV Fargo, N. D.; WJTV (TV) Evansville, Ind., and KSYD-TV Wichita Falls, Tex. Now in 60 markets.

American Civil War (Trans-Lux TV): Sold to State Capitol Insurance Company for Raleigh, Charlotte, Greensboro-Winston-Salem and Raleigh-Durham, all N. C. Also sold to WLUK-TV Green Bay, Wis., and WABI-TV Bangor, Me.
NASA sticks to balloons for space communications

No matter all the hopes to put up active relay satellites for global space communications, the National Aeronautics & Space Administration is still sticking to its original concept that passive, balloon-type satellites can be used for international communications.

The space agency announced last week that it had awarded a $450,000 study contract to the Douglas Aircraft Corp. for the development of orbital placement techniques and engineering design specifications for Project Rebound.

NASA hopes in 1963 to put balloon-type satellites into 1,500-2,000-mile-high orbits from one launch vehicle. The satellites will be larger and more rigid than the 100-foot Echo I. Studies have shown, NASA stated, that a number of such satellites spread around the world can act as mirrors to reflect radio signals between ground transmitting and receiving stations on a global scale. Present plans for Project Rebound are to place six satellites in a common circular orbit with equal circumferential spacing between them. The six would be put up in clusters of three from two rockets.

New Tiros • NASA also announced that it would soon attempt to launch another Tiros meteorological satellite. This one, the third in a series, will be similar to the previous two but will contain two wide-angle half-inch vidicon tv cameras for radioing cloud formation pictures back to earth. Tiros I and Tiros II contained both a wide-angle and a narrow-angle tv camera, but, the agency said, it has been found that more valuable information can be secured from the wide-angle lens.

Teleglobe plans pay-tv test

Teleglobe Pay-Tv System Inc., New York, announced last week that the area in which the technical and engineering phases of an over-the-air commercial test of its system will be made will be announced in a month. Ira Kamen, an electronics systems specialist who most recently was president of Portland Industries Corp. last week was appointed executive vice president of Teleglobe and will supervise these phases of the test.

Technical topics...

Precision measuring • Pearson Electronics Inc., Palo Alto, Calif., has developed a line of transformers for precision measuring of amplitude and waveform of electronic currents at voltages up to 300 KV. Among its applications are the monitoring of currents

Mr. Arne states the Conrac case quite simply when he says: "I don't know of anyone that provides the combination of features that Conrac provides!"

Conrac monitors offer uniform, dependable quality in a complete range of types and sizes for every broadcast application.

Look to Conrac for quality in video monitoring equipment.

EVERY CONRAC MONITOR FROM 8" THROUGH 27", BROADCAST AND UTILITY, INCLUDES THESE IMPORTANT FEATURES:

* Video response flat to 10 megacycles
* DC restorer with "In-Out" switch
* Provision for operation from external sync — with selector switch
* Video line terminating resistor and switch

CONRAC DIVISION

Glendora, California

-makers of fine Fleetwood Home Television Systems - Telephone: Covina, California, Edgewood 5-0541

CONRAC MONITORS ARE DISTRIBUTED BY — RCA, GENERAL ELECTRIC, AMPEX, AND VISUAL ELECTRONICS

CONRAC IS A DIVISION OF GIANNINI CONTROLS CORPORATION

BROADCASTING, July 10, 1961
in high or low voltage devices such as klystron tubes, magnetrons, and radar modulators, and the measuring of amplitude and waveform of radio transmitter equipment. For further information write: 707 Urban Lane, Palo Alto, Calif.

Move completed • Collins Radio Co.'s western operation has completed its move into a new multi-million dollar communication and data processing research and development center at Newport Beach, Calif. The Collins Information Science Center, designed primarily for research and development, is the first building on a 100-acre site on Irvine Ranch property within a proposed University City and campus of the U. of California. M. L. Doelz, a Collins Radio vp, heads the new center.

Strike clouds gather in LA airwaves

AFTRA PLANNING TO WALK OUT ON KFWB

A strike by the Los Angeles local of the American Federation of Television & Radio Artists against KFWB is imminent, Claude McCue, executive secretary of the talent union, said Thursday (July 6).

"We are still in negotiations and are attempting to work out a new contract," he said, "but we are so far apart that AFTRA is proceeding on the assumption that we won't reach an agreement with KFWB and that a strike will be called." Union and station representatives met Thursday and another session was to have been held Friday afternoon.

AFTRA is making what Mr. McCue called "very substantial demands" for salary increases for the newscasters at KFWB. Originally the union asked that their current pay of $155 a week be upped to $250, but later dropped the wage request to $225.

One of 17 independent radio stations in the Los Angeles area negotiating with AFTRA at this time, KFWB is conducting individual negotiations with AFTRA over the union's wage demands, but is part of the group on other contract terms, James Simons, KFWB station manager, said.

The 17 stations who are jointly negotiating with AFTRA are: KBIG Avalon (Catalina); KJWV Glendale; KFOX and KGER Long Beach; KFWB, KGMB, KGFJ, KLAC, KMPC, KPOL and KRKD Los Angeles; KRLA and KWKW Pasadena; KGLI San Fernando; KALI San Gabriel; KDAY Santa Monica. Calvin J. Smith, general manager, KFAC, is chairman of the broadcasters' negotiating committee.

WRVA wins in every class in UPI news competition

WRVA Richmond, placing in every available category, took top honors at the annual Virginia UPI Broadcasters Assn. meeting. The Richmond station received eight awards, six of them first places.

The Virginia UPI Broadcasters meeting took place last month at Virginia Beach.

Media notes...

Mutual affiliates • Metro-WBOF, Inc., announced the affiliation of the company's Norfolk, Va., stations, WBOF and WYFI-FM, with the Mutual Broadcasting System. WBOF operates daytime hours with 5,000 w, at 1550 kc. WYFI-FM operates full-time with 15,500 w, at 99.7 mc.

Multiplex stereo • WCRB-FM Boston plans to begin fm/multiplex stereophonic broadcasts July 10, using equipment built by station's engineers and H. H. Scott of Maynard, Mass., high fidelity equipment manufacturer. At
KOGO-TV's news beat

KOGO-TV San Diego news department scored with a national news story last month, when reporter Chuck Woolsey and cameraman Jim Hollon, alerted by Rafael Mendevil Torres-Llanda, Mexican correspondent for the station drove to Ensenada, Mexico, and got an on-the-spot sound-on-film recording of Dale Jensen’s admission that he and Bernard J. Brous had blown up three microwave relay towers in Utah and Nevada. Lou Roen, KOGO-TV weather announcer, flew his own plane to Ensenada to pick up the film and relay it back to San Diego. To clear customs, he flew from Gillespie Field in San Diego to Tijuana, Mexico, then to Ensenada, then back to Tijuana and across the border to Lindebergh Field, San Diego, air port of entry, and finally back to Gillespie Field.

The KOGO-TV film was used the following morning on NBC-TV’s Today and that evening on the Huntley-Brinkley Report.

same time KPEN(FM) San Francisco announced that it had received its multiplex equipment manufactured on special order by Standard Electronics of New Jersey, and would begin broadcasting later this month.

Ford grant • Ford Foundation, New York, last week awarded a $4,500 grant to the Community Television Foundation of South Florida for extending tv instruction by the Dade County School System’s tv channel to Bimini, British West Indies. The grant will cover equipment, textbooks, instructional guides and visits of teachers and school officials between Miami and Bimini.

ev station • The Greater Washington Educational Television Assn., to begin telecasting on ch. 26 Washington, Oct. 2, announced last week the award of an equipment contract to General Electric Co. The station (WETA-TV) will transmit from the former tower site of WTTG (TV) in Arlington, Va., using a 12 kw transmitter and a five-bay antenna. Studios will be located in Yorktown High School, Arlington.

Forgive and forget • Students at Ohio State U. who recently took the school’s special radio-television course might be forgiven if they show up en masse for jobs at WLWC (TV) Columbus. The station furnished seven guest lecturers for the course, each of whom discussed
The best tv candidate wins the election

The ability of television to present a man as he is, not a contrived "image" but his true personality, is responsible for the election of Samuel W. Yorty as mayor of Los Angeles.

So says Irvin L. Edelstein, president of the Los Angeles advertising agency-public relations firm, Irvin L. Edelstein Assoc., who became Mr. Yorty's public relations counsel shortly after the first of the year. This was three months in advance of the April 4 primary at which the candidate receiving a plurality of votes would be elected mayor, or, if none got a plurality, the two with the most votes would compete in a run-off election.

There were nine candidates for the post of mayor. The incumbent, Norris Poulson, was running for his third consecutive four-year term. Eight aspirants were attempting to unseat him, no small task as the city's four metropolitan newspapers were solidly in favor of Mayor Poulson's reelection.

Under those circumstances, it was not difficult for candidate Yorty and his p.r. adviser to decide that radio and television presented the best avenue of approach to the voters. And, since there was little money available to purchase time, that full advantage should be taken of the opportunity to appear on news and public-affairs programs.

One Paid Show • "During the entire primary campaign, we spent only $800— for one quarter-hour TV show," Mr. Edelstein told Broadcasting. "But we took every chance that was offered for a free appearance on radio or television. Mr. Yorty encouraged the broadcast reporters to cover his news conferences and they did. More than that, he called on the newscasters and commentators and made himself available for interviews or brief appearances on news programs and he saw to it that he always had something newsworthy to say." The result of this broadcast exposure was what Mr. Edelstein describes as "a political miracle." Mayor Poulson failed to get the plurality of votes he needed to retain his office and Mr. Yorty won the right to meet him in the runoff election, May 31.

Traditionally, heavy campaigning is left to the last few days before such an election, but Mr. Yorty and his advisers were not interested in observing tradition. On April 10, less than a week after the primary, Mr. Yorty called on the city's radio and TV stations "to provide a series of seven weekly hour-long debates between myself and Mayor Poulson... It's essential that the candidates for mayor have a forum where they can face each other... Such face-to-face debates are possible only through radio and television media..."

The stations were willing, but Mayor Poulson was not and the debates did not take place. Some stations lost interest at that point. Others presented the candidates individually.

True Personality • "I felt the thing most needed was for Mr. Yorty to impress his personality on the Los Angeles voters, to let them get to know his true personality, not a contrived Madison Avenue 'image' but the man as he really is," Mr. Edelstein said. "The best, the only way to do this was with television and I felt that the best way to use TV was to have our candidate appear alone for a half-hour stand-up talk direct to the viewers. This was a hard thing to sell. Mr. Yorty and his political advisers wanted to have other people around to break up the monotony of a one-man show.

"We bought five half-hours on KRCA (TV) for the weekly live telecasts, starting May 1 and running right up to election day. Mr. Yorty agreed to do the first one alone... The first broadcast was murder... and he wanted to change to a less strenuous format. But the reaction was good and before the month was over he admitted that I was right."

The month-long Report to the Citizens series was Mr. Yorty's major use of paid time, although "we did buy a couple of TV interviews and time on a couple of radio stations to run the audio tape of one TV interview," Mr. Edelstein said. But the candidate continued his all-media news conferences and his guest appearances on radio and TV.

"He never turned down an invitation for a broadcast, which is more than can be said for his opponent."

When the incumbent conceded him the victory on election night, the mayor-elect summed up the campaign in these words: "I attribute the greatest portion of my victory on a particular aspect of broadcasting.

New affiliate • WMIL Milwaukee joined CBS Radio as an affiliate June 26. The daytime station is owned and operated by Cream City Broadcasting Co., Milwaukee, and broadcasts with 1 kw on 1290 kc.

Weather equipment • WKY-TV Oklahoma City has announced the installation of its new Collins weather radar tower. The new unit has a peak output of 100 kw and a range of 150 nautical miles. Two radar scopes will be installed in the station. The station first began broadcasting weather in 1958 using closed circuit reports from the U.S. Weather Bureau at nearby Will Rogers Field.

New transmitter • WOOD-TV Grand Rapids, Mich., has begun operations from its new transmitter location near Middleville, Mich., about 24 miles away.

New radio station • WMRT-AM-FM Lansing, Mich., went on the air June 26, Herbert T. Graham, owner and manager, announced. The am station, a 500 kw daytimer, operates on 1010 kc. The fm on 100 mc with a power of 92 kw. ABC affiliation is planned.

Donation • WAST Albany, N. Y., announced the donation of a microwave system complete with transmitter and special receiver to the Mohawk-Hudson Council for Educational Television. The station valued the equipment at $3,000.

Gift • The donation of a complete dual DuMont Multiscanner system has been made to the Duke U. Medical School by WFMY-TV Greensboro, N. C. The projection system will enable televising two slides, two films and two opales in black and white or color. Gaines Kelley, general manager of WFMY-TV, valued the equipment in excess of $95,000 at its original cost.

Larger space • Spot Time Sales, Chicago, has moved to larger quarters in the Wrigley Building, 400 N. Michigan Ave.

New radio affiliate • The affiliation of WTHE Spartanburg, S. C., with NBC Radio has been announced. The addition of the 250 w facility on 1400 kc, owned by the Spartanburg Broadcasting Co., Inc., brings to 192 the stations affiliated with NBC Radio.

IBA directory • Iowa Broadcasters Assn. has published a directory of the state's radio and tv stations, complete with ex-
to the broadcasting industry, especially television, with an assist from the many small community newspapers.”

Survey of Voters - A motivation survey was made by the management services firm, Ward J. Jenson Inc. In it interviews with some 2,000 voters were conducted three weeks, two weeks and one-week before election day. They found that as late as a week before election about 20% had still not decided which way they were going to cast their ballots. After election, a checkback with undecided individuals revealed that some had remained undecided, some had voted for Mr. Poulson, but the great majority, about 70%, chose Mr. Yorty.

When asked why, they responded that when they watched the candidates on television, Mr. Poulson had appeared “nervous,” “uncertain,” “evasive” and “looking as if he had something to hide.” But when it came to Mr. Yorty, the terms given interviewers were “direct,” “forthright,” “dynamic.” “He looked you right in the eye and answered straight out.”

Mr. Yorty won the election by 16,628 votes out of a total of 530,- 774 votes, a margin of just over 3%.

Dr. Ward J. Jenson sums it up like this: “The overall conclusion is that if you have a television-type candidate you ought to put him on tv at every opportunity. If you have a non-tv personality, go to all extremes to keep him off television.”

Los Angeles mayor elect Samuel W. Yorty (right) in pre-election appearance on KABC-TV’s ‘Candidate’ series with host Ed Fleming.

Station goes on - WKIG Glennville, Georgia, went on the air June 25. Highlight of the opening day’s programming was a direct broadcast from Germany. The 1 kw station on 1580 kc is owned by Howard C. Gilreath and Claude Kicklighter, directors of Tattnall County Bestg, Co. Principal executives of the new station are Don Cobb, general manager, and Carlton Hendricks, program director.

Scholarship winner - The annual $1,500 Chuck Worcester Farm Broadcasting Scholarship presented by WMTR-AM-TV Cedar Rapids, Iowa, has been won by Gaylin F. Morgan of nearby Cedar Falls. The scholarship is presented to an outstanding junior in agricultural journalism at Iowa State U. Mr. Morgan will spend the summer working on the station’s farm department staff and will serve as the station’s farm correspondent at Iowa State during the next school year.

Added duties - WJAR-TV Providence, R. I., has appointed Creamer, Trowbridge & Case, that city, to handle its national advertising. The assignment is in addition to the agency’s responsibilities for the station’s local and regional promotions.

Stanton honored - Dr. Frank Stanton, CBS president, was given a citation by the National Press Photographers Assn. on June 23 for his efforts to gain for all communications media equal access to the news. Dr. Stanton was guest speaker at the association’s awards banquet in Wichita, Kans. (At Deadline, June 26).

Winner - KBOL Boulder, Colo., has been named winner of the 1961 Sacred Heart Radio Award for “outstanding achievement in the fields of education, religion and community endeavor.” The station was selected from more than 1,000 stations broadcasting the Sacred Heart series.

Texas radiomen organize

Following a meeting of radio station executives in Marshall, Tex., June 27, the Northeast Texas Broadcasters Assn. was formally organized. Bev E. Brown, KGAS Carthage, was elected president: Bob Bunn, KSFA Nacogdoches, vice-president; and Tom Perryman, KGRI Henderson, secretary-treasurer. The organization’s membership encompasses an area from the Oklahoma-Texas boundary south to include KDET Center and from the Texas-Louisiana line west to include KNET Palestine. The purpose of the organization is said to supplement NAB, Texas Assn. of Broadcasters and other groups by discussing ideas and problems of Northeast Texas radio.
WXYZ caravan descends on state capital

An automobile caravan originating from WXYZ Detroit travelled to Lansing to urge legislative action on higher education and mental-health programs in Michigan. The caravan idea evolved from a series of broadcasts by WXYZ news commentator, Lou Gordon, in which he criticized the legislature's budget which resulted in cutbacks to state-supported schools and mental-health programs. Audience response to Mr. Gordon's commentary was so enthusiastic that WXYZ decided to send the newsman to Lansing to cover the last two days of the legislative session, and to let him take those of his listeners who felt as he did about the budget.

Cars started to arrive at the studios at 7 a.m., and by the time Mr. Gordon was ready to leave at 8:15, some 30 automobiles were lined behind him. During the 77-mile trip, other cars joined the “legislative action caravan,” and by the time it followed its three-car state police escort up to the capital, it numbered more than 50 cars. Legislative leaders of both parties were on hand to greet the travellers. In photo above, Mr. Gordon (right) is shown interviewing Michigan’s Gov. John B. Swainson, with WXYZ Newman Lou Sherman (left) in the gubernatorial office.

Educational WMSB (TV) announces cutbacks

Educational WMSB (TV) East Lansing, Mich., announced a cutback in operating procedures and plans last week brought on by a 12% reduction in its annual appropriation from the state legislature. Manager Patrick J. Callihan said that one of the economy measures will be the dismissal of Washington legal counsel, Barnes & Neilson, “greatly reducing the station’s contact with the FCC.”

The Michigan State U. station also said it will cease to telescast several present and planned programs, including NBC public affairs shows, cutback news and sports coverage, and will curtail its staff. WMSB, which shares time with WILX-TV Lansing, will continue on the air 38½ hours weekly.

Changing hands

ANNOUNCED • The following sales of station interests were reported last week subject to FCC approval:

• WEOA Evansville, Ind.: Sold by Edwin G. Richter Jr. and associates to J. B. Fuqua for $75,000 cash and $48,000 for non-competitive agreement. Mr. Fuqua owns WJBF (TV) Augusta, Ga. Sellers own WEHT (TV) Evansville. WEOA operates on 1400 kc with 250 w.

• WCNG Canonsburg, Pa.: Sold by Lowell Williams and Richard Berg to Thomas Sutton of Dayton, Ohio, for $86,500. WCNG is a 250 w daytimer on 540 kc. Blackburn & Co. was the broker.

• KQBY San Francisco, Calif.: Sold by Sherwood R. Gordon to Atlass Broadcasting Inc. for $750,000. Principals of Atlass Broadcasting are Frank Atlass and his wife, Patricia (not sister as reported last week, BROADCASTING, July 3).

Opinion leaders’ poll

Results of a nationwide study measuring opinion leaders’ attitudes toward TV today will be made available for review and discussion at the Northwestern U. symposium on broadcasting, to be held in Chicago Aug. 3-4. (BROADCASTING, June 26).

88 (THE MEDIA)
Three television and one radio citation were among the seven “Gavel Awards” announced by the American Bar Assn. today (July 10).

The awards, recognizing outstanding contributions to public understanding of the American legal and judicial systems, will be made Aug. 10 at the ABA convention in St. Louis. Whitney North Seymour, ABA president, will make the presentations.

The awards:

In television, Armstrong Circle Theatre, for dramatizing the work of the Legal Aid Society; U. of Michigan TV Center, for a series of 10 educational films on the basic rights of American citizens, and CBS Reports, for a documentary study of a murder case. In radio, KMOX St. Louis (owned by CBS), for a documentary dramatizing what might happen in a community deprived of courts and lawyers.

The other three awards went to Hartford (Conn.) Times, Christian Science Monitor and the Chicago Tribune.

**Radio-tv to get four ABA awards**

**My, how the times do change**

To complete the missing link in KTLA (TV) Los Angeles' historical archives, the station is offering a four-piece silver tea service to the first person who can deliver a genuine first KTLA rate card issued in 1947.

The "hunt" was prompted by Charles B. Ganz, senior account executive with Guerin, Johnstone, Gage Inc., that city, who presented Seymour (Stretch) Adler, KTLA's vice president and general manager, Rate Card No. 2, dated November 1948.

While there are no doubt numerous documents that will show how times have changed since KTLA began operations in 1947, none is quite so apparent as the old rate card. It shows that the going price for an hour long show in Class A prime time was $250. Now it's $1,800 (on a 52-week contract).

**C-c tv to cover arrival of new luxury liner**

Closed-circuit television will be used to picture the arrival in San Francisco Bay of the new P&O-Orient luxury liner Canberra on her maiden voyage July 20.

The closed-circuit telecast, to be seen by travel agents and newsmen in New York, Chicago and Toronto, will be handled by 74 TelePrompTer Corp. technicians, directors, cameramen and engineers.

During the Canberra's maiden voyage, films and video tapes will be made on the high seas of various aspects of the trip. Life aboard ship will be studied on film during the special telecast.

The program, produced by Ogilvy, Benson & Mather, New York, P&O-Orient's agency, will include a radio hookup to enable New York guests to interview P&O-O executives in San Francisco.

**Rollins buys outdoor firm**

Rollins Broadcasting Inc. has purchased a Texas outdoor advertising company for more than $3 million, it was announced last week by O. Wayne Rollins, president of the company bearing his name. The firm is Tribble Advertising Co., San Antonio, which has displays in more than 100 Texas cities.

Rollins owns six radio and three TV stations and holds 10,000 acres of grove, development and farmland in southeast Florida. The radio-tv holdings: WNJR Newark, N. J.; WBEE Harvey, Ill.; WGEE Indianapolis, Ind.; WCHS-AM-TV Charleston, W. Va.; WEAR-TV Pensacola, Fla.; WRAP Norfolk, Va.; WPTZ-TV Plattsburgh, N. Y.; and WAMS Wilmington, Del.

**B'nai B'rith youth group hits tv's detractors**

A Jewish youth group has advised those searching for the causes of juvenile delinquency to forget about television and look somewhere else.

In a statement mentioning the current congressional and FCC investigations into television program policies, the B'nai B'rith Young Adults declared that making television "the scapegoat" has maximized the industry's "role in juvenile delinquency and minimized the public's responsibility to train its youth."

The statement was adopted at the organization's annual convention, in Haliburton, Ont. The BBYA, a unit of the B'nai B'rith Youth Organization, is composed of 18-to-26-year-old Jewish men and women from the United States, Mexico, Canada and the Netherlands.

The BBYA said that "parental guidance and community service are far more influential instruments in molding the attitudes of youth than are television programs." It said parents should police...
their children's television viewing.

But as for the effect of tv crime and violence shows, the statement said, "such programs are probably more harmful to the growth and maturity of American broadcasting than to the people who watch them."

Baptists' tv awards

Three commercial television programs were among the winners of the seventh annual American Baptist Convention Radio-Television awards in Portland, Ore.

"Chips Harvest," an episode in ABC-TV's My Three Sons series was honored for "presenting a Christian truth in an unusual way." Others honored were Bell & Howell for its Close-Up series on ABC-TV and CBS Reports on CBS-TV.

INTERNATIONAL

GADFLY IN BRITISH TV'S OINTMENT

M.P. Edelman carries on fight against violence on ITV

The controversy over excessive violence on tv is not confined to the U. S. Maurice Edelman, a member of British Parliament, has been carrying on a one-man campaign against what he feels is an over-emphasis on violence presented on his country's tv stations for the last seven years.

The main target of his campaign is the Independent Television network, England's first commercial tv network established in 1954. Since the arrival of the commercial network, Mr. Edelman claims both the total number of criminal offenses, and the number of crimes of violence have nearly doubled. On several occasions he has charged the Independent Television Authority, the private body which has jurisdiction over the commercial network, with "having failed to fulfill its duties" under England's Televison Act of 1954, which in part says that "nothing is included in the programs which offends against good taste or decency, or is likely to encourage or incite to crime . . ."

Mr. Edelman, who as a member of the Labor Party representing North Coventry has been elected to Parliament five consecutive times for a total of 16 years, believes violence has a place in art, but that "there is a pornography of violence" on tv, and that the medium "has made the display of violence a familiar experience."

Equally to Blame - He spreads the blame for the violence about equally between American and British producers. He cites Dragnet, Highway Patrol, Have Gun—Will Travel, M-Squad, Maverick, Wyatt Earp, Whiplash, and Wagon Train among the imported programs which bring with them excessive violence.

Mr. Edelman—who also is the author of five novels, seven tv scripts (one of which, "A Dream of Treason," was presented on CBS-TV's Playhouse 90) and one stage play, "Call on Kuprin," which had a short run on Broadway last season—says the English public "turns from the jingles of the deterrents to the crunch of the cosh [bludgeon] as a normal part of the evening's entertainment," and that "those who take the drug of violence become addicts."

Mr. Edelman argues that this is just what commercial broadcasters want. "They have to crush through the barrier of family conversation with action and sounds which will grip the viewer," he says, "and the representation of crime, incorporating acts of violence, is the quickest way to do it."

The crusading author and legislator has much kinder words for England's other tv network, the government-operated BBC. He explains that for the most part this network "has tried to avoid the excesses of TV." The differences between the two, he says, is that the BBC "hasn't got the advertisers breathing down the neck of its program planners, demanding mass audiences by hook or by crook."

Mr. Edelman feels that the nature of our "bored" and "affluent" society is at the roots of the current preoccupation with violence. The lack of "normal outlets" like "conventional warfare," he explains, are missing, and "indirectly, the inhibiting effect of the nuclear deterrent tends to promote the social violence which we see reflected on tv screens."

But in all his disenchantment with commercial tv, Mr. Edelman makes it plain that he's against censorship. What he would like to see is the establishment of a code which would outlaw "repetitious violence"—no person would be allowed to strike more than a single blow in any tv program. The rest, he stresses, should be "left to the producer's good taste in a social sense."

Parliamentary group wants CBC changes

Authority for policy of the government-owned Canadian Broadcasting Corp. should be in the hands of a government-appointed board chairman, the Parliamentary Committee on Broadcasting recommended at Ottawa on June 28.

It recommended that CBC President Al Ouimet, an engineer who has grown up with the CBC, should no longer be on the CBC board of directors, all of whom are government appointees. No management personnel should be on the board, the committee suggested.

It also urged that CBC television affiliates be allowed to join temporary networks in their non-reserved time. At present CBC, which has a veto power, does not want the independently-owned affiliates to have other network connections. Board of Broadcast Governor Chairman Dr. Andrew Stewart recently recommended this move, then changed his mind the following week (Broadcasting, July 3).

The committee also suggested that the
ATAS assembly delayed

Acting upon a recommendation by the assembly's executive committee, trustees of the Academy of Television Arts & Sciences have voted to postpone the first International Television Assembly, originally scheduled to be held in New York Nov. 4-11.

Ed Sullivan, assembly chairman, said the group underestimated the scope of international interest in the assembly and needed extra time to handle the enlarged project, which is now expected to be held sometime in 1962.

rule prohibiting anyone with broadcasting industry connections of any kind from sitting on the BBG be dropped. At present there is only one person on the BBG with broadcasting experience, Bernard Goulet, who was appointed earlier this year. He sold his connections in Goulet Productions, Montreal, to become a permanent member of the BBG, the Canadian equivalent of the FCC.

The committee recommended that a full BBG is not necessary so to reinstate a station whose license has been revoked, provided the station owner can prove to the board "that he had purged himself of those offenses which brought on the suspension."

The Supreme Court of Canada is to be asked to consider whether the government has power to legislate and control closed circuit pay-television and community antenna systems, as a result of the committee's public hearing.

The committee report was presented to the House of Commons at Ottawa by its chairman Dr. George Fairfield (Conservative member for Portage-Neepawa). The report suggested that a firm of management consultants be appointed to examine CBC operations after the network has been studied by a Royal Commission now studying government departments and agencies. Until such an examination has been held, the committee recommended that the CBC should proceed with caution on building television centers in Toronto, Montreal and Ottawa. At present CBC departments are spread widely in both Toronto and Montreal.

Telemeter replies to Sarnoff

Although no figures have as yet been published on revenue of the operations of Trans-Canada Telemeter at Etobicoke, in suburban Toronto, Robert Nelson, operations manager of the firm stated that the service is a success. This was in rebuttal to the Robert W. Sarnoff article in the Saturday Evening Post, in which it was claimed that the Toronto pay-tv experiment had proven unsuccessful. (Broadcasting, July 3).

Mr. Nelson stated that directors of Trans-Canada Telemeter are now studying a plan to expand the pay-tv system in other parts of Toronto. First expansion will be in other areas of suburban Etobicoke, where there are now 6,000 test subscribers. Then other areas of Toronto will be wired for pay tv operations.

Brazilian order aimed at political programs

As a result of a government decree issued by President Quadros of Brazil, radio and tv stations in Sao Paulo have decided to broadcast a minimum of political material and consider the possibility of abolishing political broadcasts outright.

The decree stated that stations would be closed down for reporting any matter which the government considers improper. It also empowers the government news agency and any competent government official to commande all radio-tv facilities for formation of a national network whenever this measure appears to be in the national interest.

Teaching by tv gains world-wide support

Teaching by tv is gaining acceptance throughout the world but it will never replace classroom teaching, according to a United Nations study released last week.

Entitled, "Television Teaching Today," the study was prepared by Henry R. Cassirer, a member of the UN's Educational Scientific & Cultural Organization. It contains a detailed survey of how educational tv is conducted in the U.S., Soviet Union, Canada, United Kingdom, France, Italy, and Japan. All together about 40 countries now have educational tv or plan to establish it in the near future, the survey shows. By 1959 in the U.S. alone, it reveals more than half a million school and college students were receiving part of their daily instruction by tv.

Mr. Cassirer reports that in no case did educational tv completely replace regular classroom teaching. Tv acts "as an effective in-service teacher-training device," he says.

Some of his other observations were that students seem to pay more attention to tv lectures than to "live" lectures; tv heightened the need for experts in specific fields as opposed to one-source teachers. In certain classes, especially in the arts, students established a high degree of rapport with the television teacher.

NOW YOU CAN PRODUCE EXTRA STEREO DOLLARS WITH NEW HIGH POWER 15 AND 30 KW FM STEREO TRANSMITTERS FROM GEL WITH SAME RELIABILITY AND QUALITY BUILT-INTO ALL GEL FIELD-PROVEN EQUIPMENT.

LATIN AMERICAN TV OUTLOOK BRIGHT

Fineshriber reports on ‘threats to free competition’

A report prepared by William H. Fineshriber Jr., vice president for television, Motion Picture Export Assn. of America, indicates in spite of “threats to free competition” in various Latin American countries, the outlook for U. S. telefilms there is bright because of plans for the area’s further expansion.

Mr. Fineshriber’s report was presented to the MPEAA upon his recent return from a five-week tour of eight Latin American countries. He noted that free enterprise commercial television is beginning in Chile and Colombia and that the medium is growing in Argentina, Brazil, Uruguay, Peru and Mexico.

He pointed to certain “dark spots,” particularly in Brazil and Argentina. In Brazil, Mr. Fineshriber said, a presidential decree puts a limitation of 30 minutes on the use of tv films during prime evening hours and permits only 20% of other time to be devoted to film transmission. The decree further limits all foreign tv material to a ratio of one Brazilian to two foreign films. These restrictions will not become effective until Jan. 1, 1962, and in the meantime, MPEAA hopes to rally together stations, dubbing companies and advertising agencies to present their positions to the government.

Mr. Fineshriber dwelt at length in his report on a development in Argentina that he believes could have influence throughout Latin America. This refers to a proposal known as the Guzman Bill under which all dubbing would be done locally. Mr. Fineshriber felt a precedent could be set by the Guzman proposal and that other Latin American countries might enact similar measures. He said no license fee in any single Spanish-speaking country is large enough to cover the dubbing cost. Mr. Fineshriber said he has received assurances the Guzman Bill in its present form, would be rejected by the House of Deputies and returned to the Argentine Senate for revision.

Documentary fever spreads to Canada

More public affairs, science and documentary programs will be telecast in prime evening time next fall and winter, it was revealed at a meeting at Toronto of the Canadian Broadcasting Corp. and its English and French-language affiliates. Practically all commercially sponsored programs on the air in the past year will be back for the fall season, with a possibility that some documentary and science shows will also be sponsored in evening time.

Affiliates were given a preview of the programs on the Festival series which will include 90-minute live dramatic productions, ballet and documentaries on Canadian and world affairs.

CBC French tv network will increase network programming by six hours per week, and will include a serial drama on early days of the French colonial period in Canada. Women’s programs telecast daily will be extended from a half-hour to an hour. There will also be more public-affairs telecasts on the French network.

New U.S.-Canadian rep

Gene Sumner, former Eastern tv sales manager of the Crosley Broadcasting Corp., has announced the formation of Sumner-Byles Inc., Whitestone, N. Y., a new U. S. and Canadian broadcast representative.

Mr. Sumner, and his Canadian associate William Byles, president of Stovin-Byles Ltd., rep firm, will immediately represent CFTO-TV Toronto, flagship station of the new Canadian tv network, CTV, which begins operation Sept. 11. CFTO-Tv, which broadcasts on ch. 9 and went on the air Jan. 1, is owned by Baton, Aldred & Rogers Ltd., Toronto. Sumner-Byles’ address is 10-24 116th St., Whitestone. Phone is Lenox 9-7359.

Abroad in brief...

German pay-tv launched • A limited pay-tv company has been founded in Cologne, West Germany, and plans to move into the West German market as soon as there are 8 million registered sets in the country. Only special events will be televised at a price to the viewer, however; for the rest, the company plans to rely on commercial sponsorship.

The company believes that approximately 20% of West German set owners would subscribe to the system, paying 25 cents for each special pay-tv program. At present, there are about 6 million sets in Germany.

Newly appointed • CTV Television Network Ltd., Toronto, Canada’s new independent tv network, has appointed MacLaren Adv. Co. Ltd., Toronto, to handle all advertising and promotion.

No license fee • No receiver license for television, Canadian mayors voted at their annual meeting at Halifax on June 1. Proposed by a Toronto, Ont., suburban official, and seconded by another, the motion was defeated except for the proposer and seconder at the meeting of Canadian Federation of Mayors and Municipalities.

Insight into Americans • When the 64-man U.S. Peace Corps team arrives in Colombia at the end of the summer, the natives will already know quite a bit about them and their program.

WRUL, Worldwide Broadcasting’s international short wave station, is introducing the Peace Corps to Colombians via a series of Spanish-language broadcasts from the training site at Rutgers U., New Brunswick, N. J. The broadcasts will describe the corpsmen’s activities in classes and on field trips. Worldwide is owned by Metro Media.

London & Rome • Filmways Inc., whose foreign operations include tv commercials, industrial films, programs and features, reports the opening of central offices in London and Rome through which all overseas business will be coordinated under the supervision of Richard B. Sage, overseas production head. Mr. Sage has supervised the firm’s foreign output since 1958. He is also secretary of Filmways and president of Overseas Motion Picture Ltd., a Filmways subsidiary.
BROADCAST ADVERTISING

He had previously served in various executive capacities with CBS in Los Angeles, San Francisco and Chicago over seven year period.

---

**Lee De Forest dies at 87**

**Lee De Forest**, 87, inventor of three element vacuum tube which made possible development of radio and tv broadcasting, died at his home in Hollywood, June 30.

Holder of more than 300 patents including one dealing with color tv, he maintained his research laboratory up until 1958. Many of his inventions have been causes of court battles over priority and other matters. Genius in communications field, he took time out to write his autobiography which was published in 1950 and constantly and enthusiastically advocated radio and tv as means of uplifting mass culture. He was born Aug. 26, 1873, at Council Bluffs, Iowa, received his Ph.D. from Yale in 1899, and earned his title of *Father of Radio* as result of receiving patent in 1907 for audion tube. Funeral services were held July 3 at San Fernando Mission with burial in Mission’s cemetery.

**Henry H. Steele** appointed general manager of KVLC Little Rock, Ark. and **John Mitchell** named program director.

**Johnny Daume**, director of country music and air personality with KWCO Chickasha, Okla., named farm director, country music director and air personality for KOJM Havre, Mont.

**Norman Palmer**, national sales manager of WGBS-AM-FM Miami, named local sales representative for WJW-AM-FM-TV Cleveland.

EQUIPMENT & ENGINEERING

David L. Steel Sr., Washington consulting engineer, has established own practice at 1413 K St., N.W., Washington, D. C. Telephone 393-3173.

Harold E. Felix, program engineer with Douglas Aircraft, appointed vp and director of engineering of Midwestern Instruments, manufacturers of Magnecord tape recorder-reproducers and other electronic equipment.

Raymond M. Wilmot, staff engineer for RCA since 1959 in advanced military systems division, appointed project manager to head development and construction of Relay experimental communications satellite.

INTERNATIONAL

Ward M. Cornell appointed manager of CFPL London, Ont. Mr. Cornell has been with station since 1954 when he joined as news editor.

Jean Nadon resigns as general manager of CJMS Montreal in order to open own management consulting firm Jean Nadon & Assoc., located at 1600 Berri St. Suite 12, Montreal, telephone Vi 5-2616.

Peter Dimmock, head of BBC-TV Outside Broadcasts, N. Y., appointed general manager, Outside Broadcasts, Television, that city. Mr. Dimmock will be in charge of business arrangements for international remote broadcasts and special projects. Harry Middleton, formerly assistant to Mr. Dimmock, named head, Outside Broadcast Programs, Television.

Dave Shannon, formerly with WJGB Detroit, named to sales staff of CKLW Windsor, Ont.

DEATHS

Max H. White, 61, past owner of KWNO Winona, Minn., died June 29 of stroke in Winona General Hospital. Mr. White, who had been ill for several years, had recently gone into semi-retirement after selling his interest in KWNO to his two partners on May 1. He had also sold his interest in Winona Daily News to his son on May 18, who then became publisher. Mr. White had established station in 1938. He was buried July 1 in Winona.

Charles Vassall, 59, technical supervisor for WBZ Boston, died July 2, in Carney Hospital. He had been with station since 1927 when he joined it as engineer.

Paul Guilfoyle, 58, Hollywood character actor and director, died June 27 of heart attack at his Playa Del Ray, California home. He directed more than 150 tv features including episodes of Lawman, Science Fiction Theater, Highway Patrol, and Sea Hunt. He also appeared as actor in Gunsmoke series.
WIP takes merchandising to homemaker

'HOSPITALITY WAGON' DISTRIBUTES CLIENTS' PRODUCTS

When WIP Philadelphia found in-store merchandising no longer an asset in encouraging new business, the station came up with a face-to-face sales technique, In-Home Merchandising, boasting samples, coupons, surveys, personal demonstration and prizes to housewives. A motherly-looking woman whom the station named Winnie Peters (after its call letters) drives the "WIP Hospitality Wagon" in and around the Philadelphia area, stopping to chat with housewives about WIP's advertisers and their products.

For each woman Winnie talks with there is a shopping bag containing samples of various sponsors' products, discount coupons, cook books and other advertising literature.

In addition, prizes are offered to housewives who correctly answer questions on the label of the "Pick Product," one selected each week to be spotlighted. Winnie also takes surveys for advertisers who are either new in the market or who need additional information about their distribution there.

Among WIP advertisers who are already in the In-Home Merchandising program are General Baking Co., Miller High Life Beer, Ritter Foods and H. J. Heinz Co.

IHM, created by Bob Mounty, WIP general sales manager, and supervised by promotion director Arnold Katinsky, is being promoted on the air and in local newspapers. Must an advertiser have a certain minimum billing in order to receive IHM? Not as yet, Mr. Katinsky said, as the station is "playing it [the new service] by ear," and will come to a definitive decision about its operation later.

Radio campaigns boost sales of new autos

Two widely-separated stations have demonstrated the pull of radio and television in selling new cars. They were KOB Albuquerque, N.M., and WBNS-TV Columbus, Ohio, which, using individual promotional campaigns, produced heartening financial results for the new car dealers in their respective cities.

KOB's booklet, "You Auto Buy Now," was distributed to the various new car dealers in Albuquerque. The station offered 300 promotional spots if the dealers bought adjacencies. And they did. Results: While national auto sales lagged noticeably from last year at the same period, Albuquerque zoomed ahead—and far ahead of the national figures.

WBNS-TV also produced strong results with its varied promotion and spot saturation plan. Its theme, "Time to Trade," was augmented by colorful stickers, point-of-sale promotions, live-mentions and station breaks. Columbus, too, scaled over its 1960 figures in new car sales.

And the winner!

A WINS New York dj, Murray Kaufman, was named New York's 1961 Radio Star last week, in conjunction with Portable Radio Month, sponsored by Eveready batteries and Emerson radios.

The award climaxed a month of voting during which fans throughout greater New York cast 32,000 ballots for their favorite radio personalities.

Mr. Kaufman, host of WINS' Swinging Soiree (daily, 7-11 p.m. EDT), racked up 4,503 votes. Jack Lacy, another WINS personality, took second place in the contest. Bill Cullen, WNBC, placed third, while Klavan and Finch, WNEW team, and Jack Sterling, WCBS, followed in that order.
Hitchcock, Cornél Wilde, Peggy Lee and Coleen Gray.

Now in the planning stages, the new museum has a tentative completion date of 1963. The exhibit is being held in the Garden of Allah in Lytton Center, 8150 Sunset Blvd., Hollywood.

You promote us and
we’ll promote you

WCBS New York has begun a new promotion campaign in Los Angeles, Chicago, Boston, San Francisco and Philadelphia.

Since so many people visit New York every summer, Sam Slate, the station’s general manager thought it wise to urge travelers to listen to WCBS when in town.

The 15- and 30-second spots are being aired on CBS Radios, other owned stations (WBHM Chicago; WEEI Boston; KCBS San Francisco; KNX Los Angeles, and WCAU Philadelphia) in exchange for similar announcements for these stations on WCBS.

11 radio-tv stations
sponsor Soap Box Derby

Radio and tv stations in 11 communities are among local sponsors for the 1961 Soap Box Derby. Local races in 142 participating cities for boys 11 through 15 years of age, will determine the participants in the 24th running of the national event. National sponsor of the coasting competition is the Chevrolet Motor Div. of General Motors.

Pet Milk c&w winner

Winner of the fourth annual Pet Milk Co. country and western music singer competition on Keystone Broadcasting System stations was Johnny Rose, singer-guitarist-composer entered by KBIM Roswell, N.M., according to KBS. The finals were held in Nashville, Tenn., at WSM there. Pet Milk sponsors a Grand Ole Opry series on 200 KBS outlets through Gardner Adv., St. Louis. Competition this year included 7,000 contestants at local station level.

Negro market data compiled

Advertisers will soon have access to the most complete research data ever published on the Negro market, ac-
cording to the Negro Radio Assn. The Data Processing Center of S. J. Tesouro & Co., Detroit, is doing national, local and area-level research studies on information obtained in the 1960 census. The information to be released by the NRA for use of member stations, will include income of households, sex of head of household, education, automobile ownership and ownership of consumer durables.

Drumbeats...

Dedication memento • Copies of the hard-cover 112-page souvenir pictorial history of the Chicago Tribune’s WGN-AM-TV Chicago were mailed by the stations last week to 10,000 national opinion leaders, government officials, advertising agencies and sponsors. The book was prepared under the supervision of public relations manager Daniel D. Calibraro as a memento of official dedication of the Tribune stations’ new broadcast center (Broadcasting, July 3).

Unexpected dividend • For the second consecutive year, KSTT Davenport, Iowa, bought all the seats for one night at the July 2 Quad Cities-Clinton baseball game. And, as part of its promotion with Eagle supermarkets, there were fireworks, a wild west show and a game between the station's staff and local models prior to the Midwest League contest. But the biggest promotion “break” came when KSTT scheduled it for July 2. For that night, Quad Cities pitcher Denny Ridant capped it all by throwing a perfect no-hit, no-run game against the Clinton, Iowa, team.

More Cordic • Advertisers and agencies are receiving long-playing records of Rege Cordic’s morning show routines on KDKA Pittsburgh. Entitled “Cordic and Company—Preferred,” the lp includes such topics as “German Gun-smoke,” “Pall Mall Confusion,” and “As a New Yorker Sees Pittsburgh.” Distribution is through Donald J. Tragesser, KDKA sales manager and assistant general manager, and AM Radio Sales, national rep for the station.

Lightning appointment • KNBC San Francisco has appointed The Dennis Corp., Los Angeles, to expand its “chain lightning” merchandising plan. It provides in-store displays and other promotional benefits for the station’s major food advertisers. The “chain lightning” plan covers nine counties in the Bay area.

New radio package • The “3 R’s of back-to-school advertising are spelled...
out in a special package released by Radio Advertising Bureau. The package, which contains a presentation folder and an "honor roll" of back-to-school promotion ideas, reminds advertisers that back-to-school campaigns must break by midsummer.

**Boat safety** • WINS New York distributed 10,000 off-shore forecast schedule cards to boat owners in its listening area during "Safe Boating Week," July 3-9. In addition to highlighting both general and local inlet conditions, emergency Coast Guard bulletins are aired immediately as they are received by the station's Marine News Center. Safe boating rules and reminders are broadcast frequently each day.

**FOR THE RECORD**

As compiled by Broadcasting June 29 through July 5. Includes data on new stations, changes in existing stations, ownership changes, hearing cases, rules & standards changes, routine roundup.

**Existing tv stations**

RE: A GOSSAMER INTANGIBLE

Beneath the beat, beat, beat of the tom-toms lurks the haunting suspicion there must be a far better way to communicate about such a gossamer intangible as editorial quality.

It’s great. We have it. But what is it?

We think it’s what people pay for when they subscribe to a publication. And, like most diaphanous things, it can be measured, if not described.

We think the best measurement of any businesspaper’s editorial quality is the number of readers who pay to read it. This means they value it, want it. It has that vital intangible called quality. Quality enough to move people to buy it. Quality enough to surround your advertising with reader interest. Quality enough to complement its appeal with the appeal of sound, wanted editorial. Quality enough to deliver a live, interested, paid audience. Just the right quality, in short, for the particular reader who reads it—and the advertiser who wants to reach him.

To find it in a businesspaper, look for the ABP symbol. It is, uniquely, the symbol of that gossamer, diaphanous, tremendously vital and elusive intangible known as quality. And most often, you’ll find it, has bred the quantity your advertising needs.

who was executor of estate of John F. Easley, also deceased, to Albert Riesen Jr., special administrator for Mr. Easley, no financial consideration involved. Ann. June 30.

WQO Charleston, S. C.—Seeks transfer of all stock in Radio Orangeburg Inc., owned by Clarence E. Jones (50% of total) to J. Leonard, for $20,000. Mr. Lynnard has interest in consulting engineering firm and is electrical engineer. Ann. June 29.

WLVA-M-TV Lynchburg, Va.—Seeks transfer of stock in Lynchburg Bestg. Corp. owned by Phillip P. Allen, Champion C. Allen, J. P. Read Jr. and Martha T. Reed into voting trust to be voted by trustees or the appointees; no financial consideration involved. Ann. June 29.

Hearing cases

FINAL DECISIONS

- Commission gives notice that May 11 initial decision which looked toward granting application of KCRA Inc. for renewal of license of station KCRA Sacramento, Calif., conditioned to accepting such interference as may result to its operation from grant of either of pending applications for new station to operate on 1460 kc in Orangeville, Calif., became effective June 30 pursuant to a stay order issued July 1.

- Commission gives notice that May 9 initial decision which looked toward granting application of KDOC Inc., to operate new am station to operate on 1490 kc, 100 w unl. in Princeton, Ill., and Village Bestg, Co. (WOPA) Oak Park, III., Burlington Bestg. Co. (KBUR) Burlington, Iowa, and Northwestern Publishing Co. (WAN) Danville, Ill., to increase daytime power from 250 w to 1 kw, continued operation on 1490 kc with 250 w power, to be conditioned to accepting such interference as may be imposed by other existing 250 w class IV stations in vicinity and to be authorized to increase power to 1 kw, became effective June 28 pursuant to sec. 1.153 of rules. Action June 29.

STAFF INSTRUCTIONS

- Commission directed preparation of document looking toward denying applica-

- tion of WNAS FM on the same site as station WHAS-TV (ch. 11) Louisville, Ky., from within that city to near Brownsboro, Ky., about 10 miles northeast of Louisville and 58 miles from Lexington, Ky., increases overall height of antenna, above ground from 600 feet to 1,120 feet, increase of new antenna, and makes other equipment changes. Aug. 13, 1968 initial decision looked toward this action, March 1, 1969.

- Commission directed preparation of document looking toward denying applica-

- tion of WTVN-TV Columbus, Ohio, and Connellsville Bestg, Inc. (WCVT1) Connellsville, Pa., to increase daytime power from 250 w to 1 kw, continued operation on 1320 kc, 250 w, Feb. 28 initial decision looked toward this action. Action June 30.

- Commission directed preparation of order to designate for hearing application of Gotham Broadcasting Corp. for renewal of license of its am station, WINS New York, N. Y. Action June 28.

- Commission directed preparation of document looking toward granting applica-

- tion of Moline TV Corp. for new tv station to operate on ch. 8 in Moline, Ill., and making one condition, Community Telecasting Corp., Tele-Views News, Inc., Midland Bestg, Co. and Ill-watt TV Inc., April 28, 1966 initial decision looked toward granting Community Telecasting Corp. and defendant, Bcstg. Corp. Action June 28.

- Commission directed preparation of document looking toward denying petition by WPGC Inc., for reconsideration of April 21 decision which denied its application for modification of license to change main studio location from Great Mills, Md., to Washington, D. C. Action June 28.

Announcement of these preliminary steps does not constitute commission action in such cases, but is merely announcement of proposed disposition. Commission reserves right to hear different document action upon subsequent adoption and issuance of the formal decisions.

INITIAL DECISIONS

- Hearing examiner Basil P. Cooper is

sued initial decision looking toward granting application of Hartford County Bestg. Co. to change operation of station WAMD Aberdeen, Md., from day time only with unlimited time, with DA-2 continued operation on 970 kc with 500 w, engineering condition. Action June 30.

- Hearing examiner Forest L. McClellen issued initial decision looking toward granting application of RKO Bestg, Inc., for new b fm station to operate on 101.7 mc, ERP 1 kw, ant. height 378 ft., in Lynn, Mass. Action June 30.

- Hearing examiner H. Gifford Irion issued initial decision looking toward granting, without prejudice to consideration of comparative, amplifying acting in procedural and technical requirements applications of Bloomfield-Non-Profit TV Association, Inc., to operate three vhf tv repeater stations on ch. 2, 6 and 10 to serve Bloomfield, N. M. in broadcasting programs of Albuquerque, N. M., stations KOAT-TV (ch. 7), ROB-TV (ch. 12), and KGMN-TV (ch. 3). 1950 grant of applications was protested by Aztec Community TV Inc., operator of community station KABQ, and Blancho, N. M., but grant remained in effect pending outcome of hearing. Action June 28.

- Hearing examiner Charles J. Frederick issued initial decision looking toward denying applications for new am stations of Sagar Bestg. Co. to operate on 1250 kc, 900 w, ant. height 250 ft., in Malone Bestg. Co. to operate on 1240 kc, 100 w, unl. in Norwalk, both Ohio. Action June 28.

OTHER ACTIONS

- By memorandum and order, commission granted petition for reconsideration of decision granting to New York Times Broadcasting, Inc., and extending time for filing pleadings in response to petition by James V. Perry, Grant Broadcasting, Inc., for consolidated hearing applications of Dean for new am station to increase ERP to 2500 w, from 1 kw to 10 kw, to increase power from 500 w to 1 kw and change from 1260 kc to 1130 kc, and granting to M.C.A. Inc., to increase from 1 kw to 10 kw power on 101.7 kc to be heard June 28, on condition that decision is extended to June 30.

- Alberth H. Denb and B. L. Golden, Lamoree, Calif., for consolidated hearing applications of Chalmers Bestg, Inc., for new station to be operated on 910 kc and WHTY Inc., for new station to be operated on 1510 kc, both on condition of change in location.

- By memorandum and order, commission granted petition for reconsideration of decision granting to New York Times Broadcasting, Inc., and extending time for filing pleadings in response to petition by James V. Perry, Grant Broadcasting, Inc., for consolidated hearing applications of Dean for new am station to increase ERP to 2500 w, from 1 kw to 10 kw, to increase power from 500 w to 1 kw and change from 1260 kc to 1130 kc, and granting to M.C.A. Inc., to increase from 1 kw to 10 kw power on 101.7 kc to be heard June 28, on condition that decision is extended to June 30.

- By order and notice, commission, on its own motion, determines that time further consideration its action of June 1 in granting with other hearing applications for renewal of licenses of station WAMV-AM-FM and WPMF, for auxiliary transfers, for WMV East St. Louis, Illinois and Westminster-Hawks Co. to St. Louis, Illinois, to remain in effect pending such reconsideration. Action June 28.

- By order, commission denied request by Inter-American International, Inc. (WQXR) New York, N. Y., for temporary stay of hearing on applications of Berkshire Bestg, Co., Hartford Bestg, Co. and Warwick Bestg, Co., West Hartford, for new am facilities. Action June 28.

Routine round-up

- Commission granted application of Byrant Broadcasting, Inc., for new experimental tv translator station to operate on ch. 12 at various locations in New York province. Lots of coverage tests under actual field conditions to be taken in order to determine which can be achieved by translators. There will be no public participation in proposed tests. Action June 28.

ACTIONS ON MOTIONS

By Commission Roesel H. Hyde

- Granted petition by Broadcast Bureau and extended to June 30 time to respond to petition by Interstate Bestg, Inc. (WQXR) New York, N. Y., to review order of hearing examiner denying continuance of hearing, and for temporary stay of hear-
ing pending action on this petition in proceeding on application of Berkshire Bestg. Corp. and Grosco Inc., for am facilities in Hartford and West Hartford, Conn. Action June 29.

- Granted petition by Broadcast Bureau and extended to July 17 time to respond to two petitions for review of examiner's memorandum opinion and order in Corpus Christi, Tex. tv ch. 3 proceeding. Action June 29.

- Granted petition by Broadcast Bureau and extended to July 10 time to file exceptions to initial decision in proceeding on fm applications of Bible Institute of Los Angeles Inc. (KBBI) Los Angeles, Calif. Action June 28.

- Granted petition by Mt. Holly-Burlington Bestg. Co. and extended to July 17 time to respond to petition by Burlington Bestg. Co. to enlarge issues in proceeding on their applications for am facilities in Mount Holly. N. J. Action June 29.

- Granted petition by WDUL Tv Corp. (WHYIZ-TV) Duluth, Minn., and extended to Sept. 13 time to file exceptions to initial decision in proceeding on its application. Action June 29.

- Granted petition by TriCities Bestg. Co. and extended from June 30 to July 3 time to file replies to exceptions in Greensboro-High Point, N. C. tv ch. 8 proceeding. Action June 29.

- Granted petition by Greater Princeton Bestg. Co. and extended to July 3 time to file exceptions to initial decision in proceeding on its application for new am station in Princeton, N. J. Action June 29.

- Granted petition by Dale H. Mossman and extended to June 28 time to respond to petition by Massillon Bestg. Inc. to enlarge issues in proceeding on their applications for new am stations in Norwood, Ohio. Action June 26.

By Acting Chief Hearing Examiner
Jay A. Kyle

- Granted request by MetroMedia Inc. to file opposition, not to exceed 25 pages, to petition by WHYY Inc., for review of adverse ruling of hearing examiner and petition for clarification of commission's memorandum opinion and order in Wilmington, Del., tv ch. 12 proceeding. Action June 29.

- Granted request by G. M. Sinyard for dismissal of his application for am facilities in Hazlehurst, Ga., but dismissed application with prejudice; application was consolidated for hearing with Hazelhurst Radio, Hazlehurst, Ga. Action June 27.

- Granted joint petition by Bar None Inc. and Independent Bestg. Corp. for approval of agreement whereby Independent would pay Bar None $2,500 for reimbursement of expenses incurred in connection with latter's application for new am station to operate on 1430 kc, 1 kw. D. in Dishman, Wash., in return for its withdrawal; dismissed Bar None Inc. application with prejudice but permitted effectuation of agreement; retained in hearing status Independent application for new am station to operate on 1440 kc. 5 kw. D. in Spokane, Wash., to be subject of further proceeding and initial decision by hearing examiner. Action June 27.

The efficient design of the Collins 37M FM Antenna has never been effectively duplicated. It has been imitated, to be sure, but it retains its position of leadership. Design simplicity keeps fine tuning adjustments to a minimum after installation. Bandwidth and linearity far exceed requirements for effective multiplexing service.

Collins Radio Company • Cedar Rapids, IOWA • Dallas, Texas • Newport Beach, Calif.

Features: extremely effective deicing unit, easily serviced in the field • capacitive adjustment • top or side mounting • high gain • equal power distribution. For more information, see your Collins sales engineer, or write direct.

KQV RADIO

Pittsburgh 19, Penna.
TELEVISION COMMERCIAL PRODUCTION MANAGER

There's a production manager or what some station calls operations manager who is not happy in his job, the area, management or some justifiable reason. He wants an opportunity to be creative, develop talent, improve live programs, and become a part of the 'team.'

The man we need must be thoroughly experienced to perform a first class job in staging, lighting, directing, vetting personnel, that he possess good business administrative ability.

Our station doesn't claim to be the biggest in the Southeast yet it is an excellent one, affiliated with a good network. Good staff and excellent working conditions.

If you want to improve your situation, here is your opportunity. Established firm with a solid future. Programming and film buying experience not necessary, but tell us if you have such experience.

Salary will be attractive for our market and responsibility, $8000 and up depending on depth of experience.

Write all about yourself in letter and include a number of industry references who know your qualifications. All replies confidential. Enclose photo. Prefer man over 30 years old.

BOX 964F, BROADCASTING
WANTED TO BUY

Stations

Financially qualified, experienced broadcaster purchase your station. All inquiries answered, confidential, expanding, southwest, all west preferred. Box 147G, BROADCASTING.

Equipment

Capitol Transcription music library wanted. Interested in security service or in resident classes. State condition. Box 921F, BROADCASTING.

TV station setting up news-film operation. Will consider good used developer and other equipment for 16mm news operation. Send all details to Box 921F, BROADCASTING.

50 kw transmitter perfect condition. Write or wire Radio Programs de Mexico, Mr. Romero Rios D. 106 Bucareli St., Mexico 6, D. F.

TV equipment including portable camera control for RCA TK-11 camera, transistorized Auticon camera, pin cinor 16mm Zoom lens Kenroil model 15A hot press, Telecra 6000 rear screen projector, short wave police receiver, film and dark room equipment, Phone purchasing agent, KTAL-TV, Texarkana, Texas 33-1135.

Instruction book and drawings for a Western Electric 25A console. WFRA, P.O. 908, Franklin, Penna.

INSTRUCTIONS

FCC first phone license preparation by correspondence or in resident classes. Grantham Schools are located in Hollywood, Seattle, Kansas City and Washington. Write for our free 40-page brochure. Grantham School of Electronics, 3123 Gillham Road, Kansas City 9, Missouri.

Be prepared. First class F.C.C. license in six weeks. Top quality theory and laboratory training. Elkins Radio License School of Atlanta, 1139 Spring St., N.W., Atlanta, Georgia.

FCC first class license in 5 or 6 weeks. Instruction eight hours a day, five days a week. No added charge if additional time or instruction needed, as license is guaranteed for tuition of $300.00. Professional announcing training also available at low cost, Pathfinder Method. 5004 Hollywood Blvd., Hollywood, California. Next classes July 31 and September 15.

Elkins Radio License School of Chicago—Six weeks quality instruction in laboratory methods and theory leading to the F.C.C. First Class License. 14 East Jackson St., Chicago 4, Illinois.

Since 1946. The original course for FCC 1st phone license, 5 to 6 weeks. Reservations required. Enrolling now for classes starting (August 30-Closed) October 1, January 3, 1962. For information, references and reservations write William H. Ogden Radio Operational Engineering School, 1130 West Olive Avenue, Burbank, California. Authorized by the California Superintendent of Public Instruction to issue Diplomas upon completion of Radio Operational Engineering course.

Announcing, programming, console operation. Twelve weeks intensive, practical training. Finest, most modern equipment available. G. L. approved, Elkins School of Broadcasting, 2203 Inwood Road, Dallas 39, Texas.

MISCELLANEOUS

NAB Engineering Handbook, have several new 8th additions at $20.00 each postpaid. Save $7.50, Box 367FP, BROADCASTING.

Experienced Carolina broadcaster desires to borrow $50,000 at 10% interest for one year. Highly profitable daytime station as collateral. Best references. Write Box 1965, BROADCASTING.

How to become outstanding in the field of electronics. Free literature. Wallace Cook, Box 10694, Jackson 9, Miss.

Paying $1,000.00 yearly for 30 minutes daily ($500 for 15 minutes). Pay in advance by month. 2 weeks cancellation clause. Gospel Broadcasters, Schell City, Missouri.

Yocks for jocks! Laugh-tested comedy material. Write for free listings. ShowBiz Comedy Service (Dept. DJ2), 65 Parkway Court, Brooklyn 38, New York.

MISCELLANEOUS

25,000 professional comedy lines, routines, adlibs. Largest laugh library in show business. Special monthly topical service featuring daily comment, introductions. Free catalog, Orben Comedy Books, Hewlett, N.Y.

BUSINESS OPPORTUNITY

General Steel and Concrete Construction Co. Station builders, all outside plant work from tower to ground system, to transmitter building. New equipment, or good high quality used equipment. Some financing available. Insured, quality work. Tower maintenance, painting, guy-tension, bulb changing, etc. $ 4, 6, year contracts available. Low rates, call/write TU 6-4429, P.O. Box 882, Watertown, So. Dak.

FOR IMMEDIATE SALE

Radio station KKCC, San Bernardino, Cali- fornia includes equipment of transmission of records, albums, records, real property at 270 Mill St., San Bernardino, together with the broadcasting studio, towers, etc., and all pertinent to an application pending with the Federal Communications Commission which will be submitted to the Federal Communications Commission for additional license to broadcast on a 3000 kw frequency during daylight hours, subject to approval for ch. 7 for July 13, 1961, at San Bernardino, Calif.

For further information call or write

Trustee C. R. Check, 362 Arrowhead Ave., Suite 303, San Bernardino, Tex. 816165.
The experiment* reported here had as its object to show effect of various regimens of breakfast and mid-morning breaks on maximum work output as measured by a bicycle ergometer. Twenty subjects, 18 to 36 years of age, including both office and factory workers participated. The various periods of the experiments used for the comparisons were as follows:

Period 1. Basic breakfast without mid-morning break.
Period 2. No breakfast without mid-morning break.
Period 3. Basic breakfast with mid-morning break.
Period 4. No breakfast with mid-morning break.

"The data seem to justify the following conclusions:

"All subjects did significantly more work when the dietary regimen included an adequate breakfast than when it was omitted.

"The addition of a mid-morning break when an adequate breakfast was eaten resulted in no advantage as far as maximum work output was concerned.

"The addition of a mid-morning break to a dietary regimen which omitted breakfast showed a significant advantage for half of the subjects, in maximum work output.

"The data seem to indicate that an adequate breakfast is better economy as far as capacity to work is concerned than the substitution of a mid-morning break for breakfast."

---

*a basic breakfast† used in this experiment followed this moderate low-fat, well-balanced menu.

108  BROADCASTING, July 10, 1961
OUR RESPECTS to John William Guider, WMTW-FM-TV Poland Spring, Me.

A station without a specific ‘local’ market

What are good broadcasters made of? Varying parts of will, energy and persuasion—that’s what John William (Duke) Guider is made of. And Mr. Guider is a good broadcaster who’s been involved in the electronics industry since 1922. At various times during his career, he’s been a salesman of radio receivers, an electronics supply officer in the Navy, and a lawyer who’s argued broadcasting cases before the U. S. Supreme Court. Currently he’s president and general manager of WMTW-FM-TV Poland Spring, Me., and president of Mt. Washington TV Inc., parent company of the stations.

WMTW-TV, a full-time ABC primary affiliate, is an unusual station. Its transmitter is situated on top of New Hampshire’s 6,280-foot Mt. Washington, the highest mountain peak in New England. The station serves 36 counties in a four-state area—Maine, New Hampshire, Vermont, and the northeast corner of New York—that encompasses 1.5 million people.

When Mr. Guider started the station almost seven years ago, he quickly discovered that, unlike most other broadcast outlets, WMTW-TV did not have a specific market with which it could identify. He attacked this and other problems with a determination and ability characteristic of him.

New Market • “We made a new market in an area where no other single media can reach a great population,” he recalls.

Mr. Guider learned the habits, the personalities, the likes and dislikes of his previously unclassified audience.

Less than 25% of the station’s viewers reside in cities and they are an early supper, early-to-bed audience, Mr. Guider made the most of this knowledge. He programmed strong feature films from 5:30 to 7:30 p.m. with the result that WMTW-TV now enjoys, according to Mr. Guider, a 44.9% share of the audience during that period.

Feature films is the station’s most successful commodity. WMTW-TV now has a library that includes 3,362 feature films under contract, including 568 that are post-48’s.

But feature films are not Mr. Guider’s only source of pride. He’s particularly proud of WMTW-TV’s new 50-foot-high, Fiberglas, radome-enclosed, traveling-wave antenna, which was first put into service about Nov. 1 of last year, and has operated without interruption since.

Putting up the new antenna was a necessity, but it wasn’t easy. The top of Mt. Washington gets an average of 100 days a year of hurricane-force winds and they bring snow and ice. Enclosed in a Fiberglas cylinder, the new antenna is impervious to the weather. Mr. Guider says it transmits a stronger signal throughout the WMTW service area and “fills in hollows” that never before could receive the station.

John Guider (everyone calls him Duke, a nickname he got as a result of mistaken identity when he was at the U. S. Naval Academy) never thought he’d spend a good part of his career winning shares of audiences and helping to build antennas.

“In my case,” he says without a trace of regret, “it’s always been a case of electronics overtaking me rather than I pursuing it.”

He was born March 10, 1900, in Syracuse, N. Y. Mr. Guider lived and went to school there until he was 17. After finishing high school, he entered the Naval Academy at Annapolis, Md., graduating with a Navy commission in 1922.

It was at this point that the electronics industry first embraced Mr. Guider, an embrace he’s never since successfully eluded. A fellow ensign aboard ship asked WMTW-TV’s future president if he would like to work for RCA. Electronics being in its toddling state, the idea seemed a novel one to Mr. Guider and in November 1922 he joined RCA as a sales engineer.

Sold Radios • “What I really did was sell radio receivers in Washington, D. C. to people who couldn’t get any stations.” During this period he went to George-town U. Law School in the evenings, graduating with a law degree in 1926. He subsequently joined the law firm of Hogan & Hartson, Washington, D. C., remaining there until he was called back to the Navy 16 years later.

As a lawyer, Mr. Guider handled many radio and TV cases, some before the U. S. Supreme Court, but he was not departmentalized in broadcasting. He also served as a lawyer in criminal and civil cases.

Mr. Guider served with the Navy all during the war, from 1942 to 1946. He entered as a lieutenant commander and when discharged was a captain and also was the Navy’s senior electronics supply officer. “I spent most of my time getting things built and channeled to the fighting Navy,” Mr. Guider says.

After the war, Mr. Guider opened a law practice in New Hampshire. Again the call of broadcasting was loud and alluring. In 1948 he bought WMOU Berlin, N. H., a 250-w station, and three years later he added 1-kw WJWG Conway, N. H. (now WBNC) to his building chain.

He subsequently sold both stations in 1957, but not before he, together with a group of associates, formed Mt. Washington TV Inc. in 1953. The explicit purpose of the organization was to put an “area” tv station on top of Mt. Washington, and WMTW-TV, which began operations on Aug. 31, 1954, was the result.

Mr. Guider married Dorothy Hogan, a native of Washington, D. C., and a daughter of Frank Hogan, former president of the American Bar Assn., Oct. 20, 1923. They have three children, two sons and a daughter, and nine grandchildren, all under 7 years of age.

Mr. Guider is greatly involved in civic and charitable matters and also is particularly interested in furthering educational tv. He’s a member of the bars of New Hampshire, and the District of Columbia and has been admitted to practice before the U. S. Supreme Court. For 11 years, until recently, he was treasurer and director of the American Bar Assn. Endowment, and he’s one of 600 Fellows of the American Bar Foundation.

Mr. Guider enjoys swimming and reading, but his real hobby, he says, is “to take kids and help point their feet in the right direction” (the average age of his station staff is 29 years and 4 months).

One of the highlights of his life was his appointment by the U. S. government as defense counsel for Japan’s wartime premier, Hideki Tojo, at his post-war trial.
Airspace threat

UNLESS the FCC asserts itself as the sole and final arbiter in broadcast allocations by July 15, broadcasters will find themselves caught in a split jurisdiction vice under which the Federal Aviation Agency can become the effective licensing authority.

The FAA has adopted new rules, effective July 15, to control height and location of broadcast towers. The criteria approved, unless exempted by FAA, specify any structure more than 500 feet above ground as a hazard to air commerce and any structure more than 200 feet high in a control zone as dangerous to air navigation.

The rules also provide that it may establish antenna farms in each state, which conceivably could mean that many existing antenna sites for radio as well as tv could be displaced without regard to coverage patterns, mileage separations or other criteria controlled by the FCC.

What came out of the informal discussions of FCC lawyers with the FAA since adoption of the final rules hasn’t been disclosed. If there is no agreement, the FCC should promptly seek congressional clarification or resort to court action to determine jurisdiction.

Fees, taxes and freedom

MASS media the world over are under attack. Whether it be a tax on television advertising in Great Britain, a decree to commandeer radio and television in Brazil, Castro’s seizure of newspapers and broadcasting stations in Cuba, or such seemingly innocuous proposals as disallowing costs of defense contractor advertising or assessing franchise taxes and license fees for communications in the United States, the international theme seems to be to sock them and control them.

We refer here, of course, to the democratic western world. The totalitarian way is and always has been to suppress dissemination of valid information to the enslaved subjects and to the outside world.

The British tax of 10% on television advertising imposed a few weeks ago probably does not have as its goal the “control” of tv as a mass medium. Britain already controls both radio and television through statutes which created separate authorities (the non-commercial BBC, a private corporation under government auspices, and the Independent Television Authority which physically operates the facilities leased to program contractors for commercial tv).

It is a discriminatory tax, however, against commercial tv and in favor of the non-commercial BBC and the competitive newspapers and magazines. Because it is discriminatory it is reasonable to assume that the tax either will be dropped or an equivalent tax will be imposed upon other media.

The FCC proposal to saddle franchise and filing fees upon all licensees to defray the cost of FCC administration obviously is out of line. Whether it is called a filing fee or a franchise tax, or both, it is an impost that places an additional burden upon communications media not borne by their competitors or by others regulated by independent commissions.

The imposition of fixed fees for all classes of licensees, as has been proposed at FCC staff level, would create a hardship on small market stations but wouldn’t bother larger operations except for the discrimination factor. Broadcasters, like other professional and business men, pay their federal and state taxes to defray the cost of government. The current proposal constitutes double taxation. Moreover, if broadcasters are called upon to pay the FCC’s freight for their regulation, they will have an obvious right to expect service in return. Would the FCC’s primary concern then become the private interests of the licensees rather than the public’s interest? It is a point worth pondering.

The FCC’s program crusade and its bellicose attitude toward licensees is making life tougher for licensees on all fronts, including the administration’s own campaign for economic recovery. As we reported last week (CLOSED CIRCUIT) an insurance company reneged on a $500,000 loan to an old-established radio station netting about $400,000 a year because it now regards radio as a risky investment. A nervous money market can spread like wildfire.

A fee or franchise tax to cover FCC’s overhead is far from a fait accompli. With appropriate safeguards, a reasonable franchise tax, in return for a property right, would not be hard to take. It could even rectify some of the damage already done against the drive toward stability and recovery.

Censorship in the raw

THE FCC has taken the unprecedented action of refusing to grant an uncontested application for a new broadcast station because of inadequate programming plans. If this decision is allowed to stand, federal censorship will have been firmly imposed on American radio and television.

As reported in this publication last week, the FCC reversed its examiner and denied a grant to an applicant for an fm station in Elizabeth, N.J., a community now without local fm service. The commission ruled that the applicant had made no survey to determine local program needs and therefore could not possibly have designed a program schedule calculated to serve the community.

This line of reasoning can only be interpreted to mean that the FCC thinks no programming at all can be better for a community than programming that does not fit FCC specifications. Here is censorship in its rawest form.

At best the program proposals in an application can be no more than a murky clue to the nature of a station’s broadcasting. Until a program service has actually gone on the air and been subjected to the test of public acceptance no one can make a judgment of it. Yet the FCC has now aborted a program service before its birth. The Elizabeth fm might have turned out to be a great station. If the FCC prevails, no one will ever know.

We know nothing about the men whose application was denied, but no matter what their qualifications and intentions, this case is one for general concern. At issue are principles of such fundamental interest to every broadcaster —and to every citizen who thinks the First Amendment means what it says—that the Elizabeth decision must be fought by the whole broadcasting fraternity.

The Officers and Directors of
MUZAK
CORPORATION
TAKE GREAT PRIDE IN ANNOUNCING
THE 1960 WINNER OF THE
ANNUAL GOLDEN EAR AWARD

Mr. E. A. "Bob" Alburty

In recognition of his outstanding achievements, Mr. Emerson A. Alburty of Memphis, Tennessee, is awarded the Muzak Golden Ear Award for 1960. Currently Chairman of the Board of Trustees of the Memphis Sales Executive Club, and Vice President of the Memphis Chamber of Commerce, Mr. Alburty has willingly given his time and counsel to the management of his city’s affairs. During the year, he served on a Trade Commission representing the Chamber of Commerce visiting Europe. He was actively engaged as Director of Civic Research Committee, Salvation Army, and the American Cancer Society. He also served as Vice President of Memphis Goodwill Industries. A tireless fundraiser, Mr. Alburty, as Chairman of the Shelby County United Neighbors Campaign, was responsible for raising over $1,600,000—the largest sum in the campaign’s history. Mr. Alburty has ably represented Muzak since 1946.

JUDGES: RALPH T. REED, Chairman of the Executive Committee of American Express Co.
      JACK WRATHER, Chairman of the Board of Muzak Corporation
      CHARLES COWLEY, President of Muzak Corporation

THE GOLDEN EAR AWARD is an annual award established by Muzak Corporation to honor the franchiser whose achievements in National, State or Community affairs mark him as the outstanding citizen of the year in the Muzak family. In making this award, Muzak Corporation seeks to encourage and honor individual excellence, pre-eminence and leadership in church, fraternal or social work; philanthropy, government, business, or other meritorious human endeavor.

MUZAK CORPORATION
An International Subsidiary of the Wrether Corporation
224 PARK AVENUE SOUTH, NEW YORK 3, N. Y.
BUILDING WITH HOUSTON / KTRK-TV
At the touch of a button, a modern washer-dryer washes, rinses, and dries clothes in a single operation, in less than one hour. Compare this efficient method with the old hand-operated American roller washing machine of 1865.

Television is seen and heard in every type of American home. These homes include children and adults of all ages, embrace all races and all varieties of religious faith, and reach those of every educational background. It is the responsibility of television to bear constantly in mind that the audience is primarily a home audience, and consequently that television's relationship to the viewers is that between guest and host.

Through the years, machines have been redesigned and improved to render more efficient service to users. Similarly, WGAL-TV, alert to its responsibilities, has kept pace with the times in order to fulfill the current needs of the many communities it serves.
Censorship victory

Shortly to be announced by White House will be transfer of OCM to Department of Defense but minus standby censorship organization which would come into being in event of national emergency. Censorship, instead, will move to new Office of Emergency Planning, soon to be created under White House aegis. Action is significant victory for mass communications media which opposed military control. 

Voice of Democracy scuttled

Top command of NAB has decided to dump annual Voice of Democracy contest in which millions of high school students have participated in its dozen years. Veterans of Foreign Wars, co-sponsor of past three contests, was notified late last week that NAB would bow out. Some NAB members, who had already begun to make local plans for VOD competition, got word of NAB'S defection from local VFW representatives. Third co-sponsor, Electronic Industries Assn., was willing to go along with NAB in scrapping VOD. 

Cox for Craven in '63?

Able, tough Kenneth Cox, FCC's new Broadcast Bureau chief, may not be shooting for next year's Democratic vacancy on FCC but rather may await retirement of Commissioner T. A. M. Craven on June 30, 1963. Term of John S. Cross, Arkansas Democrat, expires next year and it had been open secret that Mr. Cox had been "promised" it. But Commissioner Cross, strongly supported by Rep. Oren Harris (D-Ark.), among others, is avowed candidate to succeed himself and would be hard to displace. On the other hand, Comr. Craven will have passed retirement age of 70 in 1963 and legally cannot be candidate. 

'Inside' NAB

Consideration is being given to "inside" as well as "outside" for NAB executive vice presidency. President LeRoy Collins this week will discuss with members of his Policy Committee several names for No. 2 post, including members of NAB executive staff with station experience—necessary qualification specified by board. Among "insiders" are William Carlisle, manager of station relations, formerly with WKBK Manchester, N. H. and other New England stations; Vice President Howard Bell, formerly with WMAL-AM-TV Washington, and Radio Vice President John F. Meagher, formerly general manager of KYSM Mankato, Minn. 

Top staff member without requisite station experience but popular with board is Vincent T. Wasilewski, vice president of government relations. Consideration of these names, however, does not preclude possible selection of broadcaster from outside. 

Clyne to Uncle Sam?

C. Terence Clyne, who resigned last week as vice chairman of McCann-Erickson and top executive in tv and radio, may enter government service. He was in Washington last week in consultation with State Dept. executives in connection with quest for executive manpower to beef up foreign aid and international cooperation. 

Over the hill

Proposal to assess license fees and franchise taxes by FCC to defray its $13 million-plus overhead came before FCC again last week and was promptly talked down. FCC Chairman Minow, who espouses proposal that would extract $6 million from broadcasters, will instead explore congressional sentiment through Chairman Warren G. Magnuson (D-Wash.) and Oren Harris (D-Ark.) of Senate and House committees on commerce. Since Mr. Harris already has said he's opposed to FCC moving on its own, project can be presumed dead at least until fall. 

Big push on 20s

On theory that 20-second prime-time tv announcements will be hot as ever (though more numerous, as result of expansion of break-time to 40 seconds), at least one major station representative is conducting big push to get timebuyers to "tie up valuable 20-second franchises" for this fall. Push is based on argument that 20's have track record which gives them two advantages, especially as compared to less frequently used 30 and 40-second lengths: (1) proven efficiency and (2) known cost. 

Las Vegas expose

Goodson-Todman Productions will "expose" action in Las Vegas that led to cancellation of company's projected tv series titled Las Vegas, which NBC-TV had scheduled for 1961-1962 season. Behind scenes story of how small group in Nevada city dashed all hope of doing series will be told in feature movie planned for theatrical distribution. Release arrangements are currently under negotiation. Among wrong-doings, according to G-T, were "phony wires" to network threatening boycott of sponsors' products if show were to go on air. 

Minute meetings

NAB's fall conferences this year may be cut to one-day affairs, with morning, luncheon and afternoon sessions only. In past, conference schedule has run over two days. Same cities originally scheduled will be sites—St. Louis, Dallas, Salt Lake City, San Francisco, Jacksonville, Boston, Pittsburgh and Minneapolis. But new dates may be set. 

In search of proof

FCC Chairman Minow has top lawyers in general counsel's office working under forced draft to prepare legal support for his theory that his notions of regulation don't conflict with First Amendment or censorship prohibitions in Communications Act. He wants this legal work-up for major speech he's to deliver at Northwestern U. conference on mass media Aug. 3-4 (see story page 58). 

Compensation plan

FCC apparently still isn't satisfied with CBS-TV's new station compensation plan, which pays higher rates for program clearances above 60 percent level and which has been branded by Rep. Emanuel Celler (D-N.Y.) as move to get around recent cutback in option time (Broadcasting, June 19). FCC group headed by Broadcast Bureau Chief Ken Cox and Economist Hy Goldin conferred with CBS-TV officials on it in New York 10 days ago, after which FCC general counsel's office—not represented at that meeting—was directed to push ahead with its study of new compensation set-up, part of overall examination of non-standard compensation arrangements at all networks (Broadcasting, May 29). 

Low pitch, high hopes

Television film producers who have pilots and scripts of series which they say were rejected for upcoming series because they weren't sufficiently "sexy" or "slam-bang" still have high hopes for them. They feel that in current climate there will be higher mortality than usual for crime and western shows, that such programs as CBS Films, Mr. Doc and MGM-TV's Harry's Girls (both violence-free and low-keyed vehicles) will have chance to capture network time periods in January when 13-week cycles end.
because

Miami is
different from

Los Angeles...

and because people are different in different markets... Storer programming is different! We put together a flexible format to fit the needs of the community... making it local in every respect. That's why Storer Stations are liked, watched and listened to—why they rate high in the 9 key markets where they are located*. Local programming—quality-controlled—assures you the best is being presented. You know you've made the right buy when you buy a Storer Station. Storer representatives have up-to-the-minute availabilities at their fingertips. Important Stations in Important Markets.

*WGBS rates number 1 in Miami. KGBS blankets Southern California with 50,000 watts.

BROADCASTING
THE BUSINESSWEEKLY OF TELEVISION AND RADIO
Published every Monday, 53rd issue (Yearbook Number) published in September by Broadcasting Publications Inc. Second-class postage paid at Washington, D.C.
Subscription prices: Annual subscription for $25 weekly issues $70.00. Annual subscription including Yearbook Number $11.00. Add $2.00 per year for $4.00 for all other countries. Subscription required. Regular issues 35 cents per copy. Yearbook Number $4.00 per copy.
Subscription orders and address changes: Send to Broadcasting Circulation Dept., 1735 DeSales St., N.W., Washington 6, D.C. On changes, please include both old and new addresses.
The audiences of WPIX-11 and the top Network station are the same: A. C. Nielsen has proved that a rating point on WPIX-11 and on New York's leading Network station delivers the same number of families with the same income levels, home and automobile ownership characteristics, job occupations, etc. On WPIX-11 national advertisers are reaching the right people at the right time with the right kind of impressions ... minute commercials in prime evening time in a "network atmosphere" of fine programming, advertisers and audiences.

Where are your 60-second commercials tonight?

NEW YORK'S PRESTIGE INDEPENDENT
15-MARKET DEINTERMIXTURE PROPOSED

FCC to study plan for seven all-uhf, eight 3-uhf cities

Comprehensive staff plan to mount offensive toward greater utilization of uhf channels by deintermixing at least seven markets which now have only one uhf station and by dropping third uhfs in eight two-station markets which have greatest need for three-network uhf competition will be considered by FCC at special meeting July 27.

Hottest potato to be dropped in FCC's lap since lifting of freeze in 1952, plan, subject to usual rulemaking even if approved, provides for sub-standard separation drop-ins in certain instances on uhf channels. Staff submitted three-inch-thick document two weeks ago but it was regarded as "too complex" to be considered at other than special meeting with elaborate slide presentation depicting, by way of overlays, just how each area would be serviced through changed assignments.

Here are existing markets that have single uhf competing with uhfs that would be deintermixed to all-uhf: Champaign-Urbana-Decatur, Ill.; Birmingham, N. Y.; Madison, Wis.; Hartford, Conn.; Montgomery, Ala., and Columbia, S.C.

Among markets listed as having greatest need for uhfs and for which provision is made in plan, either through short separations or reduced powers, are, it's understood: Syracuse and Rochester, N.Y., (which can be accommodated through Canadian agreement); Birmingham, Ala.; Grand Rapids; New Orleans (where third station is operating temporarily on ch. 13 assigned to Biloxi, Miss.); Louisville, where proposed drop-in is tied up in litigation involving ch. 7 Evansville, Ind., and Providence, R. I., being held in abeyance pending finalization of recent ch. 6 grant to New Bedford, Mass., but which could be relocated to effectively serve Providence market.

Plan presents alternatives, pointing out that certain proposed moves are more favorable than others. Not all of uhf channels that would be deleted from predominantly uhf markets are re-assigned.

Argument is that if substance of plan were adopted for rulemaking, it would constitute nation-wide deintermixture coupled with existing all-uhf markets. There are enough indicated votes now at FCC to pressure substance of plan into rulemaking, which would first step toward eventual adoption. But it would have to stand barrage of opposition from stations, from congressional opponents and ultimate court test.

WITT financial woes cited at conference

Telephone company "pulled the switch" and put WITT Lewistown, Pa., off air for 10 days in June for nonpayment of bills, Broadcast Bureau claimed Friday in prehearing conference on station's license renewal (story page 60). Station's board of directors allegedly voted to put no more money into WITT and turned control over to other interests in exchange for putting station back on air, bureau counsel charged.

This would constitute second unauthorized transfer of control in one year, bureau said.

WITT counsel, who has requested bill of particulars, said he wanted specifics of hearing issues from commission itself, not from bureau. He also pressed for continuance of July 24 hearing date until Sept. 15.

Uhf test contract signed

New York City Mayor Robert Wagner and FCC Commissioner Robert E. Lee signed contract Friday (July 14) authorizing city to operate experimental uhf tv station in New York under control of federal government.

Government will reimburse city for costs--estimated at $100,000--of operating ch. 31 WUHF (TV) as part of FCC's $2 million uhf experiment. Contract runs from November to summer of 1962. WUHF will duplicate programs of existing New York uhf stations during certain hours specified by FCC. Rest of time, city will be free to broadcast its own programming.

Coordinated Marketing sets radio spot drive

Coordinated Marketing Agency Inc., N.Y., will begin saturation radio spot campaign involving several million dollars of advertising billings on behalf of nine food companies and retailers beginning end of August, primarily in New York and East Coast markets, officials said Friday. All types of spots--from 10 to 60 seconds will be included. Campaigning will stress institutional character of firms, which formerly billed almost exclusively in newspapers and point-of-sale. Included are such concerns as Dugan Bros. Inc. (bakeries), Daich-Shapow stores, Ehlers coffee and Dorman's Endeco cheese, all New York.

Lester L. Wolff, president of agency, believes that because radio is low-cost medium which reaches selected audience with great frequency, it is primary medium for food retailers and food firms building company images. His agency reportedly has increased its broadcast billings from $2 million last year to about $8 million this year.

AFTRA meets July 20-24

American Federation of Television & Radio Artists will hold its 24th annual convention in Detroit Thursday through Saturday (July 20-24). Important item on agenda will be proposals for national phonograph recording code to replace one expiring Dec. 31.

MGM's net earnings up 29%, it's reported

MGM's consolidated net earnings rose 29% in 40 weeks ended June 8 to $9,442,000 from $7,317,000 in corresponding period previous year, film company reported to its stockholders July 14 (Friday).

During that period gross revenues from tv increased $3,642,000, from $10,907,000 last year to $14,549,000 this year. Net income from tv rose $225,000, from $7,536,000 in 1960 to $7,761,000 in 1961.

Gross tv income for current fiscal period includes $8,869,000 and $9,015,000, respectively, for licensing of feature films and shorts to tv stations and $5,860,000 and $1,892,000, respectively--
Sylvester L. (Pat) Weaver Jr., who as head of NBC helped chart television programming in early 1950’s, returns to tv as president of M-E Productions, tv-radio division of Interpublic Inc. C. Terence Clyne, chairman of M-E Productions, and J. L. Van Volkenburg, president, resign in reorganization. Harold Graham Jr. promoted to executive vice president. (For details and biographical material, see story page 34.)

Robert W. Breckner, vp and general manager KTTV (TV) Los Angeles, elected to board of Times-Mirror Broadcasting Co., owner of station. Joining KTTV in 1948, as station was ready to go on air, as film director. Mr. Breckner was successively operations director; director; sports and special events director; assistant program director and, in 1952, program director. He became vp in charge of programming in June 1955 and was appointed general manager in February 1960.

David J. Mahoney Jr., president of Good Humor Corp, and long-time radio advertising enthusiast, elected executive vp of Colgate-Palmolive Co. He will be responsible for operation of household products, toilet articles and associated products divisions. Mr. Mahoney began his career in 1946 as $25-per-week mail clerk at Ruthrauff & Ryan agency and when he left five years later, to open agency bearing his name, he was vp, making $25,000 annually. His agency handled many broadcast-oriented advertisers, was billing some $2 million when it was sold to MacManus, John & Adams in 1956. At age of 32, Mr. Mahoney became president of Good Humor; its sales increased 35% under his administration.

Thomas S. Murphy, vp and general manager of Capital Cities Broadcast-ing’s WTCN (TV) and WROW Albany, N. Y., appointed executive vp of Capital Cities. Prior to joining Albany stations in 1957, when Capital Cities was founded, Mr. Murphy was director of new products, Lever Bros.’ Pepsodent division. He is member of advisory board, CBS-TV Affiliates Assn.

Richard D. Heffner, who has served as consultant to John F. White, president of National Educational Television & Radio Center, N. Y., in negotiations for establishment of NET outlet in New York, named acting general manager of new Educational Television for Metropolitan Area Inc. He will be in charge of group’s telecasts on ch. 13 in New York, which ETMA has purchased, subject to FCC approval. Mr. Heffner is on leave of absence as director of special projects, CBS-TV. His tv career began in 1956 as producer-moderator of multi-award-winning Open Mind series on NBC-TV.

Raymond E. Guth, program director for WOC-AM FM TV Davenport, Iowa, appointed general manager, according to D. D. Palmer, recently named president of Palmer Enterprises (Broadcasting, July 3). Mr. Guth was also elected to boards of Tri-City Broadcasting Co. and Central Broadcasting Co., operators of WOC-AM-FM-TV Davenport and WHO-AM FM-TV Des Moines, respectively. Prior to his association with WOC, he was program director of WSUI Iowa City and news-caster for KXIC also that city.

William C. Ackerman, director of special projects for CBS News and executive director of CBS Foundation, named special assistant to Philip H. Coombs, Assistant Secretary of State for Educational and Cultural Affairs. Julius E. Brauner takes over Foundation post in addition to his responsibilities as secretary and general attorney of CBS Inc. Mr. Ackerman, with CBS since 1940, took up State Dept. duties July 12. His successor at CBS News has not been named.

Everett H. Erlick, vp in radio-television department of Young & Rubicam, New York, elected vp and general counsel of AB-PT Inc. Mr. Erlick will be in charge of legal and business affairs of AB-PT and its divisions. He will report to Leonard H. Goldenson, president of AB-PT, and to Simon B. Siegel, financial vp. Jerome B. Golden continues as AB-PT vp and secretary. Mr. Erlick joined Y&R’s legal staff in 1951, after three years with New York law firm of Engel, Judge & Miller. In 1955 he became associate media director and was appointed vp in media in 1958, later transferring to radio-television department.

W. N. D. A. D. S. O. N., formerly vp and general manager of WNBCA MFM TV New York, appointed vp of newly-formed station representative company, Advertising Time Sales Inc., N.Y. He had been with NBC continuously since 1952, serving as eastern sales manager of NBC Radio Spot Sales, National Radio Spot Sales manager, assistant general manager of WRC-AM-FM-TV (now WNBC-AM-FM-TV) and general manager of stations in 1956. From 1949-1952, Mr. Davidson was salesmen for Free & Peters (now Peters, Griffin, Woodward, N.Y.). Earlier he had been with ABC’s station relations department and with Benton & Bowles, N.Y., and J. Walter Thompson, N.Y., as timebuyer.

For other personnel changes of the week see FATES & FORTUNES

Radio station profit

Typical radio station took in total revenues of $110,200 in 1960, and spent $101,800 on expenses, leaving profit before federal income tax of $8,400. Local advertising accounted for 85% of time sales; national and regional advertisers, 14%, and networks zero. These figures are from NAB’s financial report on radio. (See page 66 for complete story and tv typical station figures.)

BROADCASTING, July 17, 1961
A MARKET WITH MONEY IN IT

WIBW-TV IS
Television in that market.

The WIBW-TV signal—the only signal that really reaches over 323,400 TV homes*—talks to a market with over 1½ billion dollars to spend each year. A market that is unique for its closely related agricultural-industrial complex, an economy that assures steady year-round spending ... by people with real money to spend. These people look to WIBW-TV for the best in news and entertainment, because WIBW-TV with its single-station impact gives them the best of CBS-NBC-ABC all day.

JULY

July 16-18—South Carolina Assn. of Broadcasters, summer convention, Ocean Forest Hotel, Myrtle Beach. Speakers include FCC Commissioner Robert T. Bartley and Howard G. Cowgill, former chief of the FCC Broadcast Bureau.

July 24—Deadline for submission of briefs to the FCC in Boston ch. 5 re-evaluation. This is the proceeding to reconsider the license grant to WHDH Inc., due to ex parte contacts made by principals of WHDH Inc. and Massachusetts Bay Telecasters Inc. The third applicant is Greater Boston Television Corp. Reply comments are due 10 days after July 24. Oral argument before the FCC en banc is scheduled, but no date has been set.

July 30-Aug. 5—American Women in Radio & Television, first mid-career seminar, Syracuse, N. Y.

*July 31—Comments due on FCC rule change regarding broadcast announcement of financial interest held by station management or employees in products or services promoted on air (plugola).

AUGUST

Aug. 1-4—Advertising Age Summer Workshop on creativity in advertising, Palm House, Chicago. Participants include Norman (Pete) Cash, TVB; Marion Harper Jr., Interpublic Inc.; Leo Burnett, Leo Burnett Inc.; Fairfax M. Cone, Foote, Cone & Belding; Edgar Kobak, management consultant.

Aug. 6-8—Georgia Assn. of Broadcasters, annual summer convention. Speakers include Frank Fletcher, immediate past president of Federal Communications Bar Assn. King & Prince Hotel, St. Simons Island.

Aug. 7-11—American Bar Assn., 84th annual meeting, 15 principal hotels and Kiel Auditorium, St. Louis. To be addressed by President Kennedy and numerous other top government officials, including special presidical assistant James M. Landis and chairman of "Big 3" regulatory agencies, including FCC and FTC.

Aug. 11-12—Texas Associated Press Broadcasters Assn., fourteenth annual meeting. Hotel Lincoln, Odessa, Tex.

*Aug. 15—Reply comments due on FCC rule change requiring broadcast announcement of financial interest held by station management in products or services promoted on air (plugola).

SEPTEMBER

*Sept. 5—Comments due on FCC inquiry and notice of proposed rulemaking changing fm spectrum and looking into duplication of am-fm programming.

*Sept. 7—Comments due on FCC's reopened option-time rulemaking. Reply comments will not be accepted.

*Sept. 7—Deadline for comments on FCC rulemaking on revised program forms required with all broadcast applications.

*Sept. 7—Comments on FCC rulemaking imposing new log-keeping methods and stipulating three-year maintenance of logs due.

Sept. 11—Affiliated Advertising Agencies Network 17th annual international meeting. Sheraton-Blackstone Hotel, Chicago.

*Sept. 15—Deadline for comments on FCC proposal to grant rate increases to AT&T and Western Union for leased-line telegraph services.

*Sept. 15—Comments due on proposed FCC rulemaking limiting grants of vhf translator stations only to those which would cover unserved areas rather than simply extend an existing station's coverage area.

Sept. 21-23—Advertising Federation of America, 68th district convention. Hotel Madison, Madison, Wis.

Sept. 24-26—Louisiana Assn. of Broadcasters, annual convention. Bueno Vista Beach Hotel & Motel, Biloxi, Miss.

*Sept. 28—Oral argument on FCC's option time rulemaking, Washington, D. C.

OCTOBER

Oct. 3-4—Advertising Research Foundation conference, Hotel Commodore, New York City.

*Oct. 5—Reply comments due on FCC inquiry and notice of proposed rulemaking changing fm spectrum and looking into duplication of am-fm programming.

Oct. 8-18—International seminar on instructional television, sponsored by Purdue U. in cooperation with UNESCO and the U.S. National Commission for UNESCO. Dr. Warren F. Seibert, Purdue professor, is seminar director; James K. Hepler, WGN Radio-Television Unit, is associate director. Purdue U., Lafayette, Ind.

Oct. 12—Seventh Wisconsin FM Station Clinic, Center Building, U. of Wisconsin, Madison.

You can quote me...

"RCA Victor distributors tell me they select the WLW Television Stations to advertise RCA Victor Color sets because they're among the colorcasting leaders in the nation . . . with their Color TV engineering skills, wonderful Color programming, and Color selling power."

Jack M. Williams, Vice Pres. Advertising and Sales Promotion RCA Sales Corporation

Call your WLW Representative . . . you'll be glad you did!
It's quality all the way at "Communication Center" where everything is new and incorporates the very latest advancements in the industry. A good example is our film and slide projection system—designed especially for television. Five new combination motion picture and slide projectors feature a continuous motion process, and accommodate color or black and white. All films and commercials are stored in humidity controlled dust-free cabinets and bins.

Not a thing has been overlooked in giving the advertiser more for his money on WFAA-TV...including a big free-spending audience. And we're eager to deliver them to you!
With the annexation of the Tampa Industrial Park and Port Tampa areas — Tampa’s population jumped to 294,500, topping Miami corporate limits by more than 6,000 — and far ahead of Jacksonville!

Cash in! Spot your product on WFLA-TV — your best buy in Florida’s biggest city! And remember — you get 28 county coverage, too!

**WAVE-TV sells 28.8% more Soft Drinks and Confections**
— to 28.8% more men, women, teenagers and children!

That’s because WAVE-TV has 28.8% more viewers, from sign-on to sign-off, in any average week. Source: N.S.I., Dec., 1960.

**OPEN MIKE**

**Editorial coverage**

**Editor:** A few minutes ago I read your editorial on censorship (EDITORIALS, July 10). I read this aloud to Joe Smiley, WDAE president, and we discussed the wonderful week-by-week coverage in an editorial way that you have given for the benefit of broadcasters and the general public since Mr. Minow’s famous speech at the convention.

In discussing this with other broadcasters, I find unanimous appreciation of your effort in fighting for our and the public’s interests. I want to thank you, and I think every broadcaster owes you a great debt for the work that Broadcasting is doing. This industry is certainly fortunate to have a trade magazine of such independence and unquestioned integrity that it can speak out and be heard. . . . —L. S. Mitchell, General Manager, WDAE-AM-FM Tampa, Fla.

**Space editorial**

**Editor:** Congratulations on your fine editorial, “Dawdling with survival” (EDITORIALS, July 3). It was one of your usual masterpieces.—Gordon McLendon, President, McLendon Stations, Dallas.

**Etv in Milwaukee**

**Editor:** . . . Your article, “Airborne group refuses WXIX-TV’s etv offer, contains one rather serious error. It indicates erroneously that there is no source of etv programming in Milwaukee.

Milwaukee has had an educational television station since Oct. 28, 1957—WMVS-TV (ch. 10) and will have a second (on uhf ch. 36) within a year.

WMVS-TV is one of several stations in six mid-western states exploring the possibilities of establishing a six-state regional etv network. . . .—Otto F. Schlaak, Station Manager, WMVS-TV Milwaukee.

**Watch out for Lenny**

**Editor:** . . . In 14 years of watching commercials for assorted products . . . I have yet to see a new creative idea. It seems that one agency came up with a format and the others, not wanting to think too hard, adopt the attitude, “If it’s good enough for them, it’s good enough for us.”

I run a small one-man shop for a hard core of 20 advertisers. My billings do not run into the millions . . . but I am proud that my clientele are loyal. I do not create fancy productions . . . I write my own copy, do my own leg—
WPEN was the first radio station in Philadelphia to editorialize on the air. We started two years ago . . . and we are delighted to welcome other local stations who are now following our lead. Editorials on various subjects are broadcast nine times daily. We are not afraid to stand up and be counted on the vital issues of the day. The origination of this fighting policy by WPEN and its tremendous acceptance is further evidence that Philadelphia looks to WPEN for radio leadership.
GREATEST AGENCY CONTEST IN RADIO HISTORY!
HUNDREDS OF PRIZES FOR A SIX WORD SLOGAN

FIRST PRIZE
2 round trip first class tickets from New York to Rio de Janiero via Varig Jet.

3 SECOND PRIZES
A seven day Caribbean Cruise on the S.S. Nassau. (two tickets to each winner). Choose your own vacation days.

10 THIRD PRIZES
Ten magnificent Webcor Tape Recorders.

50 FOURTH PRIZES
Fifty FM clock Receivers

50 FIFTH PRIZES
Fifty alarm-clock radios.

NOW WVNJ will be FM as well as AM

As of now WVNJ is no longer AM only, but FM too!

To crystallize this larger image we want a six word slogan. Come up with the winning slogan and you’ll be one of the highest priced copywriters in history because you’ll be getting almost $300 per word.

We have no preconceived notions. We’re wide open for ideas. All we want is something nice and simple that tells you—one of the decision-makers in your agency—that WVNJ, with FM added at no extra cost, is an even better buy than it was before.

So put on your thinking caps and go to work. Even if you don’t win the Grand Prize, you’ve got a chance at hundreds of others in this greatest agency contest in radio history.

RULES: Create any six-word slogan. Send it with your name and Company’s name to WVNJ, Newark, New Jersey. Submit as many slogans as you like. We can’t return any "masterpieces" but, we guarantee they’ll all be read carefully by the judges, whose decision, of course, will be final.

Winners will be announced sometime in September. Contest is open to any agency man or national advertising manager in America excepting WVNJ’s own agency and the members of its station’s staff.

WVNJ
NEWARK, N. J. – COVERING GREATER METROPOLITAN NEW YORK

RADIO STATION OF The Newark News
work and am in constant touch with my clients at all times.

I am now in the process of expanding, and all I can say is, "Madison Avenue, watch out; here comes Lenny Kahn!"—Lenny Kahn, Cleveland.

Optimistic

EDITOR: . . . I hope your readers will be able to get some use from our positive approach to the weather. "Partly cloudy," says the official weather forecast, WSTV-TV weatherman charge it to "partly sunny." . . . Here at ch. 9 it is just a different way of stating a fact. Viewer reaction is great . . . George Wilson, Promotion-Publicity Director, WSTV-TV Steubenville, Ohio.

BOOK NOTES

Rev. Parker feels it is a clergyman’s duty these days to spread his religious influence far beyond his own congregation through the effective use of tv. In his manual he deals with the technical aspects of the medium as well as with program content and presentation.

The minister (United Church of Christ) also discusses the regulatory aspects of tv with some judicious bouquets to the FCC, which he says “has failed dismally to enforce the Communications Act in the interest of the public.” Some commissioners, he claims, “have been shown to have all-too-intimate relationships with licensees and industry representatives.”

As a partial solution, Rev. Parker insists all congressmen on communications subcommittees should divest themselves of all broadcasting stock. He further calls for the licensing of networks, divestiture of advertisers and agencies from the power to control program content, anti-trafficking regulations, and expansion of educational tv to a network with coverage equal to that of the largest commercial network.

Program codes, either voluntary or government-imposed, come under Rev. Parker’s fire: “A code that was rigidly enforced would make the same prohibition concerning violence in Macbeth that it would on violence in Have Gun, Will Travel.” The only way to protect the public from salacious, immoral conduct on tv is through honesty and moral uprightness in the producer, he states. “The producer with artistic integrity can and will discriminate without a code. The irresponsible producer will ignore the code or sink around it.”

National Rep.: John Blair & Co.
Advertising’s challenge of ‘believability’ must and can be won

The following has been excerpted by Broadcasting from a talk made earlier this year by Mr. Matthews before the Junior Assn. of Commerce & Industry in Chicago.

The headlines in our business news journals for the past year or more have spelled out the story of professional and public concern about the state of advertising ethics.

And investigations of television programming and commercials have proven to be such a fascinating new field—with so much publicity value—that I doubt if ambitious bureaucrats and congressmen will let them rest for quite some time.

In my opinion, advertising never before has been so much in the public eye, so much discussed, so much criticized, so much maligned as it is today. Hardly an agency or advertiser or media group meets without a discussion of ethics on the agenda.

Climate Actually Improved • But I do not believe that misleading advertising is any more of a problem today than it was 10 years ago, 20 years ago or 40 years ago. In fact it may be relatively much less prevalent today.

During television’s trying days of the quiz scandal and even today, it seems to agency people that the competitive media have piled on and milked the subject for their own competitive advantage.

Putting the shoe on the other foot, the question has been asked why do editors who criticize certain tv advertising copy accept that same advertising copy in their columns? And, are all those letters to the lovelorn column actually written by readers, or do some come from the fertile imagination of the columnists?

Tv broadcasters also can point out that some products which are advertised in the print media would never be acceptable for use in television commercials.

No Apology • It is not my desire to excuse the television medium and the television advertisers for the mistakes they have made. My point is that truth and taste in advertising are problems in all media and no one medium can stand in front of its glass house and throw stones at another.

I share the feeling that too many of them seem intent on piling it on a competitive medium during its travails and the result may be to fan the flames so high that the entire advertising industry will be faced with unnecessary and undesirable governmental restriction and regulation. Perhaps a slightly larger number have fallen into exaggerated claims in product areas where there is little actual product difference and where perhaps the public believes there is little or none. Most people who really have studied the subject agree that there actually is very little outright false or purposely dishonest advertising.

The Federal Trade Commission says that “probably less than half of one percent of all advertising last year was really bad from the standpoint of the public interest.”

Question of Taste • Another spokesman has said that the majority of letters to the FTC do not object so much to dishonesty in advertising as to “blatancy and bad taste, to exaggeration and a seeming disregard of human feelings and sensitivity.” So the problem actually comes down to taste rather than truth, although I will readily concede that the line between truth and exaggeration is often a thin one.

Every business has its crooks and if these crooks decide to advertise their products, they will most likely practice dishonesty in advertising too. The same people who practice dishonest advertising are the ones who in all probability are guilty of producing inferior products, paying illegal allowances to retailers, paying kickbacks to their crooked counterparts in labor unions and cheating on their taxes.

This element is with us in all fields of human endeavor and there is no reason to expect that advertising can avoid them, although we want to do everything we can to prevent them from falsely advertising their products.

Ad Sins Are Public • I’d like to quote Leo Burnett relative to this subject. He has said:

“Good advertising speeds the process of getting a good product accepted, a poor one dumped. It communicates ideas about products and services more efficiently than any other device or technique ever has. It is corrective of its own abuses, because it makes all of its mistakes in public.

“It is more moral and ethical than the sum total of business, because the nasty little people on the low and shady side of the business can’t and don’t employ it—at least for very long.”

The result of years of product claim and counterclaim, exaggeration and puffery, capped now by the criticism of television, is a public that has become skeptical.

It is small wonder that ‘believability’ has become the most sought after quality that responsible advertising people are seeking these days and one of the most difficult things to achieve.

The problem is accentuated by the growing competition of advertising volume in the marketplace and the rising cost of media itself. And the beleaguered consumer, who already is exposed to more than 1,500 advertising impressions each day, will be hit by an even greater number in the future.

Progress Possible • We can, however, make some real progress in the area of believability. At the Burnett agency we believe that all good advertising is believable. In the ‘inherent drama of the product’ there always are certain basic, honest facts about the product and what it does for the consumer.

Transmit these facts to the public in a visible, believable way and you have made a sale, served and satisfied a customer and strengthened just that much the future of our free enterprise business system.
WHAT WILL A BAHT BUY? When Thailand was Siam and ticals were “tender,” there were thousands of these three-headed elephants in Bangkok. But as times changed, these elephant coins disappeared and Bangkokians began buying with bahts. In Thailand, the natives can tell you, but, if you want to know what a baht buys in Baltimore, WBAL-Radio has the answer. Complete Coverage, that Thailand umbrellas can’t provide—WBAL-Radio covers the entire metropolitan area plus 37 surrounding counties in Maryland and four adjacent states. A Trunk Full of Listeners that even a herd of elephants couldn’t produce—WBAL-Radio is DOMINANT in the market, providing more unduplicated coverage than any other station. Full Range Programming and Music for Mature Minds—a distinctive combination that’s hard to match even by Siamese standards. If you want to keep your sales riding high, bring your bahts to Baltimore—and buy WBAL-Radio!

WBAL-RADIO BALTIMORE® Maryland’s only 50,000 watt station
Associated with WBAL FM & TV / Nationally represented by Broadcasting, July 17, 1961
The test site shown represents a unique facility to provide you with the most accurate possible arrangement of coverage pattern for your particular area. Nearly two miles across the valley (see cross section) is the transmitter used for testing. Computer facilities housed nearby make it possible to supply you with an antenna with fixed power distribution and phase relationship between sections, to achieve an optimum vertical null fill-in and beam tilt.

The two section antennas have gain of 9.4 (approximate), which is suitable for 50 kw transmitters at 42 kw out with 80% line efficiency. The three section antennas have power gain of 14.1 (approximate), for use with 30 kw transmitters at 28 kw out with 80% line efficiency. On channels where the gain is 14.4, up to 800 feet of 6½" line will permit maximum authorized power with a 25 kw transmitter.
for any channel from 7 to 13

15 new General Electric helical antenna combinations assure near optimum electrical characteristics in any transmission area with gain from 4.5 to 4.8 per bay. Two section antennas have approximate gain of 9.4; three section antennas have approximate gain of 14.1.

The facts speak for themselves, and General Electric VHF helical antennas also provide these additional advantages: (1) fewer feed points and feed lines greatly reduce air leak and coupling problems (2) another antenna often can be "piggy-backed" on the helical, so two or more stations can use the same tower (3) feed lines inside mast protected from weather, shielded from RF field (4) helical can be sectionalized for emergency operation (5) no separate heating elements for de-icing; using helix as own de-icer takes less power (6) no feed lines smaller than 3½" diameter — rugged, durable with high load capacity (7) structurally rigid, withstands winds to 112 miles per hour; resists shifting of feed lines, eliminates pattern fluctuations in winds.

Well, what kind of a trend has it been?

It's been, first, a trend to first place.* To the largest share of the viewing audience where it counts most. From October to June, in the markets where they can watch all 3 networks, they watched ABC-TV most.*

It's been a trend to new successes in new programming. My Three Sons and The Flintstones, for example, have continually hit the top ten. And such established trends as The Untouchables, 77 Sunset Strip, The Real McCoy, have kept trending right along.

It's been a trend to a new trend in public service series. Witness the acclaim for Sir Winston Churchill: The Valiant Years, Close-Up, Expedition. And a new trend in news reporting: ABC-TV News Final.

It's been a trend to sports leadership ... with Fight of the Week, NCAA and American League Football, College Basketball, All Star Golf, ABC-TV Wide World of Sports.

It's been a trend to the most tangible kind of sponsor enthusiasm—a 20% jump in billings for the first quarter of '61, a figure far in excess of the industry pattern.

It's been a trend to new affiliate successes.† In Portland, Ore., Seattle-Tacoma, Salt Lake City, Boston, Milwaukee, after affiliate switches to ABC-TV, average evening audience shares soared as much as 52%.

It's been, in summary, that happiest of trends—an uptrend. A direction in which, it should be noted, we have every programming intention (Top Cat, The New Breed, Target: The Corruptors, Calvin and the Colonel) of continuing.

ABC Television

Film syndication is fast becoming predominantly a network hand-me-down proposition. It may be the hottest second-hand business in history.

Former network series being released to stations on a syndication basis this year already outnumber new first-run syndicated series by approximately four to one—and the margin almost certainly will widen before the year is out.

The reports from NBC Films last week that Groucho Marx Show had been sold to 18 stations for a total of about $1.5 million and from Official Films that Peter Gunn had been sold to 10 major markets during the first week of selling underline a growing trend in the beleagured tv film syndication business: there’s a receptive market at tv stations for so-called off-network programs with star names that have proved popular during their cycles on NBC-TV, CBS-TV or ABC-TV.

Off-network programs have been released to local stations from the earliest days of television, but the quantity has never approached “the flood of 1961,” according to one tv film executive. Including such very recent entries as Wyatt Earp, Peter Gunn, Groucho Marx and One Step Beyond, 23 off-network programs have been placed into syndication during the first six months of 1961 alone. Only seven such shows were offered during all of 1960.

**Ray Of Hope** • The programs represent a bright ray of hope for many of the tv syndicators, whose businesses have suffered in recent years because of the decline of sales of programs to stations caused by high costs in producing and distributing syndicated tv film shows and the scarcity of prime time evening slots on many stations, attributed to a more extensive use of network programs. Some syndicators observed that the depression status of syndication over the past two or three years has helped create a favorable climate for acceptance of off-network programs by stations and cited these reasons:

- The yearly drop in production of first-run series for syndication (from a high of 29 in 1956 to a low of 6 for this coming season) has resulted in a scarcity of film programs for many stations and a consequent receptivity to proven network properties. Even reruns of syndicated shows, in many instances, have been worn thin by repeated usage.

- The feature film libraries have been “used up” by many stations and these time periods can be filled by off-network shows of the one-hour type.

- Many stations find off-network properties more satisfactory than first-run, even if the latter were available, because the price generally runs about one-third lower. The programs already have a track record and can be promoted more easily.

- Such programs need not be placed in prime time, though some are so slotted on stations, but because of their price can be scheduled in the early evening periods (5 p.m.-7 p.m.) or as daytime strips when their evening exposure has ended. By contrast, a higher investment in first-run syndicated programs dictates that they be placed in scarce time in order to obtain “top dollars” from advertisers.

- Off-network shows are “easier” sales than first-run, syndicators claim, thus shaving their selling expenses.

- The producer and distributor have recouped all, or a large part, of their investment during the network exposure of the program and require a comparatively few sales to compensate for residual talent fees and other expenses (a consensus seems to be 35 markets on an off-network show can return a profit).

The striking upsurge in release of off-network programs in 1961, as compared with 1960, can be gauged by the following information provided by leading tv film distributors:

During 1960, seven such series were released, totalling 423 half-hours. Screen Gems has issued three—49 episodes of Circus Boy, 113 of Wild Bill Hickok and 37 of Tightrope. MCA-TV placed 117 half-hours of M Squad, ZIV-UA 39 episodes of Rough Riders; Independent Television Corp., 72 segments of Broken Arrow and ABC Films 36 programs of High Road. An indication of the sales appeal of these programs: virtually all have been sold in more than 50 markets and Circus Boy and Tightrope are set for 141 and 153 markets respectively.

In contrast, during the first six months of 1961, 23 off-network series were pushed out into the marketplace: 1,528 half-hours and 146 hours.

Indications are strong that the floodgates will open for other companies that have not as yet released their programs. MGM-TV officials said they probably will place 72 episodes of The Thin Man
EX-NETWORK SHOWS IN BIG DEMAND

and 26 half-hours of Northwest Passage (both were on NBC-TV) into syndication shortly. Some station officials report that both Four Star Productions and Desilu Productions are sounding out the market for release of some of their series that have concluded their network runs.

It is too early to give a definitive sales rundown on programs released this year that have been sold to 21 stations for total revenue of $70,000. Perhaps even more striking was an announcement last week from Official Films: in the first week of selling Peter Gunn, Mr. Lucky and Yancy Derringer racked up sales of more than $1 million to 10 stations, including WNEW-TV New York, KTAL (TV) Los Angeles and WGN-TV Chicago.

Economic Conditions • Seymour Reed, president of Official Films, stressed that stations always have realized the value of off-network programs. He agreed that present economic conditions in tv film syndication have accentuated sharply a practice that has existed from the early 1950's.

Official, he noted, probably has the largest group of both new and old off-network programs with such veteran series as My Little Margie, Robin Hood and Foreign Intrigue (issued under various other titles) still making the rounds after six or seven years. Mr. Reed made a salient observation on the use of more recent off-network shows: at the outset, they will not lend themselves to daytime or early evening "stripping" because of higher talent costs, but after several runs on a once-a-week basis, they will be slotted across-the-board.

Howard Anderson, vice president and sales supervisor of ABC Films, believes these programs will find themselves in prime time on many stations because "their quality often is higher than first-run syndicated programs." He noted that all network shows are not suitable for eventual release to stations, guessing that "perhaps one in 20 can make the grade." The likely candidates are the ones that have earned a "track record" during their network run and are assured of sales in the top two or three markets, thus recouping talent costs (Screen Actors Guild requirements provide for a performer receiving a percentage of the minimum fee for a country-wide use of the program, ranging downward to 20 percent for the sixth and cut-off run; star performers work out an arrangement with the producer for use of the program in perpetuity).

Many CBS Programs • CBS Films has been active in off-network syndication since 1951, starting with Amos 'N' Andy which is still making the rounds. Its off-network roster includes such stalwarts as Our Miss Brooks (1957), Mama (1957), Life With Father (1955), Phil Silvers Show (1958) and The Honeymooners (1956).

After three years on NBC-TV, "Peter Gunn" series is being sold to local stations and was snatched up by 10 outlets in the first week of release.

BROADCAST ADVERTISING

'61 toy tv totals may pass $15 million

Ideal Toy Corp., New York, appears likely to be the highest television spender in the toy field this year, according to a Broadcasting spot check of toy advertiser activity.

It was confirmed last week that Ideal plans half-sponsorship of Maverick on ABC-TV next fall, a move that will bring the company's 1961 tv expenditure to around $3.5 million, as against more than $650,000 in 1960. Thus Ideal would appear to jump ahead of last year's leader, Mattel Inc., Hawthorne, Calif., which plans a $3-million campaign in 1961.

In addition to toy makers and agencies, Broadcasting checked officials of the Toy Guidance Council and Toy Mfrs. of the U.S.A. The latter organization estimated the 10-12 major toy companies in the country will spend at least $15 million in tv this year—two-thirds of it in the fall-to-Christmas season.

And, TMUSA predicted, 1962 will see many toy companies that manufacture summer items (outdoor pools, swings, etc.) using summer tv, making that season a close second to the fall as an active time for toy advertising.

Experiment Result • Ideal's 13-week half-sponsorship of Maverick, which is moving this fall to a new ABC-TV time slot (6:30-7:30 p.m. NYT), grew out of an experiment in prime-time effectiveness conducted by the toy firm last season.

Ideal placed spot tv orders for prime-time exposure for its ITC Model Craft lines, a series of adult hobby construction kits. The hobby sets' sales doubled as a result of the campaign and represented 12% of Ideal's gross by the end of the year. Demand for Model Craft was so great the toy manufacturer decided to use adult network programming for its hobby kits in 1961.

Returning to the ranks of network

They must like People's Choice in New York; this former network series has been sold for its ninth run in the nation's first market.

(see separate story for complete list), but those that were offered in early spring already have compiled attractive records. For example MCA-TV reports that Riverboat, Overland Trail and Clinarron City already have been sold in more than 60 markets each and CBS Films Inc. points out that December Bride, in distribution for two months,
James T. Victory, general sales manager of CBS Films, pointed out that stations often buy three or four series at a time, but he emphasized they are offered individually and are not sold as a package. He ascribes the continued popularity of off-network programs to the “tremendous built-in audiences that already know the show.”

An official of ITC provided some piquant statistics about its Susie program. Presented originally as Private Secretary on CBS-TV for three years, the program has brought in almost $4 million to ITC in domestic and foreign sales in the past five years. It is being shown for the 13th time in Washington, D. C.; the 10th time in Chicago, and is set for 7th and 9th runs in New York, Baltimore, Detroit, Nashville, New Orleans and St. Louis. It has been dubbed in French, Spanish and Portuguese and subtitled in other languages and has been seen in 37 countries outside of the U. S.

The attitude of many stations toward these properties was summarized by Herb Jacobs, president of TV Stations Inc., which buys film programs on behalf of more than 100 tv stations throughout the country. Mr. Jacobs indicated strongly there is a place for off-network properties on many tv outlets because the programs are a “well-known commodity” and can obtain good ratings; are actually first-run in many markets; can hold an audience even in larger markets because many viewers didn’t “catch” them the first time around. He noted that programs with three or four years production are “more valuable” because they provide stations with a continuity of programs. Mr. Jacobs believes that revenue accruing from sales of off-network programs will help syndicators during this period of depression and help them to prepare for production of first-run syndication programs in a year or two.

Korn Speaks For Independents • Ben-net H. Korn, executive vice president of the Metropolitan Broadcasting Div. of MetroMedia Inc., New York, summed up the view of many independent tv station operators when he said:

“Those of us who operate independent tv stations in major markets—and we are in New York and Washington, D. C.—need a quantity of programs, and they must compete with the network outlets and other independents. We find that off-networks, balanced with several first-run syndication series, can do the job very satisfactorily.

In many ways, an off-network can be superior to a first-run show because it is tried and true, while a first-run has to be ‘put into orbit’ and may not prove to be satisfactory. Our research shows there is a large audience which hasn’t seen each episode of a network program and which can catch it during the off-network presentation.”

CBS-TV presented “Amos ‘n’ Andy” on the network during 1951-52 and 1952-53, and the re-runs have been carried continuously on local tv stations since 1953, believed to be the “oldest” off-network show.

Shari Lewis, NBC-TV program hostess (Sat. 10-10:30 a.m. NYT) demonstrates American Doll & Toy’s Toodle-Loo.

CBS-TV sponsored after a five-year absence (except for the annual sponsorship of Macy’s Thanksgiving Day Parade on NBC-TV), Ideal has also signed with CBS-TV for 26 weeks of Mighty Mouse Playhouse (Sat., 10:30-11 a.m. NYT), beginning Sept. 16. In addition, Ideal has bought the Macy parade for another year and is dickering for a color show on NBC-TV.

The company will augment its network campaign with a heavy tv spot drive, bringing its total tv expenditure to around $3.5 million. Agency is Grey Adv., New York.

Doubled Budget • Mattel Inc., toyland’s second-ranking tv spender in 1961, has doubled its 1960 budget of $1.5 million. In addition to its year-round ABC-TV show, Matty’s Funday Funnies (Sun., 5-5:30 p.m. and Sat., 7-7:30 p.m., both NYT), Mattel will order a 13-week spot tv drive in 50 markets beginning in mid-September. Agency is Carson-Roberts, Los Angeles.

Louis Marx & Co., New York, plans a $2-million all-tv spot drive in the top 35 markets, for the 10 toys it is promoting on television this year. Marx, which spent only $475,000 last year, will use live commercials on local and syndicated kiddie shows from September through December. Agency is Ted Bates & Co., New York.

Remco Corp., Newark, N. J., in an all-out tv drive this fall, will spend just under $2 million in network and spot.

Bernard J. Schiff, president of Webb Assoc., New York, Remco’s agency, said the firm is ordering a 50-market spot campaign and three network shows —Shari Lewis (NBC-TV, Sat., 10-10:30 a.m. NYT); Captain Kangaroo (CBS-TV, Sat., 9:30-10:30 a.m. NYT) and Periscope, probable entry in ABC-
TV TOY TOTALS MAY PASS $15 MILLION continued

TV's 5-5:30 p.m. daily schedule.
Eldon Industries, Hawthorne, Calif., will place 3,600 tv commercials in 13 weeks in 24 markets this fall. The company is investing $1 million in the 3-month campaign placed through Guild, Bascom & Bonfigli, San Francisco.

Cincinnati Firm Uses Spot • Kenner Products Co., Cincinnati, plans to use $1 million worth of spot tv time in over 65 markets between Oct. 15 and Dec. 17. Leonard M. Sive Assoc., Cincinnati, Kenner's agency, will place 35-40 one-minute spots in each market bought for four product lines. Items to be featured include building sets, toy slide projectors, "Doozies" (plastic "funny faces"), and paint sets.

Kenner's give-a-show projector, which sells for $5, comes with 16 strips of well-known cartoon characters, including several in tv syndication now—Popeye, Yogi Bear, and Quick Draw McGraw, among others.

American Doll & Toy Corp., New York, will spend $650,000 with network and spot television on 275 stations in 145 U. S. cities this year.

In network, the toy firm will use The Shari Lewis Show (NBC-TV, Sat., 10-10:30 a.m. NYT) and Captain Kangaroo on CBS-TV (Sat., 9:30-10:30 a.m. NYT). The overall campaign, scheduled to run from Sept. 15 through Dec. 15, also includes a 42-market spot tv drive. Agency is Webb Assoc., New York

Lionel Over Double • Lionel Corp., New York, which spent over $290,000 in tv last year, reportedly will spend more than $650,000 in 1961. In addition to the Macy's Thanksgiving Day Parade on NBC-TV, the company will place spot campaigns on 75 stations in the U. S. and Canada. Aside from advertising its line of electric trains, Lionel this year enters the scientific toy field for the first time and will concentrate its spot tv efforts to promoting these products. Grey Adv., New York, is the agency.

The General Electric Co.'s radio receiver department will introduce a new line this fall—GE educational projects—consisting of seven kits of science projects for youngsters.

Commercials are being prepared by Young & Rubicam, New York, GE's radio receiver agency, for The General Electric Theatre (CBS-TV, Sun., 9-9:30 p.m. NYT), as well as for a spot drive in the top 20 U. S. markets. The more than half-million-dollar campaign will run from September to Christmas.

A. C. Gilbert Co., New Haven, Conn., has ordered $225,000 worth of participations in ABC-TV's 5-5:30 p.m. time slot from Nov. 6 to Dec. 20. Although not yet definite, the network will probably program Periscope, new show designed to appeal to the inquisitive youngster. Gilbert's agency, Banning Repplier Adv., Hampden, Conn., will place a total of 56 commercial minutes—about two spots per day.

A Gilbert spokesman noted Erector, one of America's best-known toys, will be advertised on tv this year for the first time in the product's 48-year history. The company projects a 10% increase in sales during Erector's promotion.

SHELL COMES BACK TO TV

Three-week spot-tv schedule set for 27 markets after several months of all print-media ads

Shell Oil Co., which this year has channeled all of its $15 million into consumer advertising into print, made a firm move back toward television last week. The oil company approved a three-week spot tv schedule of varying lengths to cover 27 markets across the country.

The campaign is slated July 21 to Aug. 14, and the spots will include ID’s, chain-break 20’s and some 60 seconds in length. They will be geared to a promotion contest that Shell is conducting in conjunction with its dealers. The contest features the giveaway of Snark-type sailboats to lucky contestants whose names will be drawn by chance.

A supplementary radio campaign began last week with 9 to 15 weeks of spots targeted mostly for southeastern and southwestern states, including Mississippi, Louisiana and Texas. Billings for all of the spots are through Ogilvy, Benson & Mather. This marks the first break in the agency’s resistance to the broadcasting media for Shell, whose consumer account it took over last fall.

Last month Shell announced it would sponsor 11 Sunday afternoon hours on CBS-TV devoted to a golf show. The oil company is still negotiating to sponsor on CBS-TV four hours of Leonard Bernstein’s Young People’s Concerts. Billings for both of these series come out of Kenyon & Eckhardt, which handles Shell’s institutional advertising account.

The timing of Shell’s move back to tv couldn’t have been worse for Charles T. Lipscomb Jr., president of the Bureau of Advertising of the American Newspaper Publishers Assn. In a speech before the summer convention of the Newspaper Advertising Executives Assn. held in Detroit last week, Mr. Lipscomb said the “Operation Friendship” program devised by his bureau as a promotion effort behind Shell’s newspaper ad campaign, has operated with success and “inspiring speed and smoothness.”

Vtr producers agree on exchange

Tv tape producers in three major markets have taken the first step to form a video tape production network to provide vtr service for clients anywhere in the country without the need for sending high-priced production people from one city to another. Video Tape Productions, New York, WFAA-TV Dallas, and International Video Tape, Beverly Hills, Calif., are the three founders of the vtr interchange service, which they believe will save substantial amounts for their clients. Each company will make available to the others its facilities for taping segments, inserts or even a complete production. Other affiliates, both in the U.S. and abroad, will be added as the call for service dictates. The three founding companies of the vtr service network all have equipment of the same standard type, including Marconi cameras, to insure top facilities at all three locations. This was said to be an underlying consideration in the formation of the affiliation.

New service

With this issue Broadcasting is offering a new service to its readers. Called “Commercials in Production” the new department (see page 34) will list new commercials for which advertisers or their agencies have signed contracts and which will be used in national or large regional broadcasting campaigns. Listings in the new department will include: Commercial producer, with his address; advertiser and product; length, number and type of commercial; name of production manager; agency, with agency account executive and agency production manager and the approximate cost of the commercial.

Commercial producers interested in being included in this new department should submit information promptly to any of the editorial offices of the magazine.

Radio’s ups and downs

Radio’s national spot billings dropped 7.9% during the first quarter of 1961 but snapped back during the second quarter and may wind up the first half of the year on a par with the first half of 1960, Lawrence Webb, managing director of Station Representatives Assn., reported last week.

He said first-quarter figures, compiled for SRA by Price Waterhouse & Co., put gross time sales at $40,324,000 against $43,805,000 for the first quarter of 1960. His report on the second-quarter comeback was based on preliminary estimates, which he said showed “considerable improvement.” The SRA figures, compiled quarterly by the New York accounting firm, are subject to revision upon release of the FCC’s official report for 1960 later this year.

CBS wants agencies to tout own horns

CBS Radio has offered some 100 top advertising agencies the opportunities to air their views on the role of advertising in the American society and economy. Fred Ruegg, CBS vice president, station administration, whose letters to the heads of the agencies invited them to express their thoughts on tape or disc in the form of one-minute messages, said “the project will go a long way towards achieving a better public image of the advertising profession.”

As a public service, CBS Radio will present the message 12 times each on all its seven owned-and-operated stations: WCBS New York, WBBM Chicago, WCAU Philadelphia, WEEI Boston, KMOX St. Louis, KCBS San Francisco and KNX Los Angeles.
“Charlotte’s WSOC-TV... merchandising ‘plus’ puts more sell into our campaigns” — McCowan, Henderson

When we are placing spot schedules on WSOC-TV, we know that we will reach the right audience for our products. And, WSOC-TV’s excellent merchandising support is a ‘plus’ factor that puts more ‘sell’ into our campaigns.”

BETTY McCOWAN
Henderson Advertising Agency, Inc.
Greenville, S. C.

Some things are not shown on rate cards. Important things like merchandising, for example. Schedules on WSOC-TV get the finest merchandising support in the Carolinas. Trade mailings, in-store displays when applicable, tie-in ads, product surveys if needed—other specialized support. Put your advertising schedule on WSOC-TV ... one of the great area stations of the nation. You'll see results!

WSOC and WSOC-TV are associated with WSB and WSB-TV, Atlanta, WHIO and WHIO-TV, Dayton

BROADCASTING, July 17, 1961
PAT WEAVER'S NEW M-E JOB
Will head M-E Productions and international operations as Clyne, Van Volkenburg resign

Sylvester L. (Pat) Weaver Jr. was catapulted back into the forefront of television programming last week in a surprise realignment of M-E Productions that also brought the departure of C. Terence Clyne and J. L. Van Volkenburg.

The three men are among the best known figures in television advertising and programming management. M-E Productions is the television and radio division of Interpublic Inc. (formerly McCann-Erickson).

Mr. Weaver, 52, who established himself as one of television's leading "creative" minds as chairman and president of NBC in the early 1950s, was named president of M-E Productions. He has been chairman of McCann-Erickson Corp. (International), which directs Interpublic's overseas offices in 22 countries, and also will continue in that role.

Harold Graham Jr., a senior vice president of M-E Productions, was promoted to executive vice president in the new setup.

The resignations of Mr. Clyne as chairman of M-E Productions and Mr. Van Volkenburg as president were said to be in line with wishes expressed by both men some time ago.

Marion Harper Jr., Interpublic president, said Mr. Clyne was retiring in keeping with "previously disclosed personal plans to leave the agency business in the fall of 1961," and that Mr. Van Volkenburg, who came out of retirement to take the M-E post in June 1960, had done so "with the understanding that at the end of approximately a year he would be able to return to his home in Florida."

Mr. Clyne was on vacation last week but agency authorities said both he and Mr. Van Volkenburg probably would remain with M-E for several weeks, while the new top-management team is in the process of taking over.

Big Question: Just what effect Mr. Weaver's move into the agency's top television post will have on the nature of its television activities was regarded as a speculative question, but observers agreed it could be far-reaching. M-E Productions is not currently active in the actual production of programs, but its organization specifically permits it to operate in this field and there was considerable speculation that in time it would do so, although inside sources doubted this would happen immediately.

Even without getting into production, Mr. Weaver's ability to influence programming through the selection of shows for Interpublic clients could be considerable: His division is responsible for close to $100 million in broadcast billing. In 1960 its tv billing alone was $89 million.

Without going into details, an Interpublic spokesman said that "changes will be made in M-E Productions."

Mr. Weaver is known as an innovator. At NBC he was credited with key roles in the development of the Today and Tonight shows, the Wide World format, the color spectaculars and, on the sales side, the so-called "magazine concept" which was the forerunner of the participation-sales pattern so widely used in network television today.

Some of his views were put on record two weeks ago. Testifying in the FCC's program hearing, he suggested

Commercials in production

Listings include new commercials being made for national or large regional radio or television campaigns. Appearing in sequence are name of advertiser, product, number, length and type of commercial, production manager, agency with its account executive and production manager, and approximate cost of commercial.

CBS Animations, 485 Madison, NYC
Lever Bros. (Good Luck Margarine), one 10 stop motion, film, Clem Stigdon prod. mgr. Agency: Ogilvy, Benson & Mather; Hal Burdick prod. mgr. Approx. cost $1,400.
Freberg Ltd., 7781 West Sunset Blvd., Hollywood
General Mills (Cheerios), six spots. Agency: Dancer-Fitzgerald-Sample.
Phoenix Studios Inc., 420 Lexington Ave., NYC
Raymond Scott Enterprises, 140 West 57th St., NYC
Skelton Studios, 1416 N. LaBrea Ave., Hollywood 21
The vested interest of an advertising agency is in the profits of its clients.

Today those profits are being squeezed by costs.

No advertising is as costly as advertising which doesn't work.

No advertising is as profitable as that which is persuasive enough to move even a hesitant prospect.

And the capacity of advertising to produce a profit depends— not alone on the dollars invested— but on the ability of the client to recognize and encourage the best work of the best agency he can find.
that networks had succumbed to the "Hollywood B picture" trend, said viewers "want to be sold on the better, not the worse," and took the position that the public "will respond to adult appeals, although not all the time." He also called attention to dramatic, music, opera, ballet and other so-called "quality" programs presented on NBC while he was there in various executive posts from 1949 to 1956, and described himself as optimistic about program improvement in the future (Broadcasting, July 3).

The Next Decade • Some Weaver enthusiasts who worked with him in his NBC days — many of whom are now in key positions there and elsewhere (see below) — saw in his latest assignment a chance to "help create the pattern of television programming for the next 10 years, just as he helped set the format for the first decade." Their reasoning was that current attacks on programming, particularly by the FCC and other government sources, require changes that probably will evolve during the next two years and that as head of television for one of the top four TV agencies he will be in a position to influence those changes materially.

Interpublic President Harper foresaw this and more. He said Mr. Weaver's new assignment, on top of his international post, reflects the agency's interest "in the growth and development of world-wide television, and the attainment of quality programming."

Other Interpublic sources said the reference to "world-wide telecasting" anticipated the use of television as an international advertising medium as soon as facilities are available. "We have a number of clients who use print advertising throughout the world," one official said. "Undoubtedly they will want to use television in the same way whenever that becomes feasible."

Mr. Weaver joined McCann in 1959 after serving as advertising and marketing consultant to Kaiser Industries following his departure from NBC in 1956. Before joining NBC he had been, before the age of 30, advertising manager of American Tobacco Co., under the late George Washington Hill. He also had been manager and later vice-president and director of the radio-television department of Young & Rubicam.

Mr. Clyne, his predecessor as M-E Productions head, has been in charge of television for Interpublic and its predecessor McCann-Erickson since 1954. Mr. Harper hailed this service as representing "one of the longest and most successful tenures of any agency television head," and also praised Mr. Clyne for "innumerable programming innovations for our clients."

'Lucy's' Developer • Mr. Clyne also has been vice chairman of McCann-Erickson, the major agency division of Interpublic, in addition to heading M-E Productions. Before moving to McCann he was with the Bow Agency, and among other accomplishments, he was credited with developing the long-running, top-rated I Love Lucy program.

For many years, first at Biow and subsequently at McCann, he was identified with the Bulova Watch account, which moved a few months ago to Sullivan, Stauffer, Colwell & Bayles. In 1948, while with Biow, he conceived and sold what was said to be the first "tv station identification." He entered broadcasting and advertising as an account executive with Free & Peters station representation firm (now Peters, Griffin, Woodward).

Although he has been quoted as saying he planned to retire at age 55 (he was 55 on March 22), and the announcement of his resignation referred to his "decision to retire," he was also quoted last week as saying he was considering "various other connections," starting next January. A representative doubted he would reach a decision immediately.

Mr. Van Volkenberg, for many years

---

**Where the 'Weaver Men' are today**

When Pat Weaver, the new head of M-E Productions (see above), was flying high and wide in television programming at NBC, he was surrounded by a group of assistants who became known as "Weaver Men." They've never completely lost that identification, although most of them have long since scattered to other jobs — many of them pivotal — in other networks or agencies.

Ten days ago one of them, Mort Werner, who had moved on to Young & Rubicam, was called back to NBC to become head of television programming (Broadcasting, July 10). Others of the group include Richard A. Pinkham, now senior vice-president in charge of broadcast operations for Ted Bates & Co.; Thomas A. McCavity, vice-president and television program supervisor for J. Walter Thompson Co.; Michael Dann, CBS-TV vice-president in charge of network programs, New York; Frederic W. Wile Jr., west coast manager of The Advertising Council, and — within Mr. Weaver's own parent organization — Matthew J. Culligan, general corporate executive of Interpublic Inc.
A “well-bred” SUCCESS story for WDAY-TV, Fargo!

Every afternoon from 4:00 to 5:00, the old Hayseed puts on a local live talent show called “Party Line” — breezy informal chatter that really wows the wimmin.

During one minute of one day, earlier this year, the chat was about the next day’s opening of a new Cox’s Bakery store — their eighth. Results? To quote Dale Cox himself, “We sold 500 loaves of bread before we got the door open for business; 7,300 loaves on opening day; 9,400 loaves the second day. This is a first and the people are still coming in.”

“Party Line” is doing a spectacular job for a number of big-time food and household products. Ask PGW for all the facts!

WDAY-TV
AFFILIATED WITH NBC • CHANNEL 6
FARGO, N. D.

PETERS, GRIFFIN, WOODWARD, INC.,
Exclusive National Representatives
with CBS, was the first president of CBS-TV, serving in that post from 1951 until his retirement at the end of 1956. When he retired he moved to Florida but remained a consultant to CBS and subsequently served as president of Pacific Ocean Park, a west coast amusement park, until CBS disposed of its interests in it. He came out of retirement again to take the M-E Productions presidency on June 1, 1960. He said last week he was not considering new job plans and would move back to Florida as soon as he winds up his M-E Productions assignments.

Mr. Graham, the new executive vice president of M-E Productions, started with McCann-Erickson in 1946 as a trainee, later became a radio producer and director. After two years of army service he returned as a television account executive, moved to CBS-TV as a general program executive in Hollywood from 1957 to November 1959, then moved back to McCann as manager of client planning. He became a vice president of M-E Productions in July 1960.

McCann has suffered three substantial account losses in the past six months—the $10-million-plus Liggett & Myers account for Chesterfield, Oasis and Duke cigarettes, Colgate-Palmolive’s Ajax and Spree ($3 million), and the Bulova business ($4 million)—but company officials denied these had any bearing on the television division changes. One did suggest that the changes might have been delayed a few months if the agency had not lost the Chesterfield business. This account loss came after Liggett & Myers became involved in boycott threats stemming from protests against The Untouchables, which L&M was sponsoring but decided to drop the program after the current summer season (Broadcasting, March 20).

**DUPONT’S NEW TV PATH**

Weekly hour-long program will utilize both corporate and product advertising

In a reversal of previous strategy, E. I. du Pont de Nemours will blend most of its corporate and its product commercials into one giant “mixer” next season—the Du Pont Show of the Week over NBC-TV (Sun., 10-11 p.m.). Du Pont’s rationale: by placing nearly $8 million of a total tv budget of more than $13 million into one “prestige” series, the company hopes to attain stronger identity with the program for its various divisions and for the corporation itself.

Du Pont’s tv advertising plans for next season were outlined by Charles (Chuck) Crowley, the company’s television manager, last week.

The change in the company’s approach can be gauged by one of Mr. Crowley’s observations: “During this past season, all of du Pont’s corporate messages on tv were on the Du Pont Show of the Month, but we bought participations on 28 other network shows for product advertising. For the 1961-62 season, we will use part of the Du Pont Show of the Week for corporate messages and part for product selling, and, in addition, we have bought participations on only 12 other network programs for additional product advertising.”

Du Pont officials realize there is some risk to “putting most of our eggs in one basket,” but, Mr. Crowley continued, intensive study by the company over a period of several months produced compelling reasons for an association by du Pont with a single “blue-ribbon” series for most of its tv advertising budget. Du Pont believes that the Show of the Week, which will be “dramatic actuals” of the past and present, will provide an emphatic environment for both corporate and product messages. The series is regarded as “idea programming” and will explore such subjects as “Music of the Thirties,” “Fads and Foibles” (a musical treatment of the subject), “Paper Bullets” (a dramatization of Nazi attempts to flood the world with counterfeit money), “The Ziegfeld Touch” (a musical biography of Florenz Ziegfeld) and “Merrily We Roll Along” (a pictorial history of the automotive age).

Mr. Crowley noted that the welding of corporate with product advertising on one program dictated approval of the project by three departments (Fabs & Finishes, Industrial & Biochemicals and Textile Fibers) and the corporate advertising unit. Approximately 45% of the commercial time on Du Pont Show of the Week will be devoted to corporate commercials, he said, and 55% to product commercials.

Du Pont now is in the process of producing new commercials for the coming series, but also hopes to utilize successful commercials of the past by updating them. But company policy is not to repeat a corporate commercial more than once during the season. Another change by Du Pont next season will be to emphasize the two-minute

A du Pont corporate commercial is often a story. This scene re-creates the moment when a new synthetic fiber—nylon—results from a broad program of research.

This vignette from a commercial dramatizes the invention of a new type of fire alarm by a customer of E. I. duPont de Nemours.

A Larry Harmon Production
rather than three-minute corporate commercials, dictated largely by the need to accommodate a product commercial also within an individual program (three-minute versions still will be used, however).

Seasonal Needs - The scheduling of commercials will be keyed to seasonal requirements. For example, during the fall and winter, product commercials for anti-freeze will dominate and corporate messages will be de-emphasized. In the spring, the stress will be on paints. In slack periods, the corporate messages will be accentuated, though there will be product representation throughout the year.

Mr. Crowley reported that studies by independent researchers point to the conclusion that the most effective du Pont commercials—both corporate and product—are "those that tell a story." The corporate and many of the product commercials, he said, are constructed as "vignettes around our company or a product that captures the viewers' attention, and stays in their memory, we hope." Corporate commercials may treat such subjects as basic research in the sciences; how new products are developed; how improvements in products help our technology, or what the impact of industrial welfare and pension plans is on the social structure of the country.

In addition to Mr. Crowley, a sizable group of du Pont executives has been occupied with the Show of the Week project. They include J. Edward Dean, advertising director; Edward Pechin, assistant director of advertising; Lyman Dewey, advertising division manager; Hugh Horning, television supervisor for product advertising; Mac Collette, tv supervisor for corporate advertising; George Nielson, commercial supervisor and Charles Hackett, public relations advisor for television.

BBDO, New York, is the agency of record for the Du Pont Show of the Week and handles the corporate advertising and all product advertising except the company's Lucite paints, which are handled by N. W. Ayer & Son, Philadelphia.

Knox Reeves gets Fitzgerald agency

Fitzgerald Advertising, New Orleans, which last month lost the $9 million Hunt Foods account to Young & Rubicam and suffered relatively what was considered to be the most severe billing setback in agency circles so far this year, has been acquired by Knox Reeves Adv., Minneapolis. The new name of the New Orleans agency becomes Knox Reeves-Fitzgerald. The switch of the Hunt Foods account is only a part of the multi-million dollar game of musical chairs that some 40 major broadcast advertisers have played in the past six months among agencies (BROADCASTING, July 10).

Fitzgerald's 15 remaining accounts, billing about $2 million (some other accounts also had followed Hunt out of the Fitzgerald shop), go with it into the new agency in New Orleans. Knox Reeves-Fitzgerald will be headed by operations vice president Roy M. Schwarz, formerly executive vice president in charge of creative services at Fitzgerald.

It is understood that fewer than two dozen of Fitzgerald's original staff of about 75 remain, although a few of the others move to Knox Reeves in Minneapolis and Y&R in Los Angeles.

Business briefly...

Maybelline Co., Chicago, in addition to 26-week participation schedule on NBC-TV Saturday Night Feature and the new ABC-TV Steve Allen Show to begin after Labor Day, plans a spot tv campaign in about 100 markets this fall. Additional network buys are contemplated. Tv drive will augment eye cosmetic firm's million-dollar four-color print campaign this summer. Agency is Post & Morr, Chicago.

Quaker Oats Co. has bought full sponsorship of The Tournament of Roses Parade & Pageant, to be telecast on CBS-TV New Year's Day (11:45 a.m. - 1:45 p.m. EST). Agency: Lynn Baker Co., N. Y.

Time, Life International and U. S. Camera, among others, have each ordered 13-week schedules over WRUL New York, Worldwide Broadcasting's international short-wave station, for campaigns in Europe, Africa and Latin America.
Stanislaus County is an important market in California's great Central Valley. It is the 9th county in the entire United States in total farm income. Also, it is the first county on the Pacific Coast and 18th in the United States in retail sales per household — $5,107.00 per household. (Sales Management 5-10-61)

Stanislaus County is part of the area covered by Beeline station KBEE, Modesto. In fact all the important California Central Valley and Western Nevada markets are sold on the Beeline stations. And Beeline Radio delivers more of their radio homes than any other combination of stations, at the lowest cost per thousand. (Nielsen Coverage Service Report #2, SR&D)

**Huntley-Brinkley reach and impact documented**

NBC-TV’s Huntley-Brinkley Report (6:45-7 p.m., EDT) has been an effective buy in terms of reach and impact for its sponsor, Texaco Inc., according to an NBC research bulletin released last week.

The bulletin documents its contentions with information taken from the Nielsen Television Index, and from an impact study of the news program conducted for the network by R. H. Bruskin Assoc. Among the findings of the study:

- More viewers than non-viewers mentioned Texaco gasoline when asked what gasoline brands, or companies, they could think of.
- Texaco’s trademark was identified by three out of every four viewers.
- Viewers had a more favorable opinion of Texaco gasoline than non-viewers.
- Almost twice as many frequent viewers of the news program as non-viewers (15% vs. 7%) said they use Texaco gasoline “most often.”

Figures taken from the Nielsen Television Index show the Huntley-Brinkley Report share of audience in April-May 1961 (35%) was the highest since Texaco’s sponsorship started in June 1959, and that more homes per minute were reached by the program in the first quarter of 1961 than in the same quarter a year ago (8.7 million vs. 7.5 million).

According to the NBC bulletin the findings prove that sponsors benefit from using a news program as an advertising vehicle. The heavier the exposure, the more aware people are of the advertised brand and the more favorable they feel towards the company, the bulletin concludes.

**Rexall blueprints rest of ’61 campaigns**

Rexall Drug Co. will back up its fall One-Cent Sale with the largest single promotion in the company’s history, using TV, radio, magazines and newspapers to announce the event. The print media will be used in advance of the sale, utilizing color pages in national magazines and color spreads in Sunday supplements and independent Sunday newspapers. During the sale, saturation broadcast spot campaigns will be used—61 TV spots on ABC-TV and CBS-TV and more than 100 radio spots on ABC, CBS, MBS, NBC and Keystone networks.

The One-Cent Sale is one of five major campaigns planned by Rexall for the latter half of 1961, John Hart, director of advertising, said last week.

The first, “Operation Challenge,” answers President John F. Kennedy’s challenge to American businessmen to undertake community action to stimulate the national economy. It will be heavily advertised in July, August and September, using commercials on Rexall’s weekly NBC-TV series, National Velvet, plus color ads in Reader’s Digest. Magazine space will promote Rexall’s vitamin product, Super Penamins, in a fall campaign, the Pharmacists Cough & Cold Campaign and the pre-Christmas campaign. BDLO, Los Angeles is the Rexall agency.

**Rep agreement nears end**

The representation agreement between Crosley Broadcasting Corp. and NBC Spot Sales is nearing an end because of the FCC ban on network representation of non-affiliates. In recent years the Crosley tv stations have been represented by the NBC firm in Detroit, Los Angeles and San Francisco, while NBC owned and operated stations have received similar treatment by Crosley in other specific locations. The Detroit arrangement was cancelled June 30, and an NBC spokesman last week said the agreement in the west coast cities “can be terminated at any time.” Crosley’s Cleveland office is now covering the Detroit territory.
People in the heart of the swinging Industrial Gulf South are learning their ABC's of television through the new exclusive ABC-TV outlet - Channel 12 KBMT-TV - Beaumont, Texas. Channel 12 is covering the rich expanding Gulf market like a sunburst. It's a fact - the only thing that gets into more homes in this rich Industrial market is the sun!

Williams plans TV ads for new appliance arm
J. B. Williams Co., a major TV advertiser, has completed its acquisition of Landers, Frary & Clark, New Britain, Conn., which manufactures electrical and household appliances under the "Universal" and "Universal Handy Hannah Deluxe" trademarks.
Matthew B. Rosenhaus, president and board chairman of J. B. Williams, who was elected to the same positions at LF&C, announced that plans have been made to revitalize the whole Landers, Frary & Clark operation. He said the most extensive consumer advertising campaign in the company's history is now being prepared for network television. Harry Silverman, former president of LF&C, resigned June 30 to devote full time to his duties as president of the Blume & Attwood Mfg. Co.
The J. B. Williams Co., manufactures and distributes Aqua Velva, Lectric Shave, Kremi hair tonic, Conti shampoo, Skol suntan lotion and Williams shaving cream. Its pharmaceuticals division markets Geritol, Sominex, Serutan and other drug products.

D&R Productions formed
HFH Productions, New York, film commercials producer, has been succeeded by a new film production company, D&R Productions Inc., established by Dan Hunn and Ron Fritz, both vice presidents of the now defunct company.
D&R will specialize in animated TV commercials as well as industrial and entertainment films. A cartoon property is being groomed for network sale.

Money makers of the 60’s

"Films of the 50's" will premiere in September on KLZ-TV's new Mon.-Sat. feature time slot, "THE 10:30 MOVIE"
Proposals vs. actual operation

NEW FCC POLICY ANNOUNCED IN ONE-YEAR RENEWAL OF KORD PASCO

A major FCC policy on “proposals vs. actual operation” to guide licensees in the future was set forth by the agency last week.

And, in announcing its new policy, the commission granted KORD Pasco, Wash., a one-year renewal and dismissed a March order setting the station’s renewal application for hearing (BROADCASTING, March 27).

Pointing out that the KORD case is one of “general importance in the broadcast field,” the commission agreed with KORD that it would be unfair to test an agency departure from past policy on one licensee. Instead, the FCC agreed to apply the new policy on a prospective basis.

Consequently, a copy of the KORD order was sent to all broadcast licensees so that they will have “an opportunity to understand and comply with” the commission policy on proposed vs. actual programming (see box, this page).

The FCC said that it was putting stations on official notice that what a licensee proposes to do compared with what he actually does is of “vital concern.” A licensee is entitled to one year or any period where he does not make a good faith effort to deliver on his public-service proposals, the commission said.

If licensees do not endeavor to discharge their representations in good faith, they cannot validly claim that the commission has lain “in ambush for them,” the opinion stressed. The agency also made clear the limits of the licensee’s obligations as related to what was proposed.

“Specifically, it recognizes that proposals made are not ‘binding’ in the sense of a contract and that a licensee must be able, and indeed has a duty,

to be responsive to the changing needs of the community," the commission said.

KORD Vehicle • KORD's renewal application—and short-term renewal—served as the vehicle for the commission's policy statement. The Paso station ran afoul of the FCC when its composite-week programming did not jibe with that proposed in its original application for a construction permit in 1957 and in the renewal application.

Also, the commission pointed out in setting KORD for hearing, the station aired 1,631 commercial spots per week instead of the 700 proposed. In response to a commission prehearing letter last September, KORD amended its application in November and explained the variations thusly: (1) short, live public service announcements fulfilled promises but did not appear on the log; (2) that it had been unable to find dependable sources for the promised shows on agriculture and education; and (3) that it increased the number of spots because of an upturn in the local economy.

The commission repeated last week that KORD's explanations were unsatisfactory and that if the application were considered by itself, "we have no doubt that a hearing would be in order on the issue of KORD's proposals as compared with its actual operation. But . . . this case raises issues beyond the narrow confines of the particular application."

While proposals are not rigidly "binding," the commission said, it is well established that the licensee does have a duty to either carry out its promises or, in the alternative, to justify to the FCC why substantial departures are made. "From 1946 on, this has been the thrust of the commission's renewal procedures," the opinion continued.

"The renewal form and the composite week selected at random are all geared to it . . . In short, the commission's concern with proposal vs. actual operation is not a new development, but has long been an integral part of its concern with the public interest in the broadcast field."

Departure • In one respect, however, the commission admitted that its order designating the KORD application for hearing constituted a departure from previous procedure. This came about because past applications have been consistently granted where the licensee substantially upgrades its proposals and gives reliable assurances that the new proposals will be carried out.

"KORD has done that in this case," the FCC pointed out. The amended application is substantially in accord with or better than the 1957 promises and KORD has demonstrated fairly close and continuing contact with its service area, the commission said. "And, it has made clear that it not only will carry out the Nov. 1, 1960, proposals but is in fact doing so at the present time. . . ."

"Its recent operation thus clearly strikes a more reasonable balance between advertising copy and programming material. KORD earnestly asserts that it will continue this improvement and that the commission should not single it out to bear the burden of an expensive hearing. We accept this contention . . . " the commission concluded.

Motivation for setting the KORD renewal for hearing "stemmed logically" from the FCC's July 1960 programming statement, the agency said. On second thought, in the instant case it is more appropriate to act prospectively, the commission said, and "immediately make clear to broadcasters the seriousness of the proposals made by them in the application form."

Originally, the KORD case was set for hearing on a 4-3 vote, with Commissioners Rosel H. Hyde, T. A. M. Craven and John S. Cross dissenting. Voting for the hearing last March were Chairman Newton N. Minow, Robert T. Bartley, Robert E. Lee and Frederick W. Ford (who did not participate in last week's action).

The three original dissenters concurred with the short-term renewal granted KORD last week. Commissioner Cross (with Commissioner Craven concurring) stated that he dissented in March because a short-term renewal should have been granted at that time. "While I cannot concur in the statements of the majority that a hearing appeared necessary, I agree with the general notification to broadcast licensees in this memorandum opinion and order," he said.

KORD's brand new license actually is good for one year and two weeks—until 3 a.m., Aug. 1, 1962.

KFX, KGBS, KXL ask 50 kw at night

Three limited-time stations on clear channels, claiming their collective case is "unique," last week asked the FCC to permit them to operate with 50 kw power during regular nighttime hours. The stations said this could be accomplished while still protecting the dominant stations on the channel and the new Class II stations.

The request was made in response to the FCC's clear-channel breakdown rulemaking by KFX San Francisco (1100 kc); KGBS Los Angeles (1020 kc) and KXL Portland, Ore. (750 kc).

The stations, filing jointly, said they had requested an engineering firm to explore all possibilities and enclosed the report which said that grant of full nighttime power to the three would not interfere with other operations. The stations claimed that under this arrangement they would be able to provide nighttime service to areas which would not have it otherwise and that it was consistent with the FCC's policy of maximum utilization of the spectrum to grant their request. They further asked that the commission incorporate this grant in the finalized rulemaking.

The engineering statement by Creutz & Snowberger, Washington firm, said: "It can be seen that full time operation of KXL, KGBS and KFX . . . offers no adjacent channel conflicts with any existing station or any new station that could be assigned to any area without causing a serious conflict with existing licenses."

New interest-conflict rules

A permanent ban on a former government official participating in a case before the government with which he was "substantially" involved while a government employee is one of the new provisions included in a revised series of conflict of interest laws covering federal employees and approved last week by a House Judiciary subcommittee. The present law bans only for two years a former government official from participating in a case for a private firm on which he had worked while in the government service. The bill also prohibits government employees from helping outsiders get broadcast licenses, airline routes or power station sites. Present law only bans such aid in cases involving money or property claims against the government.
RCA "Traveling Wave" Antenna

Combines Improved Electrical Characteristics with Mechanical Simplicity and Economy... for High Power TV Applications

Here is a VHF high-band antenna that has inherently low VSWR and produces smoother patterns. The design, based on slot radiators, results in improved circularity. This new antenna is strongly resistant to high winds and offers better weather protection.

INHERENTLY LOW VSWR
The traveling wave nature of the feed results in a low VSWR along the antenna. This characteristic gives the antenna an inherently good input VSWR without compensating or matching devices. The input has been broad-banded to provide a smooth transition from the transmission line to the antenna.

EXCELLENT VERTICAL PATTERN
The null-less vertical pattern is extremely smooth. This provides uniform illumination of the desired service areas. Gains from 9 to 18 can be obtained.

IMPROVED CIRCULARITY
The individual patterns produced by slot radiators when added in phase quadrature result in an overall pattern with improved circularity. This design combines radiating elements, feed system and antenna structure in one unit, giving excellent horizontal circularity.

LOW WIND RESISTANCE
The smooth cylindrical shape of the antenna is ideal for reducing wind load and has high structural strength. It is designed to withstand a wind pressure of 50 psf on flats, or 33½ on cylindrical surfaces. In addition, the absence of protruding elements minimizes the danger of ice damage.

The steel outer conductor is hot-dip galvanized for better conductivity and protection. The inner conductor of the antenna is rigidly supported at the bottom end without relying on any insulator type of support to carry the dead weight. Polyethylene slot covers are fastened to the pole over every slot for better weather protection.

SIMPLIFIED FEED SYSTEM
The feed system is completely self-contained with only one point of connection. Simplified feed system consists of a large coax line and coupling probes. Completely enclosed by heavy-wall steel shell, thereby minimizing possibility of damage and off-air time due to "lightning discharges."

Your RCA Broadcast Representative will gladly help with TV antenna planning. See him for details on this new antenna. Or write to RCA, Dept. XC-22, Building 15-5, Camden, N. J.

HOW THE "TRAVELING WAVE" ANTENNA WORKS

Essentially, the RCA "Traveling Wave" Antenna is a transmission line with slots cut into the outer conductor. These slots are arranged to guide the energy radiated by the center conductor into the needed radiation pattern. It fills the need for a VHF High-Band Antenna which combines mechanical simplicity and economy, especially in high-gain, high-power applications.

The Most Trusted Name in Television
RADIO CORPORATION OF AMERICA
BOB KENNEDY SYMPATHETIC TO MINOW

Attorney General says FCC head is ‘on the right track’

FCC Chairman Newton N. Minow has had a protective mantle thrown ‘round his shoulders—and it comes directly from a Kennedy. This is the President’s brother, Robert F. Kennedy, attorney general of the United States.

Public affirmation of Mr. Kennedy’s stance in the FCC chairman’s corner took place two weeks ago when he publicly stated:

“I’m very sympathetic to Mr. Minow. I feel at least partially responsible for his taking the job. I think he’s on the right track.”

That statement, plus the attorney general’s own attitude toward tv programming, was given in an exclusive interview to the Knight Newspapers’ Washington bureau early this month.

The attorney general added that both he, and the President, had been “extremely interested in getting somebody at the FCC who would try to improve the quality of tv.”

Mr. Kennedy’s advocacy of Mr. Minow and the FCC chairman’s stand on programming has gone even further. On July 7, the attorney general played host to Mr. Minow and the following at a private luncheon at the Dept. of Justice: CBS Chairman William S. Paley, CBS President Frank Stanton, NAB President LeRoy Collins and Deputy Attorney General Byron R. White.

The lunch meeting came about, it’s understood, when Mr. Kennedy and Mr. Paley met at a social function and talked about tv. When Mr. Paley stated he had not yet met Mr. Minow, Mr. Kennedy offered to bring the two men together.

The main topic of conversation officially was said to have been children’s programming, but unofficially it’s understood the conversation was general. Mr. Kennedy left directly after lunch, but the others remained for a period of general discussion. The high spot of this after-lunch session was a sharper colloquy between Mr. Minow and Dr. Stanton on the legality of the FCC’s position on programming.

The first indication that the attorney general was seconding Mr. Minow in the battle shaping up between broadcasters and the FCC over program control came June 21 in Chicago. Mr. Kennedy, in a talk to the American Jewish Committee and the Anti-Defamation League in Chicago, called for support for the “splendid new chairman of the FCC” in his campaign for better programming. The attorney general departed from his prepared text to commend Mr. Minow and express his own strong support for his stand on programming.

Educate ’em Young • Bob Kennedy, the father of seven youngsters, has some definite ideas about children’s programming on tv. Here are some of his views, highlighted in the Knight Newspapers’ interview:

“We always said the greatest influences on children growing up were the church, the family and the school. I would say that television should be made a fourth. It has such tremendous influence, as I see in my own children.

“My children, like other children, know all the jingles for the advertisements. They know all the westerners, who shoots who and all that.

“A lot of that could be applied, in an interesting way, to learning the history of the United States, what happened at Lexington and Concord, why the Boston Tea Party occurred, what the Civil War was about, something about the culture and geography of the United States and our relationship with other countries.

“All of these things could be portrayed in an interesting way, such as Walt Disney does . . .

“If there were some education mixed in with the entertainment, I think it would be a tremendous contribution.”

Rules For Small Fry • The Kennedy household—the Kennedy children range from two to ten—has rules for watching tv, the attorney general stated. None of the children is permitted to watch in the morning of a school day, except the youngest watch Captain Kangaroo. The children can all watch Saturday nights and Sunday nights, but not week nights unless there is a special program on.

The attorney general agreed that changes in tv programming are not going to take place overnight. “Obviously it’s not going to be done in the first three or four months. But I think the industry is aware of the problem. I think many of them want to do something.

“The programming has improved since the television quiz scandals two years ago. There are a lot more educational programs on at night for grownups, for instance. The part that distresses me is not for the grown-ups, so much, as it is for small children.”

Last Wednesday, Mr. Kennedy was asked about the relationship between so-called crime and violence on tv and juvenile delinquency. He said he thought that such programs were a factor. This occurred after he had testified before a House education subcommittee on a bill to permit federal aid in setting up programs to combat and control delinquency.

Copyright laws reported due for major revisions

A major revision of the copyright laws, the first in more than 50 years, appears to be in the making.

A report submitted to Congress by the Library of Congress suggests the copyright laws be changed in these respects:

• The maximum copyright term would be extended to 76 years; it is now 58.

• The present ceiling of 2 cents per phonograph record on royalties would be eliminated, as would the requirement today that the copyright owner permit anyone willing to pay the 2 cents a record royalty to do so. This was seen to mean that a copyright owner could sell exclusive rights to a single record company.

• Courts would not be required to assess the minimum damage of $250 against infringers, which at present include innocent violators.

• Voluntary registration in the Copyright Office would be made available to new forms or media, including choreography. Legal protection would become available as soon as a work is published in copies, registered, publicly performed or distributed on sound recordings. This latter is said to protect sound recordings against unauthorized duplication.

The report is the result of five years of study by the Library’s Copyright Office.

Southside petition denied

The FCC last week denied a petition for reconsideration filed by Southside Virginia Telecasting Corp. against action by the commission last February refusing to reopen its 1954 record which resulted in the grant of ch. 8 to WXEX-TV Petersburg, Va. The losing applicant in the 1954 case, Southside had asked that the record be reopened.
BUY MAINE
... in DEPTH!

Why go “up to Maine” and not go all the way up?
What’s “way up”? Friend, pull up a chair:

✓ 42% of Maine’s 1960 population was located in Bangor’s coverage area.
✓ Approximately 41% of the total television homes in Maine (according to ARB) can be found in these nine counties.
✓ 41% of Maine’s total 1960 retail sales (for the twelve months ending June 30th) was credited to the nine counties in Bangor’s coverage area.
✓ These nine counties accounted for 39% of the state’s total income.
✓ Bangor’s home county (Penobscot) had the largest increase in urban population, 1960 vs. 1950 (+ 27.2%). Penobscot County evidenced a 17.5% increase in income (1960 vs. 1950). This increment was larger than that recorded for any other Maine county.

THE KATZ AGENCY, INC.
Hill in jurisdictional dispute on space

WHOSE BAILIWICK IS SPACE COMMUNICATIONS IN?

Capitol Hill was in the middle of its own race for space last week— three committees asserting what they feel to be their rightful jurisdiction in the field of space communications.

Aside from jurisdictional essays, the main issues last week appeared to be over the wisdom of letting American Telephone & Telegraph Co. set up its privately-owned communications satellite system and over the function (or absence of function) of the President’s National Aeronautics & Space Council headed by Vice President Lyndon B. Johnson.

The House Science & Astronautics Committee, headed by Rep. Overton Brooks (D-La.), on Thursday heard representatives of the National Aeronautics & Space Administration, over which it has jurisdiction, and the FCC on plans for satellite communications in the future.

The House Commerce Committee, which has jurisdiction over the FCC, will hear that agency, NASA spokesmen and other witnesses during hearings July 25-27 on space communications. The committee’s communications subcommittee originally had been scheduled to hold the hearings, but increasing interest by congressmen caused Rep. Oren Harris (D-Ark.) to place the subject before the full committee.

In the Senate, Sen. Russell Long (D-La.) said his Senate Small Business Subcommittee on Monopoly will have hearings Aug. 2-4 on satellite communications.

Sen. Long and other legislators have expressed opposition against a plan proposed to the FCC and NASA for AT&T to set up a satellite system at its own expense, the company to reimburse NASA for orbiting the satellites. The congressmen feel this would give AT&T a monopoly in space communications.

Another criticism—that the Space Council has not decided on policy—was offered. And one congressman, Rep. James G. Fulton (R-Pa.), charged the Space Council is impossible to operate. The council was held a formal meeting since it was reorganized by President Kennedy.

James E. Webb, NASA administrator, told the Brooks committee last week that the agency favors letting AT&T set up a satellite system of its own—rather than advocating government ownership or underwriting of such a system—because the traditional private enterprise system seems to be the best of several alternatives.

NASA plans to orbit its own active delay satellite—Project Relay—next year, RCA is the contractor.

The FCC’s spokesman before the Brooks committee, Commissioner T. A. M. Craven, noted that agency and NASA have an agreement between them on setting up a satellite system under the free enterprise system, for global television and other uses. The FCC also has been active in negotiations with other countries for frequencies for space communications.

Bill requiring uhf-vhf on all sets introduced

A bill to give the FCC authority to require that television sets be equipped with both vhf and uhf tuning was introduced last week by Rep. Oren Harris (D-Ark.), chairman of the House Commerce Committee, at the FCC’s request.

The bill (HR 8031) would empower the commission to assist the growth of uhf by requiring that all sets be equipped for all-channel tuning, but its language is such that the FCC could prescribe a minimum for all performance capability standards for sets traded or shipped in interstate commerce.

Proposals have been advanced for several years to help uhf by inducing manufacturers to include uhf tuning in their sets. Some manufacturers have held an agreement among the setmakers to produce all-channel sets would leave them subject to prosecution under anti-trust laws. And some have said they are reluctant to go to the added expense of installing uhf tuning for fear of being undersold by other maker’s who do not include such tuning in their sets.
When Dayton area listeners and viewers want information and entertainment, they dial WHIO. They tune to WHIO-AM for information, news, good music, and sports. WHIO-FM provides the fine music they enjoy to work, read, or relax by. From WHIO-TV comes the area’s most complete coverage of local happenings, plus top network fare.

Wide-angle programming. Complete broadcasting facilities—AM, FM, and TV. And in Dayton, only WHIO covers all three.

Why not ask George P. Hollingbery to tune you in on the best buys in this, Ohio’s 3rd (and the nation’s 34th) market—

Ch. 10 Tampa case heard by full FCC

Six competing applicants for ch. 10 Tampa-St. Petersburg, Fla., pleaded their individual cases in oral argument before the FCC en banc last Thursday (July 13). WTSP-TV Inc., which was favored in a February initial decision, maintained its superiority on broadcast background and experience, program proposals and operating plans.

WTSP-TV, principally owned by three Rahall brothers (Sam G., N. Joe and Farris E.), also pointed out that the Broadcast Bureau filed no exceptions to the examiner's decision. The Rahall's own WKAP Allentown, Pa., WWRN Beckley, W. Va., WQTY Jackson-ville, Fla., and WLKY St. Petersburg.

Florida Gulfcoast Broadcasters Inc. claimed a preference on local ownership, participation in operation by its 15 stockholders and no other broadcast ownership. Gulfcoast is principally owned by Nelson Poynier, publisher of the St. Petersburg Times and Congressional Quarterly. The local newspaper ownership is an asset, Gulfcoast maintained, for determining the tv needs of the local area.

City of St. Petersburg (ch. 38 WSUN-TV and WSUN) said that it should get the vhf channel on the record of its previous operation in the community. Answering the charge of others that the city has abdicated control to employees, St. Petersburg said that there has been no delegation of the licensee's responsibilities and that the city manager keeps a close reign on the operations of WSUN-AM-TV. The radio outlet has operated under the city's ownership for 34 years without a single question being raised by the commission, the applicant pointed out. WSUN-TV has operated since 1953 and no other applicant can come close to matching St. Petersburg's past experience, the city said.

Suncoast Cities Broadcasting Corp. said that it is "head and shoulders" above the others over determining the needs of the community to be served. Suncoast is owned by local residents who filed the first petition for allocation of ch. 10 to the area in 1955 and have consistently worked toward that goal, the applicant stated. Major Suncoast principals include Hurley Holland (25.7%), attorney, Ed. Wright (25.6%), hotel owner, and Harry R. Playford, 25.5%, banker.

Tampa Telecasters Inc., 75% owned by Kenneth Giddens, claimed a preference on basis of past operation of WKRG-AM-TV Mobile, Ala., by Mr. Giddens. Tampa maintained that its application is the only one of the six which proposes something new in tv operations.

Bay Area Telecasting Corp. countered claims that it is a "Madison Avenue" controlled applicant by maintaining 17 of its 23 stockholders (with 65% ownership) are local citizens. It should be favored on diversification and integration of ownership and control, Bay Area argued. The applicant said that it has made frequent and continuous studies of the area's tv needs since 1952. Bay Area said that its president and 9.85% owner, Jack Van Volkenburg, former CBS-TV president and presently network consultant, would divorce himself completely from the network if the grant is received.

Ford says stations responsible for quality

Individual tv stations and not the networks are primarily responsible for the quality of programs broadcast, FCC Commissioner Frederick W. Ford said last week on Exposure, a local program over KTNT-TV Seattle-Tacoma.

"If a local station licensee receives a network program that he does not think will serve the interests of his community, or if he has a local program of more importance to his area . . . .”

the licensee should not air the network program, the commissioner said. He said that tv programming will gradually improve. He cited as "influences" on the quality of programming the scarcity of vhf channels and sponsors.

The Ford Exposure appearance was taped June 30 and televised last Tuesday (July 11).

Sept. 11 hearing date set for KWK case

A new hearing date of Sept. 11 was scheduled by FCC Hearing Examiner Forest L. McClennan last week in the license revocation proceeding against KWK St. Louis. The hearing is scheduled for the licensee's home city.

During a pre-hearing conference in Washington last week, a final attempt to stipulate certain facts fell through because of an expectation that testimony of witnesses will conflict. The hearing first was scheduled for last December and has since been postponed several times (Broadcasting, Nov. 3, 28, 1960).

The commission has twice denied KWK requests for a bill of particulars of charges, centered around "treasure hunt" and "bonus club" contests conducted by the station.

A FIGHT TO PRESERVE THE CLEARS

FCC duplication plan faces counter-action on Hill

Adopting the techniques of the fire fighters, clear channel broadcasters have begun to build the backfire they hope will preserve the sanctity of their stations.

The FCC has announced that it is going to duplicate 13 of the 25 clear channel stations (Broadcasting, June 19). This is the latest move in the clear channel case which has been before the commission for the last 16 years. Its intent was announced last month in instructions to the staff.

First flame in the backfire flared last Tuesday (July 11) when Sen. Paul Douglas (D-Ill.) protested the FCC's intent because it will leave the state of Illinois with no unduplicated Class 1-A stations. It now has four—WMQA, WBBM, WLS and WGN, all in Chicago. Illinois is also served by KMOX in St. Louis. All of these stations are proposed to be duplicated.

The next move will be, it's understood, a bipartisan move in Congress to stop the FCC's plan. This is likely to take the form of congressional bills which would prohibit any breakdown of the clear channels and permit higher power for these stations serving wide areas. All U. S. radio stations are limited to 50 kw maximum power by a Congressional resolution passed in the 1930s.

Expected to take the lead in offering this legislation are Sens. Herman E. Talmadge (D-Ga.) and Homer E. Capehart (R-Ind.), and Reps. John J. Flynt, Jr. (D-Ga.) and John B. Bennett (R-Mich.).

Douglas Protests • Although Sen. Douglas acknowledged that he is not sufficiently familiar about the whole subject to make a full judgment, he said he was prepared to question the wisdom of leaving Chicago and the Illinois area with no clear channels.

He urged the FCC to reconsider the order which would "at one fell swoop" cause Illinois to lose all five of the clear channel stations which serve the state.

Sen. Douglas queried whether the FCC has good reason to duplicate all four of the Chicago clear; three are network owned, he pointed out, and this seems to be the FCC's determination—to duplicate all clear channels owned by networks. But, he added, the only reason he could see for duplicating WGN Chicago is because the commission had decided to duplicate the other three. Most of the other independent stations would be unduplicated by the FCC's order, he stressed. WGN is owned by the Chicago Tribune.
Flint-Bay City-Saginaw moves into the top 40 (in actual TV homes delivered)

When Flint and Bay City-Saginaw were recently combined into one market, it changed everybody's list of the top 40 TV markets in the country. Have you brought yours up to date yet?

To check, just see if you've got Flint-Bay City-Saginaw listed in the same neighborhood as Providence, Charlotte and Denver. For that's where this Eastern Michigan market has moved on the all-important basis of homes delivered.* That is, homes with TV sets actually tuned in.

Another thing well worth noting is that nearly all the viewers in this heavily populated urban market get their television from within the area. And, of course, that's where WJRT is—with City-Grade service to Flint, Bay City and Saginaw.

You can get more information about this new top-40 market, and about WJRT, simply by calling our representatives: Harrington, Righter & Parsons, Inc. Offices in New York, Chicago, Detroit, Boston, Atlanta, Los Angeles and San Francisco.

*Based on ARB Reports—March, 1960 (Sun.-Sat., 6-10 p.m.)
NAB cites value in proposed program form

The NAB has looked over the new programming forms—proposed to be adopted by the FCC (BROADCASTING, July 10)—and found them good. Well, not good, exactly. "A net improvement over the old form," in the words of NAB President LeRoy Collins.

The association has sent a copy of the proposed new rules to all NAB members and with it went a statement from Gov. Collins.

In his statement, Gov. Collins said that there seems to be no question of the FCC's authority to call for the information. Some broadcast spokesmen have questioned the FCC's right to inquire into programming.

The questions may require more work by licensees, Gov. Collins said, and might be more onerous for stations with small staffs, but all stations should be able to complete the forms without outside special assistance.

The NAB president said that simplification of the form was the prime objective of a committee composed of representatives of NAB, the Federal Communications Bar Assn. and the FCC staff.

Comments on the new form are required by Sept. 7 and reply comments by Sept. 18.

Text of Gov. Collins' statement:

"The proposed form of the FCC represents a refinement and extension of the program forms that have been utilized by the commission for the past 30 years."

"On balance, it is our opinion that the new form represents a net improvement over the old form.

"True, more detailed information is being requested of licensees and applicants. The form itself, however, does not represent any basic change in the philosophy of the regulation of the industry by the FCC."

"In our judgment there exists no substantial question of legality. If the commission has the basic authority to require applicants for broadcasting facilities to file any information as to program plans, and this has been accepted in practice since the advent of radio regulation, the amount of such information required is a matter of sound official discretion.

"Against this backdrop the proposed form has the advantage of reflecting more accurately past and proposed operations of the licensee. It has the disadvantage of imposing a greater administrative burden upon licensees, and this burden will be more onerous on those stations with small staffs."

"However, our NAB staff believes that is is possible for any licensee to complete this form without outside special assistance," Governor Collins said.

Daytime am problem on Capitol Hill, again

Daytime am stations return to Capitol Hill this week to make their plea for extended broadcast hours. The House Communications Subcommittee headed by Rep. Morgan Moulder (D-Mo.) will hold hearings tomorrow (Tuesday) through Thursday on similar proposals by seven congressmen for extended hours for daytimers.

The subcommittee had no list of witnesses late last week, but it was practically certain the Daytime Broadcasters Assn. and individual daytime am station operators would testify in favor of proposals to extend daytimer hours from 6 a.m. to 6 p.m. instead of the present local - sunrise - to - local - sunset hours which vary through the year.

Opponents, as in the past, are likely to be the FCC, Clear Channel Broadcasting Service and individual clear channel stations, and Regional Broadcasters.

Similar proposals were heard in the 86th Congress last year (BROADCASTING, June 20, 1960) before the same subcommittee. There was discussion last year of a possible test of extended hours for daytimers to settle conflicting claims of proponents and opponents, but no tests were authorized.

Pittsfield gets uhf grant

The FCC Thursday (July 13) announced the grant of tv ch. 64 in Pittsfield, Mass., to Springfield Television Broadcasting Corp. Commissioner John S. Cross dissented.

Interest in the corporation, of which Roger L. Putnam Sr. is chairman of the board and 23.34% owner, is divided among more than 50 stockholders. Springfield Broadcasting is also licensee of WWLP(TV) ch. 22 Springfield, WRLP(TV) ch. 32 Greenfield and WWOR(TV) ch. 14 Worcester, all Massachusetts. The new station is to be a satellite of the latter.

National Airlines plans appeal to Supreme Court

National Airlines last week asked the U.S. Court of Appeals in Washington to stay the effectiveness of the court's decision in the Miami ch. 10 case because it plans to ask the U.S. Supreme Court to review the decision.

The appeals court two weeks ago upheld the FCC's move to vacate the 1957 grant of the Miami station to National Airlines and to issue a new permit to L. B. Wilson Inc. (BROADCASTING, July 10). It also upheld the FCC's findings that National Airlines and a third original applicant for the Miami vhf, North Dade Video Inc., had engaged in off-the-record representations before the final decision was rendered.

In its petition for a 30-day stay, National Airlines said it was preparing a petition for a writ of certiorari to the Supreme Court. It has 30 days to do this. Other parties to the litigation may, however, oppose National Airlines' request for a stay. Presumably this will be done by L. B. Wilson. FCC counsel said they were studying the question but could not answer what their position would be until the commission told them what to do.

A petition for review by the Supreme Court probably will not be acted upon until the court resumes after its summer recess. This is in October.

To dismiss payola complaints

A Federal Trade Commission hearing examiner has issued a separate recommendation which would dismiss FTC payola complaints against Roulette Records Inc. and Bigtop Records Inc.-Bigtop Record Distributors Inc., both New York. The examiner's order granted a motion by the FTC counsel which held that new laws, passed by Congress since the complaints were issued, were sufficient to deal with the problem.

Stiffer penalties

The House Judiciary Committee last week approved Senate-passed legislation (S 1990) to provide fines to $10,000 or ten years' imprisonment or both for destruction of communications facilities related to national defense. The bill, already approved by the Senate, would more than triple existing penalties.

Kaye defends tv

Comedian Danny Kaye doesn't think the removal of tv programs featuring so-called crime and violence will mean that a race of young pacifists will arise.

"I don't think that the fact that you take programs off tv that appeal to the kids' so-called 'killer instinct' is going to help anything," he said last week in Washington. He appeared at a news conference in behalf of a bill to make tax deductible contributions to the United Nations International Children's Emergency Fund. The entertainer has spent eight years working on behalf of UNICEF.
4 OUT OF 40 REASONS WHY the GATES BC-1T is chosen by more Class IV stations than any other one kilowatt transmitter manufactured today. ■ Convenience. Flip one switch to change power and audio level for either local or remote control. ■ Efficiency. You efficiently reduce power to 250 watts by changing the primary voltage of the plate transformer. No power consuming voltage dropping resistors are used. ■ Economy. Longer tube life by hundreds of hours as plate voltage for 250 watts is reduced at both power amplifier and modulator tubes. Saves on utility bills too. ■ Accurate in-built dummy antenna that will not change characteristics at 100% modulation permits FCC required performance proofs without burning midnight oil. Also quick problem isolation when transmission line or antenna loading problems occur.

Let us give you the 36 other reasons why this is the best selling 1KW transmitter in America. Write today for Brochure No. 99 – yours for the asking.
An FCC limit on network o & o’s?

PLAN WOULD RESTRICT EACH TO OWNERSHIP OF THREE TV STATIONS

The FCC is considering once again limiting network ownership of tv stations to a total of three per network. FCC Chairman Newton N. Minow said yesterday in a scheduled interview with Rep. Emanuel Celler (D-N. Y.). The telecast was taped on Thursday and broadcast over WOR-TV New York. (WGMS Washington carried the audio portion Friday night).

Mr. Minow was responding to a question from Mr. Celler about this recommendation in the 1957 Barrow Report, and answered:

“This is one that we have not adopted. Presently they [the networks] are allowed to own five vhf and two uhf, although the Barrow recommendation is receiving consideration now in the Commission.”

This is all that was said of the matter. Dean Roscoe L. Barrow, U. of Cincinnati Law School, has been rehired as a consultant to the FCC on network study activities (Week’s Headliners, July 10).

Mr. Minow’s session with Mr. Celler was one of three in which he was engaged during the last two days of the work week. Immediately after the Celler taping, Mr. Minow taped a radio interview with Rep. Wayne L. Aspinall (D-Colo.). This will be run on Colorado stations this week, it was reported. The next day, on Friday, Mr. Minow was taped for Mutual’s Reporters’ Roundup (scheduled for broadcast today, 5:05-5:30 p.m., EDT). The FCC chairman was interviewed by David Kraslow, Knight Newspapers’ Washington bureau, and Susan Wagner, United Press International. Ken French was moderator.

Celler Advises • Mr. Celler made no bones about his views on various matters involving broadcasting—including his direct recommendation that the FCC hurry up and grant the pending transfer of WNTA-TV New York to the educational group seeking to buy it. A New York group has offered $6.5 million for the ch. 13 facility. New Jersey Gov. Robert Meyner has objected to this transaction (Broadcasting, July 10).

This is Mr. Celler on the New Jersey opposition:

“I have read the opposition of Gov. Meyner to this station. I think his opposition is inane and unreasonable. There’s no reason why if a station is set up in New York that New Jersey couldn’t participate. . . . I don’t mean to influence you necessarily. But that is my views.”

Chairman Minow murmured that he thought it would be inappropriate for him to say anything about that.

Other Minow highlights:

• That he has had a number of talks with broadcasters and they are going to de-emphasize violence and they are going to do more about children’s programs.

• Wants to know how many hours of public-affairs programming are offered by the networks and how many hours used by affiliates. Hopes that the public will encourage local stations to carry these programs. Urges the

Minow’s big show is all set to go

NORTHERN SEMINAR TO FEATURE FCC HEAD

Chairman Newton N. Minow’s next big blast is timed for his return to his alma mater—Northwestern U.—next month.

Mr. Minow will participate in a symposium he inspired. It will be held under the auspices of the university’s School of Law (Broadcasting, June 12). The formal title of the two-day conference, Aug. 3-4, is the National Symposium on Freedom and Responsibility in Broadcasting.

Mr. Minow will be spotlighted at the only open session on the afternoon of the first day. It is expected he will devote his as yet unannounced paper to a defense of his philosophy of program surveillance by the FCC which, he will argue, is not censorship. And he is prepared to contend that broadcasting, as a licensed medium, is not entitled to the same freedom as the “unlicensed” press.

Although the 35-year old FCC chairman has been interviewed on the air and in print a dozen times since his “vast wasteland” speech at the NAB convention last May 9, he has not deviated from the theme of that address. In Chicago, he will seek to buttress his “no censorship” argument with documentation from congressional debates and court opinions.

On the same platform with Mr. Minow on the same day will be NAB President LeRoy Collins. Gov. Collins in a recent address in Chicago at the dedication of the new plant of WGN Inc., warned against “government thought control”—a bolder position than he previously had taken. The first and only major address Gov. Collins has delivered since he assumed the NAB presidency last January was at the NAB convention, just before Mr. Minow’s now celebrated speech that brought nationwide repercussions.

22 Participants • Arrangements for the Chicago symposium were firmed up last week with 22 participants, including Messrs. Minow and Collins. Chairman of the sessions will be J. Leonard Reinsch, executive director of the Cox stations, also a Northwestern alumnus. Mr. Reinsch, who served as executive director of both the 1956 and 1960 Democratic national conventions, recently was appointed by President Kennedy to membership on the United States Advisory Commission on Information which sits over the USIA. This assignment is without pay.

Sessions will be held on Thursday morning (closed except for closed circuit relay to the press and others in an accent auditorium); Thursday afternoon (open) and Friday morning (closed). Professor Louis L. Jaffe, of Harvard Law School, will open the Thursday morning session, followed by Charles H. King, former member of the FCC and dean of the Detroit College of Law, an advocate of a hands-off policy by government in programming. Panel members will question the speakers following their presentations.

At the Friday morning closed session, Dean Roscoe Barrow, of the U. of Cincinnati Law School, who, as a consultant to the FCC was responsible for the “Barrow Report” on network operations (October 1957), will present the lead-off paper. He will be followed by W. Theodore Pierson, senior partner of the Washington law firm of Pierson, Ball & Dowd.

Other participants: Warren K. Agee, executive officer, Sigma Delta Chi; national professional journalistic society; Edward L. Bernays, public relations consultant; Fairifax M. Cone, chairman, Foote, Cone & Belding; Prof. John E. Coons, of Northwestern, the conference director; Peter Goelot, president of the National Audience Board; John W. Guild, president and general manager, WMTW (TV) Poland Spring, Me. and practicing attorney; Clair R. Mc-
public to make their views on programs known to stations, the FCC, sponsors and Congress.

- Defends the right of the FCC to require information on programming, not as a censorship measure, but as a guide to determining whether there is programming balance.

- Expresses the belief that ratings have tyrannized broadcasting. "The idea that because a majority wants to see this kind of a program or that kind of a program, that this should be decisive for all kinds of programs is outrageous."

- Answers the argument that if viewer or listener doesn't like a program he can switch to another station or turn receiver off by quoting Herbert Hoover in the 1920s when Mr. Hoover was Secretary of Commerce, in charge of radio licensing: That there are two parties to radio communication, the broadcaster and the listener. "Both are participating in the use of a public resource. It would be unfair to not let the listener use the public resource if all he's given is violence, letter, for a steady routine. He would have no choice, and he's got about as much right to use the public resource as anybody else."

Collough, president, Steinman stations and chairman of the NAB combined boards; Ralph McGill, publisher of the Atlanta Constitution and nationally syndicated columnist; Sig Mickelson, vice president, Time-Life Broadcast Inc.; Prof. Nathaniel E. Nathanson, Northwestern School of Law; Morris S. Novik, broadcast consultant, AFL-CIO; Ward L. Quaal, executive vice president and general manager, WGN Inc.; Pierre Salinger, news secretary to President Kennedy; John Taylor, general manager, WTTW (TV) Chicago, and Sol Taishoff, editor and publisher of Broadcasting.

Public trust is first, judge warns stations

A federal judge last week warned broadcasters in no so veiled language that they better start operating as a public trust and forget about profitable operation or they might be sorry.

In an aside to the main case, rarely used by the judiciary, U. S. Circuit Judge George T. Washington of the D. C. Appeals Court, added a paragraph to a decision involving the 1959 transmitter move of WOOD-TV Grand Rapids:

"A further comment may be noted. All too often in cases like the present the broadcasters involved appear to be chiefly interested in the revenues to be derived from operating their stations in the most profitable manner. It seems clear in the present case that WOOD-TV will make more money in its new location than in the old; it is moving to a more prosperous and more highly populated area, and its advertising revenues will no doubt increase. But such considerations, though legitimate, cannot be controlling. Television and radio are affected with the public interest; the nation allows its airwaves to be used as a matter of privilege rather than of right. The interests which today are profiting so handsomely from radio and television may in the end find it in their own best interest to treat their businesses primarily as a public trust."

Judge Washington, speaking for himself and Circuit Judges Wilbur K. Miller and David L. Bazelon, held that the FCC did not completely justify its approval of the WOOD-TV move—from 10 miles northeast of Grand Rapids to 20 miles southeast of that city. The FCC granted the move in 1959 without a hearing, but WILX-TV Onandaga, Mich., protested. The commission affirmed the move by a 4-2 vote following a hearing on the protest, and WILX-TV appealed.

Muskogon Loser • The court seemed to place great weight on the fact that the station was moving from an underserved area to a more adequately served area. Although WOOD-TV would serve more people, the court said, the move would deprive about 900 people of any tv service and about 42,000 of all but one service. The principal loser, the court stated, seemed to be the people of Muskogon.

Judge Washington also noted that the original 1953 grant was predicated on the needs of the area to be served from the original transmitter site.

The two-year-old decision was remanded to the FCC, with instructions to hold further proceedings. The commission may, Judge Washington said, permit WOOD-TV to operate from the old or the new transmitter site, but must make a more suitable finding that the move is in the public interest.

Time extension sought in option-time case

Extension of one month in the deadline for filing comments and the date of oral argument on the FCC's proposed option-time rulemaking was requested last week by committees of affiliates of the three television networks.

Comments now due Sept. 7 would be delayed until Oct. 6 and the date for oral argument would be shifted.
from Sept. 28 to Oct. 27 if the request is granted.

The affiliates’ committees pointed out that the time during which they would be preparing comments under the present deadline is vacation time for many of the parties they will need to contact in relation to the proceeding, and August is indeed vacation time for the FCC itself. Since the FCC will not accept reply comments on the issue, the committees said, they will have to prepare comments not only to include affirmative evidence but they must also try to anticipate and deal with the arguments that may be raised in opposition.

KTTV (TV) Los Angeles and the three tv networks, parties in the option time case remanded by the U.S. Court of Appeals, have agreed to the time extension, the committees reported.

**KBOM hearing opens in Bismarck, N.D.**

An FCC hearing is scheduled to begin today (Monday) in Bismarck, N. D., in commission-instigated license revocation proceedings against KBOM Bismarck. The commission has charged that there was an unauthorized transfer of control of KBOM in 1956 and that subsequent ownership reports were filed without reporting the change in ownership (Broadcasting, Dec. 5, 1960).

This change in ownership took place, according to the FCC, when 80% owner Charles E. Kempel sold his holdings to “several persons” and John K. Harris sold the 10% he held. Presently pending before the FCC is an application to transfer the station from Mr. Kempel to Clifford Nygard and 38 others. The licensee, the FCC charged, deliberately concealed several stock transactions between 1956 and 1958.

**WITT hearing may be held in Lewisburg, Pa.**

Citing “well established” FCC policy, the Broadcast Bureau last week asked the commission to change the site of the license renewal hearing of WITT Lewisburg, Pa., from Washington, D.C., to Lewisburg.

Among reasons for its request the bureau said that one of the hearing issues is alleged unauthorized transfer of ownership of the station and that the bureau planned to call several Lewisburg residents to testify on this point. It said the cost of transporting such witnesses to Washington would be “economically prohibitive.”

Other issues are technical violations and misrepresentations to the FCC.

The bureau said it had not requested the site change earlier because a May 4 petition by WITT indicated that if the commission did not forgo the revocation proceeding, the station would not go through with the hearing because it is insolvent.

The station has changed its mind and does intend to go through with the hearing. But it needs an extension of time from the hearing date of July 24 set by Hearing Examiner Asher Ende, over protests of WITT.

This was revealed in a petition to the FCC by Arthur Stambler, representing WITT. He stated he had been retained on the case during the July 4 weekend and has not had time to familiarize himself with the details. Mr. Stambler also said the station would apply to the commission for a bill of particulars of the charges against it.

WITT’s petition said it felt the FCC was likely to grant a bill of particulars in view of its sending letters spelling out charges in the cases of license renewal of WINS and sale of WMGM, both New York (Broadcasting, July 10). WITT asked that the hearing be continued indefinitely but, in lieu of that action, set for Sept. 15.

**Broadcast Bureau criticizes initial decision**

The FCC Broadcast Bureau last week criticized an initial decision by Hearing Examiner Thomas H. Donahue as employing “a completely unorthodox approach” and lacking “soundness.” The decision cited recommended denial of an FM station in Oceanside, Calif., on grounds that the emphasis on entertainment programming and spot announcements in its application would not serve the needs of that community (Broadcasting, May 8).

The bureau and the applicant, Benjamin C. Brown, both took exception to the examiner’s assumption that the spot announcements contemplated would be of “violent exception” to Mr. Donahue’s finding that the “quality music” format proposed would not be in the public interest. He said his programming proposals were virtually identical with those of numerous FM applicants who have been granted facilities.

In his initial decision, Mr. Donahue also recommended denying the application of KBBI (FM) Los Angeles to increase power on 107.5 Mc and to change antenna. The examiner felt this would cause excessive interference to a new FM grantee in Sierra Madre, Calif. The broadcast bureau disagreed with this contention and said KBBI’s request should be granted because permitting the station to increase its coverage area by 1.5 million people would outweigh interference considerations. The bureau said that interference would not be serious to the Sierra Madre station, KMAX (FM).

Because it favored KBBI, the bureau felt that Mr. Brown’s application should be denied, but on grounds that Oceanside already has a Class B FM station and not on programming grounds.

KBBI said Mr. Donahue had reached his decision through “erroneous interpretation of FCC policies and rules.” The station claimed the examiner had evaluated interference as though am service were involved.

**WHDH-TV delay tactics charged in ch. 5 case**

“Another season, another reason for delay.”

So replied Boston ch. 5 applicant Massachusetts Bay Telecasters to a petition by WHDH-TV which asked the FCC to clarify and modify its order for the submission of further briefs in the ex parte case by July 24 (Broadcasting, July 3). The Broadcast Bureau also said a grant of the WHDH-TV proposal would preclude the FCC from making its own evaluation.

The bureau said the FCC decision which vacated the 1957 grant to WHDH-TV is proper and within the agency’s authority. WHDH-TV maintains the commission must consider the original decision as well as the facts determined during the remand hearing and the subsequent 1960 decision, but the bureau said the agency has properly “repudiated” the original action.

Massachusetts Bay said the latest WHDH-TV petition is a continuation of a “determined effort to delay decisive action” by the commission.
The magnet that may light a town

It once was just a laboratory trick. Shooting fiery fuel through a magnet to create an electric current.

But research by investor-owned electric light and power companies is helping to develop it into a promising new way to produce electric power efficiently and in great quantity.

Its jaw-breaker name is magneto-hydromagnetics!

This is one of several revolutionary new methods these companies are exploring to generate more electricity and make it more useful to more people.

The investor-owned electric companies—there are more than 300 of them—are building and planning ahead to supply the additional electricity Americans will want in the future.

A More Powerful America Tomorrow

A unique picture of America in the 1970's and 1980's comes from long-range, projected electric power needs—and the plans of the investor-owned electric companies to meet them. The coupon below will bring you a free copy of a new booklet that outlines the nation's power future.
Emploees seek delay of WNTA-TV sale

A protest of the $6.2 million sale of ch. 13 WNTA-TV Newark-New York to a New York civic group, which plans to operate the station for educational purposes, was filed with the FCC last week by six former WNTA-TV employees.

On other fronts, New Jersey Gov. Robert Meyner continued his fight to maintain ch. 13 as a commercial station in his state (BROADCASTING, July 10) and Rep. Emanuel Celler (D-N. Y.) called the plans to shift the outlet to etv “a cool breeze in the heat of summer.”

The ex-WNTA-TV employees, in a letter to the FCC chairman, asked the commission to withhold approval of the transfer until the present licensee, National Telefilm Assoc., fulfills a bonus promise allegedly made last Christmas. At that time, they stated, NTA promised a Christmas bonus consisting of stock in the licensee equal to one-week’s pay.

The bonus has not been received, the six charged, and some 200 present and former employees are affected. Signing the letter were Irving Lichtenstein, Richard Casper, Larry Gershman, James Marino, Rose Ficcarata and Harold Cranton.

In a letter published in the New York Times last Wednesday (July 12), Gov. Meyner hit an editorial in the newspaper the previous day describing the governor’s stand as “isolationist.” “Your own position suggests that you would isolate New Jersey for all time from the benefits of an important communications medium,” he told the paper. He said he applauded the efforts of New York City to establish an etv station “but why should this be done at the expense of a state of six million citizens in violation of the law . . .”

Rep. Celler said that the FCC should “as expeditiously as possible” approve the transfer of WNTA-TV, “the objections of Gov. Robert Meyner notwithstanding.” He said that the station has been operated at a loss for several years by commercial interests and that the governor is certainly not on firm ground in asking that this loss be continued.

NAB has suggestions on new wage law

NAB last week submitted suggestions to the Labor Dept. for administering a new amendment to the Fair Labor Standards Act which exempts announcers, news editors and chief engineers from those whom stations are required to pay overtime rates in cities of 100,000 population or less and not part of metropolitan areas. The amendment becomes effective Sept. 3.

NAB said announcers should be defined as those who are in routine announcing work such as announcing programs and station breaks and reading sponsor or commercial announcements. Those who conduct interviews or act as m.c.’s predominantly come under the “professional employees” classification and are already exempt from both minimum wages and overtime, NAB said.

News editors to be exempted should be those who gather, edit and rewrite the news and who present it on the air or a combination of both. Original and creative work should not be a consideration. Some news editors who supervise staffs already are exempt as supervisors or professional employees, NAB said.

All chief engineers should be covered by the exemption, NAB said, and some already are exempt where they supervise two or more full-time employees.

NAB asked that the exemption apply to workers “primarily” engaged in the excepted classifications of work instead of requiring that exempted employees devote 80% of their time to such work—the exception standard in most other industries. A Senate committee recommended this method, NAB noted, adding that there are some announcers who sell time on a commission basis and some do technical work.

The Labor Dept. also was asked to let stations dispense with timekeeping for such exempted employees who receive set salaries since the wage would seldom if ever fall below the minimum hourly rate of $1.15.

EIA, AMST petition FAA on tall tower issue

Electronic Industries Assn. and the Assn. of Maximum Service Telecasters last Friday (July 14) asked the Federal Aviation Agency to reconsider its recently announced regulations relative to tall towers (BROADCASTING, June 19).

The new rules became effective Saturday (July 15). They provide that any tower more than 500 ft. above ground or more than 200 ft. high in an air control zone constitutes an air hazard. Additionally, the FAA would make the final determination as to whether a tower is a hazard, rather than the FCC, according to the rules.

There has been considerable dispute as to the FAA’s jurisdiction over tall towers to the exclusion of the FCC (BROADCASTING, July 10) and this question was raised in the petitions for reconsideration.

An FAA hearing was held last Thursday, under the old rules calling for a recommendation to the FCC by the Air Coordinating Committee, on the tall tower applications of KGO-TV and KRON-TV, both San Francisco.

PROGRAMMING

Wolper, Ziv-UA plan $2 million series

PLANNED FOR NEXT JANUARY: 48 HALF-HOUR SHOWS

In its third acquisition in as many weeks, Ziv-UA, New York, has signed David Wolper to an exclusive contract to produce a new $2 million series of 38 half-hour shows to be ready for airing in January.

The Wolper series, part of a new Ziv-UA programming concept known as “Documatics,” was inspired by the producer’s “Biography of a Rookie.” Each week the title will specify the nature of the protagonist ranging in subject from “Story of a Jockey” to “Story of a Supreme Court Justice.”

As the first of the Documatics concept, the new Wolper show will employ no professional actors—each star will play himself.

Ziv-UA previously had announced the acquisition of “Laura” and “Acres & Pains” (BROADCASTING, July 10, July 3).

Hayward expands plans for tv production

Theater, movie and sometime-tv producer Leland Hayward is apparently moving into the tv production field with both feet. Last week he announced that Marshall Jamison, who until June 15 was executive producer for Theatre Network Television Inc., has joined his organization as executive director of production.

It was indicated that Mr. Jamison will concentrate in the commercial tv area. He and Mr. Hayward will co-produce Westinghouse’s 90-minute special The Good Years, scheduled on CBS-TV June 15 (8:30-10 p.m.). Mr. Jamison also is working on several possible special programs and two series ideas targeted for 1962-63.

Pilots for the series, one in hour-long form, the other 30 minutes in length, are in the process of the being made.

Mr. Jamison previously was associated with Mr. Hayward in the production of three other CBS-TV specials—The Gershwin Years, The Fabulous Fifties and the Ford 50th An-
GROWING! This dramatic new concept in documentaries is being picked up fast from coast to coast! Every day more and more markets join the success parade of these thirteen hour-long specials starring such renowned figures as Lindbergh, Al Smith, General MacArthur, the Duke and Duchess of Windsor, De Gaulle, and more. Actual, on-the-scene filmed highlights in their lives, from the world-famous film libraries of Hearst Metrotone News, are skillfully augmented with new footage from Hearst Metrotone cameramen throughout the world. All brilliantly woven together by the masterful writer John O'Toole, to give a true “PERSPECTIVE ON GREATNESS.” Dramatic entertainment of real prestige and stature. The kind to attract important local advertisers. Plus this practical bonus: a single, compact, easily stored source of material on famous people—complete shows to run at a moment’s notice when needed.

A Great New HEARST METROTONE Production
niversary Show. For several years he was executive producer of CBS-TV's U. S. Steel Hour.

In addition to his independent productions Mr. Hayward is program director for the Zenith-RKO Phonevision Co.'s pay-tv experiment in Hartford, Conn., Mr. Jamison also is expected to be heavily involved in that project when it starts some time next year (Broadcasting, July 3).

G-T to push comedy; signs Leonard Stern

Goodson-Todman Productions, smarting from the recent failure of several projected tv series to get off the ground, has recruited a tv comedy expert to bolster its program development staff.

Goodson-Todman last week announced a long-term agreement with Leonard Stern, producer-writer-director, who will create comedy series aimed for tv network showing in 1962-63. The contract guarantees the production company exclusive rights to series created by Mr. Stern, who also will fulfill an earlier commitment as director of comedy segments in next season's new Steve Allen Show on ABC-TV.

Harris Katleman, G-T's West Coast executive vice president, said Mr. Stern expects to propose three programs within the next few months. None will be of the panel and game variety which has been the company's bread-and-butter for some 15 years. The new shows would be filmed in Los Angeles.

Mr. Stern, 34, was producer and head writer for Steve Allen's network series during the 1958-60 seasons, and previously was head writer for The Phil Silvers Show and The Jackie Gleason Show.

Mr. Katleman said the company has discontinued plans to produce several filmed series, including Las Vegas, U. S. Secret Service and Medical Detectives.

ASCAP negotiations previewed by committee

As a prelude to forthcoming negotiations with the American Society of Composers, Authors & Publishers, the All-Industry Television Station Music License Negotiating Committee met in New York last Wednesday (July 12). TV stations presently are operating on contracts with ASCAP negotiated in 1957 and running until Dec. 31, 1961.

The all-industry committee, headed by Hamilton Shea (WSVA-TV Harrisonburg, Va.) heard a report from Chairman Andrew J. Murtha of its subcommittee on accounting procedures which analyzed provisions of the existing contract for music used on TV.

Mr. Murtha is business manager of Time-Life Broadcasting Co., New York. Dan W. Shields of the NAB was designated last week by Mr. Shea to serve as secretary of the all-industry committee. He succeeds Charles H. Tower, former NAB vice president for television, who remains on the committee in his new capacity as administrative vice president of Corinthian Broadcasting Corp., New York.

The all-industry committee was set up in January of this year under the guidance of the NAB (although its membership is not limited to NAB members) for the express purpose of setting procedures to be employed in negotiating with ASCAP for performance rights on music controlled by that group and used on TV stations.

What does JULES BUNDGUS* say about BROADCASTING YEARBOOK?

"NO REFERENCE SOURCE HANDIER"

"There is no reference source I have found handier in my years in broadcasting. I always keep it in my desk and keep one at home because in a minute I get in touch with talent, packagers, network executives and other agency people I have known for a long time."

Will YOUR advertising story be seen by top agency-advertiser people like this in the 1961-62 BROADCASTING YEARBOOK when it comes off the press on September 17? Guaranteed circulation: 18,000 copies. Same rates, same space sizes as every issue of BROADCASTING. Final plate deadline: July 29. Reserve the position you want - TODAY - before somebody else gets it! Wire or call collect to nearest BROADCASTING office now!
Remarkable Burgess engineering developments have produced an audio tape of superlative quality.

1. Micro-finished surface and built-in lubrication eliminates tape squeal and reduces recording head friction.

2. Improved pre-coating process produces a superior bond, eliminating flake-off so that recording heads stay clean.

3. Revolutionary dispersion process produces tape with high sensitivity, extraordinary frequency response, eliminating print-through, and delivering mirror-like sound reproduction.

NAB REPORTS '60 RADIO, TV PROFITS MARGINS ALMOST SAME AS '59

The profit margins of U. S. radio and tv stations changed very little last year from that in 1959, compilations by NAB's broadcast personnel and economics department indicated last week. The report was released by James H. Hulbert, department manager.

The NAB figures, obtained from information furnished by all classes of stations, showed the typical radio station's profit margin dropped in 1960 only fractionally from 1959—to 7.6% before federal taxes from 7.7% in 1959.

The typical tv station's profit rose slightly—from 14.3% in 1959 to 15.4% in 1960. Total revenue for the typical tv station was more than $904,000, up 4.5% from 1959, while total expense was up 3% to about $765,000.

Revenue for the typical radio station increased 5.6% in 1960, but average expenses were up 6%, the report said. Radio stations in larger markets had a reduction in profits; those in smaller markets were up slightly.

The average radio station anticipates increased revenues of about 2% in 1961, NAB said. Tv stations expect a 4.5% increase in revenues.

The typical tv station's sales dollar was split up this way: 43 cents from national and regional advertisers, 31 cents from local advertisers and 26 cents from network sponsors. The only change in

The new owners of KIOA Des Moines were given a royal welcome to that city at a party given by Meredith Publishing Co. The acquisition for $600,000 (Broadcasting, May 8) made KIOA part of the Star Broadcasting Co. Over 100 guests attended from Meredith Broadcast-
TPT registers $5 million debentures at SEC
Funds to be used to expand CATV and build pay TV

TelePrompTer Corp., New York, has big plans for pay TV and CATV. To help implement the plans, it filed to register $5 million in convertible subordinated debentures with the Securities & Exchange Commission last week. The debentures, due 1976, will be offered for public sale on an all or none basis.

The proceeds of the stock sale will be used in connection with TPT's CATV system in Eugene, Ore. ($400,000), to repay bank loans ($500,000) and to add to its working capital ($100,000). An estimated $3 million of the proceeds will be used for acquisition and construction of additional CATV systems. About $750,000 will be used in development of new products, mainly TPT's "participation" pay-TV plan, Key TV.

Included in the stock proposal filed with the SEC by TelePrompTer is 26,000 shares of common stock (valuation per share $26.50) which the company will exchange for all stock in Pacific Telescription System which operates a CATV system in Santa Cruz, Calif. This system has 3,100 subscribers. Its income for the 10 months ended April 30, 1961 was $158,068 and its net earnings (including special tax credit) $46,116.

TPT makes 18% of its gross revenues from CATV systems. The systems (with number of subscribers) are located in Silver City (1,000) and Farmington (3,500), both New Mexico; Rawlins, Wyo. (1,500), Liberal, Kan. (2,000), Eugene, Ore. (5,000), Elmira, N. Y. (2,700), Springfield, Ore. (750), and Coquille, Ore. (1,300). TPT in conjunction with Kaiser Industries is constructing a CATV system in Hawaii Kai, a suburb of Honolulu, which it said "must serve as the test system" for its Key TV. Two weeks ago, TPT President Irving B. Kahn said the company's pay-TV plans were proceeding ahead of schedule (At Deadline, July 3).

TPT had gross revenues in fiscal 1960 of $4,841,083 with net earnings of $51,969. The company's stock is listed on the New York Stock Exchange and has fluctuated considerably in 1961—from a low of 9 3/4 to a high of 31.

Mr. Kahn, president and board chairman, receives an annual salary of $32,066, according to the prospectus. Edward C. Reveaux, vice president—programs and productions, gets $33,333.

The company has outstanding 693,695 shares of common stock.

NEWSPAPERS THAT MEAN BUSINESS IN SAN DIEGO

With furniture-household-appliance store sales of more than $83 million last year, San Diego County ranked 11th among the nation's 200 leading counties in this category. Two metropolitan newspapers sell the important San Diego market: The San Diego Union and Evening Tribune. Combined daily circulation is 228,437 (ABC 9/30/60).

'Coronet' magazine ceases publication

Coronet magazine last week decided to end publication with its October issue. Esquire Inc., publisher of the 25-year-old national magazine, blamed rising production costs and declining advertising. Trade circles pointed to Coronet's folding as another unsuccessful example of the magazine field's competitive struggle with television. (See editorial, page 98).

As the New York Herald Tribune editorialized Wednesday (July 12) on Coronet's demise:

"Mass magazines are adjusting with some difficulty to their changing role in an age of television, which, like the magazine, offers both words and pictures to a nation-wide audience."

Coronet's passing was preceded by Collier's in 1956, and earlier by Woman's Home Companion and The American Magazine. Collier's publisher, Crowell-Collier, has since diversified by acquiring broadcast properties. Esquire, too, has entered broadcast media. It owns WQXI Atlanta.

Changing hands

ANNOUNCED • The following sales of station interests were reported last week, subject to FCC approval:

- KCUB Tucson, Ariz.: Sold by Ralph R. Boffard to Oscar I. Dodek for $225,000 plus $25,000 for agreement not to compete. Mr. Dodek is a Washington, D. C., businessman who also owns KABQ Albuquerque, N. M. Maxwell M. Marvin, formerly with radio stations in Washington, Annapolis (Md.) and Dover (Del.) will be executive vice president and general manager. Mr. Marvin holds these same positions at KABQ. KCUB operates fulltime on 1290 kc with 1 kw.

- WNEL Caguas, P. R.: Sold by Eduardo Biascoechea and associates to Jack Sterling, WCBS New York, radio personality, for more than $150,000. Associated with Mr. Sterling are James Miller, Arthur P. Lawler and William Rockwood. WNEL is on 1430 kc with 1 kw daytime and 500 w at night.

- WOOK-TV Washington, D. C.: Construction permit sold by Richard Eaton to Automated Electronics Inc. for $30,000. Automated Electronics is a Dallas firm, headed by Roland S. Bond Jr. The ch. 14 cp has been held by the Eaton firm since 1954; the station has never been constructed.

APPROVED • The following transfer of station interests was among those approved by the FCC last week (for other commission activities see For The Record, page 82).

- KCMJ Palm Springs, Calif.: Sold by Louis Wasmere and Cole E. Wylie to New York attorneys Morris H. and Ber-
nard Bergreen for $490,000 including real estate. Mr. Bergreen has a minority interest in WTBO Cumberland, Md. Mr. Wylie retains his interest in KREW Sunnyside, Wash.

Farm directors get agriculture briefing

The nation's tv and radio farm directors came to Washington last week and crammed spools of tape, for broadcast to their home audiences, with speeches and interviews from leading agricultural officials of the federal government.

They went away convinced that the regulatory climate in Washington means more and better farm programs for tv and radio stations.

"There is a definite indication," George Roesner, KPRC-AM-TV Houston, president of the National Assn. of Tv & Radio Farm Directors, said, "that tv station management is taking a greater interest in farm programming. There's no doubt there will be more from now on."

Mr. Roesner agreed that the impetus for this comes from the current campaign by FCC Chairman Newton N. Minow and others in the Kennedy administration for more public-affairs programming.

Farm programming, always a significant element in farm area radio schedules, has been more a token gesture on tv stations. Farm programs on tv range from 15-minute daily to 30-minutes weekly, according to a consensus at the NATRFD summer meeting.

The farm directors were also advised:

• That 28% of the gross income of radio stations, and 24.3% of the gross income of tv stations, come from their farm departments. This was reported by NATRFD's sales promotion committee. It was based on a questionnaire sent to 300 radio farm directors (with about one-third responding), and six tv agriculture directors. Marvin Vines, KTHS-KTHV (TV) Little Rock, Ark., chairman of the committee, pointed out that these results were tentative; a final report will be presented at the annual Chicago NATRFD meeting Nov. 24-26 at the Conrad Hilton Hotel there.

• That farm directors should be more closely identified with station policy. This was urged by NAB President Le-Roy Collins, who also called for more farm programs. Gov. Collins defended his position in advocating more "quality" programming on tv and radio.

• That the Department of Agriculture modernize its audio-visual activities by securing video tape and sound-on-film facilities in order to better serve tv farm programs.

WMGM $11-million sale goes down drain

DEAL DIES AFTER FCC QUESTIONS C-C PROGRAMMING

The record high price for a single radio station—the $11 million to be paid for WMGM New York by Crowell-Collier Publishing Co.—evaporated last week. The transaction collapsed following the FCC's questioning of Crowell-Collier station operations (BROADCASTING, July 10).

Under the terms of the contract between Loew's Theatres Inc., licensee of WMGM, and Crowell-Collier, if the FCC had not approved the sale by July 10 the transaction expired unless both parties agreed to extend the deal. Neither made any move to do so, it's understood, and the contract, thus, automatically ceased to be binding.

Some conflict developed as to whether the sale had been called off by mutual consent, Arthur Tolchin, executive vice president of WMGM, said Loew's initiated cancellation of the sale. A spokesman for Crowell-Collier claimed the cancellation was by mutual consent.

When asked if Loew's would continue to operate the station, Mr. Tolchin said: "Most assuredly—full speed ahead." WMGM, one of New York's top independent stations, operates with 50 kw on 1050 kc. It was founded in 1922.

In its letter to Crowell-Collier, the FCC questioned some of the programming practices by C-C stations (KFWB Los Angeles, KEWB San Francisco-Oakland and KDWB Minneapolis-St. Paul). The agency said it had complaints that some programs were in bad taste, vulgar and suggestive, and that the Los Angeles and San Francisco stations had broadcast announcements alarming the populace. C-C was given 30 days from July 6 to answer the letter of inquiry.

A Crowell-Collier spokesman said that all three stations have been operated in the public interest and that "we are confident the FCC will find this to be the case."

C-C has also contracted to buy WGMS-AM-FM Washington from RKO General Inc., paying $1.5 million for the good music station. This deal is involved in the whole RKO General-NBC transaction.

WIN'S Sale Extended • Last week it was reported that the $10-million sale

1. $200,000.00—on terms. 1000 watt daytimer with FM in lovely New England market. Grossing $130,000.00, owner-operator potential, cash flow—very lucrative.

2. $600,000.00—on terms. Low frequency radio station licensed to adjacent market, but covering with 25 MY/M over entire metro area of one of the top eight markets. Offices and studios in the big market.

3. $170,000.00—29% down. Fulltime 5 kw radio station in northeast—offering excellent living to owner-operator.

BROADCASTING, July 17, 1961
of WINS New York by J. Elroy McCaw to Storer Broadcasting Co. had been extended for another six months.

Speculation had been rife that this transaction also might be called off because of the FCC’s action in holding up the New York station’s license renewal. The contract, extended once to July 10, was extended again for another six months.

In its letter of inquiry to WINS, the FCC said it had uncovered instances of payola and questioned whether the station’s license could be renewed without a hearing (Broadcasting, July 10).

ABC Radio schedules four affiliate meetings

ABC Radio has scheduled its annual series of affiliates meetings for the last two weeks of August. At each of the four regional meetings, network management will present a progress report, define present problems and outline plans for the future, as well as allowing time for an exchange of ideas between management and representatives from the affiliated stations.

The schedule of meetings:

Have rickshaw, will travel

If WFBC-TV Greenville, S. C., wants to assign newscaster Lee Kanipe (above) to cover a story in the Orient, the mobile equipment is available. Like many other stations, WFBC-TV has a complete array of trucks, station wagons etc. But its latest addition is this deluxe rickshaw, (known as a “pedicab” in the Orient) which also sees service in local parades and on certain studio shows.

Crowell-Collier has labor problems, too

AFTRA STRIKES KFWB LOS ANGELES IN WAGE DISPUTE

The Los Angeles chapter of the American Federation of Television & Radio Artists called about 20 of its members from their jobs at KFWB, Crowell-Collier station that city, last Tuesday noon (July 11).

Reason, according to a news release issued the day before by the union, was that the “present wages of $173 do not reflect the large profits and the number one position of the station as claimed by the management.” KFWB, on its part, points out that its present base scale of $155 a week for news-casters—the only ones actually concerned, as the station’s disc jockeys are personalities working under individually negotiated contracts—has been augmented by merit increases bringing that base up to the figure quoted by the union.

Since the strike hour, KFWB has kept on the air and, to the casual listener, at least, sounds just like it always did, with perhaps a little more verve than usual injected by the strike situation into the voices of the management personnel who are manning the mikes. For several of them, like program vice president Chuck Blore, it represents a return to their former deejay occupation.

On the business side, late last week KFWB said it had not had a single cancellation of an advertising contract due to the AFTRA strike.

Background to the strike is this: KFWB is one of a group of 17 independent radio stations in the Los Angeles area whose AFTRA contracts have expired and are currently negotiating new contracts as a group (Broadcasting, July 10). For the group, AFTRA originally asked a $25-a-week increase across the board. Later AFTRA reduced this demand to $10 the first year and another $10 the second year of a two-year contract.

But the union singled out KFWB to ask that the base scale be raised from $155 to $250, $225 plus an extra $25 for rewriting the news and called for individual negotiations of this wage demand, apart from the group. After some discussion, AFTRA dropped its demand to a $225-a-week per newscaster. KFWB offered the union a new three-year contract with increases in base scale of $15 the first year, $7.50 the second and $7.50 the third, or $30 over the three-year period. (KFWB’s nearest competitors now have AFTRA base scales of $167.50 for KMPC, and $152.50 for KLAC.) AFTRA demands on these stations were the same as for the group—a flat $25-a-week increase. To its present employs KFWB offered an increase to $195 a week, immediately, with further raises to $207.50 the third year. The station offers were rejected and the strike began.

Robert M. Purcell, president, Crowell-Collier Broadcasting Corp. (licenssee of KDWB Minneapolis-St. Paul and KEWB Oakland-San Francisco as well as KFWB), was in the East during the period of the AFTRA negotiations. (Crowell-Collier’s option to purchase WMGM New York for $11 million terminated Monday [July 10] when the FCC by a 4-3 vote refused to approve the transfer pending an investigation of the operations of the three present C-C stations [Broadcasting, July 10]) (see story, page 69). On Monday, Mr. Purcell said he telephoned Claude McCue, executive secretary of the Los Angeles chapter of AFTRA, asking that any strike action be withheld for a few days until he could complete his business in the East and familiarize himself with the union situation on his return to Los Angeles. This request was denied. The strike commenced Tuesday noon.

On Wednesday, station and union representatives met in the offices of Federal Mediation & Conciliation Service Commissioner Jules Medoff. Mr. Purcell, who had arrived in Los
Battle of the signs

Pickets carrying signs “on strike. KFWB is unfair” no sooner appeared in front of KFWB’s headquarters on Hollywood’s Hollywood Boulevard than they were joined by other pickets. These were not hired by AFTRA but by KFWB. Their signs were not white, but vivid orange. Their message: “KFWB is not fair. It’s great.”

Angeles late the previous evening, asked for time to familiarize himself with the situation and the meeting ended, with no date set for another, although presumably one will be held early this week.

Pre-strike negotiations were conducted for KWB by Jim Simons, station manager; Theo Sanders, assistant to the president; Charles Blore, vice president, and Bruce Baumeister, attorney. AFTRA was represented by Mr. McCue, Leonard Chassman, AFTRA field representative, and David Ziskind, attorney.

Also on Wednesday, Harry Maizlsh, who sold KFWB to Crowell-Collier in 1956 for $2.47 million (Broadcasting, Sept. 3, 1956), wired W. D. Cole, board chairman of Crowell-Collier Publishing Co., parent of C-C Broadcasting Corp., expressing a desire to repurchase the station. Mr. Maizlsh, owner of KRHM (FM) Los Angeles, made no firm offer in his wire, nor did he mention any purchase price.

Mr. Cole’s answer was terse and to the point: “Dear Harry—Not a chance. Bill Cole.”

AFTRA negotiations with the independent stations as a group are in abeyance and apparently will remain so pending an outcome of the KFWB strike. Meanwhile, the independent stations group is about to commence bargaining with IBEW local 45 for a new contract to succeed the one expiring June 30. IBEW’s original proposals are for a two-year contract with an across-the-board increase of $12.50 the first year and $7.50 the second for technical employees and a four-week annual vacation with pay.

Four RFE winners named

Station winners in the 1961 nationwide broadcasting competition for support of Radio Free Europe are WBZ Boston, WEIL Scranton, Pa., KCMO-TV Kansas City and KPIX (TV) San Francisco. The awards for promotional efforts to secure support from American citizens for the Radio Free Europe Fund were announced July 11 by W. B. Murphy, president of Campbell Soup Co. and board chairman of the RFE fund. The winning stations will send representatives on a European tour, including an inspection of RFE facilities in West Germany and Portugal.

New ‘Open End’ series to have a ‘closed’ end

A new two-hour version of Open End (with a period at the end of the title to designate its limited time status) will probably be presented by Metropolitan Broadcasting Corp. on all its TV stations beginning Sept. 10.

The series will be jointly owned by MetroMedia, parent company of Metropolitan Broadcasting, and David Susskind, moderator and host of the discussion programs. Negotiations were in the final stages last week.

It also was reported that negotiations are complete National Telefilm Assoc. will be granted tv distribution rights to the series outside Metropolitan’s own distribution area. The series originated on an NTA-owned station, WNTA-TV Newark-New York (sold last month to an educational-tv group, Broadcasting, July 3), in 1959 and was subsequently syndicated by the station owner in many major markets.

Some controversy seemed sure to develop over who owns rights to the series, with Mr. Susskind emphatically maintaining that they belong to him. Talent Assoc.-Paramount Ltd., the tv packaging company of which Mr. Susskind is executive producer, will have nothing to do with the presentation of the series.

Plans call for Open End, to be telecast every Sunday (9-11 p.m., EDT) to Metropolitan stations WNEW-TV New York; WTTG (TV) Washington, D.C.; WTVH (TV) Peoria, Ill.; WTVP (TV) Decatur, Ill.; and KOVR (TV) Stockton-Sacramento, Calif. It will be taped at WNEW-TV New York, with one program every month originating from WTTG Washington, D.C.

WDSU-TV uses Visual gear

Visual Electronics Corp., N.Y., announced the installation of its Visual 6000 television program automation system at WDSU-TV New Orleans and operation was to have begun July 15. The equipment switches video and audio signals automatically on the air in accordance with the station’s program schedule, thus providing smoother programming in the very active station break periods and reducing the technical operator’s workload, the company said. Self-checking features are included at all times to provide automatic error-free operation. WDSU is the first station to adopt this system, the company said.
Two new seeing-eye satellites in orbit

The United States had two more sky-scanning satellites orbiting the earth last week—and one of them was known to be using tv cameras; the instruments of the other, the super-secret spy-in-the-sky Midas III, have not been divulged.

Titos III, launched from Cape Canaveral, is the meteorological satellite which contains two wide-angle tv cameras (BROADCASTING, July 10). This is a major change from the previous Titos satellite which contained one wide angle and one narrow angle tv camera. The new weather surveyor, which radios pictures of cloud formations back to earth, is circling the earth every 100 minutes in an orbit that ranges from 460 miles to 506 miles above earth. Photographs already received by U. S. meterologists were termed “excellent.”

The Midas surveillance satellite is a microwave tower capable of supporting two platforms and six horn antennas from heights of 25 ft. to 500 ft. Now in service in Northwestern Canada by Alberta Government Telephone, for whom it was designed, the tower is the first of its kind to be used for horn antenna support, according to Stainless. Material, installation and maintenance costs are said to be reduced by one-third.

Radio-tv production, sales rise for May

Production and retail sales of both tv and radio rose in May, Electronic Industries Assn. reported last week. But the cumulative figures for the first five months of the year are running behind the comparable period for 1960 except that radio retail sales are up by almost 300,000, EIA said.

EIA reported the following for the first five months of this year:

<table>

* Includes 113,191 tv receivers with uhf tuners (compared with 210,602 such receivers in same period last year).
** Includes 1,863,781 auto radios and 267,737 fm radios (compared with 2,720,222 auto radios and 339,516 fm radios last year).
*** Excludes auto radio sales.

Tower for horn-antennas

Stainless Inc., North Wales, Pa., and its Canadian subsidiary, Walcan Ltd., have introduced a new microwave tower capable of supporting two platforms and six horn antennas from heights of 25 ft. to 500 ft. Now in service in Northwestern Canada by Alberta Government Telephone, for whom it was designed, the tower is the first of its kind to be used for horn antenna support, according to Stainless. Material, installation and maintenance costs are said to be reduced by one-third.

DCA announces plug-in converters for fm stereo

Dynamics Corp. of America has started production at its Farmingdale, N. J., plant of broadcasting equipment which can immediately and without station “down-time” convert all existing fm radio stations to stereo broadcasting, the company said last week. The stereo conversion equipment ranges from complete 20 kw fm stereo transmission systems to small typewriter-sized “plug-in” conversion units.

Developed by DCA’s Standard Electronics Div. to meet recently set FCC standards, the company said, first orders for the new equipment have been received and filled. The equipment line includes standard electronics stereo generator 935, the self-contained plug-in converting unit; a combination stereo generator and standard electronics ser-rasoid modulator, which can convert any existing fm station to stereo, and the 20 kw stereo transmitter (equipped with stereo generator 935), which functions as a complete transmission system for newly authorized stations and existing stations requiring new or additional transmitters.

Technical topics...

Western division • Melpar, Falls Church, Va., a subsidiary of Westernhouse Air Brake Co., announced the establishment of a new division, Western Engineering Laboratories, Northridge, Calif. Edward M. Bostick, president, says the new division was created to provide increased service capabilities and liaison between Melpar and expanding defense department operations on the West Coast. Arthur N. Corner, formerly head of Melpar’s production division, was named general manager.

Magnavox split • Magnavox Co., Fort Wayne, Ind., has been authorized by stockholders to split stock on a three-for-one basis. Magnavox, which reported record first half sales and earnings, will increase the number of shares from 3.5 million to 10 million and will make a 50% increase in the dividend rate. The stock split is effective July 20, and the new stock will be issued Aug. 3. In the first half of 1961, sales were up approximately 20% to $61,793,000, compared with $51,764,000 in the same period in 1960. Estimated net income rose approximately 38% to $2,540,000 from $1,844,000 in the 1960 six-month period.

Sylvania expansion • Sylvania Electric Products Co. will add 81,000 square feet of manufacturing space between mid-August and next spring, a 40% increase, because of “unprecedented product demand” for the company’s semiconductor devices and materials. Plant additions will be made in Woburn, Mass., and Hillsboro, N. H. Sylvania predicts semiconductor sales in 1961 will rise to about $400 million from the previous record of $301 million in 1960.

Mike line • University Loudspeakers Inc., White Plains, N. Y., has announced its new line of professional microphones, which feature interchangeability between any of the mikes and a complete set of adapters. The line consists of two omni-directional and two cardioid microphones, two lavaliers and five adapters.
WLEE wants to start an ‘idea bank’

STATIONS WOULD EXCHANGE SUCCESS STORIES

WLEE Richmond, Va., wants to set up an exchange whereby radio stations can benefit from each other’s successful ideas. According to David E. Lyman, WLEE program director, a similar plan is already in use by six leading Canadian radio stations.

Basic idea is that each participating station in the exchange is to prepare a detailed report on all unusual or successful sales efforts, sales or station promotion schemes, contests and programming during the preceding month. The mimeographed report is mailed to all other participating stations.

No cash is involved, Mr. Lyman said; agreement to file the monthly report on time is the only requisite. Specifically, the following rules would apply:

- Participation would be limited to one station in each of the top 75 markets.
- Each station must be one of the top two in its market, according to a recognized survey.
- Canadian stations wishing to participate (if any) must be in one of the top 10 Canadian markets.
- Each station wishing to participate must be approved by all present participants, to avoid conflict with operations with stations in several markets. A list of stations applying will be mailed to all present participants, and participants will be given 15 days to reject any of these new stations. Automatic participation will be granted after 15 days if no objections arise.
- All participants must agree to keep all reports confidential, and for their own use, and a participant must obtain permission from the issuing participant before releasing a report, or portion thereof, to a third station.

Interested stations should contact Mr. Lyman at WLEE.

WMT-TV points to where the good tv shows are

The public-affairs programming of all area television stations is being promoted by WMT-TV Cedar Rapids, Iowa. Regularly scheduled spots give specific information on the CBS station’s programs and those of its competition—KCRG-TV Cedar Rapids (ABC) and KWWL (TV) Waterloo (NBC).

William B. Quarton, WMT-TV general manager explains, “One reason television is criticized is that not enough people appreciate the full scope of what’s going on. We believe there’s

Big mail pull • Nearly 165,000 pieces of mail were received by KOV Pittsburgh in an eight-week period. Magnet for all the correspondence was a contest with two-million trading stamps for prizes.

Low cost • To promote a new Pinocchio film series, Telefilm of Canada, Toronto, sent postcards to 525 tv stations, agency and company executives. Each day a new card was sent, with the last one giving the clue. For low campaign-cost of $600, Telefilm received nine phone calls, arranged five screenings.

Prize winner • KLAB Klamath Falls, Ore., won a trophy for its “float” in a local parade. The entry—a live donkey—carried a sign reading “Everyone listens to KLAB but me (and you can see what I am!).”

Teenage script writers • Two teenage high school students have been named winners of WABC-TV New York’s youth tv script writer competition and both have been retained for the summer months to develop their entries into possible programs for fall presentation. Susan Brown of Greenwich, Conn., and David Gingold of North White Plains, N. Y., will have eight weeks to develop their 500-word script outlines into workable half-hour shows. The facilities of all pertinent WABC-TV departments will be made available to them.

INTERNATIONAL

Canada gets a tv selling organization

SETH TO DIRECT CANADIAN Tvb LTD., SUPPORTED BY U.S. Tvb

Formation of Canadian Tvb Ltd. and the appointment of William R. Seth Jr. as its director, effective Aug. 1, were announced last week by Ralph Snelgrove of CKVR-TV Barrie, Ont., chairman of the new bureau’s temporary executive committee. and Norman E. Cash, president of Tvb (U. S.).

Mr. Seth, formerly in charge of the Colgate-Palmolive television unit at Lennen & Newell, New York (see Fates & Fortunes, page 74) will be based in the New York headquarters of Tvb but will commute frequently to Canada and is expected to establish offices of the new organization in Toronto shortly.

Mr. Cash said Tvb would give “full support” to the new organization in its early years, making available the facilities and information of the U. S. bureau. Membership in the Canadian bureau will be open to stations, networks and station representation firms.

Mr. Snelgrove said contacts by the organization’s project committee indicated almost 100% support by Canadian tv stations. Establishment of an independent selling organization for Canadian television was recommended by the membership of the Canadian Assn. of Broadcasters last year, and the formation of Canadian Tvb Ltd. has been approved by the CAB board.

CAB President Don Jamieson of CJON-TV St. John’s, Newfoundland, said the temporary executive committee would include, in addition to Chairman Snelgrove, Jean A. Poullet of CFCM-TV Quebec, W. D. McGregor of CKCO-TV Kitchener, Ont. and Roy G. Chapman of CHBC-TV Kelowna, B. C.

Mr. Snelgrove noted that “television has grown rapidly in Canada—87% of all homes are tv-equipped and 75 stations are on the air—with the result that the Canadian advertiser needs all the help he can get to obtain maximum efficiency for his dollars. Canadian Tvb Ltd. has been formed to increase the advertiser’s and agency’s knowledge of the medium by documenting local, regional and national success stories, providing brand expenditure figures for advertisers and compiling significant audience information.”

He said the work of Tvb in the U. S. “has shown Canadian members the value that can be obtained through the assistance of a television selling organization. . . . We are indebted to the Television Bureau of Advertising for its support and assistance in making this new organization possible.”

Two Ontario outlets get permission to quit CBC

The Board of Broadcast Governors has released CHCH-TV Hamilton, Ont., and CJSS-TV Cornwall, Ont., from conditions in their licenses requiring them to belong to the CBC national network. The July 6 announcement said the condition would be lifted as of Sept. 30 for the Cornwall station; the effective date for CHCH-TV will be announced later.

The decision in regard to CHCH-TV followed strong opposition from the...
CBC against loss of its Hamilton affiliate. However, the board noted "a substantial, and perhaps unique, degree of duplication" of network service in the CHCH-TV area, much of it coming from the CBC's key network station CBLT (TV) in Toronto, only 43 miles from Hamilton. The board also said a proposed change of CBLT's transmitter site could strengthen network coverage in the area. CHCH-TV is owned by Niagara Television Limited.

In the case of CJSS-TV, the board noted that the CBC had questioned the desirability of network affiliation from the first, but that affiliation had been sought by the original applicant. Since then the station had been sold to Cornwall Broadcasting Ltd., which requested the change. Again, the board noted considerable duplication of network service within the Cornwall area.

CJSS-TV plans to join the new CTV Television Network. CHCH-TV has no plans of joining the CTV network.

Cassidy describes rise of Japanese advertising

Japanese advertising expenditures have increased nearly tenfold in the past decade, H. E. Cassidy, president of the McCarty Co., Los Angeles advertising agency, told the Los Angeles Advertising Club on his return from a visit of several weeks in that country. He said advertising in Japan has kept pace with the industrial output, now nine times the prewar level.

Mr. Cassidy credited much of the advertising growth to the broadcast media. Commercial radio, he reported, started in 1951 with billings of $1 million, and in 1960 totaled $50 million. Commercial television began in 1953, when there were only about 1,000 TV receivers, with billings of $1.5 million. In 1960, the TV set count had risen to 3.5 million and the billings to $107 million. There are now about 14 million licensed radio sets in Japan, he said. Since there is an ownership tax on both radio and TV sets there is a tendency to conceal ownership where possible.

Japan's four islands have a total area about 7% that of California and a population of more than 93 million people. 10 million in Tokyo alone. With a literacy rate of 98%, Japan supports more than 100 daily newspapers, some 1,500 magazines and 106 radio and 50 TV stations.

In 1947, Mr. Cassidy said, newspapers got 75% of all Japanese advertising; today the figure has dropped to 42%. Television now accounts for 17%. Radio 11% and outdoor displays 23%.-25%. Of some 200 advertising agencies in Japan, 57 belong to the Japanese Assn. of Newspaper & Broadcasting Advertising Agencies.

CBC'S COMMERCIAL TV REVENUE DROPS

Decrease laid at doorsteps of new private stations

Commercial revenue of the Canadian Broadcasting Corp. dropped last year, at least partly because of competition from privately owned television stations which opened in eight cities formerly reserved for the publicly owned CBC.

In its annual report for the year ending March 31, 1961, the CBC said its gross commercial revenue for the year was $37,601,000, about $1.5 million below expectations and $560,000 less than 1959-60. CBC President J. Alphonse Ouimet commented: "The launching of second stations in eight major centers covering more than 50% of the population came late in the period under review. Particularly in the last quarter of the year, these stations were participating in the available advertising dollar with an appreciable effect on CBC's commercial revenue.

"This deterioration of the anticipated commercial revenue position came despite increasing energetic efforts on the part of our commercial staff. It was also due partly to a reduction in the advertising budgets of business generally."

Full Impact • Mr. Ouimet predicted that the full impact of second stations will be felt in the current year, and that establishment of a new privately owned TV network may have a further effect on income.

"The corporation has come to the end of a phase in its commercial operations, and it cannot necessarily expect as high a proportion of its revenues from this source as in the past," Mr. Ouimet concluded.

Mr. Ouimet said the second stations posed no programming problems during the 1960-61 year. Despite their novelty appeal, they did not divert a major portion of the over-all CBC audience.

"Indeed, in some of the larger centers which have for some years been served by U.S. outlets, the second stations appeared to have gained most of their audience from the viewers of U.S. stations."

He said there was an effect on audience viewing from the new stations, but that it was still too early to tell whether the current viewing pattern was firmly established or was due largely to audience curiosity about the new stations. CBC stations had no serious audience loss to second stations in such key markets as Montreal, Toronto and Vancouver, where service from other stations was already available, and generally speaking, CBC stations in these areas are leading the field in viewing for appreciable sections of their broadcast day.

Disastrous Move • Mr. Ouimet also warned against any move to split the CBC's national network in order to allow for use of CBC affiliated stations by independent networks. He said such a step could be "disastrous to Canadian broadcasting in the long run," and that his opinion is shared by both public and private broadcasters within the national service.

In an accompanying statement, the CBC board of directors also said that CBC should continue to oppose "any developments which tend to disturb the present long-established relationship between CBC and its affiliated stations, and that in particular the corporation should oppose any proposal involving the splitting of networks whenever such proposals tend to divide the component parts of CBC television networks in a manner detrimental to the maintenance and development of the national television service."

But on the same day, the Board of Broadcast Governors, the Canadian regulatory body, announced that private stations CHCH-TV, Hamilton, and CJSS-TV, Cornwall, Ontario, have won
release from their affiliation agreement with CBC.

The report showed that total operating costs for the year were $100,952,-
825, of which $59,288,476 was received from public funds. The CBC had returned to the federal treasury $2,796,-
54 which it had saved from the operations appropriation voted by Parliament. It also returned an unexpended amount of $2,063,172 from its capital grant.

Operating expenses for the year increased 7.4% over 1959-60. In comparison, the 1959-60 increase over 1958-59 was 7.7%.

Other points made in the report:
Long-range plans for tv development should include CBC stations in Saskatchewan, New Brunswick, eastern Newfoundland, and Prince Edward Island.

The CBC does not intend to modify its policy of providing a balanced and varied service in order to meet local competition from the new private tv stations.

The CBC should retain the right to refuse to disclose CBC news sources except when the withholding of such information would be in contravention of the law.

The CBC should take steps to open a tv outlet in Quebec City.
Tv coverage in Canada has been extended to over 90% of the population.

Canadians warned to seek fm

Some Canadian fm channels may be lost to the U.S. by default if Canadian broadcasters do not occupy them, the Board of Broadcast Governors warned in its annual report on July 6.

The national regulatory board said it is concerned particularly about fm channels allocated to centers in southwestern Ontario, and pointed out that these channels could best be protected by having them occupied.

It said fm development has been relatively slow in Canada for a number of reasons, especially the impact of tv stations established during the mid-50s, but that interest has increased in recent years in both the industry and audience.

However, said Board Chairman Andrew Stewart, fm stations are being established in the U.S. at so much faster a rate than in Canada, that this could affect the Canadian position on channel rights.
The board felt that, given favorable encouragement and conditions, fm could grow into the major or primary service in many parts of Canada. But while the board wished to encourage the growth of fm broadcasting, it was concerned with maintaining a higher quality of broadcasting on fm than many am stations are giving. It was reviewing the desirability of separate programming regulations for am and fm bands.

To assist in the financial support of fm stations, the board had advised the government to let fm broadcasters use their channel (without affecting the regular program) to pipe background music to selected customers on a commercial basis.

The board said again that Canada is not yet ready for color tv. It noted that licensing of second television stations in centers formerly reserved for the CBC will provide alternate viewing from CBC programs for 60% of Canadians, and declared that in all areas now served, Canadians receive a broadcasting service which compares favorably with that of any other country.

Grande Prairie tv outlet, 11 satellites authorized

A new CBC tv station at Grande Prairie, Alta., to serve northern Alberta and British Columbia, has been approved by the Board of Broadcast Governors. The station will operate on ch. 10 with 36 kw video and 18 kw audio with a directional antenna 967 feet high. It will handle national and regional network shows, but will not have facilities to originate live programs.

The board also approved a CBC tv satellite station in Peace River, Alta., to retransmit from Grande Prairie over ch. 7, with power of 720 w video and 360 w audio. The board denied an alternative application by Peace River Television Ltd. to establish a new tv station at Peace River with a satellite at Grande Prairie.

The board also approved eight satellites for CFCF-TV, Kamloops, B. C. The satellites, all 5 w., will operate from the British Columbia towns of Ashcroft (ch. 10), Chase (ch. 11), Lillooet (ch. 11), Merritt (ch. 10), Clinton (chs. 5 and 9), and Mount Timothy (chs. 8 and 11).

CKVR-TV Barrie, Ont., has been recommended for a satellite station at Parry Sound, Ont., with 5 w power on ch. 11. CKRS-TV Jonquiere, Que., was recommended for a satellite at Port Alfred, Que., on ch. 9 with 19 w video and 9.5 w audio.

A new radio station was recommended for Grand Falls, Nfld., to extend service in central Newfoundland. Licensee is Colonial Broadcasting System Ltd., and the station is to have 10 kw power on 620 kc. The same company was recommended for a license at Marystorn, Nfld., (560 kc with 1 kw day and 500 w night). It will carry some programs of local origin as well as those from the Grand Falls station.

The Department of Northern Affairs and National Resources, Ottawa, also received approval for a radio station at Fort Simpson, Northwest Territories, with 25 w power on 1490 kc.
A new fm station was approved at Kamloops, B. C. Licensee is Inland Broadcasters Ltd., with 910 w on 98.3 mc., ch. 252.

The board approved two new low-power relay transmitters for the CBC, at Cassiar, B. C., (40 w on 1340 kc.) and at Haines Junction, Yukon Territory (40 w on 860 kc.).

Canada set sales lag

Television receiver sales in Canada for the first five months of 1961 totalled 109,172 units as compared with 117,033 in the same period last year, according to figures of the Electronic Industries Assn. of Canada, Toronto. Radio receiver sales in January-May period of this year 168,190 units as against 189,012 for the 1960 period. But the association points out that the 1961 figures do not include sales of one of its members who dropped out recently, but whose sales were recorded in the 1960 figures.
FATES & FORTUNES

BROADCAST ADVERTISING

James R. Sanders named vp and account supervisor by North Adv., Chicago, for Toni Co. brands including Toni, Tonette, Silver Curl and Bobbi Home Permanents and Pamper Shampoo. He joined North year ago, previously was with Foote, Cone & Belding.

John Stack and David Wham, account executives, Dancer-Fitzgerald-Sample, N. Y., elected vps.

Eugene A. Raven, vp and account supervisor at Erwin Wasey, Ruthrauff & Ryan, joined Foote, Cone & Belding, New York, as account supervisor on spot radio-active Trans World Airlines. At EWR&R, Mr. Raven was responsible for supervision of KLM Royal Dutch Airlines and Trans Texas Airways. He is also former advertising director of United Air Lines.

Mary Agnes Schroeder and June McClain of Post & Morr, Chicago, elected vps. Mrs. Schroeder, radio and tv actress in Chicago, is creative executive for Post & Morr on The Many Faces of Eve campaign for Maybelline Co. Mrs. McClain is responsible for administration of General Finance Co.’s radio advertising on 79 Midwest stations.

Allen S. Klein, national sales director for Pulse Inc., named director of expanded Pacific Coast office. Mr. Klein will organize production facility to operate alongside sales-service departments.

Robert A. Dearth, former president and general manager, Morse International, N. Y., joins Kenyon & Eckhardt, Detroit, as senior vp.

Walter Lurie, senior vp and account supervisor, Grant Adv., N. Y., named executive vp in charge of international division.

William R. Seth Jr., former head of tv unit on Colgate-Palmolive account at Lennen & Newell, New York, named director of newly formed Canadian TVB Ltd. (see story page 74). With L&N since 1958, he previously was director of tv programming at MacManus, John & Adams from 1956 to 1958, was radio-tv vp of Lewin, Williams & Saylor from 1950 to 1953. He formerly was in sales development, promotion, and advertising at NBC for four years.

Curtis Kent, advertising manager of The Schick Safety Razor Co., appointed assistant to E. E. Ettinger, executive vp, Technicolor Corp. Mr. Kent’s duties will be in consumer products and motion picture divisions.

Alfred J. Scalpone, independent tv producer with 25 year background in advertising and broadcasting, has been appointed in charge of advertising for Schick Safety Razor Co. In 1958 he formed his own producing firm, La Mesa Productions, continuing to serve as program consultant to CBS-TV until last year, when he became general management consultant.

Abbott Washburn, deputy director, United States Information Agency, joins Carl Byoir & Assoc., Washington, D. C., as vp of international operations. In addition, Henry McNulty, formerly pr director, Free Europe Committee, appointed resident vp, London, and James Nolan, consultant to American corporations in western Europe, named resident vp in Frankfurt.

Abner E. Kohn, former vp, Dunwoodie Assoc., N. Y., opens own advertising and pr firm, that city.

Leonard Goldberg, formerly administrator, sales and programming research, NBC-TV, joins media department, BBDO, N. Y., as coordinator of broadcast media and planning.

Vincent F. Aiello, staff, creative department, Geyer, Morey, Madden & Ballard, N. Y., elected vp.

Lee Albright, formerly with BBDO, N. Y., joins Moss Assoc., that city, as vp in charge of creative services.

James E. Schwenck, president of Grant, Schwenck & Baker, Chicago, has resigned. Future plans were not announced at this time.

Raymond E. Wilson, supervisor of administration and communications, Shell Oil Co., succeeds Joseph Andrews as chairman of advertising administrative committee, Assn. of National Advertisers.

James H. Graham, vp and account supervisor at MacManus, John & Adams joins Benton & Bowles Aug. 1, as vp and account supervisor. He will handle Texaco account. (Earlier this month Texaco shifted its consumer advertising account from Cunningham & Walsh to B&B, effective Oct. 1).

Robert Widholm, broadcast media supervisor, Doherty, Clifford, Steers & Shenfield, N. Y., additionally appointed assistant media supervisor.

Thomas Blanchard, formerly tv-radio copy supervisor, Campbell-Ewald, Detroit, joins Kenyon & Eckhardt, N. Y., as tv-radio writer.

THE MEDIA

William P. Dix Jr., named general manager of WDAU-TV and WGBI Scranton, Pa. He formerly managed WGR Buffalo and prior to that was assistant manager and director of sales for WGR-AM-FM-TV. He was assistant general manager in charge of sales for WOR-TV New York and prior to that sales manager for WOR-AM-FM-TV.

Martin Giampo, manager of WPON Pontiac, appointed manager of Flint operations of WNEM-TV Saginaw-Bay City, both Mich. He previously had been manager of WJEF Grand Rapids, and WKZ0-TV Kalamazoo as well as general sales manager for WILX-TV Onondaga, all Michigan.

Monte DeVon appointed manager of KIMA Yakima, Wash. Mr. DeVon replaces Bob Dolph who resigned to enter his own business in another city, was previously associated with sales department of KIMA-TV and prior to that was sales manager for KODL The Dalles, Ore.

Sam Bennett appointed station manager of KXYZ Houston, Tex., Milt Willis, program director, and Bill Rozan, local sales manager. Appointments were made after transfer of ownership of station from Nafi Corp., to Public Radio Corp. owned by Lester and Max Kamin of Houston and Morris Kamin of Victoria, Tex. (Broadcasting, June 5). Lester Kamin will serve as president and general manager.

Fred Freed, producer of The Dave Garroway Today Show, named producer of NBC News and Public Affairs programs.

Wendell B. Campbell, managing director of KGBS Los Angeles, and John C. Moler, managing director of WIBG Philadelphia, both Storer Broadcasting Co. stations, elected vp’s. Mr. Campbell will become vp and managing director of Standard Broadcasting Co., wholly owned subsidiary of Storer Broadcasting, and will continue to direct KGBS. Mr. Moler was named vp of Seaboard Broadcasting Co., also Storer subsidiary. He will continue to direct WIBG operations.

John J. Lorenz, general auditor, CBS-TV N.Y., elected assistant controller and budget section manager, Eugene F. Connelly, auditor, CBS-TV, succeeds Mr. Lorenz.

Jack Onahue, national sales manager for KTLA (TV) Los Angeles, promoted to general sales manager.

R. L. (Danny) Cochran, assistant general sales manager for KXTV (TV) Sacramento, appointed general sales manager.

James E. Fuchs, sales manager NBC Films, N. Y., joins sales department of NBC-TV.

Robert R. Rogers, formerly of program sales department, Independent Television Corp., N. Y., named account executive, ABC Films, eastern division.

E. Jonny Graff, recently named general manager of WNTA-AM-FM Newark, elected president of stations. Mr. Graff who had been vp in charge of eastern sales was also member of board of National Telefilm Assn., owner of station which is being sold to educators (see page 62).

Sid Sirulnick, production and operations manager, appointed program director.

Herman Maxwell, formerly sales director for WNBC New York, appointed sales manager for WINS, that city. He succeeds Leon P. Gorman, who was also assistant to president, Gotham Broadcasting Corp. Mr. Maxwell was local sales manager for WNBC from 1956-57, and prior to that was account executive for that station.

Frank A. Orth named director of sales for WIC Providence, R. I. Mr. Orth has during past year headed own import business in New York and served as consultant to retail industry in matters relating to marketing.

Thomas R. Bishop, general manager of KAJJ Little Rock, Ark., appointed general sales manager of WSAI Cincinnati.

Bob Church, assistant merchandising manager for KTTF (TV) Los Angeles, promoted to merchandising manager.
Advertising group elects

New executives of First Advertising Agency Group were (from left to right) Floyd W. McRae Jr., McRae & Bealer, Atlanta, Ga., co-governor eastern zone; Charles E. Brown, Gould, Brown & Bickett, Minneapolis, vp; Phil Voss, Woodard, Voss & Hevenor, Albany, president; Barney McClure, Evans, McClure & Assoc., San Francisco, immediate past president; Gene Curtis, Curtis, Sarver & Wittzerman, Long Beach, secretary-treasurer; Don Johnson, Davis, Johnson, Andersen & Colombatto, Los Angeles, western governor. Not present was Walter Craigle, Grimm & Craigle, Chicago, central zone governor.

Jerry Bess, executive vp of Arkwright Adv., N. Y., appointed to newly created post of executive assistant to Hathaway Watson, vp in charge of broadcast operations for RKO General. Lloyd Webb, sales manager for WAIT and WJJD Chicago, named station manager of WJOB Hammond, Ind.

James C. Gates and Henry Stanley, both of Sandberg-Gates & Co., Los Angeles, join Weed Television Corp., that city. Mr. Gates will serve as L.A. office manager.

Frank M. Lokey Jr., assistant manager for WYZE Atlanta, Ga., named general manager of WEAD (formerly WEAS) College Park, Ga. Mr. Lokey had also served as program director, salesman and air personality while at WYZE. Previously he was announcer and air personality with WLWA (TV) in Atlanta.

Bill Wells named commercial manager of WKIS Orlando, Fla.

Roger Garrett, general manager of WBOY-AM-TV Clarksburg, W. Va., elected mayor of that city July 1.

Arthur Wittum promoted from advertising and promotion manager, KNX-CPRN Los Angeles, to director of Information Services, CBS Radio, Hollywood; Frank Oxart Jr., from program promotion and merchandising manager to promotion and merchandising manager; Sherrill Hopps from research assistant to research coordinator and William Wolff from writer-promotional material to audience promotion coordinator.

Ken De Vaney, attorney in broadcasting industry, appointed to newly created position of managing director of California Broadcasters Assn. He will maintain headquarters in Sacramento.

Dale Drake, most recently with Texas State Network, in Ft. Worth, named national-regional sales manager for KXOL. Ft. Worth. Mr. Drake started radio career with WRR in Dallas, spent four years with Crook Adv., that city, then became manager of WRR in 1948 and later transferred to Texas State Network.

Kay Shake, member of tv continuity and traffic department of KPHO-TV Phoenix, Ariz., named chief of that department. Chuck Glance, broadcast supervisor, named production manager. Clare Yares, station studio manager, named to newly created position of senior broadcast supervisor, and Blair Grant, chief cameraman, named to succeed Mr. Yares. Robert L. Hungerford, staff announcer for KTVK-TV Phoenix, joins KPHO-AM in similar capacity. Erwin Speakman Jr., cameraman and member of KPHO-TV studio staff, named to station's promotion department.

William Tilow, commercial manager, WDEE Hamden, Conn., joins WABC New York, as account executive.

Thomas L. Tiernan, commercial manager for WKKE Huntington, W. Va., named account executive for KYW Cleveland.

Don Sherman, local sales manager for WENE Endicott, N. Y., joins WTRY Troy, N. Y., as account executive, replacing Earl Karcher who joins WSET Glen Falls. Robert Trevitt, sales manager for WNBV-TV Binghamton, succeeds Mr. Sherman.

Douglas Brown and J. Myles Riley join WBRE-TV Wilkes-Barre, Scranton, Pa., as account executives. Mr. Brown had previously served with Headley-Reed and Mr. Riley as executive with national restaurant chain.

Charles Martin, merchandising manager of KTTV (TV) Los Angeles, promoted to account executive in station's sales department.

Ralph H. Daniels Jr., account executive with CBS-7 stations national sales, New York office, joins KNXT (TV)

CAN YOU TAKE A JOKE??

Well, then I must confess that it's not exactly yours for the taking, but I DO offer—at reasonable rates—a weekly script service consisting of stories, satires, humorous comments on the passing scene—40 separate pieces of various length, designed to put the light touch to your programming. It's the kind of material which, for the past ten years has stood this country boy in good stead in the big city. It would, of course, be EXCLUSIVE to you within your coverage area!

If interested—and I hope you are—write for sample script and details to:

'Plugola' comments

A late June meeting of NAB and network representatives with FCC staff members bore fruit—the commission extended the deadline on comments for its "plugola" rulemaking to July 31 with replies due Aug. 15 (BROADCASTING, July 3). The rule would require announcements when financial interests held by broadcasters or employees in projects or services are promoted over the air.

The FCC said it will be impracticable to consider the rule before the August reply date, because of the complexity of the problems raised by the rule and "the press of other matters."

WJBS DeLand, Fla.—Granted (1) renewal of license of station WJBS for 3 yrs. (2) transfer of control to Four Star Broadcast Co., Ltd., and Fort Worth, Utah C. Gill, president; transferee to guarantee payment of all FCC charges, as per FCC order. Action July 8.

WTYF (TV) ch. 19 Fort Pierce, Fla.—Granted assignment of cp to Atlantic Broadcast, Inc., (Isaak J. Fine, president, and all other stockholders have interest in KLIK Jefferson, Fla.,) and all but one stockholder have interest in KFEQ-AM-TV St. Joseph, Mo.; consideration $17,75. Action July 6.

WPX Thomasville, Ga.—Granted assignment of license of WPCW (TV), Inc. (Don C. Price, F. W. Hazelton and Hurley R. Wild, all owners, WPX and WTIT Tallahassee, Fla.), consideration $65,000. Action July 5.

WXVW Jeffersonville, Ind.—Granted assignment of cp to Electrocast, Inc. (Mr. L. R. Reed, president, retaining 44.5%, and Electronic Laboratories, Inc.) assignment $14,000. Action July 6.

KDLM Detroit Lakes, Minn.—Granted relinquishment of negative control by Herbert Gross, Jr., and Ronald M. Light through sale of 10% stock to Alver Leighton for $14,000. Action July 8.

WJPR Greenville, Miss.—Granted (1) renewal of license (2) assignment of license from Emmet Holmes and Marie Murray, to Frank Wilson Baldwin to Bruce H. Gresham and C. B. Massey. Assignment $165,000. Action July 6.

KBXQ O'Neill, Neb.—Granted assignment of license and cp to Roderick Sound Inc. (Robert W. Roderick, president); consideration $90,000. Action July 6.

KBKI Pendleton, Ore.—Granted assignment of license and cp to Roderick Sound Inc. (Robert W. Roderick, president); consideration $90,000. Action July 6.

KBBN Bowling, Tex.—Granted (1) assignment of license of station KBBN and same name and (2) transfer of control to Earl Fletcher; stock transaction and agreement that transferred $16,000 (i.e., Carlene Harlow and Carroll C. Lee) not compete in Montague County, Texas, for 5 yrs. Minnow not participating. Action July 6.

KDLK Del Rio, Tex.—Granted assignment of license of KDLL to Queen City Best, Co. (James D. Patterson, president); consideration $90,000. Action July 6.

WYDL Ashland, Va.—Granted assignment of cp to WYDL Radio Inc. (John Laurino, president); to Roderick Sound Inc. owners WYAL, Scotland Neck, N.C. Action July 6.

WHAR Clarksville, Va.—Granted (1) relinquishment of negative control by Mason C. and Marlene M. Mapes-Clark G. Merrill and (2) acquisition of positive control by William H. and Mildred G. Young; stock transaction. Action July 6.

WSEL Easton, Pa.—Granted, application, as amended, for assignment of cp from Walter J. Schell and Kenneth S. Gordon to Eagle River Bestg. Inc. (Thomas B. Beach, president); consideration $13,061 for expiration plus broker's fee of $1,000. Comr. Barley dissented. Action July 6.

KBRZ Laramie, Wyo.—Granted assignment of cp from Gradly F. and Edna Hill Minlocks, to George C. and William R. Vogel to Albany Bestg. Inc. (Leslie P. Ware, president and 50% owner, is majority owner of KWPW, Inc., KBO Potomac, both Missouri, and KZIX, Ft. Collins, Colo.); consideration $4,782. Action July 6.

APPLICATIONS

KCIN Victorville, Calif.—Seeks assignment of cp from Jerry Carr to Victor Valley Bestr. Inc., corporation of which Mr. Carr will be 100% stockholder; consideration Mr. Carr's $3,500 investment to date, plus additional $1,100. A.A.T. July 8.

WMEG Eau Gallie, Fla.—Seeks transfer of all stock in Mel-Eau Corp., from Victoria C. Martin, and Thomas Cary to Charles E. Varner and William S. Flinn (each 50%) for $15,000. Mr. Varner owns farm and 65% of department store; Mr. Kenney is self-employed inventor. Ann. July 7.

There are, in addition, 10 tv stations which are no longer on the air, but retain their licenses.

INITIAL DECISIONS

7. Hearing examiner Thomas H. Donahue issued supplemental initial decision looking toward granting application of WJOL-TV Bakersfield, Calif. on behalf of Audiocasting of Texas Inc., for leave to amend its application for new am station to operate on 1,140 kc, inland station of DA-2, in Waco, Tex., to bring current operating facilities of申请 to 50 kw, subject to future ratification of Mr. Jackson's application for new station on 1800 kc, 3 kw, D. in Gatesville, Tex., was subscription right to 25 percent of Audio stock; (2) accepting and approving agreements; and (4) directing Mr. Jackson to file petitions to dissolve the partnership, which will be granted pro forma as inapplicable corollary to actions. Action July 6.

OTHER ACTIONS

9. By memorandum opinion and order, commission granted motion by Seaport Best Co., Inc., for reconsideration of March 29 memorandum opinion which accepted application for hearing by People's Church of the Air, Inc., to show cause taken to be granted for in that order (2) ordered that any stipulation covering matters discussed in March 29 ruling, signed by counsel for both applicants for new fm stations in Philadelphia, Pa., and for Broadcast Bureau, must be filed within 30 days and, in event no such stipulation is timely filed, commission will remand proceedings with respect to both applications to Comrs. Minow and Comr. Lee not participating; Comrs. Strubble and Pendergrass.

10. By memorandum opinion and order, commission granted, May 8, memorandum opinion and order which denied petition by American Best-Para- mount Best Co., Inc., to reconsider the inaction of the commission in a case referred to it, directed against Nov. 4, 1960 grant to change facilities of WJR-TV Detroit, Mich., to 5 kw, from 129 to 139, from 99.9 to 102.5, and in a case referred to the commission, May 6, 1960, petition, fact that loss to WENR-FM reinsuring the loss to WENR-FM, reducing its power within 10 kw, to 9 kw, from 5,216,338,520,622 persons. We agree with WMRO that the number of listeners has not been shown to be sufficient to constitute commercial facilities under the terms of the act; the petition does not result in modifications of ABC's license within meaning of Sec. 316 of Act or KZA decision. Action July 6.

11. By memorandum opinion and order, commission denied petition by RTAG Broadcasting, July 17, 1961
A half century ago

A resolution commemorating 50 years of government regulation of radio communication was issued June 30 by the FCC. The commission noted that on July 1, 1911, William D. Terrell began enforcing the pioneer Wireless Ship Act that required the installation of radio equipment on passenger ships as a safety measure.

The FCC Field Engineering & Monitoring Bureau, successor to Mr. Terrell's three-man beginning, was the first U. S. entity to track the Soviet Sputnik I in 1957 and located the pirated Portuguese ship, S. S. Santa Maria, earlier this year.

Assocs. (KTAG-TV ch. 25) Lake Charles, La., for acceptance of affidavits nunc pro tunc, and dismissed its protest Feb. 9, 1960 grant of cp to Texas Goldcoast TV Inc., to move television station to Fort Arthur Tex., from 16 miles north of that city to 27 miles northeast thereof and 32 miles north of Lake Charles, increased height from 700 ft. to 990 ft., and make other equipment changes. This is Court of Appeals remand case. Chmn. Minow and Comrs. Lee and Ford dissented. Action July 6.

Commission designated for consolidated hearing applications of San Juan Non-Profit TV Assn. for translator stations on chs. 77, 78 and 83 to serve Farmington--Bloomfield Highway and Huerfano--Bloomfield Highway, N. M., from transmitters located on Huerfano Peak, N. M., by translating programs of Albuquerque stations KGKM-TV ch. 13, KOB-TV ch. 4 and KOAT-TV ch. 7. Adoption of order to conduct consolidated hearing, which serves the catv system in Farmington, which petitioned for denial, party to proceeding which will be held in Farmington. Action July 6.

By order, commission stayed its action in memorandum opinion and order released Jan. 9 when it granted to Radio America Inc. for new am station to operate on a. D., on W. Md., pending commission action on request for reconsideration of Jan. 9 memorandum opinion and order.

By order, commission stayed effective date of May 23 supplemental initial decision which looking at cost of James J. Williams for new am station to operate on 1450 kc, 25 kw, untl., in Williamsburg, Va., pending further review by commission. Action July 6.

Commission scheduled following proceeding for July 11 on am application on Sept. 14 and Sept. 15: fm application of Peoples Bstg. Corp., Trenton, N. J.; am applications of Brandwine Bstg., Conshohocken, Pa.; Boyertown Bstg., Co., Boyertown, Pa., and Dinkon Corp., N. J.; am application of Kitty Hawk, Inc. for new am station to operate on 1500 kc, 10 kw, in Kitty Hawk, N. C.

Commission scheduled following proceeding for July 8 on am application of Rockford Bstg. Assn., Ill., to move fm station from Rockford to Belvidere.

Commission granted new am station to operate on 1550 kc, 5 kw, untl., in Philadelphia, Pa.

Commission granted new fm station to operate on 95.3 mca., 75 kw, 0-3 db PE, at sunset, 95 kw, 0-3 db, at n sunup, to Sunbury Bstg. Corp., Pa., pending further review by commission.

Routine roundup

Commission on June 29 extended from June 13 to July 15 and from July 15 to Aug. 15 for filing comments and replies in proposed rule-making concerning broadcast announcements, stations and networks subject to 24 hr/day broadcasts, and pertinent to public interest, convenience and necessity.

New ATC 55

NEW AUTOMATED BROADCASTING

Now the originators and largest manufacturers of automatic tape control equipment offer the remarkable ATC 55; a simple, low cost, versatile answer to automated broadcasting. Plays up to 55 taped sounds, themes, music and production aids in sequence without resetting or reloading. Each tape is contained in a plastic magazine. Unit selects, positions, broadcasts, rewinds, disengages the magazine and moves to the next magazine and engages it ... all automatically! Frequency response at 7.5 ips is 12 db from 70 to 12,000 cps, and 14 db from 50 to 15,000 cps. Signal-to-noise ratio is 55 db, and wow and flutter are under 0.2% RMS. Write, wire or phone for complete details.

ATC Standard Units Now In Use In Over 600 Stations

Formerly distributed exclusively by Collins Radio Co., over 4,000 standard units have been manufactured and proved under "on-the-air" conditions.

TELEVISION

COMMERCIAL PRODUCTION MANAGER

There's a production manager or what some station calls operations manager who is not happy in love, the area, management or some justifiable reason. He wants an opportunity to be creative, develop talent, improve live programs, and become a part of the “team.”

The man we need must be thoroughly experienced to perform a first class job in staging, lighting, directing. Very important that he possess good business administrative ability.

Our station doesn't claim to be the biggest in the Southeast yet it is an excellent one. Affili-ated with a good network. Good staff and excellent work force.

If you want to improve your situation, here is your opportunity. Old established firm with a solid future. Programming and film buying experience not necessary, but tell us if you have such knowledge.

Salary will be attractive for our market and responsibility. $8000 and up depending on depth of experience.

Write all about yourself in letter and include a number of industry references who know your qualifications. All replies confidential. Enclose photo. Prefer man over 30 years old.

BROADCASTING, July 17, 1961
A French word that means the same thing in English: quality or state of being precise; accuracy; definiteness. It’s a precise description of an Air France pilot. Exacting. Accurate. Definite. An alert mind guiding skilled hands to precise action. Everyone expects it. Everyone who’s ever flown Air France finds it. They find something else, too. The same quality of precision in everything. Food that is prepared in the great French tradition. Service that is accurate, and attentive to every detail. Atmosphere that is friendly, enjoyable, and authentically French. Precisely what you want... precisely what you get... every time!
OUR RESPECTS to Lee Morse Rich, senior vp, Benton & Bowles

He's a 'realistic' advertising man

Ever since he was old enough to think about his future, Lee Rich wanted to go into advertising.

"Like some people want to be a doctor," Mr. Rich, Benton & Bowles' Mr. Television, expresses it.

Mr. Rich, senior vice president in charge of media and programming and a member of the agency's board, is tall. It's quite difficult for anyone to take his exact measurements for he's seldom stopping in one place long enough. (He's over 6 ft. and easily carries his 190-lb. weight.)

A whirlwind executive and audacious, Lee Rich gives the impression of always being on the move, even when behind the desk.

There are three things which best characterize the man: (1) primarily he considers himself an advertising man, (2) he's a realist and (3) he is a doer.

In Nothing Else • As an advertising man, he won his spurs early in life. And he's kept them fastened ever since.

He plays down his very early life (born in Cleveland in 1919), picking up his career after graduation from the U. of Ohio with a degree in marketing (at college, he remarks with typical antipathy to anything extraneous, "I played all bases and liked girls.")

"I thought I was a great genius of all time," Mr. Rich reflects, "but I couldn't get a job." His first: $75 a month with Lord & Thomas (now Foote, Cone & Belding).

He served four years in the Navy in World War II with a destroyer escort in the Pacific and when mustered out fell into step with his chosen field, joining the American Assn. of Advertising Agencies as an assistant. A year after the 4A's job, Mr. Rich moved to Albert-Frank-Guenther as media director and then for three years held that same position with the William H. Weintraub agency (now Norman, Craig & Kimmel). In 1952, he was with Benton & Bowles as an associate media director.

In media, he worked on buying program time periods, spot and in the general buying area (mostly in broadcast).

In 1957, he was made media director (a vice presidency was his two years earlier). By that time, he was working quite closely with Tom McDermott, who then headed programming and is now with Four Star Television (program producer). In 1959, he was elected to the board and he assumed the dual role of both media and programming in 1960. Earlier this year, he was elected senior vp.

In a nutshell, B & B consolidated the function to strengthen the role of its top executive in negotiation, giving Mr. Rich authority in both program and time period selection. Mr. Rich's explanation: "Coordinated of media and programming but no battling."

Deploring the one-man business, Mr. Rich says: "It cannot be run that way, it's too big, especially in our business. A man must be able to move fast with a minimum of mistakes."

One way, he makes it plain, is to build "a bright and able team."

Good For Others • Mr. Rich doesn't hesitate to recommend advertising as a career for others. "It's stimulating and refreshing."

"If someone is looking for a sinecure, it doesn't exist. Work must become almost the most important thing in your life."

If Mr. Rich were to review the highpoints of his balderdash career at B&B, he might get tongue-tied for his span at the agency has been anything but uneventful. Some of them:

A $5 million purchase for Procter & Gamble, which reflected a tremendous earned discount in the early years of daytime tv.

The experience of watching the burgeoning of a new (and now popular) program starring Andy Griffith — he worked closely with Danny Thomas on this (Mr. Thomas' show also displays the B&B banner).

The steady hand behind the wheel as B&B early became the first of the agency majors to recognize tv's flexibility and subsequently getting involved in packages (buying "minutes" in Rifleman, a P&G show, for various products).

While he soft-pedals intra-agency warfare, he's quick to march with the agency's colors when a media war is on. As early as 1957, he helped sparkplug a battle against triple-spotting between network shows, proposing a solution late that year nearly identical to one advanced six months later by the Assn. of National Advertisers.

Some two years back, Mr. Rich again spoke out (on behalf of clients). Target of his attack: the "discrimination" of some tv stations in charging several regional advertisers competitive to B&B clients the local rate as contrasted to the national rate his clients must pay.

Still Fighting • Currently he breaks into the news from time to time hitting his arch-foe: network control over program choice (the advertiser, he feels, finds it difficult to employ the creative function in programming and seldom can get a network to schedule its own show—most B&B shows are advertiser controlled).

A few weeks ago, he was back on the scene, this time pointing up problems—from the agency viewpoint—in the new network 40-second station break policy adopted for the fall season.

Mr. Rich's dynamic skill (he wrested immediate control over choice prime time periods from CBS-TV for General Foods' shows quite early in this negotiating season) is made up of many things:

He has "not enough time," works 7:30-8 a.m. to 8:30 in the evening, drives to and from home (he lives in suburban Chappaqua) because "I can't wait for trains." He has a photographic ability that permits him to scan a page rather than "read" called "quick study" in the theatre. Much traveled on plane (from coast to coast), he devours novels by the dozens, takes work home on the weekends (he's beset by the inevitable meetings, phone calls and screenings), reads scripts of everything put on the air.

Mr. Rich, a firm believer in tv and of advertising, even married within the business in 1952 (the former Viola Nolan, who was a timebuyer at Weintraub).

The Rich philosophy: "I'm a very fortunate man. A lot of people go through life hating what they do. I like what I do, the agency and the clients—after all, I'm working for the best" he concludes in typically terse language he employs.
Casualty and consequence

The death of Coronet magazine typifies an increasingly common publishing problem which also—and increasingly—promises to become a broadcasting problem. Coronet was a victim of the profit squeeze, caught disastrously between rising costs and diminishing revenues. It is the story of Collier's, American and Woman's Home Companion all over again. But although magazines have borne the brunt, broadcasters have begun to feel the pinch enough to know that they are not immune.

In television, especially, the costs of doing business continue to rise and give no sign of abating. Fortunately, television broadcasters have a superior medium which, unlike magazines, continues to attract a growing number of advertising dollars. But with television coverage now near saturation and with viewership not likely to expand materially (unless viewers give up either sleeping or working), the opportunities for growth are not unlimited. Only the blindly optimistic broadcaster can expect to avoid the profit pinch indefinitely. The farsighted broadcaster is attacking the problem by trying to program better, sell harder and tighten overall operating efficiency.

There is more in the passing of Coronet than that, however. The advertising slippage that sped its departure is symptomatic of the predicament faced by magazines generally. For the first half of this year, for example, general magazine lineage was down 11% and dollar revenue off 4% (Broadcasting, July 10). Facing that sort of situation, magazine business offices will not be inclined to discourage the already amply displayed enthusiasm of their editorial colleagues to scathe the television opposition at any opportunity. Thus the result is apt to be both a rougher tide of editorial criticism of television and harder anti-tv selling by magazine ad salesmen. It's not a heartening prospect, but one that television broadcasters had better get ready to face.

There is another sidelong worth pondering in the Coronet departure. Those in television who operate on the theory that the numbers mean everything might profitably spend a few moments on the fact that at the time its suspension was announced Coronet's circulation was at an all-time high. Obviously, numbers alone are not always enough. Coronet proved it the hard way.

Forms and substance

If the First Amendment applies to broadcasters at it does to other citizens of this country, the FCC has an unconstitutional purpose in mind in the new program reporting forms it proposes to adopt.

The forms themselves may not be unconstitutional, but the motives behind their issuance and the use for which they are intended are squarely in defiance of the first provision of the Bill of Rights.

As reported in this magazine last week, the new forms would require license applicants to supply the FCC with vast masses of information about their programming plans and performances. This would apply to applicants for new stations, license renewals, station transfers or major facility changes.

The added burdens of preparing applications and keeping new records would alone be reason enough for broadcasters to oppose the action.

But there is a bigger reason than that. Unless the FCC dumps all this information in the wastebasket (none would be big enough to hold it) without reading a word, it will be venturing into program control—either by order or by indirect threat. Program control in any form is specifically forbidden in the Communications Act itself, and it is certainly forbidden by the First Amendment.

The FCC does not have to revoke or refuse a license in these circumstances to exert program control. The mere collection of such detailed information is in itself an act of government surveillance over programming and, by implication, an assertion of government authority to approve or disapprove what has been or may be put on the air.

In the case of revocation or refusal of a license, the outrage against the First Amendment is more callous. Yet the FCC has already taken such a step in refusing to grant an uncontested application for a new FM station in Elizabeth, N. J. (Broadcasting, July 3).

In that case the FCC called into play its doubletalk justification for all its recent forays into programming. The applicant failed to show an effort to discover community needs, said the FCC, and therefore could not design a program schedule designed to satisfy the community.

Now if community needs are to be the criterion for judgment, the FCC has no logical use for program information in the detail its proposed forms would require. A simple description of efforts made by an applicant to divine local needs and to satisfy them would be sufficient. Even that procedure, we suggest, could easily stray into areas marked off limits by the First Amendment.

Unfortunately, the FCC has been assisted on its present course by representatives of broadcasting itself.

During the commission's extensive programming hearings in the winter of 1959-60 it was the NAB that agreed the FCC could exercise at least some degree of surveillance over programs.

As a sequel the FCC proposed new program reporting forms last February. The opportunity was then available for a correction of the association's position. The opportunity passed. In the months since then, the industry has succeeded only in refining the language and clarifying ambiguities in the original proposals. The substance of the problem has been wholly ignored.

If the FCC is to be swerved from its course that now heads straight toward censorship, individual broadcasters must rise in great numbers to throw themselves in its path. The deadline for comments on the new program forms is Sept. 7.
What is the place of radio today — and how has it changed or been forced to change? The idea that radio has to be a juke box, with a noisy cheap musical format carrying nothing but advertising announcements and pandering to the lowest tastes of the juvenile and the immature, is just not true. There are many stations in many different types of communities, who program differently, and successfully, and whose operation is certainly more “in the public interest.” P B C stations follow this kind of programming. (Taken from comments by Herbert E. Evans, President, Peoples Broadcasting Corporation, to Federal Communications Commission.)

MAXIMUM POWER TV-Twin to KRLD radio 1080, CBS outlet with 50,000 watts.
Spot tv clearing house

Long-held dream of central billing organization for spot tv may be near realization. Now in formation is new New York company, staffed by business systems experts formerly with Remington-Rand and by executives with experience in broadcast advertising. Already several major advertisers have made tentative commitments to use new service. Modern business machinery would be used to provide fast, complete and accurate billing for big or little spot tv campaigns. There won’t be announcement for another month or so.

Advertisers next

Next group to appear in study of network program practices will be major, blue chip tv advertisers. Biggest spenders in industry will be called before Chief Hearing Examiner James D. Cunningham in late September, according to current plans. Locale undecided. New York is indicated. Following advertisers, networks will be called in final phase of investigation.

Storer options

Storer Broadcasting Co., which has contracted to buy WINS New York for $10 million and concurrently sell WWVA Wheeling, W. Va., for $1.3 million, has entered new option agreements in light of FCC's recent action involving inquiry into WINS programming. It has extended option to purchase WINS from Elroy McCaw from July 10 to Oct. 10, and has procured two additional options which extend only to Storer from Oct. 10, 1961 to Jan. 10, 1962 and from Jan. 10, to July 10, 1962. Similar options were entered with Emil Mogil, Ira Herbert and Bernice Judis, principals of WWVA Inc. for their acquisition of WWVA.

Northwestern exposure

Indicative of interest aroused in symposium on Freedom of Broadcasting at Northwestern U. School of Law, August 3-4, is plan of ABC-TV to videotape entire proceeding as possibly historic debate between regulators and regulated in broadcasting. Ollie Treyz, ABC-TV president, last week offered to set up cameras and monitors to pipe two closed sessions into adjoining auditorium for press and invited guests (there will be one public session to be addressed by FCC Chairman Minor and NAB President LeRoy Collins). ABC also plans to use newsworthy portions of videotape on spot basis.

CBS skyscraper

Top command of CBS last week gave celebrated architect Eero Saarinen go-ahead to produce detailed drawing for new headquarters skyscraper on New York's Sixth Avenue between 52nd and 53rd Streets. Decision followed temporary exploration of possibility of moving into new firm at 277 Park Ave. Last piece of building to be constructed by another property for Sixth Avenue site was acquired last week.

This will be first Manhattan building designed by architect Saarinen. He has already built model—square tower rising sheerly from its own surrounding courtyard. Wholly without interior supports (so floor space will be open except for center elevator-service core), building will rise on concrete columns that in themselves will be exterior "walls." Columns will be faced with granite that will weather to charcoal gray, and windows will be tinted lighter shade of same color. It promises to be like no other building in New York.

Model date delay

There's some uncertainty about automobile manufacturers' plans for broadcast advertising to announce new models this fall. Reason: Manufacturers still haven't firmly set introductory dates. They're worried about current negotiations with United Auto Workers, and some think there is possibility of strikes—which could delay production of new models.

Instant nationals

There's good chance American Research Bureau will produce overnight national tv ratings throughout fall, winter and spring. According to present plans, Arbitrons—representing true national sample—will be offered daily from Sept. 24 through March 25. Information will be collected by mixture of coincidental telephone interviews and metered sets. In last season national Arbitrons were made intermittently. If plans go through for 1961-62 season, more meters will be used than in 1960-61.

What did they talk about?

Preparatory to trip next month to Europe, including Iron Curtain Prague and East Berlin, J. Leonard Reinsch, executive director of Cox Stations and newly appointed member of U. S. Advisory Commission on Information, conferred last Thursday with Attorney General Robert Kennedy. On following day he luncheoned with USIA Director, Edward R. Murrow.

Just checking

Since FCC Chairman Newton Minow launched his campaign to clean up television's so-called program "wasteland," broadcasters are finding it isn't necessarily enough to watch what they say. In at least one case FCC has called tv networks to account for statements made about them. Appearance of Television Magazine item reporting on number of network hours devoted to public-affairs programming was followed by calls to networks to justify those figures—although figures had not been attributed to networks in first place.

JFK's pickups

Jack Christie, Democratic National Committee radio-tv director, is working on arrangements for President Kennedy's report tomorrow (Tuesday) on Berlin situation. Mr. Christie aided Presidential News Secretary Pierre Salinger on President's broadcast last month after his return from Europe.

AFL needs tv

Court decision nullifying National Football League's contract with CBS-TV may or may not lead Justice Dept. to challenge other major tv-sports contracts (see page 61), but in legal inner circles there's speculation that one may be exempt. That's American Football League's contract with ABC-TV, and reasoning is this: Justice Dept.'s actions against NFL, going back several years, stemmed from intention to break up NFL's former monopoly position. With AFL now on scene, NFL is no longer monopoly. But AFL gets most of its revenues from tv contract and might not survive if that contract were invalidated. Hence blow at AFL contract just might restore NFL to its former monopoly position.

Burma Shave tv test

Despite reports to contrary, those roadside Burma Shave signs will not be discarded. They're part of Americans and will be retained, albeit curtailed, Burma-Vita Co. is to say this week in announcement of decision to put biggest hunk of its budget into heavy spot tv test for full year in Chicago and few other key markets. Sponsor also is expected to disclose its selection of new Chicago agency, switching from Bozell & Jacobs.
SPECIAL PULSE QUALITATIVE STUDY OF SAN DIEGO RADIO, SHOWS......

1 KFMB reaches more different adults daily than any other station.

2 KFMB’s audience listens more attentively, has more travel cards, credit cards and charge accounts.

3 KFMB is the adults’ first choice for news and for fuller details of bulletins and flashes.

4 KFMB would be chosen if San Diego adults could have only one station.

5 KFMB reaches both men and women equally, all income groups, all educational levels.

Ask your Petry man for the full brochure which shows why this great station moves more merchandise.

BROADCASTING THE BUSINESS WEEKLY OF TELEVISION AND RADIO

Published every Monday, 53rd issue (Yearbook Number) published in September by Broadcasting Publications, Inc. Second-class postage paid at Washington, D. C.

Subscription prices: Annual subscription for 52 weekly issues $7.00. Annual subscription including Yearbook Number $11.00. Add $2.00 per year for Canada and $4.00 for all other countries. Subscriber's occupation required. Regular issues 55 cents per copy. Yearbook Number $4.00 per copy.

Subscription orders and address changes: Send to Broadcasting Circulation Dept., 1320 DeSales St., N.W., Washington 6, D. C. On changes, please include both old and new addresses plus address label from front of magazine.
Frankly, it’s easy on WINS, and we deliver far more than you imagined. Not just New York City, but 24 counties in 3 states surrounding it. Not just homes and offices, but over 2,800,000 cars on the road, as well. Over 17 million people of all ages, interests and incomes whose annual purchases equal those of the next 3 markets combined. Examples? Over 6 billion on food, 2 billion on apparel, 2½ billion on cars and automotive products.

Yes, you buy all this when you buy WINSland, the mammoth market reached by Radio WINS.

And summer brings you an extra bonus: 1 million radio-equipped boats that rely on WINS for official offshore weather and marine reports. Buy WINS to sell New York. It’s as simple (and profitable) as that.
NFL pacts may be same as in 1960

LIKELY IF RULING IN CBS GRID DEAL STICKS

National Football League was reported Friday (July 21) as almost certain to file early appeal from federal court decision invalidating its $9.3 million TV contract with CBS-TV and to "fight judgment all the way" (story, page 61).

If appeal is unsuccessful or undecided when season opens two months from now (and it's considered unlikely that decision will be reached by then), teams probably will revert to provisions of last year's TV contracts, according to NFL officials. They are: telecast rights for nine teams were held by CBS-TV. Washington Redskins TV rights were held by advertiser (Amoco gasoline) but games were telecast on CBS-TV facilities. Cleveland Browns TV rights also were in hands of sponsor (Carlings Brewing Co.) with games carried by Sports Network. Baltimore and Pittsburgh games were televised by NBC.

Minnesota, 14th league team, is new and may be left in cold if league contract falls through. Informed sources indicated, however, that Minnesota will negotiate independently and wind up on CBS-TV—but probably for considerably less money than under overall league contract.

Spokesman for NFL questioned why Justice Dept. attacked its contract with CBS-TV but not NBC-TV's with National Basketball Assn. and ABC-TV's with American Football League and National Collegiate Athletic Assn.

Pros and Amateurs • He claimed "law should be applicable all the way down the line," and wondered why there should be difference between televising professional and amateur events (as in case of NCAA-ABC-TV contract).

NFL spokesman said league is well aware of existence of controversial 1953 clause which was basis for Judge Grim's judgment last week, but wants government "to rule on it again after eight years of changing economic conditions."

Clause evolved from Dec. 12, 1953, judgment by Judge Grim in case involving legality of NFL's bylaw giving member teams right to "black out" their home territory during home games.

Judge Grim ruled that "black out" bylaw was legal.

He said Friday (July 21) that clause was part of "long order" he issued in case. He explained that clause barred NFL and its teams from making any agreement "having purpose or effect of restricting the areas within which broadcasts or telecasts of games may be made."

He said he could not recall why clause was added since in 1953 no league was engaged in negotiations for its member teams, but that his ruling was comprehensive and covered much ground.

This stricture, apparently thrown in casually, is now crux of government's case against NFL.

Jack Dolph, CBS-TV's director of sports, said CBS reaction "is wait and see" because company lawyers had not had opportunity to go over judgment. He indicated network would not file its own appeal, but would rest case on NFL's appeal.

ABC-TV, which because of involvement with telecasts of AFL and NCAA games, has heavy stake in future of litigation, said through spokesman that it has not seen copy of opinion and has had no opportunity to consider matter.

NBC-TV, which owns rights to NBA games, had no comment.

NBC tops Trendex for space shot on TV

Tv coverage of space shot by astronaut Virgil Grissom Friday morning was seen by 43 million viewers in 40% of U.S. TV homes, NBC estimated. Figures for live TV coverage on all three networks were national projections from Trendex figures in 18 cities and were compared to first astronaut flight May 5.

Trendex ratings and audience shares by network: NBC-TV, 15.4 rating and 61 share, more than combined totals of other networks; CBS-TV, 6.5 and 26; ABC-TV, 3.4 and 13.

Special study of New York TV audience by A. C. Nielsen Co. showed tune-in slightly trailing that for May 5 flight.

Gannett criticized in WAVY-AM-TV sale

Gannett Co., Rochester, N. Y., was accused of past trafficking in broadcast licenses and antitrust violations in a petition to FCC to deny sale of WAVY-AM-TV Norfolk-Portsmouth-Newport News, Va. to Gannett.

Petitioner, Beachview Broadcasting Corp., was losing applicant in original contest for WAVY-TV (ch. 10).

Beachview claimed that 14 newspapers, 4 radio and 2 TV stations owned by Gannett puts that company in precarious antitrust position.

Donahue & Coe gets $3.5 million from C&A

Donahue & Coe Inc., New York, will add $3.5 million in radio-TV billings Aug. 1 when majority of Cohen & Aleshire Inc.'s accounts and personnel merge with D&C.

Harry B. Cohen Sr., board chairman of Cohen & Aleshire, New York, announced merger Friday (July 21). He said D&C will acquire following accounts: Grove Labs Division of Bristol-Myers (4-Way cold tablets); Fitch hair tonic and shampoo; Amstel beer; Kiwi

How to kill an audience with culture

Cultural programming on television can create "wasteland" of its own—if wasteland is interpreted to mean place without people.

Comparison of New York Arbitron figures for two recent prime periods on New York TV tells story.

On Thursday, July 6, WCBS-TV drew low fifth place among New York stations with 9-10 p.m. broadcast of Sir Thomas Beecham and Toronto Symphony. Show had 5.8 rating average for hour against 16.5 for My Three Sons and Untouchables on WABC-TV, 10.5 for Bachelor Father and Great Ghost Tales on WNBC-TV, 10.3 for baseball on WPIX-TV and 6.2 for wrestling on WNEW-TV.

On Saturday, July 15 in 10-11:30 p.m. period WCBS-TV clobbered all competition with 46.8 rating on Miss Universe contest telecast, representing 70% share of total audience. Miss Universe vastly enlarged WCBS-TV's normal audience for that time. Week before station averaged 26.8 rating in same period which started with its regular powerhouse, Gunsmoke (10-10:30), and included regular Sea Hunt, news and late movie.
WARREN SCHLOAT, vp and creative director of Compton Adv., N. Y., named vp and creative director of Robert Lawrence Productions, N.Y., producer of tv commercials. Mr. Schloat will serve Lawrence as producer, director, writer and pre-production consultant. He joined Compton Adv. in 1955. Earlier he had been executive tv producer for William Esty Co., N. Y.; tv commercial producer with Young & Rubicam, N. Y.; copywriter for BBDO, N. Y. and animator-story director for Walt Disney Productions on West Coast.

CARL W. NICHOLS JR., senior vp, named president and chief executive officer of Cunningham & Walsh Inc., as part of major realignment of agency's top executives. Also involved in reorganization were John P. Cunningham, chairman, who was named chairman of executive committee, and Robert R. Newell, president, who was appointed chairman of board. Three new executive vp's were also named: Edward H. Calhoun, marketing services; Anthony C. Chevins, creative services; and Joseph D. Nelson Jr., account management. (For details and biographical material, see story page 22.)

SIMON B. SIEGEL, financial vp of AB-PT, Inc., elected executive vp of ABC division. Appointment officially ranks Mr. Siegel as second in command at AB-PT and ABC next to Leonard H. Goldenson, president. He will continue as financial vp. Mr. Siegel began entertainment industry career in 1929 at Paramount Pictures, becoming comptroller of newly-formed United Paramount Theatres in 1950, and in 1953 became treasurer of AB-PT upon merger of ABC and UPT. In 1957 Mr. Siegel was elected financial vp and treasurer of AB-PT and ABC. In 1958, he was elected member of board and in 1959 to AB-PT board of directors executive committee.

TIO tells station side

FCC last Friday witnessed 30-minute presentation of what tv stations are doing to serve "public interest, convenience and necessity." Slide presentation with running commentary was made by Lou Hausman, director of Television Information Office and introduced by John S. Hayes, president, Newsweek-Washington Post Broadcast Division and TIO board member.

SENATE TO ACT ON FCC REVAMP

Bill to reorganize FCC will be considered by Senate this week. Senate Majority Leader Mike Mansfield (D-Mont.) scheduled bill (S-2034) for action at request of its sponsor, Sen. John O. Pastore (D-R.I.).

In asking for Senate action, Sen. Pastore described bill as non-controversial, and predicted its easy passage. (See earlier story, page 49.)

SPACE COMMUNICATIONS MONEY

There's $94.6 million for communications satellites in authorization signed by President Kennedy Friday to spend $1.784 billion on operations of National Aeronautics & Space Administration. Sum is $60 million more than first proposed in Eisenhower fiscal 1962 budget and $50 million more than first proposed in initial Kennedy budget. Overall, Congress passed space authorization bill $400 million above original Kennedy request, mostly for man-on-moon project.

AFTRA TO BACK MINOW

Delegates to American Federation of Television & Radio Artists convention in Detroit were expected to adopt resolution over weekend endorsing FCC Chairman Newton N. Minow's stand on station license renewals. Resolution was suggested in speech by Donald Conaway, AFTRA executive director, on opening day of convention Thursday (July 20, when he applauded Mr. Minow's determination to examine local station promises and performances in passing on license renewals.

Convention, which closed yesterday (July 23) featured talk by Herman Kenin, president of American Federation of Musicians, who urged "united" action by entertainment unions on broadcaster obligations.

RCA UNVEILS NEW TUBE

RCA Electron Tube Division is introducing today (July 24) first commercial vidicon type camera tube with limiting resolution capability of 1,200 tv lines.

RCA said new vidicon (RCA-8051) is only one designed especially for 35 mm film camera optics. It may be used for high-quality black-and-white film or live pickup, closed-circuit tv involving remote reading of documents or instruments, or for color pickup in three-vidicon cameras.

RCA spokesman said development would result in improved pictures on standard tv receivers, but said new tube will not be used as direct replacement for present cameras. Number of companies, including RCA, are working on new cameras which would utilize RCA's new tube.

ROLLINS APPOINTS BLAIR
FOR
CHARLESTON-HUNTINGTON, W. VA.
WCHS-AM & TV

For national representation
of its West Virginia stations,
covering the Charleston-Huntington area,
Rollins Broadcasting Inc. has named Blair,
effective August 1, 1961.

WCHS Radio, 5000 watts at 580, will be
represented by John Blair & Company.

WCHS-TV, Channel 8, ABC-TV, will be
represented by Blair Television Associates.
RAVES, RATINGS AND ALL THAT GREAT JAZZ

NOW—ALSO FOR FIRST TIME SYNDICATION:

- MR. LUCKY
- YANCY DERRINGER
- WIRE SERVICE
The show that started it all and is still the best of them all—Peter Gunn, the private eye with an ivy league profile and a sophisticated approach to danger—urbane story lines and some of the most fabulous jazz of our time by the great Henry Mancini. After three swingin' years on NBC and ABC-sponsored by national advertisers—now available for syndication! Call, wire or write. the audience is pre-sold coast to coast.

Created and produced by Blake Edwards.

114 HALF HOURS
1st TIME FOR SYNDICATION!
A calendar of important meetings and events in the field of communications

**DATEBOOK**

*Indicates first or revised listing*

**JULY**

July 24—Deadline for submission of briefs to the FCC in Boston ch. 5 re-evaluation. This is the proceeding to reconsider the 1957 grant to WDHH Inc., due ex parte contacts made by president of WDHH Inc. and Massachusetts Bay Telecasters Inc. The third applicant is Greater Boston Television Corp. Reply comments are due 19 days after July 24. Oral argument before the FCC en banc is scheduled, but no date has been set.

July 30—Aug. 5—American Women In Radio & Television, first mid-career seminar. Syracuse, N. Y.

July 31—Comments due on FCC rule change regarding broadcast announcements of financial interest held by station management or employees in products or services promoted on air (plugola).

**AUGUST**

Aug. 1—Advertising Age Summer Workshop on Creativity in Advertising, Palmer House, Chicago. Participants include Norman (Pete) Cash, TVb; Marion Harper Jr., Interpub Inc.; Leo Burnett, Leo Burnett Inc.; Fairfax M. Cone, Cone & Belding; Edgar Kobak, management consultant.

*Aug. 3—4—Northwestern U. Conference on Mass Media and their Responsibilities in Free Society. Northwestern U. School of Law, Chicago. Participants include FCC Chairman Newton N. Minow; J. Leonard Reinsch, executive director of Cox stations; Pierre Salinger, presidential news secretary; former FCC Commissioner Charles H. King; Prof. Louis L. Taffe, Harvard Law School; Dean Roscoe Barrow, U. of Cincinnati Law School and FCC consultant; Fairfax Cone, chairman, Foot, Cone & Belding; Clair R. McCollough, chairman NAB Board; Ralph McGill, publisher Atlanta Constitution; Ward L. Quaal, WGN Inc.; William K. Andrew, NBC News; Warren K. Agee, executive officer, Sigma Delta Chi; Edward L. Bernays, PR agencies consultant; Prof. John E. Coons, Northwestern U. (conference director); John W. Guider, WMWT (TV) Program Director; Morris S. Novik, broadcast consultant; A/L-CHO; John Taylor, WTTW(TV) Chicago etv station; W. Theodoron, Chicago; William, Washington commu- nications attorney; D. Goel, National Audience Board president; Sig Mickelson, Time Inc.; Sol Taishoff, editor and publisher Broadcast and Television magazines, and others.

Aug. 6-8—Georgia Assn. of Broadcasters, annual summer convention. Speakers include Frank Fletcher, immediate past president of Federal Communications Bar Assn. King & Prince Hotel, St. Simon’s Island, Ga.

Aug. 7-11—American Bar Assn., 49th annual meeting, 15 principal hotels and Kiel Auditorium, St. Louis. To be addressed by President Kennedy and numerous other top government officials, including special presidential assistant James M. Landis and chairman of “big six” regulatory agencies, including FCC and FTC.

Aug. 11-12—Texas Associated Press Broadcasters Assn., fourteenth annual meeting, Hotel Llano, Giddings, Tex.

Aug. 15—Reply comments due on FCC rule change requiring broadcast announce- ment of financial interest held by station management or employees in products or services promoted on air (plugola).

Aug. 25-26—Arkansas Broadcasters Assn., fall meeting, Sam Peck Hotel, Little Rock.

**SEPTEMBER**

Sept. 5—Comments due on FCC inquiry and notice of proposed rulemaking chang- ing fm spectrum and looking into duplica- tion of am-fm programming.

Sept. 7—Deadline for comments on FCC rulemaking imposing new log-keeping methods and stipulating three-year maintenance of logs due.

Sept. 10-13—Asm. Canadienne de la Radio et de la Television de Langue Francaise, annual convention, Seaway Hotel, Toronto, Ont.

Sept. 11-17—Affiliated Advertising Agencies Network 17th annual international meet- ing, Sheraton-Blackstone Hotel, Chicago.

Sept. 15—Deadline for comments on FCC proposal to grant rate increases to AT&T and Western Union for leased-line tele- graph services.

Sept. 15—Comments due on proposed FCC rulemaking limiting grants of vhf translator stations only to those which would cover unserved areas rather than extend an existing station’s coverage area.

Sept. 18—Reply comments due on FCC rulemaking on revised program forms.

Sept. 18—Reply comments due on FCC rulemaking on new method and time period for keeping station logs.

Sept. 21-22—Advertising Federation of America, 10th district convention. Hotel Mayflower, Washington, D. C.

Sept. 24-26—Louisiana Assn. of Broadcasters, annual convention, Buena Vista Beach Hotel & Motel, Biloxi, Miss.

**OCTOBER**

Oct. 3-4—Advertising Research Foundation conference, Hotel Commodore, New York City.

Oct. 5—Reply comments due on FCC in- formation notice of proposed rulemaking changing fm spectrum and looking into duplication of am-fm programming.

Oct. 7—Comments due on FCC’s reopened option-time rulemaking. Reply comments will not be accepted.

Oct. 18—International seminar on instru- mentation in television, in cooperation with UNESCO and the U.S National Commission for UNESCO. Dr. Warren G. Quaal, KXLY-TV, is seminar director; James S. Miles, Purdue Television Unit, is associate director. Purdue University, West Lafayette.

**OPEN MIKE**

Amazed, gratified

EDITOR: ... I'm always amazed and gratified to read Broadcasting's stories on activities in which we have had a hand (Broadcast Advertising, July 10). The articles are always accurate, well written and to the point and—considering your circulation among station personnel throughout the country—vitaly important to us.—Herbert Zeltner, Vice President and Media Director, Lennen & Newell Inc., New York.

More to be desired

EDITOR: I thought you would like to know how pleased I was with the reception to my Monday memo in Broadcasting's June 19 issue. The article drew a lot of comment via phone, letter and in personal conversations with sales representatives of the different broadcast media, as well as agency media people themselves. Apparently there are a few other people in the business who feel that there is more to be desired in the evaluation of frequency.—Sam Novenstern, Media Director, North Advertising Inc., New York.

Deeply impressed

EDITOR: ... We were deeply impressed by the coverage in depth of a most difficult subject (Samuel W. Yorty's successful use of IV in his campaign for mayor of Los Angeles, The Media, July 10) and by the thoroughness of the story...—Irvin L. Edelstein, President, Irvin L. Edelstein Assoc., Los Angeles.

Appreciation

EDITOR: We are impressed with your article on our company, "How radio lit a light under Zonolite" (Broadcast Advertising, July 10), and want to express our warm appreciation...—L. A. Castell, Editorial Department, Western Mineral Products Co., Minneapolis.

Extends vital facts

EDITOR: The article, "Is FCC making FM basic medium" (Broadcasting, July 3) is very informative and is one of the first on this medium that extends vital facts...—Fred J. Shannon, Kelly, Zahmtd & Kelly Inc. Adv., St. Louis.

AMA series a hit

EDITOR: Dr. (James Roger) Fox and I greatly appreciated the fine story you printed about Doctor's House Call (Programming, July 3). Already...we have had over a dozen inquiries from stations...—John R. Lucas, Prestige Productions Co., Minneapolis.

---

**“PROGRAMATIC® ASSURES TROUBLE-FREE OPERATION...at rock-bottom cost”**

says Frank S. Lane

KRMG, Tulsa, Oklahoma

"Using Programatic on the midnight to 5:30 A.M. shift permits us to schedule programs around the clock on our AM channel operation. Programatic automation allows broadcasting without attendants for this period. It gives us trouble-free programming at rock-bottom cost, while maintaining the broadcast quality."

Yes, more and more AM broadcasters, large and small, are discovering the way to bigger adult audiences, happier advertisers and higher profit potentials. The secret is the distinctive Programatic package of all-time favorite music played with taste and restraint, plus the exclusive program service and audience-building techniques. And it's automated, too. Programatic is available to only one station per market. For complete details, write to Programatic.

"The Sound of Success" TO WORK FOR YOU

Programatic Broadcasting Service
229 Park Avenue South • New York 3, N.Y.

An International Subsidiary of Wether Corp.
The mercurial state of television during the past couple of years has made it necessary for agencies whose clients have substantial network TV investments to establish a much closer working relationship between their media and programming departments than in the past.

We at Benton & Bowles have successfully accomplished a virtual wedding of the two departments and I'm sure other agencies have made similar moves, which in many cases represents a significant change because of the traditional feeling of rivalry between media and programming.

A great change started taking place in network television at the start of the 1958-59 broadcast season. This was the emergence of ABC as a strong contender for audiences along with NBC and CBS. Before this time it was relatively easy to plan and purchase network television because it was much easier to predict the performance of television programs. Also, prior to the 1958-59 season, programs were sold on either a half-hour or alternate half-hour sponsorship basis and more often than not, you were locked in for 52 weeks.

Thus, planning and purchasing of network television was relatively uncomplicated. Under these conditions there was less need for frequent contact between media and programming than there is today.

Unpredictable Medium • Today television is about as unpredictable as anything in the advertising business can be. This can be illustrated by the great mortality rate of television programs from season to season. For example, here are the names of some of the shows which started but didn't finish the last broadcast season:

In addition, a long list of shows were on the air last season, but will not return next fall. Some of these are shows that have enjoyed long successful runs:

The Rebel, Shirley Temple, Tab Hunter, Loretta Young, This Is Your Life, Peter Gunn, Bringing Up Buddy, June Allyson, The Americans, Barbara Stanwyck, Hong Kong, Angel, Peter Loves Mary, Guestward Ho, Zane Grey, Bai Masterson, Ernie Ford, Groucho, M. Shayne, Deputy, Wyatt Earp, Stagecoach West, Tom Ewell, Harrigan & Son, Law and Mr. Jones.

Obviously, there were advertisers and agency people—including media and programming people—and networks and program producers who were betting that many of these programs would continue successful runs or become outstanding successes. Just as obviously, a lot of people were wrong, and there is no reason to believe that this high program mortality rate will not be with us from now on.

This means we are all going to have to get deeper and deeper into the problem of analyzing and predicting program performance. Today there is a more urgent need than ever before to develop new tools, both qualitative and quantitative, for program and time period analyses. To be used intelligently, these must be examined in combination and put to use jointly by media and programming.

New Patterns • Another development during the 1958-59 season: the networks started to offer advertisers for the first time thirds of half-hour programs and alternate-week thirds of hour programs so that an advertiser could buy a single network commercial minute on a weekly basis.

This practice has mushroomed to such an extent that a very large percentage of the program time during the evening can be purchased on a one-minute or so-called participating basis. In fact, today you can buy scatter plans that will give you a few minutes on any number of programs, and you can buy these long term or short term.

These kinds of buys are considered even by the networks to be basically media buys—and they are indeed—because their flexibility presents the kind of problems that rightfully fall into the media department's area. However, even this kind of buy can be made more intelligently through counsel with the programming department.

These are important and fairly drastic changes, and since necessity is the mother of invention, we saw a need for a change in our operation at Benton & Bowles.

The change that we made was simple but effective. The media and programming departments were brought together under the supervision of one person—Lee Rich, our senior vice president in charge of media and programming. Mr. Rich has always recognized, and still does, the importance of the media department's role in the planning, selecting and purchasing of network television programs.

So it was an ideal solution with the right man in charge. We think it has worked out so well that, considering today's network television situation, we just don't see how we could function properly in any other way. I report directly to Lee Rich as head of the media department, as does Grant Tinker, head of our programming department. Grant Tinker now knows a lot more about programming.

It's Mutual • How do we make it work? By working closely together. It's as simple as that. Instead of a feeling of rivalry between media and programming, there is a feeling of respect for each other's role at the agency and this results in the kind of cooperation necessary to do the best possible job for our clients.

Media and programming, in certain areas of responsibility, are like love and marriage—you can't have one without the other. Although we all know there is love without marriage and marriage without love, and there are media and programming departments that try to get along without each other, I submit that this kind of carrying on can only lead to complications and in some cases, grave consequences.

Lee Currlin joined Benton & Bowles Inc. as a media buyer in 1953. He was subsequently appointed as assistant media director, and became an associate media director in 1958. A year later he was made vice president and manager of the media department. He reports to Lee Rich, senior vice president in charge of both media and programming. Before joining B&B, Mr. Currlin was with the William H. Weintraub Agency (now Norman, Craig & Kummel) and Kenyon & Eckhardt.
The best way to reach the rich heart of the Central South? Through its main TV artery: WLAC-TV, covering a 91-county, 4-state area that's pulsing with vast sales potential!

This virtually unduplicated network coverage (proved by NCS #3) and unparalleled local programming maintain WLAC-TV's acknowledged position of leadership. Of course.

Broadcasting, July 24, 1961
PROGRAMMERS PICK TV FAVORITES

- Executives like drama, documentaries and news shows best
- Select astronaut shoot, presidential debates top programs
- View just over 13 hours weekly, most at home, some at office

The men who program television—the men accused of overloading it with crime and violence—prefer drama, documentaries and news shows for their own personal viewing.

They rate the 20th Century documentary series 2-to-1 ahead of The Untouchables—and indeed, if they had to nominate any current series for oblivion, The Untouchables would be their first choice. They vote the first astronaut shoot, the Kennedy-Nixon debates and related coverage of last year's presidential campaign as the "best" television they ever saw, and if they had the power to call back one program from bygone years, the Playhouse 90 dramatic series would be their favorite by 5-to-1 over their second choice (the also non-violent Wide Wide World).

Like many other parents—perhaps more than most other parents—they take a positive hand in their own children's viewing: Eight out of ten put limits on what or how much their children may watch. And like television's most outspoken critics they think crime and violence are "bad" for youngsters to watch.

Decision-Makers - These conclusions emerge as the dominant viewpoints in a survey conducted by Broadcasting among programming decision-makers in networks, agencies and program production firms. Approximately 175 were canvassed. These are the men regarded as primarily responsible for most network and much local programming, through their influence in the selection of programs to be seen or offered for selection.

Respondents were guaranteed anonymity in order to encourage frankness in their replies. Their answers as a whole showed a wide range of personal opinion and preference, with the experts at odds in many instances, but from the total this picture of the "average" television program executive may be drawn:

- He watches television 13 hours 4 minutes a week at this time of year—about average for him for the whole year, he figures, although in some cases it's a little less than average because the pilot-screening season is over and the new one hasn't begun.
- He does most of his viewing at home—10 hours 30 minutes of it, to be exact—but also puts in 2 hours 13 minutes a week in viewing at the office, and 21 minutes a week in "other" places.
- It's sometimes hard to tell whether he is watching for business or pleasure, but he divides it as 5 hours 32 minutes

ABC's top executives tell how they watch television

It takes three sets going simultaneously for some tv executives to get their television viewing done. Oliver Treyz, president of ABC-TV, is shown here with a specially designed three-channel set in his office.

His boss, President Leonard Goldenson of AB-PT, has five black-and-white and two color sets, keeps three going simultaneously at home during new program introductory season in fall, watches all three networks but keeps two silent until on rotation basis, he has both seen and heard all new shows, both his own and his competitors, at least once. Says he also follows all of ABC's new shows for at least eight weeks to make sure they maintain standards of openers.

Like Mr. Goldenson, Mr. Treyz has five black-and-white and two color sets at home. During fall introductory period he takes film prints of ABC-TV's new shows home on weekends, reviews them in home screening room, then catches the competition on week nights. He says his own regular-series favorites are Untouchables (ABC), Danny Thomas (CBS), My Three Sons (ABC), Candid Camera (CBS), Real McCoys (ABC). Messrs. Goldenson and Treyz agreed to waive anonymity for this look at their personal viewing habits. Their counterparts at other networks preferred not to speak for the record.
PROGRAMMERS PICK TV FAVORITES continued

a week for business and 7 hours 32 minutes for pleasure ("non-business").

- He has two black-and-white sets in working order—plus not quite one color set (two out of three respondents said they had at least one color receiver).

Asked to name the three program types they "generally enjoy most," some respondents named more than three and a few named less, but all principal program types got at least one mention. Those named most often were the following (showing the percentage of respondents naming each):

General drama ..................64 per cent.
Documentary ..................56
News ..................40
Mystery ..................30
Situation comedy .............28
Variety ..................28
Western ..................25
Talk ..................25
Sports ..................19
Panel ..................14
Adventure ..................14
Movies ..................11

Pet Hates • The programmers were more discriminating in their "least liked" categories. Where a total of 16 types gained mentions as generally enjoyed most, only 11 were singled out as generally least enjoyed. Those named most often as non-favorites (again with percentage of mentions):

Game ..................50 per cent.
Panel ..................42
Western ..................40
Participation ..................30
Situation comedy .............28
Talk ..................25
Variety ..................14
Mystery ..................11

The cosmopolitan nature of the executives’ preferences was demonstrated when they undertook to name (1) their "five favorite programs" and (2) five others which, if five prime-time network shows had to be deleted, they would nominate for oblivion.

In all they named 66 different programs as their favorites—plus such generic preferences as pro football, baseball, news specials and movies.

No single program was named a favorite by more than 22 per cent of the respondents. 20th Century (CBS-TV) made first place with that figure. Perry Mason (CBS) got the vote of 20 per cent and five shows—Huntley-Brinkley News (NBC), Andy Griffith Show (CBS), Perry Como (NBC), CBS Reports (CBS), and Thriller (NBC)—tied for third place with mentions by 17 per cent.

Tops with Programmers • Here are the programmers’ top 20, ranked according to percentage of mentions (actually, it’s top 22, because of ties):

1. 20th Century (CBS).
   2. Perry Mason (CBS).
   3. Huntley-Brinkley (NBC).
   4. Andy Griffith (CBS).
   5. Perry Como (NBC).
   6. CBS Reports (CBS).
   7. Thriller (NBC).
   9. Untouchables (ABC).
   10. Danny Thomas (CBS).
   12. Twilight Zone (CBS).
   13. Have Gun Will Travel (CBS).
   17. Meet the Press (NBC).
   18. Naked City (ABC).
   20. Hitchcock Presents (NBC).  
   22. Jack Paar Show (NBC).

A total of 47 different shows were mentioned in response to a query asking the programmers which five they would nominate if five prime-time network programs were to be taken off the air.

This question also brought more sweeping responses—both pro and con. One executive voted to drop "any five westerns." Another suggested dropping "every third one of each type—I want more choice (of program categories)." Another thought "most of the westerns could be dispensed with, and another "couldn’t think of any I’d really like to save." At the other extreme, one voted to drop "none" because once in a while they are nearly all good.

Untouchables Vetoed • Leader in the oblivion hit parade was The Untouchables (ABC), nominated by 20 per cent of the respondents. It was followed by Whispering Smith (NBC), Adventures in Paradise (ABC), Surfside Six (ABC) and Hawaiian Eye (ABC), each of which was named by 14 per cent. Bringing Up Buddy (CBS), named by 14 per cent, and Roaring 20s (ABC) and Pete & Gladys (CBS), which were mentioned by 11 per cent.

Twenty-two programs were singled out in response to the question: "What program no longer on air would you like to see back (if any)?" These nostalgic responses included, among others, Mama, Sid Caesar, Kubla, Fran & Ollie, Philco Playhouse, Producer’s Showcase, Comedy Hour, Omnibus, Studio One, Climax, Person To Person with Edward R. Murrow, Tales of Tomorrow and $64,000 Question and an

Top 100 spend 53.5% in tv advertising

Last year’s top 100 national advertisers spent more money than ever before for network and national spot tv advertising—and more than in all other media combined—according to the Television Bureau of Advertising. Of the $1,695,353,369 spent by the group last year (marking a 5.6 per cent overall increase in their budgets over 1959) 53.5 per cent, or $906,467,950, was spent in tv (with the medium getting 62.3 per cent of the overall budgetary increase). Network tv expenditures for the leading 100 advertisers rose 8.5 per cent in 1960, while spot tv enjoyed a 3.6 per cent increase.

Other favorable statistics for tv: 98 of the top 100 advertisers used at least some tv to carry their advertising messages (the only outsiders were liquor companies); 71 considered tv their basic medium; 51 spent over 50 per cent in tv; 33 spent more than two-thirds, 19 more than 80 per cent; and 9 more than 90 per cent.

Current hubbub is

Despite all the criticism, "broadcasters are no less responsible, sensitive or intelligent than any other business executives—they are just more exposed."

This is the view of a veteran television program executive, Robert F. Lewine, programs vp of CBS Films, formerly with NBC and before that with ABC. He offered it in an analysis of the "current hubbub" in a letter accompanying his replies to Broadcasting’s survey of the viewing habits of leading program authorities (see page 19).

Mr. Lewine said:

"It is my considered opinion that the current hubbub about television is a typical excess just as the current trend of action-adventure programs is an excess and just as the last four years of westerns were an excess. Indeed, we seem to be a nation of excesses in eating, drinking habits, appliances, chromium on automobiles, above-knee-length dresses, Metrecal, Elvis Presley, the stock

20 (LEAD STORY)
an excess—but it may serve a useful purpose

market, rock 'n roll ad nauseam.

Never Ashamed • “I make my living in television and have done so quite comfortably for more than sixteen years. Never have I been ashamed of it; often have I been concerned about it. Much of it is second-rate; some of it is third-rate and more than we can possibly recall to mind is first-rate. I suspect that this ratio holds true in other creative endeavors whether it be publishing, the legitimate theatre, music, motion pictures, architecture or the arts. Those who would make wholesale condemnation of television should not blithely ignore its very unique pressures. The incredible appetite and the equally incredible logistics and economics. When these pressures cease to become factors in television programming, then we will have the equivalent of the BBC.”

“How far is it? And it never will be; it is far from atrocious and it never will be. At

the rate of having to provide ten thousand hours of information and entertainment each year, it is simply unrealistic to expect that television can avoid failures, bad taste, carbon copies, shoe-string productions and all inherent in mass production.

unspecifc quiz shows. But the winner far and away was CBS-TV’s trail-breaking Playhouse 90, named by 42 per cent of all respondents. Wide Wide World, NBC-TV’s pioneering venture, took second place with mentions by 8 per cent.

Not all programmers wanted to call any particular program back from the past. As one observed, he didn’t "particularly" want to see any revived, because “I’d like to see some innovation . . . some imagination . . . something that is not formula.”

Shepard’s Show • Comdr. Alan Shepard’s ride into space was the dominant choice for the program or event liked best out of “All you have seen on television.”

A close second was last year’s convention and election coverage, including the historic Kennedy-Nixon debates. These were followed by Peter Pan (NBC), the Fred Astaire Specials (NBC), coverage of President Kennedy’s inauguration, and the Project 20 series (NBC). Nearly a score of other shows, mostly dramatic offerings, documentaries or special events, also were mentioned.

Respondents with children under 16 years of age gave widely varying answers when asked what programs, if any, they “particularly want your children to watch.”

Three said “very few,” “damn few,” and “can’t think of any,” while four others reported simply “none.” Several did not respond at all to this part of the questionnaire.

Most of those who did reply listed programs or categories generally considered in the children’s or all-family class—My Three Sons, Shirley Temple, Father Knows Best, Disney, Capt. Kangaroo, etc. “Documentaries,” “news and information,” Project 20, 20th Century and Play of the Week also got a few mentions, indicating that age of the children obviously is an influence.

Limit Viewing • A total of 80 per cent of those who answered this question said they do limit their children’s viewing in some way: Either by putting a ceiling on the amount of watching that is permitted, or by ruling certain programs off limits—or by both methods.

To get the views of programmers who have no children at home as well as those who are practicing parents, the questionnaire asked “which programs, if any, do you feel are good for children to watch?” The answers agreed generally with those given previously by parents with youngsters at home, with additional emphasis on such shows as Lassie, Mr. Wizard, Danny Thomas, Bugs Bunny, Flintstones, Leave it to Beaver, Shari Lewis Show, etc.

One respondent said “there are very few children’s shows on tv—this is our major disgrace.” Another thought that “generally all” tv programs would be good for youngsters.

A query about shows considered “bad for children to watch” produced a few program titles—Untouchables and The Three Stooges led the list—but most of the answers condemned “violence,” “rough talk,” “immorality,” “programs that scare them or deal with adult problems,” etc., rather than naming specific shows.

These answers ranged from the view that “none” would be harmful to the contention that 90 per cent of all dramatics, mysteries and westerns on the air today would be bad for children. “A normal child can watch about anything available on tv without harm,” said one.

It “would take a book” to list all that would be harmful, said another. Most of the replies fell between those extremes but concentrated on violence as the biggest offender.

Parents who limit their youngsters’ viewing said they do so in various ways. Some put arbitrary limits on the number of hours that may be spent before the set; others name a specific cut-off time (bedtime, for instance), rule out television altogether on school nights or raise or lower the ceiling in relation to the children’s marks in school. The other primary form of limitation, sometime’s imposed in addition to the limit on time, is to name the programs—or types of program—that may be watched.

Not all respondents went into detail on this point: one, asked “in what way” he imposed limitations, replied simply: “I cut off the set.”

C&W gets major surgery, transfusion

NEW MANAGEMENT BLOOD TAKES OVER AS CHICAGO OFFICE IS SOLD

Cunningham & Walsh, which this year has lost accounts totaling close to $20 million, reorganized its top echelon last week. At the same time the agency sold its Chicago office to a group of company executives who were running its operations, but C&W indicated it would open a new office in Chicago soon.

Chosen to help stem the adverse tide against the agency were four young company officers whose average age is 40 years (also see WEEK'S HEADLINER'S, page 10).

Carl W. Nichols Jr., 37, a senior vice president, was named president succeeding Robert R. Newell, who was shifted to board chairman. John P. Cunningham, who had been board chairman, was appointed chairman of the executive committee.

Three vice presidents—Joseph D. Nelson Jr., 42, Anthony C. Chevins, 40, and Edward H. Calhoun, 41—were named executive vice presidents, a newly created title at C&W. Mr. Calhoun is in charge of marketing services, Mr. Chevins is top man in creative services, and Mr. Nelson heads the account management department.

In another management shift, Carl R. Giegerich, formerly senior vice president and chairman of the executive committee, becomes chairman of the plans board.

The executive committee now consists of Mr. Cunningham (chairman) and Messrs. Calhoun, Chevins, Nichols and Nelson. The plans board is now being reorganized under the direction of Mr. Giegerich.

The Chicago office was sold for an undisclosed price to Ivan Hill and three associates. Effective July 31, the new agency will be known as Hill, Rogers, Mason & Scott.

Mr. Hill will be president of the new organization; Laurence W. Scott, executive vice president; Sherman E. Rogers, vice president in charge of creative services; and Kenneth Mason, vice president in charge of marketing services. Mr. Hill was formerly executive vice president in charge of midwest operations for C&W; Mr. Scott was senior vice president and account supervisor; Mr. Mason was vice president and account supervisor; and Mr. Rogers was vice president and creative director.

At the beginning of this year, C&W had estimated billings of more than $54 million and ranked among the country's first 20 agencies in total domestic business. During the first six months of 1961, the agency lost Sears, Roebuck & Co. (national advertising account), billing more than $4 million last year; Crown Zellerbach Corp. (consumer product division), with billings of more than $1 million; Smith-Corona Marchant Inc., which billed some $1.5 million; Italian Lines, with approximately $1 million in billings; Revell Inc. (toy and game manufacturer), which billed about $150,000; and Texaco Inc., with billings, after discounts, of some $12 million.

The Texaco account, whose departure was a staggering loss to C&W, went to Benton & Bowles; the Revell business went to Fletcher Richards, Calkins & Holden; Ogilvy, Benson & Mather grabbed off the Sears, Roebuck billings; and the Italian Lines went to Kaster, Hilton, Chesley, Clifford & Atherton Inc. Crown Zellerbach and Smith-Corona Marchant are still shopping for new agencies.

C&W's total loss of business for the first six months of this year, more than $19 million amounts to about 37% of its total billings for 1960. During that period the agency hasn't picked up any appreciable accounts to offset the losses.

Mr. Nichols, C&W's new president, joined the agency in 1950. He worked in the research department for three years before transferring to the copy department, where he worked on such accounts as AT&T, Sunshine Biscuits and Folger's Coffee. In 1957 he was made a vice president, a creative director, and a member of the management committee.

Two years later Mr. Nichols was appointed senior vice president and account supervisor on the Johns-Manville and St. Regis Paper Co. accounts. In 1960 he was elected to the agency board of directors, and was placed in charge of the account management division.

Joseph D. Nelson Jr. joined C&W as a vice president and account supervisor of the Jergens-Woodbury account in 1957. For 17 years before that he was with Stockton, West, Burkhart Inc., serving as president of the agency for the last two years of that time.

In 1959, Mr. Nelson was appointed a member of the management committee at C&W, and also was named director of the account management division, elected a senior vice president and made a member of the agency's executive committee.

Anthony C. (Tony) Chevins joined the creative department of C&W in 1951, and was made director of the department eight years later. He formerly was a copy writer at BBDO, working on such accounts as American Broadcasting Co. and Lucky Strike cigarettes. He's a member of the board of directors and the executive committee of C&W, and also serves on the management committee.

Edward H. Calhoun joined C&W in 1950 from Chicago, where he was di-

BROADCASTING, July 24, 1961
rector of sales, merchandising, advertising, publicity and promotion for three years for American Marietta, a paint and chemical corporation. Previously he was director of sales and advertising for K. C. Baking Co., and assistant advertising and merchandising manager of the John F. Jelke Co. (now Good Luck Division of Lever Bros.).

At C&W, Mr. Calhoun has been account supervisor for Folger's Coffee, Boyle Midway Division and the Whitehall Division of American Home Products. He is a member of the agency's board of directors and of its executive committees.

C&W's reorganization took in still another area. Robert W. Daily, executive vice president of West Coast operations, was elected to the board of directors. Edward G. Comstock and George McMoran, both senior vice presidents with the agency, continue as secretary and treasurer.

A spokesman for the agency emphatically denied that C&W's international division, which was established early this year, would be a victim of the current reorganization. He said there was "absolutely no truth" to reports that the agency would discontinue its plans for expansion in foreign areas.

**Bulova's $1 million buy on NBC-TV**

Bulova Watch Co. has spread a $1 million blanket of participations across NBC-TV's fall nighttime schedule, and additional buys are under consideration.

As Bulova's schedule stands currently, Sundays and Wednesdays are the only nights omitted from the prime-time orders for its consumer product advertising, all via Sullivan, Stauffer, Colwell & Bayles Inc., New York (watches, Accutron electronic timepiece, transistor radios, clock and table radios and portable stereo phonographs). The orders range across all night time periods and almost all types of tv program fare.

The six NBC-TV shows purchased to date are National Velvet (Mon.); Laramie and the Dick Powell Show (both Tue.); The Outlaws (Thur.); International Showtime (Fri.), and Feature Films (Sat.).

Except for two network specials last spring, Bulova has been a tv absentee in recent years. The company was one of tv's first commercial sponsors, with B-U-L-O-V-A time signals at $4 per announcement 20 years ago.

**Get rich quick?**

The average western advertising agency has increased its billings 22% since 1957, according to a survey of all advertising agencies in the western states conducted in May by John B. Knight Co., for the Western States Advertising Agencies Assn. But, in the same three-year period, gross agency profits have dropped 15.8%.

Median profit before taxes for the 78 agencies reporting was $9,288, which might be an eye-opener for those who envisage the advertising agency field as a get-rich-quick business. Yet 60% of the agencies reported increases in billings in 1960 as compared to 1959, with 20% reporting a decrease and 20% showing no change.

**NBC seeks dismissal of $100,000 damage suit**

NBC moved in New York Supreme Court last week to dismiss a $100,000 damage suit brought against it and two of its star performers, Jack Paar and Ralph Edwards, by a woman who once appeared on the Edwards' This Is Your Life program. Mrs. Elizabeth Hahn, of Connecticut, had charged that defamatory remarks were made about her when Mr. Edwards was on NBC-TV's Jack Paar Show.

Mrs. Hahn's husband, Abraham, also is suing NBC, charging that the This Is Your Life program had "falsely represented" his family life. Instead of being happily married as implied on the show, he said, he and his wife have been separated for six years and have started divorce proceedings.

In her complaint Mrs. Hahn said that Mr. Edwards referred to her as "a fraud and a phony" while he was a guest on the Paar show.

**Chain saw chain**

New tv venture for McCulloch Corp., Los Angeles, on behalf of advertiser's chain saws gets underway next Oct. 1. It will make use of approximately 90 markets located throughout U. S. excluding major markets in east (aimed for lumber-producing areas), will feature participation in Royal Canadian Mounted Police syndicated tv series in markets selected. Advertiser seeks tie-in with its distributors because of advertiser's limited tv budget. Agency is Fuller & Smith & Ross, Los Angeles, which has six men in field to facilitate buying and tie-ins.
Single camera operation shooting illustrates the simple and mobile operation that marks MGM Telestudios' on-location productions. The scene was one of nine that make up a 90-second Texaco commercial scheduled for presentation on NBC-TV's 'Huntley-Brinkley Show.'

TAPE FIRM GOES RURAL

MGM Telestudios rents farmhouse for summer as operational base for remote commercials

Commercials in the country—that's the pitch MGM Telestudios is giving its clients these days. For the MGM subsidiary, which produces taped commercials for TV, has gone rural for the summer and rented a 100-year-old, colonial-style farmhouse in New Hope, Pa.

Located in the heart of scenic and historic Bucks County, the seven-room, fieldstone structure, which comes equipped with a combination housekeeper-cook, plus an outdoor swimming pool, serves as a base of operations for Telestudios' productions of taped commercials on location. It was chosen because it is within easy reach of several scenic areas—brooks, woods, fields, and hills—that are considered desirable settings for many TV commercials. Too, the interior of the house, and of several other homes in the vicinity, have provided Telestudios' clients with authentic and interesting settings for some of their messages.

Host of the house for the summer is George K. Gould, president and general manager of MGM Telestudios and a zealous advocate of tape-on-location commercials. He believes the era of location taping is here and that the future is "limitless."

Mr. Gould, who started Telestudios under his own ownership in 1957, the year Ampex introduced video tape, feels that tape has made long strides.

Quality • "In the early days," he says, "video tape methods were sold to agencies as being quick and cheap. Now we're selling quality."

But the factor that has made the use of tape so advantageous in the production of spot commercials on location is one that his company developed and used first, Mr. Gould claims. He calls it the A and B technique, and points out that it was made possible by the use of Ampex's Inter-Sync, developed to prevent the roll in the TV picture when a program or commercial cuts from tape to film (Broadcasting, Dec. 5, 1960, et seq.).

Working out of the New Hope house, Telestudios does its on-location productions using small and highly mobile operation. The firm is currently using two custom built trucks—prototypes of MGM Telestudio trucks to be finalized late this year—which carry all equipment necessary for on-location production. One truck contains a 50 kw generator (which Mr. Gould says is too much power for his needs) and everything else goes into the other vehicle.

Telestudio's top man says that his company can do two commercials—of varying lengths up to 60 seconds— in a normal 10-hour shooting day, seven hours of which are actual shooting time. Telestudios charges approximately $4,900 for a day's shooting in a package that includes use of the New Hope house, which can accommodate up to five agency people. Mr. Gould thinks Telestudio's price for the on-location package is "highly competitive" with a film package, and that the unit cost is actually a little lower.

The production firm is paying $2,500 for the use of the Pennsylvania farmhouse during July and August, and Mr. Gould indicates that Telestudios will be back again next year. He says that during the winter his company may move its operations "to a nice, warm, sunny place like Miami or Puerto Rico."

Mr. Gould estimates that the production of commercials is currently a $50 million business, with video tape getting about $7 million of it. The further development of the A and B technique, he feels, should encourage a large increase, from 20% to 25%, in video tapes' business within the next year or year and a half. He also indicates that if the volume of business is large enough, Telestudios, which now only tapes in monochrome, will go into the production of taped color commercials.

Telestudios maintains permanent studios at 1481 Broadway in New York.

Also in advertising...

Agencies' agency • J-F Productions Inc., N. Y., has been formed by former advertising agency executives as a creative production firm to handle specialized assignments on a fee basis, and particularly for small agencies. Principals at J-F include Gene Foster, president, former vice president and art director at BBDO, and Jack Rome, director of the company's TV division. Mr. Rome was previously associated with Blow Adv., Leo Burnett Co., Mutual, and NTA film network. Located at 156 E. 52nd St. (telephone: Plaza 2-0993), the staff includes specialists in art, copy layout, package design, new business presentations, brochures, merchandising, premium promotion, TV and radio commercial creation and production. J-F offers to perform all agency functions except advertising placement.

Merger • Russ Brown, theater publicist, and Claud Morris, who operates Claud E Morris & Assoc., Hollywood, have joined forces to form Morris-Brown & Assoc., that city. The new firm will handle creative graphic arts, advertising and publicity campaigns and merchandising ideas. It is headquartered at 6425 Hollywood Blvd.

Establishes own firm • Charles L. Burrow last week announced the establishment of his own station representative firm in Portland, Ore. Mr. Burrow, formerly with WBZ Boston and WBZA Springfield, said the new company, to be known as the Charles L. Burrow Co., will represent a select group of stations in the Portland area. The firm is located in the Alderway Building, Portland. Telephone: Capitol 3-6690.

New office • Advertising Time Sales Inc., formerly the broadcast division of the Branham Co., opens offices at 247 Park Ave., New York 17. Telephone is Murray Hill 7-5040. Thomas B. Campbell is president of the new firm.
ABC-TV NATIONAL SALES TOOLS UP

Ready to open for business Aug. 15th with staff of 57

ABC-TV National Sales Inc. will open officially for business on Aug. 15 with a personnel staff of 57. Its tooling-up operations, moving at a fast pace for the past month, in the next few weeks include two full days of intensive indoctrination sessions at each of the five ABC-TV stations the company will represent.

The whirlwind tempo at ABC-TV National Sales began on June 22 when formation of the new sales arm was announced. Theodore F. Shaker, president of the unit, noted last week that since that time, hundreds of prospective employees have been interviewed and 57 chosen; office space has been rented in New York, Chicago, Detroit, Los Angeles and San Francisco, and the schedule for the indoctrination meetings has been worked out with the five ABC-TV-owned TV stations.

Fast 'Tool-Up' • Mr. Shaker said the "excitement" of building up a new sales organization has been communicated to all members of the staff, and, apparently, to broadcast personnel throughout the industry who had approached him and other executives for employment with the unit over the past month. He expressed the view that the short time it has taken ABC-TV to "tool-up" has been "probably the shortest in history for an organization of this size."

As he spoke, carpenters and masons were at work building adjoining offices, and Mr. Shaker observed: "Even the construction men sense our urgency; they've been going like the devil for the past few days."

There have been some rapid and sudden changes in titular ranks at ABC-TV National Sales. Mr. Shaker, initially named vice president and general manager, was elected president last week; Edwin T. Jameson, who had joined the unit as general sales manager, added the title of vice president, as did D. Thomas Miller, central division manager (Week's Headliner, June 26). Robert Goldman, who was appointed business manager late last month, has now been given the title of treasurer.

Other sales executives named last week are Harrison E. Mulford Jr., formerly with NBC-TV, eastern sales manager; John A. McElfresh, previously with CBS Spot Sales, sales manager for Chicago office; Richard Beesemyer, recently sales manager of KNXT (TV) Los Angeles, sales manager of Los Angeles office, and James R. Osborn, general sales manager of KXTV (TV) Sacramento, Calif., sales manager of San Francisco office.

From Other Networks • Mr. Shaker noted that sales and other personnel recruited by ABC-TV National Sales were drawn from the two other networks, stations and representative companies. He said: "Top management at ABC believe that in the future, the network will not have to go outside to fill executive posts at its various divisions; many of the people at the new unit are expected to go on to top jobs within the company."

Mr. Jameson, the top sales executive, pointed out that the one immediate objective is to "close the dollar gap between ABC-TV stations and those owned by NBC-TV and CBS-TV in the amount of national spot business placed."

The two-day indoctrination sessions begin in San Francisco on July 30 and end in New York on Aug. 11. Approximately 20 of the top officials at the new sales unit will meet with department heads of each station and will be briefed on salient and saleable characteristics of each market.

ABC-TV National Sales' new offices are at 663 Fifth Ave., New York; 360 N. Michigan Ave., Chicago; Madison Theatre Bldg., 1567 Broadway, Detroit; 1539 N. Vine St., Hollywood, and 277 Golden Gate Ave., San Francisco.

ABC-TV National Sales Inc. will represent the following network owned stations: WABC-TV New York, WXYZ-TV Detroit, KGO-TV San Francisco, WBKB (TV) Chicago, and KABC-TV Los Angeles.

RAB adds new feature to management meetings

A new element will be added this year to the Radio Advertising Bureau's annual management conferences. "Top-Management Selling," dealing with strategy and tactics of selling the heads of banks, retail stores, and other prospective advertisers, will be discussed at each of the eight regional meetings.

### ARBITRON'S DAILY CHOICES

Listed below are the highest-ranking television shows for each day of the week July 13-19 as rated by the multi-city Arbitron instant ratings of the American Research Bureau. These ratings are taken in Baltimore, Chicago, Cleveland, Detroit, New York, Philadelphia and Washington.

Copyright 1961 American Research Bureau
to be held between Sept. 7 and Oct. 13.

Other topics to be covered in half-
day sessions will be “Programming for
Greater Audience,” “Sales Manage-
ment,” “Managing Promotion,” and
“Station General Management.” In all,
at least 25 subjects will be covered
during each half-day.

The conferences will be held in Had-
donfield, N. J. (Sept. 7-8); White Sul-
phur Springs, W. Va. (Sept. 11-12);
Sea Island, Ga. (Sept. 18-19); Dallas,
Tex. (Sept. 21-22); Des Plaines, Ill.
(Sept. 28-29); Omaha, Neb. (Oct. 5-
6); Palo Alto, Calif. (Oct. 9-10), and
in Detroit (Oct. 12-13).

Agency appointments...

- Jamieson Laboratories, Van Nuys,
  Calif., specializing in agricultural elec-
tronics, appoints The McCarty Co.,
  Los Angeles, to handle advertising and
  public relations. A national promotional
  program, progressing through state-by-
  state markets, is planned.

- Capital Records Distributing Corp.,
  Los Angeles, has appointed Carson/
  Roberts, that city, as agency for Angel
  Records. Appointment consolidates
  three Capitol accounts at C/R, which
  already handles advertising of Capitol
  Label Recordings and Capitol’s elec-
tronics subsidiary, EM1/US.

- Lewis Research Labs appoints Frank
  B. Sawdon Adv., N. Y., as its advertis-
ing agency. Sparkcoal, charcoal igniter,
one of Lewis’ products, is now using
spots on WABC-TV New York. An
agency official said Sparkcoal’s tv ad-
vertising will expand as its distribution
expands.

- Cadbury-Fry Ltd., N. Y., American
division of Cadbury Bros. Ltd. of Eng-
land, chocolate manufacturer, has ap-
pointed Guild, Bascom & Bonfigli, N.
Y.

- KUKA San Antonio, KUNO Corpus
  Christi, The Romero Drug Co. and
  the Dixie Meat Co., appoint Cusiek-
  Schwerke & Wild, San Antonio.

- Rambler Dealers, Kansas City, ap-
  point Merritt Owens Adv., that city,
to handle all advertising and sales pro-
motion.

- Dubonnet Aperitif (wines and ver-
mouths), N. Y., appoints Norman,
  Craig & Kummell, N. Y., effective
  Sept. 1.

- Arthur Murray School of Dancing
  (New York) appoints Lambeth & Feas-
  ley, that city. Media strategy has not
  been set.

- Dulany Foods Inc., Fruitland, Md.,
  packers of frozen fruit, vegetables and
  specialties, appoints Smith/Greenland,
  N. Y., as its advertising agency. Billings
  expected to be around $250,000.

### Policy change lands $4 million account

NBC-TV, which earlier this month
lifted long-standing restrictions against
bra and girdle advertising, grabbed off
an estimated $4 million worth of Inter-
national Latex business last week.
International Latex Corp., New York,
manufacturer of Playtex bras and girdles,
will spend the money on a network
saturation campaign that will
include participation on seven NBC-
TV nighttime programs and one morn-
ing program. It marks the first break-
through of a foundation garment firm
into prime-time network programming.

Six of the Latex nighttime buys, the
first of which starts in September, con-
sist of alternate-week minutes. The
27-week campaign includes sponsorship
on NBC-TV’s new Saturday night, two-
hour, prime-time, feature-film series
"Saturday Night At The Movies" (9-11 p.m.),
starting Sept. 23 and continuing
through Dec. 2.

Other NBC-TV programs in which
Latex will appear on an alternate week
minutes basis are: "Thriller" (Mon., 10-
p.m., Sept. 18 through Dec. 11; "Robert
Taylor-The Detectives" (Fri., 8:30-9:30 p.m.),
Dec. 22 through March 1, 1962; "Outlaws"
(Thur., 7:30-8:30 p.m.), Dec. 14 through April 5;
"Cain’s Hundred" (Tue., 10-11 p.m.),
Oct. 10 through March 27; and 87th
Precinct (Mon., 9-10 p.m.), Oct. 9
through Nov. 27.

In addition Latex has bought 28
program spots on NBC-TV’s "Today"
show (Mon.-Fri., 7-9 a.m.), from Sept.
18 through March 28, and 18 program
spots on the network’s "Jack Paar Show"
(Mon.-Thur., 11:15 p.m.-1 a.m.) from
Sept. 18 through March 21.

The concentrated campaign will pro-
claim the Playtex “Living” Bra, the
Golden Playtex girdle, and three new
cotton bras. Reach McClintock & Co.,
N. Y., is the advertising agency that
handles the Latex bra account and Ted
Bates & Co. is the agency for the girdle
account.

### Business briefly...

Seeman Bros., N. Y., is conducting a
New York metropolitan area spot cam-
paign for White Rose Tea, using spots
on WNTA-TV, WNEW and WMCA.

Bell Telephone System and Associated
Bell companies are using 30-second ra-
dio spots on the four major networks
for the summer vacation period. The
spots, which have been running since
early June, are placed through N. W.
Ayer & Son, N. Y.

Best Foods, Div. of Corn Products Co.,
New York, will launch an introductory
network and spot tv campaign for its
Knorr Soups beginning Sept. 17. Cam-
paign includes daytime participations on
all three networks and spots in east-
ern and central markets. Agency: Dancer-Fitzgerald-Sample, N. Y.

Nationwide Insurance Co., Columbus,
Ohio, today (Monday) begins an in-
tensive two month, $350,000 advertis-
ing campaign on automobile insurance.
The theme will be based on a recently-
completed survey showing that 90% of
Nationwide’s 2½ million policy-
holders renew their coverages with
the company. Major emphasis will be on
spot radio with 237 stations taking part
during prime time.
Avery-Knodel acquires rapid telephone system

An innovation in telephonic communication has been installed by a New York station representative firm to provide both agency buyers and stations with faster servicing of availabilities and confirmation of schedules. Avery-Knodel said last week it is the first station rep to acquire the leased wire telephone service called Wide Area Telephone Service. The installation gives the company instantaneous and almost continuous telephone contact with represented stations in more than half of the U. S. Far west and south western states will be added when the service is extended to those areas. New York, as the originating state, always will be omitted from the service.

Thomas J. White, vice president of Avery-Knodel, explained that the service offers a one-way, non-reversible line which is available 24 hours a day. The monthly fee, he said, is $1,700, more than what the company has been paying for regular monthly long-distance service, but he said that the increased cost is worthwhile from the standpoint of better station service as well as lessening the monthly cost of sending wires and two service. Mr. White said the only problem encountered since the service was installed two weeks ago is the matter of spacing calls so that all rep salesmen don’t decide to make calls at the same time.

New RAB fact booklet now being distributed

Radio Advertising Bureau last week laid claim to the “largest collection of facts on radio ever assembled,” all published in a 40-page pocket-sized booklet entitled “Radio Facts Pocket-Piece.” Now in distribution to RAB member stations, the compilation of data reflects “radio’s growth as an information, entertainment and advertising medium,” Miles David, RAB vice president, said. RAB cites evidence of radio’s increased size-of-audience as follows: During 1960, 20.3 million radio sets were sold in the U. S., more than twice the number sold as recently as 1954, when sales totalled 10.1 million sets. Auto radio sets in use are up 252.2% since 1949 (42.6 million in use on Jan. 1, 1961, vs. 12.1 million on the same date in 1949).

Annual portable set sales are up 380.8% since 1949 (8.6 million sold in 1960, vs. 1.7 million in 1949).

To point out the substantial growth in the number of people reached daily by radio, RAB’s booklet includes Sindlinger figures for the period April 1960-March 31, 1961, showing an average daily reach of 76.2 million, compared to 68.9 million in the like period of 1957-58. The 11% increase is only part of the “reach” story, RAB said, because the average weekly reach total would be much higher.

AFA merger committee

John P. Cunningham of Cunningham & Walsh, chairman of Advertising Federation of America, and two past chairmen, James S. Fish of General Mills and Robert Feemster of the Wall Street Journal, will serve as an AFA special committee to study the feasibility of the proposed merger of AFA with Advertising Assn. of the West. The committee will also consider methods by which the merger might be accomplished, if approved. It will report to the AFA board at its meeting next February.

AAW has appointed a similar committee to study the merger proposal; this committee will report back to its own board, also in February.

Rep appointments...

- WDLP Panama City, Fla.: Gill-Perna Inc.
- WHNL-TV Hartford, Conn.: Kettell-Carter as New England sales representative.
- WWSR St. Albans and WSNO Barre, both Vermont: Breen & Ward, N. Y.
- KWHK Hutchinson, Kan.: Spot Time Sales Inc., N. Y., as national sales representative, effective Sept. 1.

Also in advertising...

New name • Robinson, Fenwick & Haynes, Los Angeles agency, has changed its name to Robinson & Haynes. David Fenwick has left the agency and is now a vp of Donahue & Coe, L. A.

Commercials in production

Listings include new commercials being made for national or large regional radio or television campaigns. Appearing in sequence are names of advertiser, product, number, length and type of commercial, production manager, agency with its account executive and production manager, and approximate cost of commercial.

PERSPECTIVE ON GREATNESS is a favorite choice from coast to coast! New York—sold! Los Angeles—sold! Detroit—sold! Boston, Milwaukee, Houston, Denver, Memphis, Hartford, Rockford, Amarillo, Phoenix, Sacramento—all sold! “PERSPECTIVE ON GREATNESS”...a new concept in documentaries! Thirteen hour-long specials featuring actual on-the-scene filmed highlights in the lives of such famous figures as Al Smith, General MacArthur, Lindbergh, the Duke and Duchess of Windsor, DeGaulle, and more. Plus new footage from Hearst Metrotone cameramen throughout the world. Great shows for important local advertisers! And a practical, easy-to-store source of material on famous people—hour-long shows to run when needed.

NAB pulls plug on Voice of Democracy

14-YEAR-OLD HIGH SCHOOL SCRIPT WRITING CONTEST CANCELLED

Broadcasting's vaunted Voice of Democracy contest was abandoned by its father last week and left on the doorstep of another. There were murmurs of "shame" from some of the father's kin when the news got around (CLOSED CIRCUIT, July 17) and there are strong indications that the opposition to the abandonment may grow in volume.

NAB announced that it, and the Electronic Industries Assn., are withdrawing from active sponsorship of the 14-year-old radio scriptwriting contest for high school students.

The NAB statement said that the contest had been offered to the Veterans of Foreign Wars. VFW became a co-sponsor of the VOD contest in 1958; before that the Junior Chamber of Commerce was the third co-sponsor.

A VFW spokesman said last week that the veterans' organization desires to continue the contest and is looking for co-sponsors to help foot the bill. The total bill yearly is estimated at $25,000. VFW is willing to underwrite up to $10,000 of this cost, it was explained.

VFW also asked that broadcasters continue to cooperate in the contest. NAB said that both it and EIA would endorse the contest and assist in the transitional stage from three national sponsors to a single one.

Oppose Cancellation • The first objection came from the Georgia Assn. of Broadcasters. George Patton, president of the Georgia group, wrote NAB President LeRoy Collins, "... we oppose the planned decision to discontinue co-sponsorship of the Voice of Democracy contest with the VFW. On the one hand we promise more public service through our industry, while you, the spokesman for the industry, cancel a worthwhile project."

Mr. Patton, WBML Macon, Ga., also criticized NAB's handling of the proposed cancellation. No NAB member was given any indication of the intention to withdraw, he said, or any opportunity to express an opinion.

The GAB statement said that James L. Howe, WIRA Ft. Pierce, Fla., NAB's Fifth District director, had not been advised of the proposal to sever connections with the contest. Mr. Howe opposes the move, the GAB statement said. NAB told state presidents of its decision July 17.

NAB has reported that it was asked by the VFW that no statement be issued until the VFW board of directors decided on the future of the contest. This, the GAB said, "still does not free NAB from the responsibility of communicating to its members and state associations its intentions. We should have heard something on this six weeks ago."

In response to NAB's position that lack of interest among broadcasters this year prompted the decision to withdraw; that only 23 out of 48 state organizations signed up to participate, the GAB indicated this could be a reflection on NAB's failure to push the contest.

GAB, the statement said, has notified the Georgia VFW that it will continue to cooperate in holding the statewide VOD contest.

Miller Sorry • Judge Justin Miller, the NAB president under whose tenure the Voice contest was begun, said he was sorry to see it go since it seemed a highly desirable project. Judge Miller's comment:

"Not knowing the considerations which went into the determination to abandon the Voice of Democracy program it is hard to make any intelligent comment concerning it. As one of the original sponsors of the program and as one with a continuing interest in it, personally I am sorry to see it go. It has always seemed to me a highly desirable project, one calculated to stimulate the interest of high school students in government and in ways of improving it at a time certainly when there is great need for such stimulation."

Other broadcasters and those allied with the industry expressed their regrets at the decision and their doubts as to the wisdom of withdrawing from the contest at this time.

The NAB statement, issued July 20, said the decision to withdraw from active sponsorship was made after much consideration.

Gov. Collins explained that the NAB is currently undergoing a reorganization which calls for stepped up government relations, a re-direction of public relations and much more emphasis on the radio and TV codes and research. All of these, he added, will require a re-direction of staff efforts and reallocation of available association funds.

"We are greatly pleased that the VFW is giving consideration to continuing the contest," he said. "Should the VFW accept the national sponsorship, broadcasting stations will have the opportunity to participate in the Voice of Democracy very effectively,
and, of course, we will all be happy for them to do so."

Gov. Collins indicated that NAB hoped in the near future to develop a new youth program "which will attract much greater public and broadcasters' interest." He added that this will not be competitive with the VOD, if carried forward by VFW.

No details were given as to what the new program might be.

An EIA spokesman said that the organization had been for some time dissatisfied with its role in the VOD contest. It has been mainly a broadcasters' promotion, he said, and they, and the VFW, received the lion's share of the credit.

The NAB decision to withdraw was made July 7 and then communicated to EIA, it is understood. At the root of the decision, it's believed, was the unwillingness of some state associations to shoulder their share of the work.

Only 23 out of 48 state associations signed up to participate this year, NAB said. It's also estimated that the contest was costing NAB $20,000 a year—$11,252 in actual cash outlay, and more than $8,000 in manpower, mail, etc.

Postwar Baby • Brainchild of Robert K. Richards when he was public relations chief of NAB, the Voice of Democracy contest was begun in 1947. Mr. Richards is now a public relations counselor. It was first operated in conjunction with EIA and the Junior Chamber of Commerce. In 1958 the Jaycees bowed out, and VFW came in as a co-sponsor. At that time, too, the state broadcasters associations took over the grass roots work. It has always had the endorsement of the National Education Assn. and U. S. Office of Education.

Although the total number of high school students who participated cannot be estimated, there have been over 700 state winners in the 14 years of VOD's life. On the national level, there have been 56 national winners. Since 1957 the individual state winners have been brought to Washington and feted by the broadcasting industry, the VFW and EIA. Highlight of the Washington trip was a luncheon at which members of Congress and other high federal officials were guests.

Before 1957 only the four national winners were brought to Washington. The four awards carried stipends beginning with $1,500 for the top winner, underwritten by NAB; $1,000 for second place, $750 for third place and $500 for fourth place. The last three sums were advanced by VFW. EIA gave the winners tv receivers. The 1960 contest cost NAB $11,252 in cash outlay plus another $8,000 in manpower, mail, etc.; EIA $10,000 and VFW, $2,900.

Of the 56 national winners, several have gone into radio-tv work. Charles Kuralt, a 1949 winner, is now with CBS News. Robert Shanks, a 1950 winner, is associated with the Jack Paar Show. Robert A. Burnett, a 1951 winner, is an announcer-salesman with KADY St. Louis.

Mutual claims gains in its audience size

MBS-affiliated stations throughout the country last week were alerting station representatives and local agencies and advertisers to a network presentation that claimed that Mutual was the only radio network to make a substantial gain in average audience listening for the first five months of 1961.

Mutual stations acted following an announcement by network president Robert F. Hurleigh on July 13 of Mutual's audience growth pattern, which, he said, has moved the company into third place ahead of ABC Radio and into contention for second place with CBS Radio. Using A. C. Nielsen Co. figures for the first five months of 1961 and 1960 as yardsticks, Mr. Hurleigh said that average audience figures (7 a.m. to 6 p.m.) showed that only Mutual made a substantial gain in audience size (plus 23%) and that NBC lost 3%, CBS lost 23% and ABC gained 4%.

Mr. Hurleigh's remarks were carried by closed circuit to MBS affiliates. He praised them for "marked local audience gains" which, he said, "are being reflected by the Nielsen figures for the entire Mutual Network." He attributed the gain largely to Mutual's programming formula, which permits integration of network service into local programming. Other factors he cited were the addition of name personalities to

Participants in WGR-TV's special program were (l to r) Charles J. McDonough, president of the Buffalo Trial Lawyer's Assn.; Dr. Samuel Yochelson; Lou German, 'Speak UP' program moderator, and Frank N. Felicetta, Buffalo police commissioner.

Tv persuades suspect to surrender

WRG-TV Buffalo, N. Y., helped resolve a kidnapping-murder case which had Buffalo terrorized for 11 days, during the latter part of June and early days of July. The case concerned the kidnapping and drowning of 3½-year-old Andrew Ashley on June 22 by an unknown woman.

On July 2, the station, sensing the impact of the crime, and as a service to an alarmed public, programmed a special news program, part of its regular Speak Up series. Among authoritative guests who appeared on the program to discuss the crime was Dr. Samuel Yochelson, medical director of the Jewish Family Service of Buffalo, and recently appointed director of criminal research at St. Elizabeth's Hospital in Washington, D. C.

Dr. Yochelson made a personal appeal to the murderess to give herself up. As a direct result of the appeal 15-year-old Chyrel Lee Jolls voluntarily surrendered to police, but said she would speak of the crime only to Dr. Yochelson. The girl confessed to the kidnapping and is now undergoing psychiatric examination preliminary to legal action.

WGR-TV, a Transcontinental TV Corp. station, was given formal on-the-air credit by Buffalo Police Commissioner Frank N. Felicetta, for its assistance in bringing about the girl's capture and her confession.
New use found for old tv antennas

Children using the facilities of Greensboro Country Park, N. C., have found a 2-ton tv antenna to be quite the enjoyable plaything. Sixty-feet long and equipped with twelve batwings, the antenna lies in a horizontal position and is used as a jungle gym. The antenna, over which WFMY-TV Greensboro transmitted its first telecast in 1949, was formally presented to Oka Hester, (1) Greensboro park and recreation director, by Gaines Kelly, (r) general manager of WFMY-TV. Since the station moved its operations in January 1955, the antenna has been stored until appropriate use for it could be found. Doyle Thompson, (c) chief engineer, watches the proceedings.

MBS’s staff, including Arlene Francis, Tony Marvin, Leo Durocher and Galen Drake; the affiliation of higher-power stations with the network, and expansion in the company’s news, special events and public affairs departments.

Under questioning, Mr. Hurleigh said Mutual is not operating at a profit yet, and expressed belief that only one radio network—NBC—is now “in the black.” He reported, however, that business at Mutual is running about 5½% over 1960 and said he is “very optimistic” about the rest of 1961.

About half fm stations plan stereo programs

Almost 50% of the nation’s fm broadcasters plan to broadcast stereo programs—but more than 35% said they had no plans to join the sound-in-depth contingent.

These are the basic results of an NAB survey on the plans for stereo broadcasting by fm broadcasters.

The survey was based on a questionnaire mailed to 594 fm stations which are members of the association. On July 13, 381 responses were received. These showed that:

- 185 stations reported they plan to engage in stereo broadcasting. Two are already broadcasting stereo; 77 others said they plan to begin in 1961; 44 said they planned to commence in 1962 and seven, in later years. 140 stations said they did not plan to broadcast stereo, 32 were undecided and 24 said they were broadcasting stereo via am-fm, but did not indicate what their plans were for fm stereo operations.

- Stereo broadcasting will occupy anywhere from two hours weekly to a maximum of between 90 and 130 hours weekly (according to eight of the respondents).

- One of the main questions in the minds of fm broadcasters is the availability of equipment. Another is the small number of homes equipped to pick up broadcast stereo.

CBS News department expanded, reorganized

CBS News expanded and reorganized its news information and special services department last week. The information unit, which is responsible for maintaining CBS News liaison with all network operating divisions, now also has jurisdiction over news and public affairs research and transcripts, and is in charge of the news department’s special projects library.

The expansion adds 15 people to the department, all of whom report to Josef C. Dine, CBS-TV information and special services director. As part of the realignment, May Dowell, manager of the CBS News Special Projects Dept., has been promoted to director of CBS News Special Projects. In this post she succeeds William C. Akerman, who resigned to join the State Dept. (Week’s Headliner, July 17).

It also was reported that Ernest Leiser will become assistant general manager of CBS-TV News, effective Sept. 1. Mr. Leiser formerly worked for several years as head of the CBS News Bureau in West Germany.

Currently he reports on the network’s daily morning program, World News Round-Up (8-8:15 a.m.).

KQBY aimed too high, says chagrined Gordon

KQBY San Francisco, being sold to Frank Atlass and wife for $750,000 (Changing Hands, July 3), went silent July 16 pending FCC action on its transfer application.

Sherwood R. Gordon, owner of KQBY, said he is closing down the station to cut losses. Mr. Gordon, who also owns KSDO San Diego and KBUZ-AM-FM Phoenix, blamed the plight of KQBY on rating services. He claims that KQBY has cost him a quarter of a million dollars.

He said the station failed in the “Hooper-Pulse-Nielsen rating rat race,” although it delivered the community leaders of thought.

Mr. Gordon bought what was KQBY last year for $700,000. He changed it into a quality music, news and editorializing station.

News of the sale, Mr. Gordon said, has aroused his audience. He said the station has been receiving 300-400 telephone calls a day from listeners who express their sorrow at his plight. His mail has reached over 3,000 pieces, he said. Newspaper columnists and editorial writers have also reacted, he said.

Metropolitan news setup

Metropolitan Broadcasting is establishing national news headquarters in Washington on Aug. 1 to provide the company’s five tv and three radio stations with the latest in-depth coverage of news from that city. Martin Weldon, Metropolitan’s news and special events director, will head the operation and will make his headquarters at WTTG TV, company-owned outlet in Washington. Programming also will be available to WRUL New York, the short-wave radio station of Worldwide Broadcasting, a division of Metromedia Inc., parent company of Metropolitan.
New RCA Cartridge Tape System with "TRIP CUE"

Here's the cartridge tape system with something new—trip cue! This unique feature allows you to record a special trip-cue tone that, during playback, can be used to start the next device in an automatic or semi-automatic system, with split-second timing. (In TV operations it may be used to advance slide projectors.)

Delayed broadcast, spot announcement campaigns, production aids, themes, station breaks can be handled by the RT-7A with a minimum of effort. Cartridge is selected, placed in a playback unit, forgotten until "Air" time, then instantly played at the flick of a button. Cueing and threading are eliminated.

Check this handsomely-styled equipment against any other for compactness and design...Provides transistor circuitry, low power consumption, simplicity of operation! It's one more in a growing line of value-packed new products for radio and television stations from the pioneer in broadcasting. See your RCA Broadcast Representative. Or write to RCA Broadcast and Television Equipment, Dept. XD-22, Building 15-5, Camden, N. J.

RCA The Most Trusted Name in Electronics

Typical packaging is this attractive four-unit console with single BA-7 Cartridge Tape Record and Playback Amplifier and three Cartridge Tape Decks, as illustrated. Separate units of this system available are the Record and Playback Amplifier, and the Cartridge Tape Deck. A Cartridge Storage Rack is also available.
AFTRA STRIKERS PUT ON SQUEEZE
Announcers seek agreement with IBEW on picketing

More than a hundred Los Angeles area radio and TV announcers voted unanimously last week to ask the Los Angeles chapter of American Federation of TV and Radio Artists to drop its ban relieving members from being required to respect the picket lines of other unions where the announcers work.

The motion for the vote to eliminate the rule, which has been in every AFTRA contract since the chapter was established some 20 years ago, came spontaneously from the floor and was not suggested by the union's executives, it was stated at a news conference following the meeting, which had been called to inform the members of the progress of the strike against KFWB (Los Angeles, Aug. 17). The strike is also the first the L.A. local ever called against a radio station.

The proposal was referred to the board of the local for approval. "Specifically," said a news release issued by the union, "this would be an appeal to the International Brotherhood of Electrical Workers, that represents the engineers of the station, to respect AFTRA's picket lines with the pledge that AFTRA would respect theirs."

After approval by the board, the proposal will then have to be negotiated into the contracts with the radio stations of the area. Those with the 17 independent stations expired April 30 and a new agreement is now being negotiated, although no meetings have been held with the group since the strike was called against KFWB. At last Monday's meeting, the staff announcers present stated their willingness to take strike action against all the stations if that is necessary to secure its inclusion in the contracts.

Under the proposed new clause, AFTRA members could not be prohibited from respecting the picket lines of other unions at their stations, provided the strikes of these other unions are sanctioned by the Los Angeles County Labor Council, representing all AFL-CIO unions in the area. An AFTRA petition asking that its strike against KFWB receive such sanction is pending before the council.

Late last week, the strike was still in progress against KFWB and the engineers were still at their jobs at the station, despite the AFTRA picket lines in front of its doors. The station, its mikes manned by supervisory personnel, was continuing to operate as usual. On Wednesday afternoon, the KFWB management reported that not a single advertiser on the station had canceled his advertising because of the AFTRA strike. On the contrary, 17 new advertisers had been signed in the eight days since the strike had begun at noon of July 11.

Nor were there any signs of an early end to the strike. Both sides expressed a willingness to sit down and talk, if called on to do so, but neither seemed inclined to do the calling. Claude McCue, executive secretary of the local, is in Detroit attending the union's national convention. Before he left he said he felt that it was up to Robert Purcell, president of Crowell-Collier Broadcasting Corp., owner-operator of KFWB, to bring about a resumption in negotiations. He expressed a willingness to return "on a moment's notice," if called on to do so. The KFWB management expressed the view that they had made a liberal offer for a new contract and that there was nothing more to be said until the union chose either to accept it or to make a counter offer.

Meanwhile, Mr. McCue filed strike-breaking charges against five AFTRA members with the board, which has summoned them to appear Aug. 2 before the directors sitting as a trial board. The five are:
- Jim Hawthorne, program director

Veterans' day in Washington

The two most seasoned network representatives in Washington stared last Thursday at a testimonial luncheon.

One was master of ceremonies and the other the honored guest.

The guest was Earl H. Gammons (at right in picture above), Washington vice president of CBS from 1942 to 1955 and now consultant to the network and other broadcasting interests including Storer Broadcasting Co.

The m.c. was Frank M. (Scoop) Russell (at left), Washington vice president for NBC from 1929 to 1959 and now consultant to that network and other broadcast interests.

Some 200 representatives of Congress, the Supreme Court, the FCC, other agencies of government, broadcasting and the federal communications bar attended the luncheon in the Mayflower hotel. It was a combined testimonial and premature birthday party (Mr. Gammons was to be 68 yesterday, July 23).

Featured speakers included Ted Koop, now the CBS Washington vice president and Paul Porter, CBS Washington attorney at the time Mr. Gammons moved from the management of WCCO Minneapolis, then owned by the network, to take up Washington residence. Mr. Porter later became FCC chairman and is now a Washington attorney.

Mr. Russell presented Mr. Gammons with several mementos including a book containing some 75 testimonial letters from political figures including Dwight D. Eisenhower. Mr. Russell said the letters were unique in Washington literature. Not one was written by a ghost.
Robert M. Purcell, president of Crowell-Collier Broadcasting Corp., has been taking a daily news shift at KFWB during the AFTRA strike.

of KFWB and an officer of Crowell-Collier Broadcasting Corp. Mr. Hawthorne had also been doing a daily weather show on KTTV (TV) Los Angeles, but he gave up that employment at the time of the strike and was called to devote full time to KFWB, the station reported.

- B. Mitchell Reed, a disc jockey at KFWB who was sent to another Crowell-Collier station, KDWB Minneapolis-St. Paul, before the strike began. AFTRA has no jurisdiction at KDWB, which has no contract with the union.
- Charles Blore, vice president in charge of programming for the Crowell-Collier stations, which include KEWB Oakland-San Francisco in addition to KFWB and KDWB.
- Bill Angel, assistant to Mr. Blore.
- Don French, program director of KEWB, the Oakland-San Francisco station.

These five executives are taking their turns at the KFWB microphones, replacing the striking disc jockeys.

**Radio listeners get up early in San Diego**

San Diegans are early risers and early radio listeners, according to a Pulse survey made earlier this year with 1,000 adults in San Diego county. The results have been published in brochure form by (KFMB San Diego (a Transcontinent TV Corp. station). The study shows that most adults turn their radios on between 7 and 8 a.m., but that the 6-7 a.m. tune-in is almost as large as that at 7-8 a.m. and larger than during the two-hour 8-10 a.m. period. Similarly, more San Diego adults turn their radios on between 5 and 6 in the morning than in the 10-11 a.m. hour.

The chief reason for the morning tune-in is to get the news, the survey reveals, with music in second place with about two-thirds as many listeners for this reason. News accounted for 60.3% of the tune-ins and music for virtually all the rest, except for a small minority who tuned in for weather or time checks. Questions as to which San Diego station is usually dialed for news showed that KFMB and the other radio network affiliates are the most popular stations for news, but that the "top 40" stations rank well above the "soft music" stations as news sources.

The survey also shows that the network stations—with their "talk" programming—are more actively listened to than the music stations, with more people reporting they hear all of what announcers say on these stations. The "top 40" stations top the "soft music" stations in this respect, indicating that perhaps the latter are tuned in at low level for background music.
KING-FM steps away from stepchild status

How to get mileage out of fm? Give it the full treatment. This is what KING Seattle did beginning early this month when it cut away its fm station from duplication of the am schedule and inaugurated broadly diversified programming.

Beginning July 3, KING-FM began operating eight hours daily (4 p.m. to midnight) with such offerings as BBC's "Third and Light" programs, Broadcasting Foundation of America, NBC and CBC presentations. Other programs are produced locally. Included each week are two-hour dramatic presentations, five nightly newscasts and the more normal half-hour comedy and drama, public affairs and cultural discussion programs. Music, long-hair, jazz and folk, still plays a prominent role in the new schedule.

Changing hands

ANNOUNCED • The following sales of station interests were reported last week subject to FCC approval:

• KLEO Wichita, Kan., and KQEO Albuquerque, N. M.: Sold by K. R. Greenwood and associates to George A. Bolas and group for $665,000, of which $365,000 is for KLEO and $300,000 for KQEO. Mr. Bolas, a Chicago advertising executive, is president of the buying company, Swamco Broadcasting Corp., which last May received FCC permission to acquire KIOA Des Moines, Iowa, for $600,000. Gilbert C. Swanson, Omaha, Neb., businessman, is chairman of Swamco; Mr. Bolas is president. Mr. Greenwood, president of Dandy Broadcasting Corp., will become executive vice president of Swamco. Mr. Bolas announced. KLEO is a fulltime station on 1480 kc with 5 kw daytime and 1 kw nighttime. KQEO is fulltime on 920 kc with 1 kw daytime and 500 w night. Mr. Greenwood and his associates, Lee Vaughn and Merritt Owens, formerly owned KDEO El Cajon, Calif. Broker in the Wichita and Albuquerque transactions was Blackburn & Co.

• WBNY Buffalo, N. Y.: Sold by Nathan Straus and family to Gordon and Barton McLendon for $650,000. McLendons own WYSL-AM-FM in Buffalo, and have reached a tentative agreement to sell the WYSL facilities (1 kw day on 1080 kc) to comply with the FCC's duploey regulation which forbids a single broadcaster from owning more than one station in a community. McLendon stations also include KLIF-AM-FM Dallas, KILT-AM-FM Houston, KTSA San Antonio, all Texas; KEEL Shreveport, La.; WAKY Louisville, Ky., and KABL San Francisco, Calif. The Straus' bought WBNY in 1959 for a total consideration of $610,000. WBNY is 250 w fulltime, 450 kc. It has applied for 1 kw power.

• KTUL Tulsa, Okla.: Sold by John T. Griffin and associates to Raymond Ruff and Charles A. Sammons for $450,000. The buyers own KTRN Wichita Falls, Tex. Mr. Sammons is a multiple owner of community antenna systems and headquarters in Dallas. The Griffin group retains KTUL-TV Tulsa, KATV (TV) Little Rock and owns 50% of KWTW (TV) Oklahoma City. KTUL is 5 kw fulltime on 1430 kc. Hamilton-Landis was the broker on the sale.

• KCKC San Bernardino, Calif.: Sold by C. R. Cheek, trustee for MVW Radio Corp., to Fred H. Gottfurcht, Beverly Hills investment banker, for $135,000 in bankruptcy sale. KCKC operates on 1300 kc with 500 w fulltime.

APPROVED • The following transfers of station interests were among those approved by the FCC last week (for other commission activities see For The Record, page 72):

• KLAK Lakewood, Colo.: Sold by Maurice J. and Julia W. DaVolt and Etythe G. Walker to Edward Smith Scott for $310,000. Mr. Scott is a radio-tv producer and personality. He was mayor of Englewood, Colo., and is presently a member of the Arapahoe County Board of Commissioners.

• KSYD Wichita Falls, Tex.: Sold by Sydney A. Grayson to R. E. Lee Glasgow and Bob H. Walker for $300,000. Mr. Glasgow has interests in WACO-AM-FM Waco, WTAG College Station-Bryan and KAND Corsicana, all Texas. Mr. Walker owns 51% of KWBA Baytown, Tex.

KBS stations heard in 85% of counties

Affiliated stations of the Keystone Broadcasting System reach listeners in 2,547 (83%) of the nation's 3,069 counties, according to a KBS survey.

Sidney J. Wolf, president of Keystone, commenting on the "grass roots" study, stressed the increasing importance of radio selling aimed at the local level—"the real and pinpointed point of persuasion."

"We reach even deeper than the 83% into those counties which comprise the bulk of the small town and rural areas. These are the so-called C and D coun-

ties (less than 100,000 in population),” he said.

While television may have taken the lead as the national air medium, depending on one’s definition of the word national, according to Mr. Wolf, radio continues to have a pronounced and unique national character and does a superb job for advertisers.

Keystone stations by population breakdown: A counties (over 500,000 population)—19 stations; B counties (100,000-500,000)—106; C counties (30,000-100,000)—418; D counties (under 30,000)—553. And 29 stations have duplicate home counties.

According to the report, Keystone stations reach 55% of all people in the U.S., more than 98 million of an estimated 179.3 million persons.

**BERATING RATINGS**

Brown suggests broadcasters make own audience counts

Broadcasters should set up their own circulation bureau, Walter J. Brown, president of WSPA-AM-FM-TV Spartanburg, S. C., told his fellow broadcasters last week in a keynote speech to the South Carolina Broadcasters Assn. meeting at Myrtle Beach, S. C.

Referring to what he called the “numbers game in tv,” Mr. Brown said he doesn’t believe in ratings: “the samples are too small and the margin for error too great.”

He also decried what he described as advertising agency time buyers’ practice of using the ratings on programs to determine cost per thousand without regard to a station’s image or the quality of its audience.

“I don’t see why broadcasters can’t be as smart as newspaper publishers and set up their own bureau of circulation,” Mr. Brown said. “I am firmly convinced that unless there is a new system for buying broadcast time in this country, we will never stabilize broadcasting and we shall continue to live in a jungle of rating warfare…”

In other points, Mr. Brown—

- Claimed that news stories and documentaries about the racial situation in the South are slanted and called on southern broadcasters to convince their networks and news services that “they should not be overly influenced by these minority blocs who are being pampered as they peddle their vendettas against the South.”

- Charged that the good being brought to children by tv is overlooked, while the bad is whipped into sensational stories by newspapers attempting to “cripple broadcasting and get back the advertising dollars they have lost to a new competing media.”

- Urged broadcasters to editorialize, but warned that the ownership and management must take an active hand in preparing the editorials.

- Expressed concern about the FCC’s interest in programming as opening the possibility of the “camel getting his nose under the tent and wrecking the covering protection of free broadcasting.”

The commissioners may not want to censor programs, Mr. Brown declared, but “whatever power the commission may adopt over programming will not be exercised by the members of the commission but by lesser people in government, many of whom will crave the power to have a hand in programming to promote their own political or sociological ideas.”

**More, Better News** • The South Carolina association also heard Howard H. Bell, NAB vice president, urge broadcasters to upgrade their reporting staffs and techniques. Broadcasters, he said, face a challenge to provide the facts and knowledge “that will help us understand and cope with the problems we face in our communities and beyond our borders.”

The South Carolinians also heard FCC Commissioner Robert T. Bartley call on stations to “recapture” control over programming from networks. He also urged that network affiliated stations carry more public affairs shows offered by their networks.

**United to buy Friendly Group**

United Printers & Publishers Inc., Boston, makers of greeting cards, gift wrapping paper, party goods and specialty items, is planning to buy the Friendly Group stations, which include 12 broadcasting properties—five am, two fm, and five tv stations—for $1,350,000 and transfer of an estimated 175,000 shares of company stock. This was disclosed in United’s proxy statement which was mailed July 12 to stockholders in advance of the annual meeting to be held in Dedham, Mass. on Aug. 3.

The stockholders are being asked to approve the acquisition of WSTV Inc., Steubenville, Ohio, and WPIT Inc., Pittsburgh, Pa., the two broadcasting companies that make up the Friendly Group stations. WSTV Inc. owns and operates WSTV-AM-FM-TV Steubenville; KDE-AM-TV Joplin, Mo.; WBOY-AM-TV Clarksburg, W. Va.; and WRGP-TV Chattanooga, Tenn. WPIT Inc. owns and operates WPIT-AM-FM Pittsburgh; WSOL Tampa, Fla.; and WRDW-TV Augusta, Ga. WSTV Inc. earned $134,254 after taxes last year. Net earnings after taxes for

**BROADCASTING, July 24, 1961**
WPIT Inc. in 1960 amounted to $25,786.

The proposed agreement calls for the transfer of a maximum of 175,000 shares of United stock for all the 1,540 shares of WSTV Inc. outstanding, which is valued at $3.5 million.

The agreement with WPIT Inc. provides that United will purchase all the 721 shares of outstanding stock of the broadcasting company for a total purchase price of $1,350,000. United will pay 29%, or approximately $355,000, of the purchase price in cash, and will issue notes for the balance, payable over a five-year period.

Some of the officers, directors and stockholders of United also are substantial stockholders and officers and directors of the Friendly stations.

Louis Berkman and Jack N. Berkman, through various companies they own or control, own about 220,000 shares, or some 40%, of United common stock. Louis Berkman is chairman of the board, treasurer and director of United, senior vice president and director of WSTV Inc. and executive vice president and director of WPIT Inc. Jack Berkman is vice chairman of the board of United, president and director of WSTV Inc., and chairman of the board and director of WPIT Inc.

John J. Laux, executive vice president and general manager of WSTV Inc., president and director of WPIT Inc.; and managing director of the Friendly Groups, owns 1,200 shares, or .22 per cent of United common stock. Mr. Laux is up for election as a director of United at the annual meeting on Aug. 3.

United is a publicly-owned company whose stock is sold over-the-counter. It has marketing outlets in Mexico, the United Kingdom, France and Germany, and other countries.

Storer net-income report shows drop

Storer Broadcasting Co. last week reported earnings for the six months ended June 30 with net operating income after taxes amounting to 82 cents per share compared with $1.14 for the same period in 1960. Net income after taxes was $2,032,500 compared with 1960's $2,820,939.

Net income for the second quarter of 1961 amounted to $977,083 (39 cents per share) as against last year's second quarter figures of $1,397,860 (56 cents per share).

Per share earnings are based on a total of 2,474,950 shares of common and class B common stock outstanding at June 30, 1961.

Storer stations are WJBK-AM-TV Detroit; WJW-AM-TV Cleveland; WSPD-AM-TV Toledo, Ohio; WITI-TV Milwaukee; WAGA-TV Atlanta; WIBG Philadelphia; WGBS Miami; WWYA Wheeling, W. Va.; KGBS Los Angeles. Storer also owns the Miami Beach Sun Publishing Co.

Collins calls for 'professionals'

NAB President LeRoy Collins called on broadcasters to become professionals—assuming all the responsibilities that implies.

In a talk to the graduating class of the NAB Executive Development Seminar at Harvard on Friday, Gov. Collins said that recognized professional status for broadcasters requires competence, ethics, and "a high sense of public service responsibility."

"The teacher who is concerned solely with salary—the doctor whose primary aim is to collect fees—the lawyer who regards his work merely as a stepping stone to fame—are not true professionals. Neither are broadcasters who may be similarly motivated," Gov. Collins said.

The brickbats being thrown at broadcasting, the NAB president said, have meaning for broadcasters: "It means that people care about broadcasting. What we do, how we run our businesses and how we act are really important to them."

"Would any of us really want to be in a business nobody cared about, even if it were more peaceful and somewhat easier on the nerves?"

Kansas tribunal critical of radio trial coverage

A ruling by the Kansas Supreme Court which found fault with a tape recording by KJKC Junction City, Kan., of a kidnap case arraignment, has been protested by the president of the Kansas Assn. of Radio Broadcasters, Thad H. Sandstrom, manager of WIBW-AM-TV Topeka.

The state supreme court sharply criticized the Geary County district court for allowing the KJKC recording. The reprimand came in a ruling July 8 that reversed the lower court's conviction of defendant Eddie Cox—on grounds apart from the broadcast—and that ordered a new trial.

Mr. Sandstrom said broadcasters are aware of their obligation not to interfere in any way with court procedure or decorum and with modern broadcast techniques can cover any proceeding in a completely unobtrusive manner. He observed that "A basic foundation of our judicial system is that it shall be public."

GOVERNMENT

FCC plagued by bawky witnesses

BISMARCK, N.D., REVOCATION PROCEEDING OFF TO SLOW START

A seeming epidemic of witness trouble plagued the FCC Broadcast Bureau last week as it attempted to prove the license of KBOM Bismarck-Mandan, N.D., should be revoked because its licensee had conspired to effect an unauthorized transfer of control of the station. Unlike renewal hearings, revocation proceedings place the burden of proof on the commission.

One witness was called to the stand three times on as many days and left without ever testifying. Another witness persisted in evading questions by FCC attorneys Virgil Tacy and James F. Marten. They asked Hearing Examiner Charles Frederick to declare the witness hostile, to which request the examiner agreed after first warning the witness.

Yet another witness, John K. Harris, former manager and president of KBOM, the subject of much testimony, never appeared. FCC counsel gave no indication they knew his whereabouts, but when KBOM counsel Thomas Sullivan applied for a subpoena for the witness, Messrs. Tacy and Marten told the hearing examiner that Mr. Harris had been in Bismarck for the past two days and had just left on a plane for Yuma, Ariz. The FCC attorneys did say they did not wish to call Mr. Harris but denied having kept him "under wraps."

The main issue in the hearing (which continues this week) is whether the licensee corporation, Mandan Radio Assn., through sale of stock not reported to the FCC, changed ownership since July 1, 1956. Over the protests of KBOM's attorney, Mr. Tacy offered volumes of station bookkeeping into the hearing record. The FCC counsel charged that there were numerous irregularities in the station's reports.

Hostile Witness • Charles E. Kempel, Minot, N.D., major stockholder and former director of Mandan Radio Assn., was questioned about his 1956 purchase of the assets and liabilities of MRA. He said he had bought the stock to help his son-in-law John Harris and Richard C. Johnson become established in business with the agreement they should pay for their equity over a period of time. He said he turned over responsibility for filing FCC reports to Mr. Harris and to Mr. Johnson, who followed Mr. Harris as manager from 1958 until Feb. 6, 1961. Mr. Kempel said he had asked Mr. Harris to resign as manager late in 1957 because of his "incompetence."

Under further questioning, Mr. Kempel kept referring FCC counsel to the record which he said "speaks for itself." Mr. Marten asked the examiner to declare Mr. Kempel a "hostile witness." Under such a ruling a witness is no longer the witness of the party calling him and may be cross-examined, asked leading questions or impeached.

Finally, having directed Mr. Kempel to be more direct in answering questions, Examiner Frederick did rule him to be a hostile witness.

A July 30, 1956, FCC ownership report disclosed only the names of Messrs. Kempel, Harris and Johnson. The Broadcast Bureau attorneys introduced an exhibit of an ownership report filed at that time with the state securities commission which listed two additional stockholders. The attorneys said they would show transfers of stock to 20 other persons and their wives that had never been reported to the FCC.

Point of Privilege • Mr. Johnson was called to the stand by the bureau Monday and Tuesday. On both occasions he said he would testify under a point of privilege provided in the Communications Act, which grants immunity to those testifying before the commission under compulsion. Mr. Tacy did not wish to hear the testimony under those conditions. When Mr. Johnson waived the immunity Thursday and offered to testify, the FCC attorneys conferred briefly and said they would not call him to the stand until they had an opportunity to question him outside the hearing. This proved unsatisfactory to Mr. Johnson.

J. Philip Smith, attorney for the FCC Complaints & Compliance Div., testified he had gone to the station on Sept. 19, 1960, and asked Mr. Johnson why the corporation's minutes did not record a series of stock transactions carried in KBOM's most recent FCC ownership report.

Mr. Johnson, according to the FCC investigator, said he had discovered the irregularities after becoming station manager in 1958 and feared that if he told the FCC before it had renewed the station's license, the renewal would be "unmercifully held up" and that KBOM might "get into hot water" with the commission. Mr. Smith said the station manager told him that his plan was to wait until renewal was granted and then to "bare all" to the commission.

Under cross examination Mr. Smith said he had not discussed KBOM's reporting situation with any of the stockholders other than Messrs. Johnson and Kempel.

Thursday's witnesses, produced by KBOM counsel, testified to the character of the principals of Mandan Radio

"You can't regulate taste, curiosity or morals"

John W. Guider, president of WMTW-TV, N.H., was praised in the U. S. Senate last week for a speech in which he warned that it is both vain and dangerous for the government to attempt to regulate public taste.

In the speech, delivered before the Portland, Me., Rotary Club, Mr. Guider charged that the government is attempting to do this by threatening not to renew licenses and by requiring program formats to conform to Washington's idea of "what the public should see and hear."

"But . . . you cannot regulate taste or intellectual curiosity any more than you can morals," he said. "We tried to regulate morals with the Great Experiment, [prohibition] and it proved to be a colossal failure."

Censorship, he warned, is a serious threat, even through prior control over programming by government is not involved. "Threats that station licenses may not be renewed unless stations conform to the current thinking in Washington . . . is censorship by fear of subsequent punishment," he said.

Sen. Styles Bridges (R-N.H.), who inserted the speech in the Congressional Record, called it "an excellent analysis of the problems and dangers of one man or group of men setting" tv standards for 180 million Americans.

Another request that government go slow in seeking to impose additional controls on the broadcasting industry was voiced last week by Rep. Robert W. Hemphill (D-S.C.). He predicted more stringent government controls would mean greater expense to the public, poorer programs, and additional bureaucratic red tape.
"YOU MAY AS WELL TAKE OUR MICROPHONES"

"Take away our Spotmaster cartridge tape recorders and you may as well take away our microphones. Our Spotmaster units are indispensable. No more scratchy E.T.'s, only the highest quality sound for every client."

TOM KITA, WLEE

A satisfied customer, of course. But, wherever you find a Spotmaster unit in use (you'll find them in stations in every state in the U.S.A., Canada, Australia and Europe) the opinions of the broadcasters are the same. "Spotmaster is the finest cartridge tape recorder in the industry today." And rightly so. Its pushbutton operation was designed and developed by broadcast engineers in an actual station operation using in excess of 300 spots per day. It is the most field-tested, most field-proven equipment available. Spotmaster is available in the BE500 combination recorder-playback model and BE505 companion playback model—both guaranteed for one year. For further information, call or write today to Broadcast Electronics, 8800 Brookville Road, Silver Spring, Maryland, Dial JU 8-4983.

The FCC regains some ground from FAA

Two federal regulatory agencies put their heads together last week and as a result the FCC and tall tower applicants gained a small bit of ground. The FCC and Federal Aviation Agency issued a joint statement Friday (July 21) noting that certain agreements had been reached on the latter's new tall tower rules which became effective July 15 (Broadcasting, July 10).

Primary FAA concessions were (1) inclusion in the new rules of a statement that the FAA regulations do not affect the jurisdiction of the FCC over the radio-television industry, and (2) deletion of the FAA requirement that new tower applicants submit their plans to the aviation agency 30 days before filing an application with the FCC.

Under the joint agreement, broadcasters would be able to notify the FAA of tower proposals simultaneously with the filing of an application with the FCC. The two agencies, in turn, adopted procedures for coordinating consideration of the application.

The new FAA rules authorize that agency to establish antenna farms but no such farm will be specified which would interfere with the statutory responsibility of the FCC, last week's joint announcement said. Further agreements have been reached "to insure that the coordination of new FAA regulations on tall structures with FCC requirements would not result in any unnecessary restrictions on persons who propose structures ... which may project upward into the navigable airspace," the notice stated.

After the new FAA rules were announced, the commission insisted on a conference with the agency to preserve the FCC's authority in the field. It was felt that the FCC has the final statutory authority in the area covered by the FAA rules and that the latter does not have the power enunciated without a congressional mandate.

The commission, however, received no support from Sen. A. S. Mike Monroney (D-Okla.), the man who wrote the Federal Aviation Act. He said last week that the act gives the FAA authority to make rules regarding radio towers and other obstructions which reach up into "navigable air space." And this includes, under the act's definition, "air space needed to insure safety in take-off and landing of aircraft."

The FCC appointed a three-committee commission headed by Robert T. Bartley, to negotiate with the FAA. Friday's joint announcement was a culmination of talks between the two agencies.

Still remaining in the FAA rules, however, and troublesome to broadcasters are the exclusion of the aeronautical rules from protectors of the Administrative Procedures Act and the provision that a "no hazard" tower determinations will be effective for only 18 months. Both the Assn. of Maximum Service Telecasters and the Electronics Industry Assn. have asked the FAA to reconsider the new rules.

ACT IV: ENTER PASTORE

Senate communications subcommittee sets hearings on space communications, frequency allocations

Congressional determination to put its stamp on the national space communications policy still to be developed was indicated anew last week with the disclosure that the Senate Communications (Pastore) Subcommittee will hold hearings on the subject sometime next month.

The senate group—latest in a series of congressional committees to get into the space field—plans to examine not only space communications policy, but the related question of frequency allocations.

Serving as a springboard for the allocations inquiry will be a resolution (SJ Res 32) introduced early in the session by Sen. Vance Hartke (D-Ind.). The legislation proposes the creation of a five-man commission to study and report on the manner in which the radio spectrum is allocated among government agencies.

At the time he introduced the resolution, Sen. Hartke said it is "deplorable" that the U. S. has neither a high-level agency to resolve conflicts among government and non-government users nor a national communications policy. Subcommittee members are known to share Sen. Hartke's views.

The House Side—The House Commerce Committee, meanwhile, begins three days of hearings tomorrow (Tuesday) on space communications. Witnesses will be drawn from the FCC, the Justice Dept.'s antitrust division, the State and Defense Deps., the National Aeronautics and Space Agency, and the Office of Civil and Defense Mobilization.

Next week, it will be the Senate Small Business Committee's turn for hearings on the same subject (Broadcasting, July 17). The House Science & Aeronautics Committee also held hearings which ended last Monday.

A recommendation on one of the major determinations to be made in the formulation of national space communications policy—the role to be played by private industry—reportedly has been given to President Kennedy by his National Space and Aeronautics Council.

But there are conflicting versions of what the recommendation was. One says the council favors government ownership; others, that it favors private enterprise participation, along the lines...
of the joint venture scheme being considered by the FCC and NASA to permit private companies to operate the proposed system.

**Disclaimer** • When clarification was sought from White House News Secretary Pierre Salinger, he disclaimed knowledge of the council's action.

If a top-level decision has been made, it wasn’t evident in the testimony of several administration figures who expressed differing points of view in appearances before the House Science & Astronautics Committee, which concluded its hearings on space communications last week.

John H. Rubel, assistant secretary of Defense, said his department will cooperate with NASA in encouraging private industry to develop and establish an operational communications satellite system.

But Philip J. Farley, a special assistant to Secretary of State Dean Rusk, and U.S. Information Agency chief Edward R. Murrow expressed doubts that the traditional private enterprise approach is applicable to space age communications.

Neither commented directly on who should operate the system. But both said the system must be “global,” open to all nations. And “novel arrangements,” said Mr. Farley, “may well be needed to deal with novel technology.”

**Interest Private?** • Mr. Murrow said that “industry may have little interest in communications with Upper Volta, as there may be no profit forthcoming for years. Yet is it right that Upper Volta have as much potential use of the system as the United States. And if it is not the aim of private industry to serve the lean as well as the lucrative, then it must be the aim of government.”

The apparent lack of a national policy on the private-vs.-government ownership question caused several members of Congress to express concern that private interests might achieve a monopoly in space communications activities.

Sen. Estes Kefauver (D-Tenn.), chairman of the Senate Antitrust and Monopoly Subcommittee, urged FCC Chairman Newton N. Minow and Lee Loevinger, the Justice Dept.’s antitrust boss, to see to it that the space communication system is developed in strict conformity with antitrust principles.

Rep. Chet Holifield (D-Calif.) bluntly charged that American Telephone & Telegraph is seeking a monopoly in the field. He called on Congress and the executive department to formulate a policy for space-age regulation of communications facilities.

Going farther than either of his Democratic colleagues was Rep. John E. Moss (D-Calif.). He said ownership of the space communications system should be “vested in Uncle Sam,” not thrown open “to possible monopoly by one or more of the giant communications corporations.”

Now... greatly improved picture with General Electric's new TV

Type PF-10B Continuous Motion Projector. A unique "skew-ray" plate in the optical system breaks up the collimated light beam into random rays that illuminate film defects such as scratches from so many angles that they virtually disappear. Continuous motion projection eliminates the intermittent film advance mechanism that, when faulty, can cause picture unsteadiness and shorten film life. All controls are located on the front of the pedestal on a swing-out door for easy accessibility. The pedestal also houses the exciter power supply. A variac controls the lamp voltage.

Type PF-11-A Pneumatic Multiplexer is manufactured for General Electric by Eastman Kodak Company to relay the optimum image from film and slide projectors to the vidicon camera. Pneumatically operated high efficiency front surface mirrors travel in their own plane and normal to the optical axis. This unique mirror mechanism and a very rugged base cabinet result in a stable and accurate relay system. The mirror switching system can be controlled at the unit or from remote operating positions.
quality...simplified operation

Film Camera Center

The new General Electric Film Center is designed to transmit high resolution pictures from any standard TV film or 2 x 2 slide. The Film Camera Channel Type PE-21-A features superior signal-to-noise ratio, outstanding resolution, and the ability to adjust for light variations of 100 to 1. The system provides maximum reliability with one-man operation. The continuous motion projectors will accommodate both optical and magnetic sound tracks on 16 mm film, and remote controls can be operated from several different locations. Inputs are directed to the vidicon camera through a fast-action pneumatic mirror assembly in the multiplexer, which may be operated manually at the bench or electrically from remote locations.

For complete details of the economy, efficiency and superior performance this new Film Center can bring to your station, write to Broadcast Equipment, Section 4871, General Electric Co., Lynchburg, Virginia. In Canada: Canadian General Electric, 830 Lansdowne Ave., Toronto, Ont. Export: International General Electric, 150 E. 42nd St., N.Y. 17, N.Y.

GENERAL ELECTRIC

BROADCASTING, July 24, 1961
Deceitful conduct' charged to KLFT

The "pattern of perfidious and deceitful conduct" displayed by Leo Joseph Theriot, licensee of KLFT Golden Meadow, La., "warrants only one sanction—that is the revocation of the license of KLFT," the FCC Broadcast Bureau claimed last week in its proposed findings to Hearing Examiner Jay Kyle. The license revocation hearing was held in New Orleans in May on charges of willful and repeated technical violations by the station and alleged misrepresentations made by Mr. Theriot to the FCC (Broadcasting, May 29).

Indeed Mr. Theriot had shown "a lack of attention to the requirements of commission rules," his own lawyer agreed in his findings, but added that an appropriate penalty would be a short-term license renewal.

KLFT's attorney argued that to deprive Golden Meadow of its sole community communications medium (there are no papers published there) would be unfair to the public. The Broadcast Bureau said Golden Meadow residents could tune in New Orleans stations and could get the weather warnings here-tofore provided by KLFT from Coast Guard sources.

The bureau charged that KLFT had no first-class radio-telephone operator on duty from July 18, 1959 until April 17, 1961. During this period an FCC field representative had warned licensee Theriot repeatedly that he was violating FCC rules, the bureau said.

Engineer Issue • The FCC field inspector referred several engineers to KLFT; Mr. Theriot told one of them that he wasn't going to employ a first-class operator and that "he would prefer shutting down the station before he would," according to bureau findings. The bureau further charged that he had given an involved runaround to a local resident seeking an engineering job; had borrowed his operator's license and photostated it, telling the engineer he would check with the FCC whether the license was valid. No such check was received at any FCC office, the bureau said. (KLFT findings said Mr. Theriot had checked with the engineer's previous employer and had decided not to hire him after getting a bad reference.)

When an FCC field representative checked at the station he was told by employees that George Roundtree was the station's engineer and that he had performed maintenance during the past few days. The employees later rescinded their statements and said they had made them under Mr. Theriot's instructions. Mr. Roundtree was employed by a radio service company in Houma, La., (50 miles away) and serviced KLFT only as a representative of that company, the bureau charged. He was paid $50 per month to "post his license" at the station, but was not required to perform duties for this money, the bureau asserted.

KLFT's attorney agreed that Mr. Theriot had, in good faith, instructed employees that Mr. Roundtree was the station's engineer. "Unfortunately for Theriot's interests, however, the same employee attempted to embellish on this statement when confronted by FCC inspectors, and were later forced to retract their detailed statements."

FCC, Wilson protest Miami ch. 10 delay

Both the FCC and L. B. Wilson Inc., holding an FCC permit for Miami ch. 10, have protested to the U. S. Court of Appeals in Washington against a request by National Airlines for a stay of that court's July 6 ruling.

The court upheld the FCC's determination to revoke the 1957 grant to National Airlines and to disqualify that company, plus North Dade Video Inc., another applicant, and to grant the Miami vhf outlet to L. B. Wilson. (Broadcasting, July 10). National Airlines asked the court to stay its decision because it is planning to ask the U. S. Supreme Court for permission to appeal (Broadcasting, July 10).

The FCC said a stay should not be granted because an applicant (National Airlines) found guilty of conduct amounting to fraud "should not be permitted to reap the fruits of that fraud." There is no substantial likelihood, the FCC said, that the Supreme Court will grant certiorari or reverse the appeals court.

L. B. Wilson Inc. said it is ready to
Cantonese or Mandarin

KRON-TV San Francisco will soon offer a translation system better than subtitles to its Chinese-speaking viewers. The FCC July 19 granted the TV outlet's sister FM operation authorization to use a subchannel, when not employed for transmission of background music, for broadcasting running Chinese translations of the audio portions of its programs.

begin broadcasting 15 days after the FCC says the word. The company said National Airlines should not be permitted to profit from its transgressions. An affidavit by Thomas A. Welstead, vice president of the company, included in the L. B. Wilson pleading indicated that over $1 million has been spent on building WLBW-TV and over $215,000 expended to maintain it on a standby basis over the last nine months. It costs more than $18,000 a month to maintain the facility on a standby basis, Mr. Welstead said. He said WLBW-TV has assurances of an ABC affiliation whenever it begins operating and that it has commitments to hire 39 of the 63-member staff of National Airlines' WPST-TV, the present ch. 10 station.

Congress resumes activity on FCC reform

FCC-reorganization legislation to give the commission the flexibility it says it needs began moving through Congress again last week after temporary delay by the July 4 holiday.

The Senate Commerce Committee approved without objection the bill (S-2034) introduced by Sen. John O. Pastore (D-R.I.), and sent it to the floor. And the House Commerce Committee, which had previously approved a virtually identical bill (HR 7856) sponsored by its chairman, Rep. Oren Harris (D-Ark.), filed its approving report with the House on Monday.

The House bill, however, still has to clear the Rules Committee before it can reach the floor for debate. The sometimes balky Rules Committee is expected to hold a hearing on the matter within the next two weeks.

Both the Senate and the House bills, introduced after the House killed President Kennedy's FCC-reorganization plan (BROADCASTING, July 19) follow closely recommendations submitted by the commission. But although the Senate Commerce Committee revised the language of the Pastore bill to make it agree more with the House version, differences remain.

The House bill would permit the FCC to rule out in advance the possibility of review for certain types of minor cases. The right of appeal in these cases would be limited to filing exceptions to initial decisions.

The Pastore bill would permit parties to any case to seek review. But both bills allow the commission to exercise discretion in granting review.

In addition, while both bills permit the commission to delegate any of its functions to individual commissioners or employees, the Pastore legislation requires only that the delegation of authority—or its withdrawal—be effected by a majority vote of the commissioners participating. The Harris bill requires that the action be taken by a majority of the commissioners "holding office."

The Commerce Committee kept this section of the Pastore bill intact at the request of FCC Chairman Newton N. Minow. In a letter to the committee, he said that, with one or more members of the commission often absent on official business, the requirement that a constitutional majority be mustered would prove too restrictive.
Revolt against FCC program controls

HYDE HINTS NAB SHIRKED EXPLANATION; IDAHO BLASTS COLLINS STAND

The Idaho Broadcasters Assn. last week officially disapproved the stand of the NAB and its president, LeRoy Collins, endorsing the FCC's proposed new program forms.

And, at the same IBA meeting which expressed official disapproval of the NAB action, FCC Commissioner Rosel H. Hyde told the broadcasters of his home state that industry spokesmen have not made radio-tv's position adequately understood. Commissioner Hyde also spoke out against the increased regulatory activities of the government along lines normally found only in the regulation of public utilities and in areas bordering on censorship.

Gale (Gib) Mix of KRPL Moscow, outgoing IBA president, said: "We don't go along with the NAB stand at all." The Idaho association, after hearing a luncheon address by James McKnight of the NAB's Los Angeles office, officially condemned the NAB position (BROADCASTING, July 17). State broadcasters were urged to contact the NAB, FCC and members of Congress expressing opposition to the new program reporting forms (BROADCASTING, July 10). Commissioner Hyde reviewed recent official government actions, statements and policy declarations all looking toward more federal regulation of broadcasting. Pointing out the FCC now rules on the "legitimate and prudent" expenses of applicants seeking to drop out, he said this is the first instance where expenditures in a broadcast enterprise have been made a matter of government regulation. "The concept, of course, is familiar in public utility regulation," Commissioner Hyde stated.

Utility; Censors: Referring to the new program forms, he said: "Detailed reporting and accounting are characteristics of utility regulation. It is said that efforts by others to employ microscopic detail inspired the observation of Justice Holmes that 'delusive exactness is a course of fallacy throughout the law.'"

He said the executive, legislative and the FCC itself are rapidly placing the agency in a position of regulating programming fare. "I think it is unfortunate that the public is being led to look to the FCC for fulfillment of its program interest," Commissioner Hyde stated. And, he maintained, advocates of this new trend have never considered whether close government supervision can give better results than a free enterprise system.

"It is particularly disturbing in the face of the clear declaration of policy [against censorship] in the Communications Act," he stressed. Citing several other prohibitions against censorship by the commission, Commissioner Hyde asked: "What possibility could we have of untoward regulation or interference in programming without doing violence to law? Perhaps there is such a thing as subtle violence. . . . The unattractive office of censor can be made to appear as guardian of integrity."

The commissioner said that broadcasters will make promises designed to satisfy the programming wishes of the commission. "It does not take much imagination to find elements of prior restraint in such a system," he said. "I believe that in more thorough and temperate consideration of the fundamental issue, we may find that broadcasting's greatest opportunity and potential lies in the application of free enterprise principles, free of censorship."

"I should like to see the Communications Act interpreted in a forward-

Poop sheet on FCC's 'Rover Boys'

"Don't forget that the FCC has gotten additional money for more inspectors and they are determined to inspect."

So warns a special committee of the Idaho Broadcasters Assn. which has prepared and circulated a memorandum designed to help member stations prepare for FCC renewal inspections. The five-page document covers every phase of broadcast operations from the condition of employee rest rooms to the proper maintenance of towers.

In addition to the above, here are some direct quotes from the IBA advice sheet:

"Keep your mouth shut and DO NOT VOLUNTEER ANY INFORMATION UNLESS ASKED A DIRECT QUESTION. You will talk yourself into a deeper hole by trying to talk yourself out of a smaller one."

"They will want to know—the minute they walk in the door—whether you are a member of the state association."

"If you have [rebroadcast a program from another station], you'd better pray you've got written permission from the originating station ON FILE. Don't try to talk your way out of this one. . . . You can't outsmart them on this. They will nail you for an infraction AND DISHONESTY."

"They are murder on program and transmitter logs."

"Is your Connelrad alert system in perfect operating condition? It better be."

"If you have ever given anything away over the air you're in for a long grilling session."

"Don't kid yourself on this one [payola], either. They mean ANYTHING by way of under the table benefits."

"If any of those third tickets have lapped you had better do something about it the minute you put this down."

"They will go over your political broadcast activity with a fine tooth comb. . . . You better have a full file. . . ."

"They will ask in the community and if the community reaction or image differs from what you state it to be—LOOK OUT."

"They will double check your answer if they have reason to suspect it—and they indicate a reason to suspect everything."

"They will check your station for employee comfort facilities and with the employees as well as looking for themselves."

"They just hit one station and the manager said to pass this on: 'It is a white glove inspection of your equipment. You had better take a vacuum cleaner to your transmitter and other equipment then polish it up so it looks like new—Even take the tubes out and polish them.' He wasn't kidding."

"You can bet you'll get [at least one citation]."

"If the team hits your station YOU ARE IN BAD SHAPE."

"Just got another call—says to look out for logs that are made up too far ahead or too far behind. LOG IT WHEN DONE."
looking manner—the kind of interpretation which has made constitutional principles effective in meeting the requirements of our country from its beginning to its present status of world leadership."

Commissioner Hyde stressed that broadcasters should have the freedom and discretion essential to creative endeavor and to meet ever-changing conditions. "According to precedent, a conclusion may include an exhortation or a charge," he said. "I make the suggestion with concern for the future of broadcasting that operators of stations haven't made their positions adequately understood . . . or that their demonstration of the advantages of the free enterprise system should have improved attention. Perhaps both of these matters warrant further serious attention."

Duane Wolfe of KCTD Caldwell was elected president of IBA, succeeding Mr. Mix, at last week's meeting in Salmon. Henry Fletcher, KSEI Pocatello, was elected vice president and Ed Brainard, KORT Grangeville, secretary-treasurer. Next year's meeting will be held in Pocatello.

CCBS urges FCC: ignore 50kw request

Clear Channel Broadcasting Service last week asked the FCC to ignore the request of three limited-time Class II stations for 50 kw power and nighttime operation (Broadcasting, July 17). Stations are KFAX San Francisco, KGBS Los Angeles and KXL Portland, Ore.

CCBS said the stations' comments were untimely filed and should not be accepted by the commission. In addition the organization said the comments were "without merit" and, if considered, should be rejected.

The three stations' situation is not "unique" as they claim, CCBS stated; any number of stations could advance similar arguments. Further population increase in the communities served by the three stations would not justify their request because the purpose of the clear-channel proceeding is to provide service to "white" or underserved areas, CCBS maintained. These areas can be served only through improvement of the quality and power of nighttime skywave service, CCBS claimed, and the stations' proposal would reduce rather than improve such service.

Westinghouse Broadcasting Co. also filed opposition at the commission, charging that the stations' request is "not entitled to consideration at the present status of the record at this docket." WBC said the petitioners should have their request returned with leave to refile it, if appropriate, at a later date.

Political funds bills sidetracked in Senate

Hope faded completely last week for passage this year of legislation to ease the burden of radio-tv costs for candidates campaigning for federal office.

The Senate Elections Subcommittee, which held hearings on two such bills, was reported ready to shelve both.

One ($227), offered by Sen. Mike Mansfield (D-Mont.), would require the government to pay up to $1 million for the radio and television time of major party presidential candidates. Minority party candidates would get $100,000.

The other (S-1555), introduced by Sen. Maunine Neuberger (D-Ore.) would provide federal payments to defray part of the cost of broadcast time of any candidate for federal office.

The subcommittee is considering a bill to raise ceilings on campaign expenditures, require public disclosures of contributions and provide a 50% tax credit on political contributions of up to $10. The legislation (S 604) is co-sponsored by Sen. Kenneth Keating (R-N.Y.) and Edward V. Long (D-Mo.).

WWTV-AREA SERVICE STATIONS
SELL 76% MORE THAN DELAWARE'S!

Service stations in Northern Lower Michigan—36 counties served by WWTV, Cadillac- Traverse City—cash-in on 76% more sales of gasoline and other automotive service products than all the stations in Delaware!*"
THE JURY’S VERDICT

THESE TWELVE men and women, selected at random from the thousands of agency executives who make the wheels go 'round in broadcast advertising, all concur on one decision:

BROADCASTING Yearbook — whose 27th annual edition will be out September 1 — is the most essential single reference volume of its kind published anywhere. As you may read in their individual opinions, rendered below, certain key words are significantly repeated over and over — "invaluable" . . . "most useful" . . . "great help" . . . "handy" . . .

(Matter of fact, in a recent survey of decision-makers at the Top 50

PACKED (as usual) WITH MORE FACTS THAN ANY OTHER SOURCE BOOK

- Complete directory of all U.S. television and radio stations.
- Lists of station and network personnel; ownership and facilities information. • Broadcast regulations, code. • Facts, figures, history of the broadcasting business. • Directory of TV-radio agencies, suppliers, services, trade associations, professional societies, allied organizations. • Data on Canadian, Mexican and Caribbean broadcasters, foreign language stations within the U.S. • “The Dimensions of Broadcasting” — key facts about television and radio.

AND hundreds of other reference sections covering virtually every up-to-date aspect of the broadcasting business — all assembled in a single definitive volume to answer thousands of basic questions for thousands of agency, advertise and station users. In all, more than 600 pages crammed with current information! It’s the ideal place to present your own facts, amplifying those which broadcasting’s busies people will be checking, month after month, in the 1961-62 BROADCASTING Yearbook.
agencies — where nearly 1 ½ billion dollars of TV and radio business is transacted annually — BROADCASTING Yearbook is adjudged first choice by more than 2-to-1 over the next-best reference yearbook of broadcast media facts! And by $3/2$-to-1 over the No. 3 annual!

BROADCASTING Yearbook for 1961-62 will again offer the most comprehensive round-up of information on today’s broadcast media available anywhere. Like previous editions, it will enjoy a full and useful life in offices of agencies and advertisers throughout the nation... ending up dog-eared and thumbmarked 12 months later when next year’s volume appears.

---

“For continuous performance and maximum exposure among the people who really count in TV-radio advertising, you can’t find a better place than BROADCASTING Yearbook to tell your own story. This year’s edition will be made even handier to use with special insert dividers between sections, tabbed for swifter reference.

Same rates, same page size, same space units prevail as for regular issues of BROADCASTING. Guaranteed circulation: 18,000 copies. Final deadline for plates: July 29. NOW is the time for action. Reserve the position you want — TODAY — before somebody else gets it!
Congressmen oppose clear channel plan

HOUSE, SENATE BILLS WOULD BLOCK FCC PROPOSALS

A bipartisan attack on the FCC’s proposal to duplicate 13 of the 25 remaining clear-channel stations went off on schedule last week as five members of Congress introduced legislation to block the move.

The proposals—three in the House and one co-sponsored bill in the Senate—would prohibit the FCC from licensing more than one station to operate at night on any of the present 25 class I-A clear-channel frequencies.

The three House bills (HR-8210, HR-8211 and HR-8288) were introduced by members of the House Commerce Committee, which has jurisdiction over the FCC. They are Reps. John J. Flynt, Jr. (D-Ga.), John D. Dingell (D-Mich.) and John B. Bennett (R-Mich.).

The Senate bill (S-2290) was co-sponsored by Sens. Homer Capehart (R-Ind.) and Herman Talmadge (D-Ga.). Plans for the move in Congress came to light after a Senate speech by Sen. Paul Douglas (D-Ill.) criticizing the FCC proposal (BROADCASTING, July 17).

More Power for Clears • In addition to barring the FCC from implementing the duplication proposal it announced last month (BROADCASTING, June 19), the Bennett and Dingell bills would require the commission to authorize clear-channel stations to operate on power “in excess” of the 50 kw presently permitted by FCC rules.

The commission is now empowered to grant all U. S. stations increased power; that it hasn’t done so is believed due to a 1938 Senate resolution expressing that chamber’s view that the 50 kw limit should be maintained.

In statements that for the most part were identical, Rep. Bennett and Sen. Capehart said that keeping the remaining clear channels intact and increasing the power of clear-channel stations is “the only” way of improving radio service to rural areas.

They said this is shown “conclusively” in FCC hearings held in 1938 in 1945.

Rural Loss • The proposed FCC action, they said, “will lead to more service to cities which are already well served and to less service to the rural and remote areas which are now underserved.”

They charged that the proposed FCC action would “create an impossible roadblock” to the use of higher power by class I-A stations and “lead to a further degradation of service to rural areas.”

The legislators also used arguments involving the national defense and international considerations.

They said they are “convinced” it would benefit the military to keep the present I-A and I-B clear-channel frequencies intact and to authorize higher power for all class I-A stations.

And “our [foreign] neighbors,” they said, “could not be stopped from using our class I frequencies in their countries should we choose to desecrate their use in our own.”

WTVW (TV) rebuffed in ch. 7 struggle

WTVW (TV) Evansville, Ind., lost a major battle last week in its four-year fight to retain its right to operate on ch. 7 instead of on ch. 31—as ordered by the FCC in a February 1957 deinter- mixture decision.

Hearing Examiner Jay A. Kyle issued an initial decision recommending that ch. 7 be shifted to Louisville, as the commission proposed, and that WTVW be required to move to ch. 31. Mr. Kyle said there is a much greater need for the vhf channel in Louisville (28th market), which has two commercial vhf, than Evansville (108th market), which has WTVW and two uhf stations in operation.

At the same time, the examiner found that WTVW “has achieved a record of remarkably significant pro- gramming [and] has made a distinct contribution to the community life of Evansville.” He rejected the station’s contention that it would be ruined financially by a required shift to ch. 31 in the Evansville area.

Operating in the Indiana city are WFIE-TV (ch. 14) and WEHT (TV) (ch. 50). Mr. Kyle felt addition of ch. 7 at Louisville will result in advantages to ABC-TV which, he said, has been “starved out of that city because of the lack of an outlet.” The terrain around Evansville is ideally suited for uhf propagation, he said.

The case began in 1957 with the FCC’s order making Evansville all-uhf and intermittent hearings on the WTVW shift were held through Feb. 21 of this year.

Reconsideration plea by WHDH-TV denied

The FCC last week denied a petition by WHDH-TV (ch. 5) Boston for reconsideration of the commission’s order vacating the 1957 grant to Boston and ordering further comparative evaluation of the three applicants.

WHDH-TV’s contentions (BROADCASTING, July 3) “ignore the nature of the court remand” which ordered the commission to re-evaluate the applicants on the basis of the record, including ex parte revelations, the FCC said. The commission also refused to reopen the record, as requested by WHDH-TV, or to permit the station to introduce evidence relating to its ch. 5 operation the past three years.

The commission said that the present proceeding would not be underway except for the misconduct of WHDH-TV and to allow such evidence to be presented would “indirectly be permitting it to profit from such misconduct. It would not seem to require discussion to demonstrate the inequity of such a situation.”

WHDH-TV last week asked the commission to dismiss the competing ch. 5 application of Greater Boston Tv Corp. following the sale of a 2.77% interest by Richard Maguire to John Quincy. WHDH-TV maintained that this constitutes a “significant change” in GBT because Mr. Maguire was the prime organizer of the application.

WHDH-TV also maintained that GBT made much of the fact that each of its 36 stockholders owned an equal amount (2.77%) but now there are only 35, and Mr. Quincy owns twice as much stock (5.55%) as the remaining 34 stockholders. Mr. Maguire’s withdrawal destroys the usefulness of the existing hearing record, WHDH-TV said.

The third applicant for ch. 5 is Massachusetts Bay Telecasters.

54 (GOVERNMENT)
WITT hearing moved to own community

Amid a flurry of petitions and objections last week, FCC Chief Hearing Examiner James Cunningham approved the Broadcast Bureau's request to move the site of the license renewal proceeding against WITT Lewisburg, Pa., from Washington, D. C., to the station's own community (AT DEADLINE, July 17). The attorney for the station had opposed the move, holding that preparation of his case in Washington, where he has offices and access to FCC files, would be difficult enough and the move to Lewisburg would place an extra burden on him.

Since the Broadcast Bureau has argued repeatedly against delay of the case into September, it finds itself committed to a hearing during the FCC's vacation month, August, contrary to the FCC's expressed general policy against such proceedings during that month. The hearing is scheduled tentatively to start July 31.

The issues will include alleged unauthorized transfer of control of WITT and misrepresentations by WITT to the FCC.

The bureau last week asked the FCC to deny WITT's request for a bill of particulars, citing the commission's refusal of a bill to KWK St. Louis, and claiming the bureau has been willing to discuss the charges against WITT in prehearing conference. The bureau also opposed three other WITT requests: to turn the proceeding from a renewal to a revocation proceeding; to place the burden of going forward with evidence upon the Broadcast Bureau; to clarify or revise the issues.

Bigger Conelrad seen in Kennedy reshuffle

President Kennedy last week reshuffled the civilian defense activities of the United States.

He abolished the Office of Civil & Defense Mobilization and placed the bulk of its civil defense activities under the Department of Defense.

Censorship and telecommunications remain under the White House roof in a new staff Office of Emergency Planning (CLOSED CIRCUIT, July 17).

Among the missions given to the Secretary of Defense is one to maintain communications and a warning system for civil defense.

This is taken to mean that the Conelrad program, under review by the Joint Chiefs of Staff (Broadcasting, April 10), will probably be retained—and perhaps even expanded.

Retained in the White House is an Office of Emergency Planning, which will handle planning and coordination. Frank B. Ellis, present OCDM director, is scheduled to head this office. He will retain his present responsibilities for telecommunications and censorship.

The President's executive order becomes effective August 1.

WOOD-TV circumventing FCC, charges WILX-TV

An "emergency" plea that the FCC prevent WOOD-TV Grand Rapids, Mich., from dismantling its tv tower site north of that city was entered last week by WILX-TV Onandaga, Mich., which had protested WOOD-TV's original move of its tower to the south. The case was carried to the U. S. Court of Appeals, which found the FCC had erred in permitting the move because this left some areas without tv coverage (Broadcasting, July 17).

Four days after the court remanded the case to the commission, WILX-TV claimed, WOOD-TV started to dismantle its northern site. WILX-TV charged this action was an attempt of the Grand Rapids station to foil the FCC, since that agency could not order a tower re-erected in just a few days.

BROADCASTING, July 24, 1961
DAYTIMERS ASK INTERFERENCE TEST

Livesay suggests trial after hostile Hill questioning

Daytime am stations received little encouragement last week that Congress would be any more sympathetic this year than in the past to their request for permission to extend their broadcast hours.

The House Communications Subcommittee held a three-day hearing on legislation to permit daytimers to broadcast from 6 a.m. to 6 p.m. regardless of the hours of sunrise and sunset. But at the hearing’s conclusion, even the author of one of the seven identical bills under consideration privately conceded that the votes for sending legislation to the parent Commerce Committee weren’t available.

As in the past, opposition to the proposal was expressed by the FCC, which was represented by James E. Barr, assistant chief of the Broadcast Bureau; and the Clear Channel Broadcasting Service. John H. DeWitt Jr., president of WSM-AM-TV Nashville, Tenn., represented the CCBS as chairman of its engineering committee.

In addition, sharp opposition was indicated by some of the subcommittee members who subjected J. Ray Livesay, board chairman of the Daytime Broadcasters Assn. and the only witness appearing in behalf of the legislation, to rugged questioning.

More Loss Than Gain • The FCC and CCBS statements argued that the interference caused unlimited-time stations by daytimers operating during nighttime hours would far outweigh the additional service daytimers could render their local areas. About half the 3,700 am stations are daytime-only.

They also maintained the proposed legislation would conflict with U. S. international agreements involving broadcasting. The FCC said the North American Regional Broadcasting Agreement and a bi-lateral agreement with Mexico are predicated on present U. S. regulations involving daytime-only broadcasting.

The CCBS even felt the hours of future daytime stations should be restricted more than present daytimers, since already the “present operation . . . causes objectionable interference during post-sunrise and pre-sunset hours.”

The CCBS had its own recommendation for improving nighttime service to rural areas—increase the operating power of clear-channel stations above the presently authorized 50 kw.

Mr. Livesay, the owner of WLBB Mattoon, Ill., argued that, in opposing the legislation, the FCC is “putting too much reliance” on engineering data and not enough on the radio-programming needs of local areas which, he said, are best served by local stations.

The subcommittee’s two California members, Rep. J. Arthur Younger (R) and John E. Moss (D) took a dim view of Mr. Livesay’s arguments. Rep. Younger said the DBA representative is, in effect, “accusing the FCC of making prejudicial decisions.”

If the FCC is acting in such a manner, he went on, “it’s a matter for congressional investigation. But it’s not Congress’ function” to direct the commission to take actions contrary to decisions that are based on engineering studies.

Moss Repeats • Rep. Moss, taking a similar line, said Mr. Livesay is asking the subcommittee “to substitute a political judgment for an engineering judgment where these [daytime] stations are concerned.” He indicated he is not ready to disregard the FCC’s recommendations.

After a few minutes of this double-barreled treatment, Mr. Livesay retreated to a request that the subcommittee recommend “a fair and inclusive test” to determine whether daytimers broadcasting 6 a.m. to 6 p.m. during the winter would create serious interference to unlimited-time stations.

And he readily endorsed a suggestion that the proposed legislation be amended to provide for a temporary, 1-year extension of daytimers’ hours.

Moline ch. 8 parties charge FCC inconsistent

In the face of three recent FCC decisions stressing the importance of surveying local program needs, the commission’s announced plan to grant ch. 8 Moline, Ill., to Moline TV Corp. is “wholly incredible” if the agency understood the record, three other ch. 8 applicants charged last week.

Citing (1) the decision denying an Elizabeth, N. J., fm application to grant ch. 8, (2) the revised program forms and (3) the FCC policy statement in the KORD Pacific, Wash., case (Broadcasting, July 3), the three applicants said: “It would seem abundantly clear that the most clear-cut and emphatic” of the FCC’s current policies is the requirement that local program needs be determined.

Yet, the petitioners charged, the commission has proposed to grant ch. 8 to

What does EDWARD FITZGERALD* say about BROADCASTING YEARBOOK?

"YEARBOOK OF GREAT HELP"

"BROADCASTING Yearbook is of great help in getting basic information about stations and other pertinent information regarding the overall broadcast field."

Some rates, same space sizes as every issue of BROADCASTING. Final plate deadline: July 29. Reserve the position you want — TODAY — before somebody else gets it! Wire or call collect to nearest BROADCASTING office now!

* Media Director J. Walter Thompson Chicago
Moline tv, the only one of five applicants which made no effort to determine local program needs. The record is clear that Moline deliberately adopted such a policy and that its president, Frank P. Schreiber, described such local surveys as "worthless" and "eye-wash," Community Telecasting Corp., Midland Broadcasting Co. and Iliway Tv Inc. said.

Staff instructions proposing a grant to Moline tv were issued by the commission June 29 (Broadcasting, July 3) — the same day the Elizabeth fm application was denied. An initial decision had favored a grant to Community. The fifth applicant for the channel is Tel-View News Inc.

From the Chairman • The petitioners pointed out that FCC Chairman Newton N. Minow has "repeatedly emphasized" that applicants must determine local program needs and has been given wide publicity in his statements. They asked that these statements and the commission's three recent decisions be compared with the lack of knowledge by Moline principals of local needs and local civic, religious and educational leaders.

"Petitioners sincerely believe that when the commission ••• adopts two decisions and a rulemaking proposal which cannot be squared with a grant to Moline Tv, it is obvious that the instructions in this case were issued without a full understanding of the record evidence," the applicants said. Therefore, they pleaded, a reargument of the case is necessary prior to a final grant to protect all the parties involved.

If the commission did understand the record when the instructions were given, Iliway, Community and Midland said, only one other conclusion is possible — "That the vote was not based on the record evidence but upon a distortion of the evidence and the commission's established criteria in a fashion that justice could not condone."

Since Moline Tv did not make a survey of local needs, its programming plans are skeletal in nature and the type proposal "that any communications lawyer could draft, singlehanded, without ever having seen the community involved," the petitioners charged. They pointed out that the examiner described Moline's proposals as leaving "much to conjecture."

---

**EQUIPMENT & ENGINEERING**

**STEREO’S FUTURE PROGNOSTICATED**

It's seen as potentially bright if handled properly

The fall market potential in fm stereo receivers and color tv sets captured the attention of the annual convention of the National Assn. of Music Merchants in Chicago last week. The 60-year old national trade show attracted over 10,000 retail buyers who placed orders for everything musical from church organs, pianos and miscellaneous musical gear to G. LeBlanc Corp.'s e-flat flugelhorn.

Several speakers, including FCC Comr. Robert E. Lee, sounded warnings that fm stereo could die aborning if manufacturers failed to build sufficient quality into their product equal to the transmission standards and the public's present high expectations for fm.

Both major and minor manufacturers and marketers of radio-tv sets, phonographs and tape recorders exhibited at the music show. Japanese and German importers, sprinkled through last year's show, made a heavy impression this year, including Sony's tiny portable television set (Broadcasting, July 10).

Especially noticed were import models of transistorized am-fm pocket radios and small am-fm portables, many in the $69-79 range and some to be sold by U.S. manufacturers under their own brand names. The big console lines stressed the growing trend to fine furniture. RCA introduced its new fm stereo adapter to sell for $29.95 which will fit all its line of phonograph consoles with am-fm tuners that were introduced earlier this year and most models introduced in recent previous years.

Color-tv interest was stimulated by reports of still more entries in the color manufacturing and marketing field, including Sylvania's announcement early in the week and fall introductions planned by Delmonico International (using Japanese chassis with RCA picture tube), and Canada's Dominion Electrohome Industries Ltd. (using RCA chassis, tube). Latter intends to invade U. S. market with high-priced cabinet line.

Observers at the show felt that by next year every console radio or phonograph would have fm stereo and that within the next two to three years nearly every table model radio would be an am-fm combination set. The emphasis appeared to be on the surge of promotion and interest in fm and how it could be made profitable.

The show talk on "fm stereo" (the
Go with Day-Glo

ABC engineers call a two-year experiment in paint on the WABC New York transmitter in Lodi, N. J., an “unqualified success,” both in terms of airplane safety and cost. In 1959, ABC received FCC approval to paint the uppermost 100 feet of the 650-foot transmitter with special Day-Glo orange fluorescent paint. No sign of wear has been detected, while the remainder of the tower, painted with standard paint, will soon require repainting. Though special FCC approval is required, Frank Marx, ABC vice president in charge of engineering, has recommended the use of Day-Glo to ABC Radio affiliates. (Day-Glo is a product of Switzer Bros. Inc., Cleveland.)

term now preferred, with “multiplex” to be omitted to avoid further confusing the public) was spurred by demonstration broadcasts by WKFM (FM) Chicago and Zenith’s WEFM (FM) there as well as by a symposium sponsored by Electronic Industries Assn. which featured FCC Comr. Lee and John F. Meagher, NAB’s vice president for radio. EIA also introduced its new mass-distribution booklet on fm stereo which contains a brief introduction by FCC Chairman Newton Minow.

“A serious word of caution is very well in order to this particular group,” Comr. Lee said. “The commission is requiring the stations broadcasting this new technique to adhere to very high standards in order to provide the public with the type of service that they are entitled to expect from this new and probably relatively expensive equipment.

“All of this will go to naught if the receiving equipment does not match those high standards,” Comr. Lee said. He hoped the “heat of competition will not result in killing the goose that will lay a beautiful golden egg.”

As for proposals to advance some form of stereo broadcasting in the regular am radio band, Comr. Lee let it be known he does not favor any such idea. It would take years of study and the frequency is inappropriate, he said, and “to put it bluntly, I can certainly say that I for one am in no mood to even study let alone approve stereo in the am band. I believe it would be contrary to the public interest if the term stereo were to be attached to less than high audio quality.”

Mr. Meagher reported on NAB’s survey of station fm stereo plans (see page 34).

GE develops fm unit for news gathering

General Electric Co., Lynchburg, Va., today (Monday) is announcing the availability of a new personal portable two-way radio that can be used to cover news and special events. It is described as the smallest, lightest and most compact vhf-fm man-carried communications unit to be marketed to date with transmitter and receiver in a single case.

The sets will be manufactured for high band frequencies (132-174 mc) with 1 kw transmitter RF power output. Called the Voice Commander, the new unit is 9.5 inches high, 5.3 inches wide and 1.7 inches deep. It weighs slightly more than four pounds. More information is available by writing to the company.

RCA sales, earnings up for second 1961 quarter

RCA’s second quarter earnings rose 10% above the 1960 quarter on a sales increase of 4%, the company announced Friday (July 21).

Profits after federal income taxes amounted to $5.5 million during the second quarter, compared with $5.1 million in the 1960 quarter. Sales of products and services reached a secondquarter record of $360.1 million, compared with $345.8 million in the like period a year ago. Earnings per share of common stock were 29 cents, the same as a year ago.

In the first half of 1961, RCA sales totaled $721.8 million compared with $707 million in the corresponding 1960 period. Profits after taxes were $17.7 million, compared with $18.1 million during last year’s first half. Per share earnings amounted to 97 cents, as against $1.14 on a smaller number of shares outstanding in 1960.

Technical topics...

U. S. rep • The English Electric Valve Co. Ltd., Chelmsford, England, has appointed Calvert Electronics, N. Y., as U. S. distributor for all its products other than television camera tubes.

Fm stereo exhibit • Manufacturers of high fidelity components will show new fm stereo equipment to the public at the New York High Fidelity Music Show Sept. 13-17 at the Trade Show Bldg. It will be among the first exhibits of such equipment since the FCC’s approval last April of the General Electric-Zenith system of fm stereo broadcasting. More than $6 million worth of hi-fi components will be exhibited.

RCA awarded government contract • RCA received a $423,967 government contract last week to study ways of minimizing radio frequency interference problems. RCA’s aerospace communications and controls division, defense electronic products, will handle the research and development contract which comes under the U. S. Dept. of Defense radio frequency compatibility program. A feasibility study will be made by RCA to evaluate the compatibility of electronic equipment in specified electromagnetic environments.

Closing down • Sylvania Electric Products Inc. will discontinue operations at its receiving tube plant in Shawnee, Okla., by the end of the year. The company said the closing was forced by a number of economic factors including reduced demand for receiving tubes because of increased use of semiconductor devices in electronic equipment. Sylvania, which is a subsidiary of General Telephone & Electronics Corp., also operates receiving tube plants in Emporium, Brookville and Altoona, Pa., and in Burlington, Iowa.

Three new additions • The development of three additional all-glass base novar receiving tubes was announced last week by RCA. The tubes, with a pin-circle diameter of 0.687 of an inch, are the RCA-6BC3, RCA-17BH3 and RCA-22BH3.
Programatic offers quality and wide program diversification.

“Programatic offers quality and wide program diversification.”

says George Chernault
WSLS-FM, Roanoke, Virginia

“We use Programatic on a 14-hour daily basis Monday through Saturday...just slightly less on Sunday. Programatic helps reduce overall costs while maintaining our FM programming quality. In fact, we at the Shenandoah Life Station find Programatic enables us to offer a wide variety of eminently listenable music in the best taste.”

Yes, more and more FM broadcasters, large and small, are discovering the way to bigger adult audiences, happier advertisers and higher profit potentials. The secret is the distinctive Programatic package of all-time favorite music played with taste and restraint, plus the exclusive audience-building techniques and program service. And, it’s automated, too. Programatic is available to only one station per market. For complete details, write to Programatic.

Corinthian stations to continue ‘Doerfer Plan’

The Corinthian TV stations next fall will continue with public-affairs “Doerfer-Plan” programs in prime time although CBS-TV, with which the stations are affiliated, apparently will discontinue the practice of turning back a half-hour of option time on a once-a-month basis. CBS-TV’s reasoning appears to be tied in with its plan to expand public-affairs programming on the network.

In Doerfer Plan programming, toward which all three TV networks have subscribed the past season, a half-hour goes back about every third or fourth week to stations to showcase a local public-affairs effort.

Prior to the CBS-TV affiliates meeting last spring, it’s generally known, the network made a check among affiliates on whether they wished to have the once-a-month half-hour again in the coming season.

The Corinthian decision apparently stems from C. Wrede Petersmeyer’s request of the five owned stations in late May that they let him know of their reactions to his belief that the stations ought to continue to produce half-hour public affairs shows and these be worked into a regular, once-per-month scheduling.

As it has been worked out, the stations will schedule their shows in prime time, preempting a network program (or syndicated program in some cases), but probably at different times each month to avoid preempting any one advertiser more than once in a season.

In the past season, CBS-TV turned back to stations a half-hour (Thursdays, 10:30-11 p.m.) once each month but in the 1961-62 period plans to provide an hour-long CBS Reports each week.

Peak Periods • It’s reported that these stations polled by Mr. Petersmeyer, who is president of Corinthian, have indicated they may consider spotting many of the shows in the peak viewing periods (8-10:30 p.m.).

Corinthian feels that continued local production of these shows will prove to be worth the effort, particularly because of the stations’ past experience. Mr. Petersmeyer, for example, has pointed to the fact that this type of programming in prime time has been stimulating to the stations’ staffs and desirable to the stations, to TV as a medium and to the communities of which the stations are important parts.

The Corinthian analysis of the situation:

• The stations as a group have had a “living laboratory” in which they’ve been able to test their abilities to showcase ambitious local program efforts.

• They’ve found that stations have access to a wealth of source material.

sound stages, will be able to provide pay TV with the vast amount of programming it will require. The profit potentials, he stated, “are staggering.”

Film sales...

Consult Dr. Brothers (ABC Films): Sold to KPTV (TV) Portland; KOB-TV Albuquerque; WGAL-TV Lancaster, Pa.; KXLY-TV Spokane; KTAR-TV Phoenix; KMJ-TV Fresno, and KGUN-TV Tucson. Now in 42 markets.

Films of the 50’s Vol. II (Seven Arts Associated): Sold to KGW-TV Portland; KREM-TV Spokane, and KOGO-TV San Diego. Now in 32 markets.

Films of the 50’s Vol. I (Seven Arts Associated): Sold to WAGL-TV Lancaster; KTBC-TV Austin, and KRGV-TV Weslaco, Tex. Now in 98 markets.
$9.3 million CBS football pact held illegal
OTHER PLANS SEEN ENDANGERED BY JUDGE'S RULING

U.S. District Court Judge Allan K. Grim ruled in Philadelphia last week that the National Football League's record $9.3 million, two-year "package plan" contract with CBS-TV (BROADCASTING, May 1) violates a decision he handed down Dec. 12, 1953, and therefore is in violation of the antitrust laws.

The Dept. of Justice questioned the legality of the new NFL-CBS deal which gave the network the right to telecast the 98-game schedule of the league's 14 teams. It was in response to this opposition that Judge Grim made his decision.

Under the terms of the NFL-CBS contract, each of the league's teams would receive for its rights slightly more than $332,000 this year and next. In 1960 the 13 teams of that time negotiated individually, and the result was an unbalanced distribution of finances ranging from $75,000 to the Western Division champion Green Bay Packers to more than $225,000 to the Pittsburgh Steelers, an "also ran" team in the Eastern Division.

Rival Package • The rival American Football League, operating an eight-team league in its first season last year, has a five-year, $11 million package plan with ABC-TV. Judge Grim did not refer to this agreement.

"By this agreement (selling of the pooled television rights in a package)," the ruling said, "the member clubs have eliminated competition among themselves in the sale of television rights to their games."

Clearly, this restricts the individual clubs from determining from which areas the telescasts of their games may be made, since the defendants [the AFL] have by their contract given to CBS the power to determine which games shall be telecast and where."

NFL Comment • Pete Rozelle, National Football Commissioner, attacked the ruling in a statement:

"This decision will have far-reaching effect on televised sports events. The National Football League contract is the same type that has been employed by other sports leagues and heretofore has gone unchallenged. (Mr. Rozelle was alluding to the AFL "package" and a similar one between the National Basketball League and NBC-TV.)"

"I am keenly disappointed with this decision, and we are consulting our attorneys as to the possible future course of action."

Network Silent • CBS refused to comment on the action pending a study of the various legal aspects.

How powerful is the television as-

Cochran makes choice

The decision facing CBS-TV newscaster Ron Cochran was whether to remain a member of the network's news department, or quit and become a performer. Mr. Cochran chose the latter alternative last week. Beginning Oct. 11, he will be host-narrator for CBS-TV's Armstrong Circle Theatre, a documentary series which will be starting its 11th consecutive season on the air. Mr. Cochran replaces another CBS-TV newscaster, Douglas Edwards, who left the show last season after 10 years.

The network's rule forbidding members of the news department to appear on non-CBS news shows brought about his resignation.

Program notes...

Jungle series • Banner Films Inc., New York, has acquired world-wide distribution rights to the Jungle Girl series from the estate of Edgar Rice Burroughs. Produced by Republic Pictures, the 15-episode series includes one segment running 28 minutes. Others are 18 minutes apiece.

New GAC division • Preminger-Stuart-Feins Agency, personal representative of writers, directors, producers and other creative behind-the-camera personnel on July 31 becomes the literary division of General Artists Corp. The entire personnel of P-S-F, headed by Ingo Preminger and including Malcolm Stuart, Bernard Feins and Sam Adams, will join GAC. Martin Shapiro, active
"Game shows," the TV baby that almost went out with the bath water when the quiz scandals broke two years ago, are on the rise again. But they're being scheduled primarily in daytime, and precautions are being taken by the networks to police the programs and keep merchandise and money prizes at comparatively modest levels.

A check by Broadcasting last week showed the following:

- CBS-TV, which dropped all game programs in the wake of the television quiz scandals in the winter of 1959, is back in the field in a substantial way with four daytime programs—Your Surprise Package, Double Exposure, Video Village and Face the Facts (with a Saturday-only version of Video Village, aimed at the children's audience, to start shortly).
- ABC-TV, which had utilized few game programs up to 1959, currently carries five—Camouflagge, Seven Keys, Number, Please, Who Do You Trust and Queen For a Day.

NBC-TV continued to schedule a full complement of game programs even after the quiz scandals but, a spokesman pointed out, controls at the network level are stringent to eliminate any possible criticism.

NBC-TV now schedules Concentration, The Price Is Right, Say When, It Could Be You, Play Your Hunch, Truth Or Consequences and The Jan Murray Show, with Price and Concentration also seen in nighttime versions once a week.

Network officials stressed there is a distinct difference between a game show (which offers merchandise or money to a contestant who participates in a game), a quiz program (which usually offers large sums of money for the right answers), and a panel show (which spotlights the panel, rather than the contestant). They added that game programs were not tainted in any way but that CBS-TV and ABC-TV became reluctant to schedule them because of the climate of opinion which evolved from the quiz scandals.

Networks also were sensitive to criticism which charged that they did not control the acquisition and distribution of merchandise and the length of the "plugs" for products offered on the programs. Shortly after the quiz scandals, the networks established units to "police" programs that offered prizes. Control was asserted by the networks in these ways:
- They now acquire the merchandise themselves, either directly from manufacturers or through a so-called prize agency and direct the distribution of merchandise to winning contestants. This move was aimed at eliminating criticism that the producer and/or the prize agency kept duplicate prizes for clients, in GAC's television department for the past two years, will also join the new literary division.

New studios • Tele-Visual Aids, Miami, has opened a new 500-square-foot studio, complete with sound stage, sound control room and editing facilities. The firm specializes in audio-visual services for television, industry and education. It is headed by Bernard Blynder, president.

Giant schedule • Metropolitan Broadcasting's WNEW New York will carry the complete 19-game schedule of the New York football Giants this fall. A lineup of four sponsors is expected to be announced shortly. The station's exclusive New York area radio coverage will begin Aug. 12, the first of five pre-season games. The regular schedule includes seven home games which will not be covered by local TV (WCBS-TV New York) and seven out-of-town games. WNEW has a two-year deal, with options, with the pro-football team. Announcers will be Joe Hasel, sports editor of WNEW, and Al DeRogatis, former Giants' player.

1962-63 entry • Screen Gems Inc. reports that Clarence Greene and Russell Rouse, who produced Tightrope for SG, are preparing a new half-hour TV film program, The Seekers, for the 1962-63 season. The series will depict the adventures encountered by a group of scientists undertaking the solution of problems which their clients cannot solve.

Opening for business • Taynod Productions, N. Y., has been formed by Sherrill Taylor and Jory Nordland as a TV program packaging and production company. New York office will be established in September at 330 E. 46th St. The company will produce half-hour Kaklopolitians, which have been scheduled for NBC-TV next fall, and is preparing another half-hour tape show, Dear Abby, featuring lovelorn columnist Abigail Van Buren. Other offices will be opened in Chicago and Los Angeles. Mr. Taylor formerly was radio-TV senior group supervisor with J. Walter Thompson Co., Chicago; Mr. Nordland has been a radio-TV producer with various companies.

First series • Project III Enterprises, N. Y., independent TV production firm, is planning its first series, All That Jazz, hour-long situation comedy to be fi-
themselves. Networks claim they buy the prizes but receive a reduced rate because of a modified "plug."

- The plug itself, in conformity with Section 317 of the Communications Act, is brief and devoid of descriptive phrases.

- Network staffers work closely together with the outside producer on selection of contestants, devising of questions and in program production coordination.

- Producers sign warrants that they will not reveal the questions to any contestants or 'rig' the programs in any way.

Jerry Hammer, president of Jerry Hammer Productions, which packages ABC-TV's Camouflage, agrees with network officials when they say that game shows will not over-run the schedules in the future but will nevertheless play an important role. He points out that the programs which have come on the air in the past five or six months all have stressed "visual appeal, fun and entertainment, rather than big prizes, which were most common two years ago." There must be an element of participation in the games by the home audience as well as the contestant and the studio audience, Mr. Hammer asserts.

'Program Balance' - Mr. Hammer believes that game programs supply a balance to daytime schedules, providing the audience with a varied diet - dramatic serials, off-network programs as well as game shows. Their acceptance by the audience, he said, is verified by the ratings, with Camouflage tuned in each day by more than 3 million homes.

Network officials supported Mr. Hammer's view on program balance. Larry White, vice president and director of daytime programs for CBS-TV, stressed that this consideration was the

Host Don Morrow assists a contestant on 'Camouflage,' one of ABC-TV's recently-instituted game shows, which is based upon the indentification of objects hidden with a camouflage drawing.

Canadian network, and SG has engaged producers Alfred Crown and Dan Enright to create new game shows and other programs for the company. A second SG game entry also is headed for showing in Canada next fall.

The bright picture in game shows was dampened by a warning from an official of a leading prize agency who told Broadcasting:

"Now that game programs are coming back, a few of the 'prize guys' who operated freely a few years ago are coming 'out of the woodwork.' Though networks have tightened their controls considerably, there are still some ways by which people can make a quick buck. The networks must be ever vigilant and guard against doing any business with merchandisers with dubious reputations."

nanced and distributed by MGM-TV. Project III plans to deliver three hour-long series and three half-hour series during the next tv season.

Fargo color - NBC-TV has added Tales of Wells Fargo to its schedule of color programs for the 1961-62 season. The program, produced at Revue Studios, is entering its fifth season on television. In addition, it is being lengthened to an hour and will introduce five additional characters to be featured with Dale Robertson, the series' star.

OCDM show - Stations desiring Retrospect, film series offered by the Office of Civil and Defense Mobilization, may be in for a short wait. The popular series, offered eight weeks ago by OCDM's radio-tv division, already has had in excess of 200 requests. The pro-

gram, with CBS-TV's Douglas Edwards as host, features such famous newsreel footage as the Berlin Airlift, Cuba in Turmoil, Pearl Harbor and documentaries on Churchill, Mussolini, Gandhi, and baseball and movie stars. Prints are furnished free but stations are required to carry the complete series of 13 programs.

New Ford show - Tennessee Ernie Ford, whose program was sponsored by Ford Div., Ford Motor Co. on NBC-TV, will star in a daily daytime program on ABC-TV in 1962, according to Giraud Chester, ABC vice president in charge of tv daytime programming. The Tennessee Ernie Ford Show, half-hour musical variety program to be broadcast at a daytime hour to be announced, may originate from KGO-TV San Francisco. The program will be produced for ABC-TV by BedfFord Corp.

ETV series - Mark Damen, special projects producer for WQED (TV), Pittsburgh's etv station, will visit every European country except Spain, producing a five-program series, Of Sixes and Sevens. The series, a study of the European economic community, will be distributed nationally by National Educational Television.

'Street' sales - Public Affairs Radio Inc., N. Y., received orders from 10 stations for its daily two-and-one-half minute business and financial news feature, This is Wall Street. Stations and sponsors, all member firms of the New York Stock Exchange, include: KABL San Francisco, Kidder, Peabody; WPAT New York, Hayden, Stone; WNAC Boston, Goodbody; WBRK Pittsfield,

BROADCASTING, July 24, 1961
Advisory council guides programming

The Community Advisory Council of WBAL-AM-FM-TV Baltimore, established last September to help the station produce programming more suited to the community needs, is showing its teeth.

Results of the council's efforts will become reality this September when the station presents "Minus 1,000-000," the first of nine monthly documentaries. This particular one deals with teenagers who drop out of high school prior to graduation. The documentaries, in varying lengths according to subject, are part of the station's Perspective series.

WBAL-TV this fall also will present a weekly newsreel of the activities of the youth in its area to be prepared, written, filmed and presented by teenagers. The station also will present a weekly program featuring outstanding musical and dramatic talent.

The council is composed of 14 prominent civic, religious and educational leaders in the station's coverage area.

Mass., Goodbody; WHEC Rochester, N. Y., Bonbright; WHYS Ocala, Fla., A. M. Kidder; WLBZ Bangor, Me., Hornblower & Weeks; WLOL Minneapolis, Paine, Webber, Jackson & Curtis; KFMK Houston, E. F. Hutton, and KDAL Duluth, Minn., Paine, Webber, Jackson & Curtis.

Time change: WCBS-TV Views the Press, the New York station's weekly program featuring an analysis of newspapers, will shift to Saturdays at 7:15-7:30 p.m. NYT, beginning July 29. It will stay in that time period until the end of September when the 15-minute series returns to its regular time, 3:45 p.m. Sundays.

UAA films sold in 20 markets

The A-O-KAY's from UAA, in their first twenty days of television release, have been sold in 20 markets, together representing a gross volume of over $1 million, United Artists Assoc. reports.

Markets buying the 32 United Artists features in the past week include Buffalo, Providence, Philadelphia, St. Louis, Denver and Phoenix.

Films include Twelve Angry Men, Paths of Glory, and Paris Holiday.

New bowling league aims for television coverage

The new National Bowling League, which will feature a regular schedule of inter-city matches commencing in October, is aiming for tv exposure. According to the NBL's Los Angeles office (1239 North Highland Ave.), Sports Network of New York has been commissioned to make a television pilot of the league's first exhibition match inside a league stadium at Kansas City today (July 24).

League Commissioner Dick Charles said that sportscaster Chick Hearn will handle the commentary, Douglas Laurence will produce the pilot and Phil Shuken will write.

Ten cities, including New York and Los Angeles, will have franchises in the NBL, which envisions a structure comparable to professional football and baseball leagues. League is to meet five nights a week for 26 weeks starting Oct. 13.

Mr. Charles said that several networks and sponsors have expressed an interest in the new NBL and that he had a goal of "well over 100 tv stations by the end of the first playing season."

Mr. Charles headquarters in the Curtis Bldg., 2301 North Akard St., Dallas, Tex.

ABC INTERNATIONAL INVADS PANAMA

Will assist local company in building tv station

ABC International's next tv station affiliation in Latin America will be in Panama City. An agreement between ABC International and Televisora Nacional, S.A., announced Wednesday (July 18), calls for the latter to construct the new station, with assistance from ABC. Televisora is assigned channels 2 and 6 for coverage throughout Panama, where current tv set circulation is said to exceed 25,000.

In addition to engineering, financial and administrative assistance, ABC will also act as program purchasing agent and sales representative for the Panama station, which is expected to start operations by the end of 1961. ABC International's other Latin American affiliations are the five-station VeneVision Network in Venezuela; Buenos Aires, Argentina; Guatemala City, Guatemala; San Jose, Costa Rica; San Salvador, El Salvador; Tegucigalpa, Honduras; Managua, Nicaragua, and Guayaquil, Ecuador. Elsewhere, ABC is affiliated with tv stations in Adelaide and Brisbane, Australia, and with a new station under construction in Beirut, Lebanon.

Pro football on pay tv

Trans Canada Telemeter, franchise holder for the Telemeter pay tv system, will present the second of two preseason football games of the Toronto Argonauts Aug. 2, at a cost of $1.50 to each of the 5,800 subscribers electing to watch it. The first game was seen last Thursday (July 20).

Both games originate from the Canadian National Exhibition Stadium in Toronto.

German tv set sales drop

West German television set manufacturers have announced a cut back in production, because of large inventories at all levels. Figures for May 1961 reveal a decrease of 38,000 units compared with a corresponding period in 1960.

Radio production spiraled by some
Product comparisons ruled out by ITA

The British Advertising Assn. has recommended that manufacturers be allowed freedom to explain specific product advantages in television advertising. The recommendation was made after a recent ruling by Independent Television Authority that comparisons be stopped.

The BAA holds that product comparison is a strong selling point. The association also informed the Pilkgton Committee (a committee established by the British Postmaster General to make an intensive study on television there and determine its future) by official memorandum of its “uncompromising” position against the new advertising tax established in England.

CAB radio tape exchange

Tapes of outstanding radio broadcasts will be exchanged by members of the Canadian Assn. of Broadcasters under a new plan approved at a recent meeting of the CAB board of directors in Winnipeg. CAB President Don Jamieson said only radio shows will be exchanged at first; exchanges may follow among private tv stations as well. He said the exchange system should help stations raise their Canadian content with the best productions of private radio programming.

No trend away from CBC-TV

Mass withdrawals from the CBC-TV network will not result on account of ruling by the Board of Broadcast Governors last week releasing CHCH-TV Hamilton, Ontario, and CJSS-TV Cornwall, Ontario, from their affiliation. The two stations were the only holdouts when CBC introduced a two-year contract at the start of 1961. Other CBC affiliates are committed to the network during the contract period, and under present regulations may not belong at the same time to the new private CTV network.

German governments buy tv

The West German Laender Governments announced last week that they had agreed to purchase Freies Fernsehen GmbH, and all its properties for about $4.5 million. Freies Fernsehen, a private television company, has been producing programs on tape and film in anticipation of a future television license from the government which was denied.

The company is equipped with modern production facilities including American video tape recording units and mobile studios.

German Laender plan to use the facilities and the large program library for television stations of their own. They intend to establish a Laender Network this year or early in 1962.

Bigger program revenue seen from overseas sales

Revenue from the sales of U.S. television programs abroad should run between $35 million and $43 million in 1961 and can reach $50 million in 1962, John G. McCarthy, president of the Television Program Export Assn. reported last week.

Mr. McCarthy made these estimates to the U.S. government for use by American representatives to the current Geneva negotiations on tariff and trade. He pointed out that the rise in business to $50 million can be attained next year if restrictions in the United Kingdom and Brazil are lessened.

He offered the following breakdown on revenue for 1961: Continental Europe, Africa and the Near and Middle East—$3-$4 million; United Kingdom, Canada, Australia and other English-speaking markets—$23-$29 million; Latin America—$5-$6 million, and the Far East—$3.75-$4 million.

Nova Scotia liquor ads

Tv and radio stations in the Maritime province of Nova Scotia will be able to carry liquor advertising beginning Sept. 1, under liberalized regulations announced by the provincial liquor commission. But ads will not be allowed on tv before 9 p.m., and no brewer or distiller will be allowed to sponsor more than 90 minutes on any one station per week. This time limit may be extended to permit complete coverage of specific sports or cultural events. Family and drinking scenes, bottles and glasses are forbidden, but advertisers can show bottle labels, trademarks, brand names, slogans, recipes and descriptions of merits of their product within the “limit of good taste.”

Abroad in brief...

New show – Housefurnishings Guild of Canada, Toronto, plans a 13-week tv series on interior design, likely to be carried over the new Canadian CTV network.

Summer fare – Westminster Paper Co. has signed Bringing Up Buddy, U.S.-produced show on the CBC English Network's summer schedule, for 13 weeks.

Football buy – British-American Oil Co. announced it will co-sponsor Canadian football broadcasts from coast-to-coast this year using both radio and tv. TV co-sponsor will be Dow Brewery Co. Ltd. where brewery advertising is permitted. Radio co-sponsors are not yet known.

New agency – Remington Rand Ltd., Toronto, has moved its electric shaver account to Young & Rubicam, Toronto, from Cockfield Brown Ltd., Toronto, effective Sept. 11. Young & Rubicam handles the account in the United States.

New office – Mcconnell, Eastman & Co. Ltd., advertising agency, is opening its eighth Canadian office in Saint John, New Brunswick, at the end of July. New branch will be headed by Cletus Lunney. Other branches are in Toronto, Montreal, London, Ont., Winnipeg, Calgary, Edmonton and Vancouver.

Reps appointed – The NAC Camera Service Co., Tokyo, and Brockliss-Simplex, Paris and Brussels, have been named far eastern and French-Belgian sales representatives, respectively, for Telescript CSP, N. Y., designers and suppliers of electronic devices and television prompting equipment.
Who's on first in Detroit?

Any resemblance between the Detroit Tigers fighting for the American League pennant and the assembled lot pictured above is purely the figment of a promoter's imagination. The sporting lot above are Detroit DJs and sportscasters who produced 20 minutes of hilarity between games at a Detroit-New York doubleheader. 50% of the gate receipts were turned over to the Knorr Foundation building fund for Hillsdale College in honor of the late Fred Knorr. Knorr stations, who was scalded fatally in Florida early this year.

Standing (1 to r): Mark Avery, WJBK; Doug Lacy, WCHB; Don Wattrick, WXYZ; Ben Johnson, WEXL; Paul Winter, WXYZ; J. P. McCarthy, WJR-TV; Johnny Ginger, WXYZ-TV; Chuck Lewis, WPN; Lee Alan, WKMH; Harvey Kaye, WJBK; Jack Riggis and Jac LeGoff, both CKLW. Knorr stations are WKMH-AM-FM Detroit-Dearborn, WKMF Flint, WKHM Jackson; WSAM-AM-FM Saginaw and WELL Battle Creek, all Michigan.

Radio course teaches safe boating practices

More than 100 youngsters, ages 10-14, are studying for their Coast Guard boating certificates via a Sunday-morning program launched June 25 on WGRL Babylon, N. Y. Titled Young Boatman's Safety Course, the seven-week, half-hour series is presented as an experiment in cooperation with the New York Conservation Dept. and the Coast Guard Auxiliary Massapequa (Long Island) Flotilla 13-2.

Previously, youngsters who studied for the certificate to operate motorboats in the state attended classroom sessions. Participants in the WGLI series will be qualified to take the Coast Guard test. The course, (8:8:30 a.m.), first of its kind in the state, is conducted by an officer of the Coast Guard auxiliary. The State Conservation Dept. will make the taped lessons available to any station requesting them, and WGLI will repeat the course next January to prepare young boatmen for next summer's boating season.

Hollywood stars help launch new CHUM d. j.

To introduce new announcer Bob McAdorey, CHUM Toronto staged a Hollywood Day in which five stars became CHUM disc jockeys for a day. While CHUM regulars leisureed, Jim Backus (with Mr. Magoo), Jane Morgan, Pat Boone, Mitzi Gaynor and Bill (Jose Jimenez) Dana entertained the listening audience via pre-recorded tape.

Returning to their posts the five CHUM regulars put Mr. McAdorey through a 16-hour audition marathon, then unanimously accepted him as a member of their staff.

While fun pretty much was the keynote of the day, CHUM officials often think of the star-studded dj cast and the larger-than-usual audience that day.

New York viewing guide

The three network-owned tv stations in New York are cooperating in the publication of a monthly bulletin, titled Previews, providing details of scheduled educational, religious, news, informational, music, interview, discussion and special programs. Following the example of stations in some 25 other markets, WABC-TV, WCBS-TV and WNBC-TV, all New York, have set up a joint mailing list. The project stems from the Television Information Office's proposal in April 1960 that stations promote their quality programs through special guides. Previews started with the July listings. New York's other four tv stations were asked to cooperate in the venture but declined for various reasons.

Graduation day at WTMJ-TV

WTMJ-TV Milwaukee graduated 317 persons July 9 who successfully passed examination at the conclusion of a series of first-aid-instruction telecasts aired by the station since April in cooperation with the American Red Cross. A three-hour exam was held at WTMJ-TV's auditorium studio. Of 1,671 who registered for the tv course, 345 appeared for the final exam, 317 passing.

Drumbeats...

Soldiers' choice • Expedition: Colorado, a tv documentary series produced by ABC-TV affiliate KBTB (TV) Denver, has been selected by the U. S. Dept. of Defense for showing to military personnel around the world. The series, produced in conjunction with Colorado educational institutions, was one of 71 local Expedition! series produced by the network's affiliates.

Old radios • As part of CFAC Radio Week in Calgary, Alberta, the radio
station asked listeners to lend it any receivers dating back to 1931 or earlier, then displayed the old models in a downtown store window from which the daytime schedule was being specially broadcast. Visitors were asked to guess which model was oldest, and first three correct answers drawn at the end of the week got 10 lb recordings. The oldest factory-built model in the contest was a Westinghouse Aerila of about 1921 vintage.

Floating luncheon • Timebuyers of Chicago advertising agencies were taken for a ride Wednesday for a two-hour lunch break aboard the S. S. Hollingbery on Lake Michigan. Host for the event was George P. Hollingbery, board chairman of the radio-television station representative firm of the same name. Nearly 100 agency people turned out despite inclement weather.

Viewers on the run • To promote its Million Dollar Movie, WKTV (TV) Utica, N. Y., offered viewers free trading stamps for identifying coming shows. Every 20 minutes during each movie, viewers' cards were drawn. Viewers thus selected, had 10 minutes to call the station after his name was mentioned; otherwise his prize—Triple S Blue Stamps—was forfeited. Only once during the six-week contest did the station draw a card that did not send the viewer running to the telephone.

'Cool' promotion • A summer promotion campaign built around "cool" sounds is being conducted by Westinghouse-owned WIND Chicago with station breaks and sound effects of running water, clinking ice cubes and similar temperature soothers. Listener contests are scheduled based on correct identification of the sounds.

Meet 'Sam Dune'—WABC's beachcomber

Weekend sunbathers at New York area beaches are the target of a summer audience-builder promotion at WABC New York. A roving beachcomber named 'Sam Dune,' a WABC creation who visits with portable radio listeners at a different beach each Saturday and Sunday, encourages a greater tune-in to WABC. "Sam" distributes puzzles which are to be sent to the station for a prize after proper completion. Nominal prizes such as beach hats and beach bags are awarded for accurate entries. In a series of WABC spots listeners are told to stay tuned to learn the exact whereabouts of the beachcomber.

BULLETIN: to you know who!

Are you aware, sir, that the Tide-water is growing 2 1/2 times faster than the nation as a whole? Did you know, too, that WHIH has the liveliest format, the brightest personalities and the most distinctive news and public service programming in Virginia?

What we're saying is this: we'd love to help you pop millions of those tiny little tea leave into the cups and glasses of WHIH listeners.

Forgive us this brazen superlative, but we believe we're far and away the best chaps for your job in the Tidewater area in Virginia.

BROADCASTING, July 24, 1961

(For the Record) 83
Bob Maciejczak works at U.S. Steel's South Works in Chicago, Illinois, and he's the Corporation's champion Employee Suggestion Plan winner. Over the last four years, he has had sixteen suggestions adopted—and he's been awarded $18,827.

Thousands of U.S. Steel employees have received cash awards that are based on benefits generated by their suggestions. Since 1957, employees have sent in over 200,000 suggestions; and more than 46,000 have been adopted and put into operation. The Employee Suggestion Plan is one of the many ways U.S. Steel develops better techniques, better employees—and better steel.

United States Steel
OUR RESPECTS to Dr. Daniel David Palmer, president, Palmer Enterprises

Broadcasting and public service are family traditions

Broadcasting is even more than a deep personal interest to Dr. David Palmer. It's a "family responsibility."

Now president and chief owner of the Palmer properties, including WHO-AM-FM-TV Des Moines and WOC-AM-FM-TV Davenport, Iowa, Dr. Palmer for more than three decades shared with his late father, Col. B. J. Palmer, the top executive management of the stations.

From 1929 until only a few weeks ago, Dr. Palmer was vice president of the Palmer interests, embracing the broadcasting stations and the Palmer School of Chiropractic, Davenport, as well as a printing plant, public and private clinics associated with the school and Clear View Sanitarium. He also holds the office of treasurer.

Citizens on the local scene point out that "Dr. Dave," as he is warmly addressed by students and business associates, through these decades has been a principal influence for the encouragement of broad public service through broadcasting and personal participation. They observe that through his great devotion, service and involvement in local charitable and civic affairs he has by example led the way for the Palmer administrators and employees.

Radio Pioneer - Dr. Palmer has been in broadcasting ever since the early 1920s when he was a young but enthusiastic radio amateur in the "pigeon roost" of the family home on Brady St. hill in Davenport. It was here that he first heard Robert Karlowa broadcast talk and music on his amateur station 9BY at Rock Island, Ill., just across the Mississippi River.

Young David's excitement over the new communications medium prompted his father to purchase the station in March 1922 and move it to quarters atop the Palmer school. Now WOC, it quickly earned its place as an Iowa institution. In 1930 WHO was acquired.

The Palmer stations subsequently pioneered FM and TV in their respective areas too, including color TV. WHO is a Class I clear channel outlet on 1040 kc with 50 kw. WOC is on 1420 kc with 5 kw. WHO-TV is on ch. 13, WOC-TV ch. 6, both full power. The radio-TV outlets in both markets are affiliates of NBC, an association that began in 1927 when WOC became western leg of the early NBC radio network.

Part of Family - Growing up with WOC is the background that gives unique emphasis to Dr. Palmer's sincerity when he explains how he feels about each of the Palmer stations. "This is a family obligation to me," he states.

The station associations "have given me a sense of real family responsibility to our community, because I know what a wonderful opportunity our radio and TV stations have to continue to help make our community healthy, live and prosperous." He consistently has refused offers to sell the properties.

All of the Palmer stations long have enjoyed a record of program and public-service achievement, but Dr. Palmer is aiming still higher. "We must continue to be a deeply interwoven part of the life of our community and a vital force for good," he believes, "and I intend to see that WOC and WHO are even increasingly dedicated to our local economic and civic affairs."

Dr. Palmer puts his beliefs of close personal interest in the welfare of others into practice in the community of his employees as well as the community at large. He recently further expanded pension and bonus plan benefits for station personnel at WOC and WHO, the cost absorbed by the company.

Expansion - Dr. Palmer now is directing extensive modernization of the Palmer School of Chiropractic. He next plans to construct a new million-dollar color TV and radio studio for the WOC properties.

He foresees an eventful and successful future for color TV and his expectations are high for FM too. His plans include multiplex stereo operation in FM and expansion of FM programming separate from that on AM.

Dr. Palmer predicts continuing growth for AM radio also, particularly for its broad and basic service to the communities of mid-America and the vast, rich rural market there.

Native Son - Dr. Daniel David Palmer was born Jan. 12, 1906, in Davenport. He is named for his paternal grandfather who was the discoverer of the chiropractic technique and philosophy, which were fully developed by his late father, Dr. B. J. Palmer. The Palmer School of Chiropractic, founded in 1895, now has nearly 1,000 students on campus and 25,000 graduates.

He attended public school in Davenport and after the family acquired WOC he spent every spare hour at the station, first running errands, then later serving as announcer and a general helper in every department. Early year sheet music pluggers like Little Jack Little, Wendal Hall and Tom Small, and other name personalities, soon became close family friends during their stops at WOC.

From these experiences, through the years, Dr. Palmer can recall many stories of both humor and respect for many broadcasting pioneers, from network officials to talent. He can recall, too, early broadcasts of Presidents Coolidge and Hoover, of Lindbergh, and of "Radio Rex" Willets' cooking show for the ladies. He can't forget early on-air benefits to buy crystal sets for shut-ins, because as a young man it was Dr. Palmer's job to deliver them.

In high school he made his mark in "business" as well as in scholastics. He was advertising manager of the school paper and senior yearbook and twice he was elected president of his class, in both his junior and senior years. Dr. Palmer earned his B.S. degree in economics in 1929 at the Wharton School of Finance and Commerce at the U. of Pennsylvania.

Family Honor - During the 1930s, after he had become vice president of Palmer Enterprises and out of respect for the Palmer family tradition, he enrolled in the Palmer School of Chiropractic for the full course (about 4,300 classroom hours) and was graduated with the D.C. degree. Three years ago he spent a semester at Harvard for graduate study in management.

Dr. Palmer married Agnes High at Davenport on June 27, 1943. They have three girls: Bonnie Joan, 12; Jenny Wren, 11, and Vicki Ann, 8. Mrs. Palmer joins her husband in wide interest in community affairs. The list of groups in which he is active fills a page. Dr. Palmer is a Mason and a member of the Episcopal Church. His hobbies: golf, baseball and billiards.
EDITORIAL

Then why the hiatus?

LEGISLATION to reorganize the FCC to make it easier on the commissioners stands some chance of passage at this session—after the stunning defeat of the first administration-supported bill to give the chairman dictatorial power.

We hope the new legislation—perhaps modified—will become law because members shouldn't be burdened with miscellaneous and non-policy, non-adversary matters.

The FCC does carry a heavy load, particularly the chairman who is executive officer.

But we wonder why the FCC must take one-twelfth of the year off if it has such a horrendous backlog and if there aren't enough hours in one day. No other independent agency—not the FTC, SEC, CAB, ICC or FCC—takes a summer hiatus. Most arrange for at least a quorum all summer long. Vacations are staggered.

While the FCC vacations in August, most staff members do not. They have to catch up or work on budgets and annual reports. Practitioners can't quit because, as of now several very important rulemaking procedures are outstanding, with comments due when the FCC returns immediately after Labor Day.

Commissioners do not and should not have to punch a time clock. It does seem to us, however, that the commissioners should be able to arrange to have a quorum present at all times and still have each commissioner get his month off. After all, Congress itself will remain in session until Labor Day.

Exposure in Chicago

FROM a standing start a few weeks ago unusual interest suddenly is being manifested in the symposium on broadcasting at Northwestern U. School of Law in Chicago next month.

The reason isn't difficult to discern. Broadcasting has been subjected to unprecedented criticism and the regulatory vise has tightened in the intervening weeks. The symposium, which first had the aspect of a prosaic, legalistic study of communications history now is being built up as a historic debate on freedom and responsibility of broadcasting—mainly television.

The participants are men prominent in law, communications and journalism. The event is a homecoming for the FCC's new, provocative chairman, Newton N. Minow, one of the law school's bright, young alumni who in five months in Washington has had more exposure on front pages and on the air than our first astronaut.

Mr. Minow is taking it seriously. He has a squad of FCC lawyers researching for him. He has retained a consultant on public relations who knows Chicago and has worked in broadcasting.

We can only surmise that the thrust of his homecoming thesis will be that the FCC can legally review programming without censoring and that newspapers are different, using the familiar cliche that anyone can start a newspaper or a magazine but a license is needed for television (and radio) and wavelengths are scarce.

Fortunately there are protagonists of free radio on the panel. A practical broadcaster, J. Leonard Reinsch, is the symposium chairman. W. Theodore Pierson, an eminent Washington attorney specializing in communications, has made an exhaustive study of constitutional law and censorship. John W. Guider, president of WMTW (TV) Portland, Ore., and an attorney formerly in Washington practice, can speak from practical experience as well as legal theory. Lining up with Mr. Minow will be Dean Roscoe Barrow, author of Barrow Report on network practices, and several other law school deans and professors.

Broadcasters will observe with interest the performance of NAB's new president, LeRoy Collins, who assumed office almost coincident with Mr. Minow. Their views in certain areas have coincided. But he has inveighed against "government thought control" in his most recent utterance.

The nation's press is interested too. Although most editors and publishers have gloated over the broadcasters' plight because of competitive instincts, the more discerning ones know that if censorship through program control strikes broadcasting, the press is only one step removed.

A shot in the head

THE annual Voice of Democracy contest in recent years may have failed to realize the expectations of its originators, but that is not reason enough for the NAB's decision—which was reported here last week—to quit as a co-sponsor.

It seems to us the NAB would have been wise to think of ways to improve and expand the contest and to associate it more directly with broadcasters.

No one knows precisely how many high school students have competed since the contest was begun in 1947, but their number certainly runs well into the millions. Among them the image of broadcasting must be presumed to have been enhanced.

There seems now at least a possibility that the Veterans of Foreign Wars, a co-sponsor of the contest in recent years, will attempt to continue it and will seek the cooperation of individual broadcasters. This would not provide the benefits to radio and television that a well-organized sponsorship by the NAB would provide. From then on it would be a VFW contest, and stations assisting in it would gain only secondary recognition.

It is true that the NAB had increasing difficulty in persuading its members to do the admittedly tiresome work of organizing local contests, and we can understand why the NAB headquarters would conclude that the contest was losing popularity among broadcasters. But if improved public relations are a principal objective of NAB, the VOD should have been revitalized instead of dumped. The contest needed a shot in the arm. What it got was a shot in the head.

"It's way past sign-off time. I think somebody just forgot to turn things off!"

BROADCASTING, July 24, 1961
ABOVEBOARD ALL THE WAY

An agency messenger boy was suspected of stopping along the way for unbusiness-like purposes. But when asked why it took him two hours to get to 46th Street, or all morning to the West Side, he always claimed he had been lost in the subway. To keep him aboveground where he could read street signs, the agency bought him a bicycle. His first assignment on wheels was to pick up and return a paper of indescribable value*. The distance was one mile straight each way.

Madison Avenue being totally devoid of traffic, the messenger whizzed there in three minutes with the wind at his back. He returned in four minutes flat pedalling against the wind. Now the agency wants to know how long the same trip should take him when there is no wind (and no traffic). Assume that the terrain is flat and that he applies the same force to the pedals at all times.

Send us the answer and we'll send you a prize you're sure to enjoy in any weather. It may be round or rectangular, thick or thin, solid or flappy. Just let it come as a nice surprise.

* Description: recent contract for time on WMAL-TV, the station first in Washington, D. C. market, 6 PM to Midnight all week. (ARB, April '61)

THE MOST TRAVELLED BRIEFCASE IN BROADCASTING
BELONGS TO AN HR SALESMAN

During the past year HR salesmen rolled up more than 400,000 air miles visiting HR radio and television stations. HR salesmen take planned station trips every year, so that all HR salesmen visit all HR stations. These travel schedules are carefully planned by HR management far in advance and on a comprehensive company-wide basis. Because of HR’s LIMITED STATION LIST each salesman thoroughly learns all the facts about EACH station he represents. When an HR salesman says: “I was there, I know,” you can be sure he was and does.

COMPLETE INDEX PAGE 7

CLUBWOMAN

John C. Gilmore, president of Community Club Awards, in Baltimore to help W-I-T-H launch its 20th CCA campaign, is named "Mr. Clubwoman" by Mrs. John P. Kaufman of the Federated Women's Clubs of Maryland, while R. C. Embry, Executive Vice President of W-I-T-H looks on. This year W-I-T-H will round out $200,000 distributed among its clubwomen listeners. Since W-I-T-H pioneered this total merchandising concept in 1955, more than 750 CCA campaigns have been conducted in 400 markets in the United States, Canada, Puerto Rico and Australia, with some 6,000,000 women taking part. CCA stations have received more than $10,000,000 from participating advertisers, while they rendered a positive, tangible service to their communities. W-I-T-H is proud to lead the way with CCA in responsible broadcasting by community-integrated stations.

Tom Tinsley, President; R. C. Embry, Vice President; NATIONAL REPRESENTATIVES: SELECT STATION REPRESENTATIVES in New York, Baltimore, Washington and Philadelphia; ADAM YOUNG in Boston, Detroit, Chicago, St. Louis, San Francisco, Los Angeles, Minneapolis, Milwaukee, Cincinnati, Cleveland, Pittsburgh and Seattle; JAMES S. AYERS in the South and Southwest.
BIG AGGIE BLANKETS THE UPPER MIDWEST

In fact, the powerful broadcast voice of Big Aggie spreads far beyond the WNAX 5-state area. In answer to a recent contest question, "What is the most unusual place you have listened to WNAX-570?"—Listeners informed us that they had heard WNAX-570 in half of the states in the nation as well as some eight different foreign countries.

Where do they listen? In tree tops and slaughter-houses, snake dens and dentist chairs, church belfries and delivery rooms, on flag poles and in caskets. WNAX-570 is their companion at work, at home and at play.

A recent Area Pulse Survey conducted in Big Aggie Land's five state area showed WNAX-570 to have almost three times as many listeners as the nearest competitor. WNAX-570 is the magic carpet that delivers listeners and sells products in America's 40th Radio Market.

See your Katz representative for details and the complete Big Aggie Story.
...and a New Force in South Florida makes its presence felt!

One such New Force documentary was WCKT's MIAMI: CONDEMNED, an hour in which the unflinching Camera 7 showed the slum conditions of Miami in a harsh, direct style that brought new, fresh candor and responsibility to the television screen. MIAMI: CONDEMNED used film, tape and live sequences to bring into clear public light an appalling social and welfare problem.

The facts, the issues and the people in the open and in the background were given a responsible opportunity to speak. There were threats and counter-threats against the station but there was also overdue action by the City Commission and others to clean up the squalor.

WCKT's Camera 7 — the Camera with a Conscience and a responsibility — will continue its vigil!

WCKT is the New Force in South Florida.
The Conestoga Wagon, a pioneer in transportation, originated in Lancaster County, Pennsylvania. It was the principal medium of westward travel, prior to the railroads.

WGAL-TV, a pioneer station, introduced television to a sizeable area of Pennsylvania. Since its inception in 1949, WGAL-TV has firmly maintained its pioneering principles by being constantly alert to new and better ways of serving viewers throughout its coverage area.
RKO's own rep firm

RKO General is latest major multi-station owner to move toward establishment of own sales rep organization, now in process of formation and expected to be announced next month. Don Quinn, former rep executive who headed sales at WNTA-TV New York before joining RKO General last March, will be national sales director. Stations involved are all RKO outlets except WHCT (TV) Hartford, which expects eventually to be pay-tv and may remain with Young-Tv in meantime. Others are KJH-AM-FM-TV Los Angeles, WNAC-AM-TV and WRKO (FM) Boston, KFRC-AM-FM San Francisco and WHBQ-AM-TM Memphis, all of which are currently represented by H-R Representatives and H-R Television; WOR-AM-FM-TV New York, whose representation in south and far west is also by H-R (stations have own sales arms in New York and Chicago); CKLW Windsor-Detroit (E. Eastman); CKLW-TV (Young-Tv) and WGMS-AM-FM Washington (Avery Knodel).

Others pioneered

Westinghouse, Storer and ABC-TV are other multiple owners that have moved into rep area recently. Reports circulated last week that Corinthian and Capital Cities were thinking of following suit, but these were roundly denied by responsible officials. Metropolitan Broadcasting has recently set up house rep for one of its stations, WNEW New York, but has given indication of extending this principle to all its stations.

Booz, Allen at H-R

Study designed to clear out underbrush from dense paper jungle that historically surrounds spot time buying and selling is under way at H-R Representatives and H-R Television. It's being conducted for H-R by Booz, Allen & Hamilton, management consultants well known in broadcasting. Objective: cut down paper work at all three levels—station, rep, agency—so that buying-selling can be conducted more efficiently.

Bill or Vince?

Unless there's eleventh hour switch, NAB executive vice presidency will go to one of two incumbent staff executives: William Carlisle, formerly with WKBR, Manchester, N. H., and other New England stations, is 38, and has been with NAB since 1954. Mr. Wasilewiski, 38, is veteran of 12 years with association, but hasn't had station experience. Latter fact is one reason Gov. Collins is checking board members because one of specifications is for "practical broadcaster" to serve in No. 2 spot.

Swezey as code head?

Robert D. Swezey, former executive vp-general manager of WDSU-AM-FM-TV New Orleans, is front runner for NAB code head in charge of administration of both radio and tv codes. New office, authorized by board at meeting last June as one of cornerstones of reorganization, carries vice presidency. Attorney-broadcaster Swezey (Harvard, 1931) is 54 and has been with NBC, ABC and MBS, latter as vice president, general manager (1944-48). He sold his 20% interest in WDSU properties last March and had been assistant to Secretary of Labor Mitchell until change in administration.

Mr. Swezey has conferred with NAB President LeRoy Collins but there was no formal proffer or indicated acceptance. Mr. Swezey was chairman of NAB Committee in 1947 which drafted first radio code and provoked controversy at Atlantic City convention. In 1952, he chaired committee which brought in first television code. Swezey family left for Europe last Saturday (July 29) for month vacation and it's presumed discussions with Gov. Collins will be resumed after Labor Day.

Special attention to GE

FCC staff still is actively pursuing its investigations of license qualifications of General Electric Corp. and Westinghouse Electric Corp. following antitrust convictions of two firms and several of their top executives. Latest commission move was letter to GE seeking: (1) description, with diagram, of top management organization of GE; (2) diagram of line of authority of GE executives over its broadcast operations, and (3) position description of J. Milton Lang (general manager of GE's WRGB (TV), WGY and WGF (FM), all Schenectady, N. Y., and each person in line of authority above Mr. Lang up to but not including chairman of board and president.

Shell sneaking back

After weeks of on-again, off-again negotiating, Shell Oil has definitely contracted to renew sponsorship of four hours of Leonard Bernstein's Young People's Concerts (CBS-TV). Shell's action (although billings from series comes out of Kenyon & Eckhardt, agency handling oil company's institutional advertising) is seen as another indication that much of firm's $15 million in consumer advertising, all of which has been channeled into print media, will eventually find its way back to tv. Earlier this month Shell approved three-week spot tv schedule for its consumer billings through Ogilvy, Benson & Mather (Broadcasting, July 17), and previously it closed deal to sponsor golf film series of 11 hours on CBS-TV.

 Rochester transfers

FCC has approved in principle transfers in Rochester, N. Y., involving ch. 5 and ch. 10 there. Matter was held up pending document writing to deny several protests and is expected to receive formal commission okay at tomorrow's FCC meeting. WROC-TV ch. 5 is being sold to WVET-TV for $6.5 million. WVET-TV, which shares ch. 10 with WHEC-TV (Gannett), is selling its interest in ch. 10 to WBEC-TV for $3.8 million. Transactions include transmitter-antenna property, studio and office space.

Drop-in back-fire

Taking leaf from clear channel book, vhf broadcasters who would be affected by FCC deintermixture-drop-in bombshell (see pages 48 and 49) are expected to importune Senate to adopt resolution expressing opposition to "down-grading" of tv coverage as disservice to public. Accusation will be that FCC majority is not acting in good faith since it received from Congress last year $2 million-plus appropriation for New York uhf test and that implicit in this authorization was understanding that uhf coverage would not be disturbed pending New York test results.

Influential in deintermixture-drop-in action, which squeaked through 4-3, was FCC's new Broadcast Bureau Chief, Kenneth Cox. Mr. Cox was special counsel of Senate Commerce Committee which delved into tv allocations and advocated steps that would introduce greater competition through use of uhf and possibly reduced vhf separations.
Four ratings in a row tell the same story — in Milwaukee, Channel 6 is first choice with viewers during prime time ... and it's growing! Its shares, seven nights a week, 6:30 to 10:00 pm:

FCC UNWRAPS STRATEGY TO AID UHF

Features: end to uhf allocations, grants to first comers

FCC Friday (July 28) extended its long-planned "helping hand" to uhf (Broadcasting, Dec. 12, 1960) in asking for comments on proposal to expand use of idle frequencies.

Highlighting plan are proposals to abolish uhf table of allocations, authorize dual vhf-uhf operation by same licensee in same city, expand deintermixture and eliminate comparative hearings for uhf channels (with qualified applicant getting grant before second party can apply). FCC's uhf plans were announced at time agency made public its planned deintermixture of eight cities and drop-in of vhf channels at like number of markets.

Commission expressed "unqualified recognition" that uhf is indispensable to fully nationwide competitive tv service. Use of uhf in markets where multiple, comparable services would probably develop (not possible under intermixture) would be encouraged through establishment of uhf city "pools" (group of channels not allocated but available for specific city). Additional channels also would be for cvtv.

FCC will make new push for legislation requiring manufacture of all-channel receivers and will encourage use of translators to fill in white areas.

Applicants could designate and apply for any uhf channel available for city, but FCC will guard against unequal distribution across country under plan. First applicant for local channel would preempt it.

Comments were invited by Oct. 2. Commissioners Hyde, Craven and Cross dissented.

FCC defends space unit; NASA, AT&T sign pact

Two congressmen kept FCC Chairman Newton N. Minow and Commissioner T. A. M. Craven on griddle Friday during House Commerce Committee space satellite hearing.

Reps. John E. Moss (D-Calif.) and John D. Dingell (D-Mich.) criticized FCC's proposed ad hoc committee on space because it includes only international common carriers.

Chairman Minow said manufacturers' and domestic carriers' proposals would also be considered and that FCC retains power of approval over committee's suggestions.

Congressmen were worried that international carriers (such as AT&T, RCA Communications, IT&T and Western Union) would try to influence equipment contracts in their own interests or otherwise gain monopoly (see story, page 74).

National Aeronautics & Space Administration said Friday it has signed with AT&T to launch active satellites made by Bell for experiments to test tv and other signals.

AT&T will spend $25 million on project ($500,000 to build each satellite, $6 million payment to U. S. for each launching). Two test satellites are to be put into orbit from Cape Canaveral (in April, October) and possibly two more (in June, December). All data are to be turned over to NASA for release to scientific community.

CBS-TV News expands its daytime schedule

CBS-TV's news will handle bigger slice of network's daytime programming this fall, with addition of three new informational programs Oct. 2.

First is 30-minute weekday news and features program, tentatively titled Calendar (10-10:30 p.m.). Newsman Harry Reasoner will handle news reports and some interviews, but host is yet to be named.

Program will have magazine format and deal with many subjects including arts, history, science, human relations, leisure and current events. Experts from various fields will be guests.

Other additions will be five-minute news programs: Charles Collingwood With the News (Mon.-Fri., 3:55-4:00 p.m.), and another with CBS news correspondent to be announced (Mon.-Fri., 11:55 a.m.-noon). Two half-hour entertainment shows Your Surprise Package (at 11:30 a.m.) and The Verdict Is Yours (at 3:30 p.m.) will be cut to 25 minutes to make room for new programs.

CBS-TV children's program, Captain Kangaroo, will be expanded to full hour daily (Mon.-Fri., 8-9 a.m.; Sat., 9:30-10:30 a.m.), beginning Oct. 2. It previously was 45 minutes.

Senators try to link tv violence to networks

Senate Juvenile Delinquency Subcommittee on Friday presented stack of subpoenaed documents and half-dozen subpoenaed witnesses in effort to demonstrate network brass is responsible for tv's alleged excessive violence. Testimony, for first time during hearings, was sworn.

One letter read into record was designed to show that David Levy, former NBC programming vice president, wanted more sex and violence in Ziv-UA's Man and the Challenge series. Two Ziv-UA officials, however, insisted pressures were resisted.

Other documents purported to show that ABC permitted Desilu to ignore objections of network's continuity department to excessive violence in The Untouchables.

Arkansas board okays test for wired pay tv

Three-man board of Arkansas Public Service Commission ruled unanimously Friday in favor of International Telemeter pay-tv experiment in Little Rock. Ruling ordered Southwestern Bell Telephone Co. to establish rates and facilities in Little Rock for closed circuit wired pay tv system for Midwest Video Corp., which holds telemeter franchise. Midwest is owner of group of community tv systems in Southwest.
WEEK'S HEADLINERS

Mr. Webber  Mr. Schachte

Harold H. Webber, vp and director of Cowles Magazines & Broadcasting Inc., and formerly executive vp of Foote, Cone & Belding, elected consumer relations vp of Lever Bros. Mr. Webber, who will join Lever on Aug. 15, will take over duties of Henry Schachte, who is resigning as executive vp to join parent Unilever Ltd., London, as member of management committee of Unilever Marketing Div. Mr. Webber will supervise Lever Bros.’ advertising, promotion, marketing, research and pr activities. Mr. Schachte, who joined Lever in June 1955, will begin Unilever post Aug. 31, and will assist its European companies in dealing with their advertising and marketing problems. He was previously senior vp of Bryan Houston Inc. and has been board chairman of Assn. of National Advertisers. Mr. Webber’s advertising career started in 1941, first as account research supervisor at Chicago office of Lord & Thomas. In 1944, when Foote, Cone & Belding acquired Lord & Thomas, he was named vp and research director. He became executive vp and director in 1955. He joined Cowles in 1957 as vp, becoming director year later.

David Klinger, formerly director of business affairs, CBS News, appointed vp-administration. Administrative responsibilities of CBS News were formerly functions of Robert E. Lang, who continues as vp in charge of sales and sales administration of news and public affairs programs. Ernest Leiser, formerly head of CBS News bureau in West Germany, appointed to new position of assistant general manager of CBS News for tv, it was announced officially (BROADCASTING, July 24). No counterpart position for radio news is planned. Mr. Klinger joined CBS in 1950 as assistant to director of business affairs, CBS-TV, and became director of business affairs for CBS News in May 1958. Reorganization follows previously announced realignment of news and public affairs research, news and public affairs transcripts and CBS News Special Projects library under CBS News Information & Special Services.

Daniel B. Burke, formerly new products manager of Jello Div., General Foods, appointed general manager of WTEN (TV) Albany, N. Y. He succeeds Thomas S. Murphy, newly named executive vp of Capital Cities Broadcasting, which owns WTEN. Other executive appointments: Charles G. Pogan, tv operations director of WTEN, named program director for all Capital Cities tv stations; William J. Lewis, sales manager of WTEN, named director of sales for all Capital Cities tv stations. Both Messrs. Pogan and Lewis will also continue their present positions in Albany. Robert M. Peebles, station manager of WROW Albany, has also been named station’s general manager. Capital Cities’ other tv stations are: WTVD (TV) Durham, N.C.; WCDC (TV) Adams, Mass., and WPRO-TV Providence, R.I.

Martin Brown, treasurer, AB-PT, elected to additional post of vp and treasurer of company’s ABC division. Michael P. Boland, ABC vp and assistant treasurer, elected ABC vp in charge of financial controls. Mr. Brown joined company in 1959 as assistant treasurer of AB-PT and assistant treasurer of ABC. He was elected AB-PT treasurer in May 1960. Before joining company he had been associated with Price Waterhouse Co., N. Y., for 10 years. Mr. Boland came to ABC in 1951, serving as tv budget officer and assistant controller. He became member of ABC cost control unit in 1955, was named assistant treasurer of ABC in 1956, and last January was elected to vp.

Stuart buys KOEL: $364,000

KOEL Oelwein, Iowa, was bought by Stuart Stations for $364,000, subject to FCC approval, Dick Chapin, executive vice president of Stuart group, said Friday. Sellers include C. W. Crahan and 14 other local businessmen. Consultant’s contract is being negotiated with KOEL manager Walter Teich. Stuart Stations, owned by James Stuart, include KFOR Lincoln, KRGJ Grand Island, and KODY North Platte, all in Nebraska; KSAL Salina, Kan., and KMNS Sioux City, Iowa. Broker was Norman & Norman.

K&E forms London agency

Establishment of Kenyon & Eckhardt Ltd., London, as independently operating advertising agency to provide creative service to its American clients and advertisers generally is to be announced today (July 31) by B. C. Stewart, K&E president.

For other personnel changes of the week see FATES & FORTUNES

Action came as result of petition filed with commission by Midwest Video Jan. 23. Petition was contested by Independent Theatre Owners of Arkansas, affiliate of Theatre Owners of America, who contended commission lacked jurisdiction in matter because pay tv program will be produced outside state. Commission dismissed theatre owners’ petition.

Spokesman for Telemeter said ruling represents “important and basic victory for pay tv.”
THE ONLY LEMMON

...among COLUMBIA'S POST-48's

His name of course is Jack, and this Academy Award winner is starred in six of the Columbia Post-48 feature films now available for television.

These are the big features with the big stars that are racking up big ratings in major markets from coast-to-coast.

Landis and chairmen of "big six" regulatory agencies, including FCC and FTC.

Aug. 11-12—Texas Associated Press Broadcasters Assn., fourteenth annual meeting. Hotel Lincoln, Odessa, Tex.

*Aug. 12—New Mexico Broadcasters Assn., meeting, Alvarado, Albuquerque.

RAB management conferences
Sept. 7-8 Haddonfield, N. J.
Sept. 11-12 White Sulphur Springs, W. Va.
Sept. 18-19 Sea Island, Ga.
Sept. 21-22 Dallas.
Sept. 28-29 Des Plaines, Ill.
Oct. 3-6 Omaha.
Oct. 9-10 Palo Alto, Calif.
RECORD ATTENDANCE. Nearly 19,000 share owners attended the 1961 annual meeting of A.T. & T. This was the largest attendance ever recorded by any business. There was full and free discussion of many matters—evidence of democracy at work.

Now... 2,000,000 Bell Telephone Share Owners

A NEW MILESTONE IN DEMOCRACY AND AMERICAN BUSINESS

The ownership of the country's largest business by over two million people is a dramatic testimonial to the American economic system. Here, for all the world to see, is democracy at work.

The result is a communications service of increasing value to both the public and business and a vital element in national defense.

The owners of American Telephone and Telegraph Company stock are people in all walks of life, in every section of the country.

A great many are small share owners. About 290,000 own fewer than ten shares. 42% are women. An additional 31% are joint accounts, generally in the names of husband and wife. More than 300,000 are telephone employees.

In addition to the direct owners, many millions of other people have an important, beneficial interest through the holdings of their insurance companies, pension funds, investment companies, unions, savings banks, etc.

Without the money that A. T. & T. share owners have put in the business, you could not possibly have the telephone service you enjoy today. Nor would there be work and wages for over 730,000 employees.

This year alone share owners have furnished $961,000,000 in new capital by subscribing to A. T. & T. stock.

Given the opportunity to plan boldly for the future—and with earnings on a level that makes such progress possible—you can be sure that we will make further contributions to the growth and security of the nation.

BELL TELEPHONE SYSTEM

BROADCASTING, July 31, 1961
Aug. 15—Reply comments due on FCC rule change requiring broadcast announces ment of financial interest held by station management or employees in products or services promoted on air (plugola).

Aug. 18-19—Oklahoma Broadcasters Assn. meeting, Lake Murray Lodge, Ardmore.

*Aug. 22-23—Annual Defense Communications Seminar, National Industry Advisory Committee, under sponsorship of FCC. Defense Commissioner Robert T. Bartley will moderate first day; Assistant Defense Commissioner Robert E. Lee, the second day. FCC Chairman Newton N. Minow will address the meeting. Departmental Auditorium, Washington, D. C.

Aug. 26—Archana Broadcasters Assn., fall meeting, Sam Peck Hotel, Little Rock.

SEPTEMBER

Sept. 5—Comments due on FCC inquiry and notice of proposed rulemaking changing fm spectrum and looking into duplication of am-fm programming.

Sept. 7—Deadline for comments on FCC rulemaking for new log-keeping methods and stipulating three-year maintenance of logs due.

Sept. 11-17—Affiliated Advertising Agencies Network 17th annual international meeting, Sheraton-Chicago Hotel, Chicago.

Sept. 15—Deadline for comments on FCC proposal to grant rate increases to AT&T and Western Union for leased-line telegraph services.

Sept. 15—Comments due on proposed FCC rulemaking on granting of vhf television stations only to those which would cover unserved areas rather than simply extend an existing station’s coverage area.

Sept. 18—Reply comments due on FCC rulemaking on revised program forms.

Sept. 18—Reply comments due on FCC rulemaking on new method and time period for keeping station logs.

Sept. 21-23—Advertising Federation of America, 10th district convention. Hotel Mayo, Tulsa.

EXCLUSIVE ABC TELEVISION NETWORK FOR OMAHA, COUNCIL BLUFFS AND LINCOLN

BROADCASTING, July 31, 1961
MONDAY MEMO from CARL M. POST, president, Post & Morr Inc., Chicago

Luck usually resides with the agencyman who pushes it

I happen to believe that in the advertising profession, or any other field for that matter, "luck" can be developed with practice, experimentation and determination.

Some agency executives early in life develop the habit of being lucky—of being positive—of being right more than 50% of the time. In contrast, we all know of the account executive or timebuyer whose "luck" is always bad.

How many times have we heard one of these men say "I wish I had his luck," or "Everything that fellow touches turns to gold," or "I never get the breaks." It certainly pays to be lucky. So how do people get that way?

'Lucky' People — How was Fairfax Cone lucky enough to be manager of the Chicago office of Lord & Thomas 30 days before Albert Lasker turned the agency over to him and his two associates? How was Lasker himself lucky enough to have bought a lot of stock in Pepsi and in Kotex and Kleenex when they were new and untried brands? How was Lou Wasey lucky enough to buy into Barbasol and end up with an island in the Bahamas today?

If you examine these people, you'll find they got into the habit of being lucky early in life. Their intuition seems often to be uncanny and their hunches often correct. They seem to have been in the right place at the right time, doing and saying the right thing.

The others, those who constantly are besieged with and talking about a variety of minor and major problems, have created an aura of "bad news" about themselves and have a problem that multiplies itself. Their negative frame of mind may be one of the big contributing factors to their misfortunes.

Practice Makes Perfect — A distinguishing characteristic about the Fairfax Cones, the Lou Waseys and the Albert Laskers is that they always were ready for opportunity when it came to them. More than that, a lot of their time was spent looking for opportunities. By constantly looking for ways to advance the ball, they lose their knack for fumbling it.

They are not like the golfer who spends two hours a day at the driving range practicing the wrong swing. They get the habit of being right and spend very little time dwelling upon, magnifying or rehashing their bad luck or problems of the day.

I think lucky people develop and polish their intuition like a jeweler polishes a stone. Given a chance to take a chance, they take it. They are willing to forecast the future. They are doers. They stand out among the agency crowd because they are innovators, inventors and idea men. They keep themselves in the habit of thinking this way.

On the desk of one of America's great advertising executives is a sign that says, "Do it now." The most important part of that phrase is the first two words. If you don't do it, you will never start adding to your collection of lucky events.

How We Hire — Applicants seeking work with our agency often bring in impressive records and credentials on paper. Some of them have advanced degrees, excellent academic background and are pleasant and personable, well-dressed and impressive speakers. Yet, sometimes they do not ring the bell, for in looking over their lives and their past records of performance, we find signs which show they may be just a face in the crowd.

In probing more deeply into their way of life, we often find that they have been method workers, formula thinkers, copycat creators or "play-it-safers" with one eye on the boss and the other on the pension fund.

Their uneventful years have been characterized by the safe and the sound and the sane. They haven't tried much. They didn't take a chance.

To put it another way, we often find that this is the kind of person who tells you how unlucky he has been.

No agency is interested in hiring a copywriter or account supervisor whose career has been checkered with disaster and misfortune. No agency is interested in the art director who can do the job only as well as the man at the next desk.

Imagination — What the agency employer is looking for in an account executive, a copy chief, a sales manager or a television writer is the one man in a thousand who has that extra ounce of intuition, a sense of timing, a little imagination and the courage of his convictions. All agencies and advertisers will pay handsomely to get that kind of lucky person on their staff.

You will notice that there is a distinction between speculating and gambling in this business of being lucky. The gambler takes a blind chance. The speculator has considerable more information on which to base his judgment and intuition.

Here are five simple rules that we have found are a pretty good gauge of whether or not someone is going to be successful in our agency business. But you can apply them yourself. They are:

1. Know what you are doing.
2. Know more about it than the other fellow.
3. Make up your mind.
4. Be confident of your position.
5. Do it.

What It Takes — One last thought to answer those who might ask just how hard do you have to work at this business of being lucky to succeed at it. In advertising, like all business, people sometimes are distinguished by their simple industry.

A young agency writer told me that when he signed out of the Prudential Building at 4 a.m. one time recently, the name just above his on the sign-out sheet was "Leo Burnett."

Carl Post was class president and Theta Chi president at the U. of Michigan where he was graduated in 1938. He was advertising copywriter for General Mills, Nash Kelvinator and Sears, Roebuck; account supervisor-copywriter-vp of Foote, Cone & Belding; vp of Erwin Wasey; executive vp of Grant Advertising; president of Gordon Best Agency, predecessor of P & M. Outside interests: commodity and stock markets, oil wildcatting. He has owned two cosmetics companies and other interests.
And here's how WHIO-TV gives viewers more of what they want. A solid hour of live and informative programming from 6 to 7 P.M. weekdays. Here's a typical run-down:

- National and international news
- Sports
- Local and area news
- Business news and stock market information
- Weather summary
- Dow Finsterwald's Golf Tips
- Plus features and human interest items in the news.

In addition, each Monday evening 7-7:30, "WHIO-TV Reports" presents a lively forum devoted to the discussion of items of particular local interest. "Rising Generation," a talent showcase for the youth of the area, adds life to Saturday evenings, 6-6:30 P.M.

These, and countless other live and informative programs, provide the kind of balanced programming that pleases most of the people, most of the time in Ohio's 3rd, and the nation's 34th market.

See George P. Hollingbery (in living color) for the full story on Dayton's High, Wide, and Wholesome station (WHIO-TV)

Associated with WSB, WSB-TV, Atlanta, Georgia and WSOC, WSOC-TV, Charlotte, North Carolina
Your single purchase buys co-ordinated promotion and coverage over 67,000 square miles in West Texas and East New Mexico. Here, the West Texas Television Network serves the CBS signal to a 62-county area and 1,079,300 people with effective buying income of $2,054,386,000 and retail sales in excess of $1,409,857,000.

Commercials feature

EDITOR: The new service, "Commercials in Production," introduces a problem for some of our subscribers.

I'm sure you will find that Procter & Gamble will be most unhappy if any of their commercials are reported at the production stage.

We at Burnett specifically provide, in contracts with all commercial producers, that the production studios may not publicize in any manner their work for us for all clients, without our prior written authority. Such authority is never granted during production.

From our point of view, we would appreciate cancellation of the new feature. It just means a headache for us and for those producers who will, sooner or later, forget their obligations to us and risk being removed from our "approved producers" list as a result of breach of contract. . . .-David W. Dole, Vice President, Leo Burnett Co., Chicago.

[NOTE: While Procter & Gamble is certainly an important broadcasting advertiser it is by no means the only one and its wishes regarding suppression of news of commercial contracts cannot therefore be applied to the whole industry. Since BROADCASTING finds there is a good deal of interest in plans for production of new commercials it is believed that the new department will be of value to readers. The feature will be continued.]

Forms and substance

EDITOR: . . . I feel I must take exception to part of your editorial, "Forms and substance" (EDITORIALS, July 17).

In the first place, the new forms eliminate many of the old loopholes which have been threaded by many of our less public-spirited colleagues. In the second place, the new definitions of a program and of the different types of programming represent a definite improvement to both licensee and licensors.

If all of us as licensees do our best to live by the intention of the Communications Act . . . our problems would be solved.—Joseph D. Coons, President and General Manager, WOHI-AM-FM East Liverpool, Ohio.

EDITOR: Bravo on your editorial, "Forms and substance." Frankly, it is high time that the average, usually unnoticed, honest, dedicated broadcaster rise up and be heard. It seems that broadcasting needs dynamic leadership now more than ever before in an effort to stem the tide of government control. . . . Verne Paule, General Manager, WIPS Evansville, Ind.

Special market stories

EDITOR: We will have good use for reprints of your special report on Los Angeles (BROADCASTING, May 29) in the servicing of industrial prospects who frequently request general economic information on the Los Angeles area.—Patricia Aho, Industrial Department, Los Angeles Chamber of Commerce.

EDITOR: Thank you for forwarding the BROADCASTING articles on the part television played in my successful campaign for the mayoralty of Los Angeles (THE MEDIA, July 10) and on the Los Angeles market study. I enjoyed reading both articles. . . .-Sam W. Yorty, Mayor, Los Angeles.

EDITOR: Congratulations on your excellent Los Angeles (BROADCASTING, May 29) and Chicago (BROADCASTING, June 19) articles. Undoubtedly the best ever done. . . . Please send me ten reprints of each article.—Arthur Wittum, Director of Information Services, KNX Los Angeles.

EDITOR: Your market profile of Chicago was one of the best I have ever had the pleasure of reading. You caught the flavor and tempo of our city and made it quite clear that we are not a "second city" . . . .

I ordered reprints for all of our salesmen. I, for one, use a reprint of your story when I talk to clients. Ruth L. Rainy, Vice President, Fred A. Niles Productions Inc., Chicago.

[Lionel's tv campaign]

EDITOR: Congratulations on an informative article on the toy industry's tv expenditures in 1961 (BROADCAST ADVERTISING, July 17).

Incidentally, Lionel Corp.'s Toy and Train Division will spend just under $1 million on tv spots in 1961, not "more than $650,000," as reported in your article. Also Lionel's spot campaign will saturate 75 markets plus eight in Canada, not 41 as reported. Jacques Zuccaire, Advertising Director, Lionel Corp. Toy & Train Division, New York.

'The House Detective'

EDITOR: I read with interest the article (BROADCAST ADVERTISING, June 12) regarding the new real estate program, Suburban Living. The whole story seemed to imply that Cunningham & Walsh has come up with something brand new.

Will it come as a surprise to you to learn . . . that The House Detective tv program, a real estate program, started its 10th year on tv July 1 and is now seen in 16 markets?—Cy Newman, President, HD Productions, Bon Air, Va.

**FCC CLEARS DECKS FOR VACATION**

- Big, little cases decided in preparation for August holiday
- Deintermixture gives eight cities v's, takes them from eight
- Miami 1956 grant revoked; WSPA-TV 8-year record reopened

A decision to issue rulemaking which would delete vhf channels from seven intermixed cities and add a third vhf assignment to 10 cities highlighted two days of vigorous activity by the FCC last week.

All seven commissioners were present as major decisions were made in several cases and the decks were cleared in numerous minor actions as the commission prepared for its annual August hiatus beginning Wednesday.

In the deintermixture-drop-in rulemaking, the commission proposes to add vhf channels in Baton Rouge, La.; Dayton, Ohio; Birmingham, Ala.; Jackson- sonville, Fla.; Knoxville, Tenn.; Johnstown, Pa.; Charlotte, N. C., and Oklahoma City, Okla. All of these cities presently have two stations operating on vhf assignments.

Losing low-band channels under the FCC plan would be stations in Madison, Wis.; Rockford, Ill.; Hartford, Conn.; Erie, Pa.; Champaign, Ill.; Columbia, S. C.; Montgomery, Ala., and Binghamton, N. Y. The vote was 4-3 on issuing the rulemaking (for further details, see page 48).

In other major actions, the commission:

- Set aside the January 1956 grant of ch. 7 Miami to Biscayne TV Corp. (WCKT [TV]), disqualified three of the applicants and granted the remaining applicant, Sunbeam TV Corp. The order does not become effective until further notice by the commission and Sunbeam's original license would be for a period of four months only (see page 56).
- Reopened the eight-year-old record in the ch. 7 WSPA-TV Spartanburg, S. C., case for the taking of further testimony on ex parte charges (see page 62).
- Ordered Crowell-Collier Broadcasting Co. to pay a $2,500 fine for "repeated failure to operate station KDWB St. Paul, Minn., substantially as set forth in its license." At the same time, the FCC said that it intends to use its power to levy fines in the future to impel broadcasters to comply with commission rules (see page 60).
- Instituted license revocation proceedings against WPFA Pensacola, Fla., and set for hearing application for renewal of WMOZ Mobile, Ala. The commission charged Edwin H. Estes, licensee of the two stations, with submitting false and forged program logs and with compelling employees to violate FCC rules under threat of discharge (see page 50).
- Issued short-term licenses to WILD Boston (because of financial condition of the station and violation of technical rules) and WAVA Arlington, Va. (programming and commercial practices and policies) (see page 60).
- Set for hearings, on charges of trafficking, applications for sale approval of WMIN St. Paul, Minn., and transfer of the construction permits held by Plains Broadcasting Co. for five new fm stations (see page 58).
- Scheduled hearing on application to increase power and transmitter height by KWTX-TV Waco, Tex., to determine whether KWTX-TV and KTBC-TV Austin, Tex., are under common ownership and extent of overlap between the two stations. The LBJ Co. (Mrs. Lyndon B. Johnson, wife of the Vice President of the U. S.) owns KTBC-TV and 29% of KWTX-TV (see page 48).
- Clarified and amended the "local notice" requirements of the FCC rules which makes it mandatory for broadcasters to publish local announcements of major filings with the FCC (see page 50).

The commission has scheduled a meeting for tomorrow (Aug. 1) because of a stipulation in the law that the agency meet at least once each month. Not all commissioners plan to be present at Tuesday's meeting, however, which will be the last one until September.

Several of last week's decisions were made on 4-3 and 5-2 votes, with other controversial items either passed over

---

**Scrub the airwaves now, Sen. Dodd urges**

Sen. Thomas Dodd (D-Conn.), chairman of the Senate Juvenile Delinquency Subcommittee, wants the networks to scrub the airwaves of crime and violence shows. He wants the FCC given the power to see that they do. And he wants action now—not next year. Although the hearings of his subcommittee on the effects of television crime shows on children are not yet completed, he is convinced there is a connection between television and juvenile delinquency.

Secretary Abraham A. Ribicoff (right) of the Dept. of Health, Education and Welfare isn't enthused with television, either. But he's not sure that tv crime shows are a cause of crime; there's too much conflicting evidence on the question, he says. In any case, he feels parents have the prime responsibility for policing their children's tv-viewing (see story page 56).
or not reached for consideration because of the extremely heavy agenda. One of the more controversial items upon which no action was taken was a final order in the commission's trafficking rulemaking.

As now drafted, this new rule would require licensees to retain ownership of a station for a minimum of three years, except in extenuating circumstances. Comments have been received by the commission from industry parties with a large majority of those commenting opposing the measure (Broadcasting, Jan. 30, 1961). This is the fourth time in recent weeks the trafficking rulemaking has been on the agenda without the commission reaching a decision. The commissioners, in fact, are known to have violently opposing views on the advisability of the proposed requirements (Broadcasting, Dec. 12, 1960).

A companion rulemaking, also not acted upon last week, would specify that when one or more applicants drop out in a comparative case leaving only one party, no action would be taken on the remaining application to permit new competing bids to be filed.

**BROADCAST ADVERTISING**

**MAXWELL HOUSE IN SPOT TV**

Big schedule will bring most of budget back into medium that it abandoned early in year

Maxwell House Instant Coffee and spot TV are percolating together again. The General Foods product, which earlier this year pulled its entire national spot budget—an estimated $5 million annually—out of TV (Broadcasting, June 19), is buying a large schedule of 20-second and 60-second commercials, and 10-second IDs, in many markets across the country for the coming fall season.

In addition it was indicated that Benton & Bowles, the agency handling advertising for the coffee brand; has 30-second and 40-second films in its possession and will use them if the situation is "propitious."

The agency started buying spots for Maxwell House the week of July 17 and is still asking station representatives for availabilities.

It's estimated that most, if not all, of Maxwell House's $5 million spot TV budget will find its way back to the medium. The coffee firm's move is said to have been motivated by "marketing considerations" after a revaluation of its former spot TV philosophy.

Maxwell House's cancellations earlier this year came in two phases. In April the company exercised the standard two-week spot TV cancellation clause and dropped all of its 20-second commercials. In June, Maxwell House, which was one of the most heavily promoted brands in spot TV, pulled out all of its 10-second IDs. Although at the time there was a great deal of speculation that the action was prompted by the instant brand's dissatisfaction with the pending expansion of station breaks to 40 seconds, the General Foods division maintained that it only was "reevaluating" its marketing position.

Evidence of that "reevaluation" can be seen in Maxwell House's use now of 60s, and possibly 30s and 40s, along with 20s and 10s, where formerly it only used the last two named lengths.

**American Oil buys CBS-TV football games**

While Shell Oil Co. has courted its television advertising drastically, a competitor, the American Oil Co., Chicago, is planning to expand its television investment substantially this fall.

American Oil, through D'Arcy Adv., Chicago, has signed tentatively for one-quarter sponsorship of the regional telecasts of the National Football League games on CBS-TV in approximately 85 markets. The pact could be revised, depending on whether a federal court ruling invalidating the network's contract with the NFL is upheld or modified (see story page 60).

American Oil's participation is on the regional network telecasts of the Chicago Bears, Minneapolis Vikings, St. Louis Cardinals and Green Bay Packers, and on either the Baltimore Colts/Washington Redskins and New York Giants/Pittsburgh Steelers, depending on which areas are blacked out.

The buy by American Oil is significant in that the company's TV expansion is into some of the markets bought by Shell Oil during its sponsorship of the NFL games last season. Similarly, Atlantic Refining picked up markets relinquished by Shell during its defection earlier this year for Atlantic TV news and weather programs.

**NBC Radio reports $1.24 million sales**

NBC Radio's new and renewal business totaled $1,245,098 between June 19 and July 19, a one-month total which follows more than $2.5 million in sales written during May and early June, according to George A. Graham Jr., vice president and general manager.

Mr. Graham said new business placed during the last month includes orders from Mogen David Wine Corp. through Edward H. Weiss & Co., Chicago; Evinrude Motors through Cramer-Krasselt Co., Milwaukee; Curtis Circulation Co. and DuPont through BBDO; Reader's Digest and Standard Brands through J. Walter Thompson; Philip Morris through Leo Burnett, and Bristol-Myers through Doherty, Clifford, Steers & Shellenfield.

Renewal orders came from R. J. Reynolds through the William Esty agency; the Evangelical Foundation through Wermern & Schorr; Sterling Drug through Dancer-Fitzgerald-Sample, and P. Lorillard through Lennen & Newell.

**Gulf moves more billing to EWR&R from Y&R**

The Gulf Oil Corp. announced last week it has transferred the tire, battery and anti-freeze portions of the account from Young & Rubicam, New York, to Erwin Wasey, Ruthrauff & Ryan, Houston. Billing amounts to $2.5 million and the account is expected to be active in radio and TV, particularly on news programs.

Earlier this year Gulf moved its petroleum specialty products from Y&R to EWR&R, but Y&R still handles the bulk of Gulf's advertising, including gasoline and oil products. The account will be serviced by EWR&R out of Houston but will be supported by the Pittsburgh and New York offices.
In the next few weeks, Death Valley Days will start its 10th year on television under the sponsorship of United States Borax & Chemical Corp. Oldest of tv's western-locale programs, Death Valley Days has carried commercials for the company's consumer products since the fall of 1952, as it did on radio for most of the 20 years before that. During the 1930's and '40's, radio was virtually the only medium used to advertise the "soap sweetener," 20 Mule Team Borax, and the powdered hand soap product, Boraxo, to the general public. Today, television is the company's standard bearer, estimated to account for better than 90% of advertising expenditures of well over $4 million a year.

It was on Sept. 30, 1930, that the nostalgic bugle call and creak of the 20 mule team wagons were first heard on the air. Starting on NBC, Death Valley Days stayed on that network for 11 years, moved to CBS for three more and then was discontinued and replaced with what was first called Death Valley Sheriff and then just The Sheriff. This series of modern day detective stories in the familiar Death Valley setting, ran on ABC until 1951.

At that time the company switched the major portion of its advertising budget to magazines—Good Housekeeping, True Story and Woman's Home Companion for 20 Mule Team Borax and Life for Boraxo. While magazines carried the national advertising for the borax products, newspapers, radio and the then new medium of television were being tested in various markets.

"But the advantages of being able to demonstrate the various uses of our product in the home led us into television," D. V. Parker, vice president of the 20 Mule Team Products Dept., said last week. "Television was new and it was expensive, but it seemed to pay off.

Why Spot TV? • "We wanted to use one-minute spots, but in 1952 there were so few spots available that program sponsorship seemed a more feasible way to get into tv. In those days—and it's hard to realize they are less than nine years behind us, so rapidly has television developed—the television networks were limited regional hookups, not the nationwide affairs they are today. So we were forced to go into spot television, if we were to use the medium at all on a national scale.

"Fortunately, we had the makings of a television program in our own files—the 750 scripts from our 14 years of Death Valley Days radio broadcasts. Our present day television show was simply an adaptation of our original radio show which we as a sponsor owned, as was the case with other radio sponsors. We merely continued with our property by simply adding the visual proportion to an already successful format. Most fortunately, Ruth Woodman, who had written the original Death Valley Days scripts and about eight out of 10 ever since in addition to serving as story editor, was on hand to guide the transition from radio to television.

"You might say we had 'fool's luck' in every aspect of our entry into television," Mr. Parker commented. "In the early 1950's many markets had only one television station. Of the 62 cities in which we launched Death Valley Days as a half-hour series, 42 were single station markets. With little or no competition, our program had little trouble in establishing itself and, by the time competition did appear we had amassed a loyal following which stayed with us despite the lure of more novel fare on other channels. From the start, western programs were among the most popular type of tv entertainment and here we were lucky again to have an
anthology series set in a western locale. The fact that this locale is closely identified with our product didn't hurt, either."

In The Beginning • At first, the Death Valley Days tv series was broadcast every other week. As tv grew and sales continued to increase, the schedule was stepped up to a broadcast a week in major markets, starting in 1956 with New York, adding the next eight markets, then the next 16 and so on until today of the more than 130 markets in which the program is seen, only 20 stations continue to carry it on an alternate week basis.

Sales of 20 Mule Team products had doubled during the 1940's, then trebled in the '50's and the company's annual report for 1960 noted that in that year they "were above last year's record levels." By mid-1959 expansion of advertising was in order. Mr. Parker and other executives in his department and at McCann-Erickson felt that experimentation with other types of tv programming than Death Valley Days was called for. As President James M. Gerstly reported to the annual stockholders meeting last February: "Now that nearly every home in the USA has television, we can no longer expect annual growth in audience by reason of the sale of sets to new families.

"We conducted tests last year to see if we could effectively reach a new audience if we used daytime television in addition to our Death Valley Days evening program. Results of these tests obtained within one year were encouraging, so we embarked on a national daytime campaign, starting October 1, 1960."

"As you can imagine, it takes time for the cumulative effect of such campaigns to be felt and little can be expected within six months. However, there is evidence that we are making progress, though perhaps at a slower initial rate than experienced in our tests. If these trends persist, results should be increasingly satisfactory as the year advances. The net cost after taxes of this additional advertising amounts to some $500,000 or 12¢ per common share per quarter."

Daytime, Too • In addition to Death Valley Days, the 20 Mule Team Dept. of U. S. Borax is now using participations in five of NBC-TV's five-a-week daytime programs: The Jan Murray Show, The Loretta Young Show, From These Roots, Make Room for Daddy and Young Dr. Malone.

For the first quarter of the 1961 fiscal year, the company's net income was 25 cents per share, compared to 31 cents for the same quarter of the previous year. Sales were about the same. "So you can see," Mr. Gerstly told the stockholders, "if advertising had been held to last year's levels, with no consequent reduction in sales, our earnings this quarter would have exceeded those of the like 1960 quarter by about 10%.

At the end of the second quarter, Hugo Reimer, president of U. S. Borax & Chemical Corp. was able to inform stockholders: "Sales of consumer products have reached higher levels than for comparable periods in previous years and recent surveys show a steady increase of 20 Mule Team Borax sales in grocery stores, suggesting, as anticipated, growing effectiveness of the higher advertising expenditures incurred this year."

During its radio run, Death Valley Days was produced for its sponsor by the program department of McCann-Erickson in New York under the supervision of Dorothy McCann. With its entry into television in 1952, Death Valley Days was filmed by the Gene Autry organization, Flying "A" Productions, then was handled by McGowen Productions, which later became a subsidiary of McCann-Erickson known as La Brea Productions. In 1959, production of the series was transferred to Filmster Inc., which is currently producing the half-hour films for the 1961-62 season at Producers Studios in Hollywood. Ruth Woodman, story editor at Filmster, still has the final say on all Death Valley Days scripts and, to keep her hand in, she will have several credits among the new shows being produced.

Reruns • For seven years, U. S. Borax used the Death Valley Days programs on tv under its own sponsorship and stored the master prints away, in their old mines in Death Valley, resolutely resisting all offers for rerun rights. But, Stanley Andrews, tv's 'Old Ranger' appears on every 'Death Valley Days' show as story teller and as commercial spokesman for U. S. Borax & Chemical Corp.'s 20 Mule Team Borax and Boraxo products.

two years ago, the company decided to allow some of the earlier programs to be rebroadcast under other sponsorship. The name was changed to The Pioneers and certain features with strong Death Valley Days identification such as the 20 Mule Team and the bugle call were withheld from the rerun versions of the original series. Otherwise few changes were needed. Syndication of The Pioneers is handled by Peter M. Robeck & Co. in association with McCann-Erickson.

The use of Death Valley and the 20 mule team as keynotes of the tv series, and in radio before that, are authentic and legitimate. For more than 30 years, from 1884 to 1927, Death Valley was the principal source of borax. For a dozen years or more, the 20 mule teams hauled 24-ton wagon loads of crude borax across the desert and over the mountains, without a single breakdown, until their replacement by a special railroad line in 1898. Even after that date, the mules and the wagons were called on for emergency duty until their final trip, save for exhibition purposes in 1907.

Distribution of the 20 Mule Team consumer products, initially borax and boric acid, began in the 1890's through drug stores; grocery stores came later. Bar soaps and soap powders for laundry and dishwashing were added and in the early 1900's the first powdered hand soap was introduced. It was called Grime Off, a name later changed to Boraxo.

All Those Mules • The use of the 20 mule team as the trademark of the consumer products began in 1891. Adver-

Why Filmaster produces 'Death Valley Days'

Death Valley Days presents one particular production problem unique to itself as a series. It is the only western locale program which bases its stories on historical accuracy. Each story is hinged on a proved fact. Many times an artifact indigenous to Death Valley is incorporated into the plot and shown on camera.

This adherence to fact has led to some odd research—i.e., locating a wooden pegleg used to conceal a gun; locating the rifle used by Pete Kich- en, a hog rancher, in his one-man war against the Apaches, and perhaps most bizarre of all, a kite that was instrumental in rescuing a U. S. military unit. The unit was stranded atop a mesa. One man made his way to low ground, flew the kite into the air. The group on the mesa then grounded the kite and the string used to put it aloft was used to haul up rope strong enough to support a man. The men then slid down, one by one.

Offhand, this may just appear to be interesting color or human interest, but in terms of production dollars it is more than that. Production time and research translate themselves directly into production dollars and on any program the budget is an ever-present factor. Such allegiance to fact also affects the writers producer Nat Perrin hires—none of the standard western plots meets the Death Valley Days specifications. Plots center to a great extent on actual western pioneer events.

Filmaster Inc. won its contract to produce Death Valley Days for U. S. Borax two years ago against 28 other bidders. At the time Filmaster was primarily an "under-the-line" producer and a principal factor in its winning the Borax contract undoubtedly was its performance in filming three major series for CBS-TV—Gunsmoke; Have Gun, Will Travel and Playhouse 90.

Robert Stabler, Filmaster's president, gained a reputation through his work on these three programs as a producer who came in on time and within or lower than budget, which was true of the 156 Gunsmokes; 78 Have Guns and the four 90's he did for CBS. Both Mr. Stabler and Nat Perrin, Filmaster's program vice president, who is also producer of Death Valley Days, are veterans of Hollywood's production scene and know the hundreds of holes through which production dollars can be dribbled away through careless production procedures.

In the two years since Filmaster has taken over production of the series one major change made was to begin using important Hollywood names as guest stars in individual episodes. Last season saw such personalities as Ken Murray, Jane Russell, Cesar Romero, Ida Lupino, Ricardo Montalban, Yvonne de Carlo and others on the program. The complement of stars who'll grace the films set to start rolling in a month is now being set by Mr. Perrin.

The production schedule calls for completion of two half-hour episodes a week. Other than location shooting, filming is done at Producers Studios in Hollywood, where Filmaster maintains its home office and general production facilities.

tising of the consumer line began in the early 1890's on a modest scale. Occasional ads in national magazines were augmented by booklets, posters, contests and premiums, promotional materials that accounted for a substantial part of the advertising dollar. The first major exploitation of the trade mark came in 1904, when a 20 mule team was paraded daily at the St. Louis World's Fair.

For many years thereafter, whenever a major promotion was called for, such as the introduction of a new product, the regular sales force would be supplemented with canvassing crews, whose appearance in town would be heralded by a sure traffic-stopper, a parade of the 20 mule team. Just as today, more than a half-century after the St. Louis debut into product promotion, the team is still catching all eyes on television.

Midwest ad agencies merge

Announcement of a merger combining the Winius-Brandon Co., St. Louis, and Selders-Jones-Coveington Adv., Kansas City, has been made by William L. Sandborn and David V. Selders, the respective presidents.

James H. Barickman, director of Winius-Brandon's Kansas City office since its inception in 1959, will continue as vice president of the combined Kansas City operation.

In the new combination, Mr. Selders becomes a vice president in the Kansas City operation. James A. Firth, vice president and director of marketing research for W-B's St. Louis office, transfers to Kansas City in a similar capacity. Wallace H. Husted, formerly creative supervisor of Wade Adv., Chicago, becomes creative director for W-B in Kansas City.

Tv circulates where newspapers never go

**DISCOUNT HOUSE LIKES WAY TV BRINGS IN TRAFFIC**

A big new sales potential for television—discount house advertising—is envisioned by a Wheeling, W. Va., discount store which attributes its thriving success in large part to spot schedules on WTRF-TV Wheeling.

David Kahn, general manager of the Value City discount house in Wheeling says: "Discount houses in various local communities will use more and more television when they find the right advertising approach for their sales needs and eventually television may wind up with the major share of the advertising budget."

The reason Value City has been consistently increasing its tv ad budget, as compared to print media, Mr. Kahn says, "is that tv provides a store image and a definite visual advantage for particular items that cannot be matched by other ad media."

The discount house sales expert feels a particular type of copy writer is needed for the sales copy a discount house needs to get across its most effective message. When this type of person is available, tv stations will get a far greater percentage of the discount house advertising than they do now, he said. Mr. Kahn cited electric fans, air conditioners, refrigerators and other hard goods as easier to move immediately on tv advertising.

**Tv Traffic** — Mr. Kahn's pat on tv's back gets harder when he talks about which medium does the best job of bringing people into the store.

"The real reason to use tv," he says, "is to bring people into the store. You can reach out only so far with other media, but when we advertise on television we can reach an area six to eight times as great as that on any other media. We reach hamlets and towns where there are no newspapers and we reach an area in which we would have to buy newspaper space in 10 different counties if we used print. Fifty per cent of our trade comes from outlying areas. We need a traffic average per month of 500,000 people in order to maintain our level. The newspapers give us only 200,000 homes, but WTRF-TV can give us the additional 300,000 homes we need."

"That's the main reason we are using more tv and it's the only way we can sustain our operation."

Although Mr. Kahn declined to give the actual figures for Value City's tv expenditures, he said the 1961 budget for WTRF-TV is double that spent in 1960. The store's new tv budget is 25% of its total advertising as against 10% a short time ago and will rise to 30% in the fall. He added that when personnel is available to present the store's sales approach, the tv budget will move to 50% and even higher.

Value City's spot schedules are always in prime time, with a weekly average of three to five 20-second or 60-second spots every night except Satur-

**Business briefly...**

Lucky Auto Supply Stores, Hollywood, has announced a 13-week spot radio schedule in eight California cities, heralding its silver anniversary of service to the motoring public. Stations sharing the schedule are: KWG Stockton, KYNKO Fresno, KGEN Visalia, KNGS Hanford, KSBW Salinas, KVEC San Luis Obispo, KUZZ Bakersfield and KWOW Pomona. Agency: Clifford Gill, Hollywood.

Willys Motors Inc., Toledo, is presenting on NBC-TV's Jack Paar Show, a series of 13 "home movie" type commercials starring Jack Paar and Hugh Downs featuring a new jeep model, "Tuxedo Park," a four-wheel drive sports convertible. The series of commercials, which will be televised in color, will accent the vehicle's sporty white, red and black combinations.

**Bell System,** through N. W. Ayer & Son, Philadelphia, will sponsor Threshold, a three-part series of 90-minute programs exploring America's scientific plans, objectives and accomplishments in the space age, beginning this fall.

**National School of Home Study** (correspondence school) has signed with WNTA-TV New York and WIBG Philadelphia for a 13-week spot campaign on each station. Agency: Metlin & Lebow Corp., N. Y.

**American Enterprises Inc.,** San Mateo, Calif., manufacturers of "space-age toys," will launch a national tv schedule in major cities this fall to promote the introduction of a new space product. Agency: The Wyman Co., San Francisco.

**STP (Scientifically Treated Petroleum),** Los Angeles, has announced a $100,000 summer-fall push of its lubricant in the west coast area with radio sharing the bulk of the budget. Stations in Los Angeles, San Francisco, Portland,

Seattle, Honolulu and San Diego will get the major portion with key secondary markets also sharing in the buy. Agency: Fallon, Brangham & Brewer, Hollywood.

Associated Super Food Centers, new association of southern California supermarket chains formed by Boys Markets, Gateway Markets, Kory’s Markets and Pantry Markets, on Sept. 1 will launch a cooperative radio campaign encompassing more than 100,000 local spots per year. Initial campaign will start on KLAC, KPOL and KKKD Los Angeles and KDNY Santa Monica, with a budget of more than $500,000. The cooperative campaign is being handled by Roche, Eckhoff & Assoc., Los Angeles.

General Mills Co., Minneapolis, will launch its new Wild Blueberry Pancake Mix starting this week with an all-media advertising campaign which includes a month-long (August) radio and television promotion. A pre-introduction of the product took place earlier this month on the West Coast. Agency: BBDO.

49ers backed – Falstaff Brewing Corp., General Insurance Co. of America and Borden Co. will co-sponsor the radio coverage of the San Francisco 49ers this fall on KSFQ San Francisco and the Golden West Network of stations in Northern California and Western Nevada. Broadcasts will include five pre-season and 14 regular league contests starting Aug. 12. Falstaff, through Dancer-Fitzgerald-Sample, N. Y., will sponsor one-half of the broadcasts; General Insurance Co. (SAFECO) one-quarter, through Cole & Weber, Seattle, and Borden Co. (milk and ice cream) one-quarter, through Young & Rubicam, San Francisco.

Rep appointments...

- KADY St. Louis: Spot Time Sales, N. Y., as national representative.

REPORTED THE TRADE PRESS IN MARCH 1959: "A new working tool to make spot announcement handling as simple as push-button technology will permit." The attention was focused on the new Gates Spot Tape Recorder, soon to be called the greatest boon to broadcasters since the invention of the microphone. Now, two years later, more than 500 stations from coast to coast have one or more Spot Tape Recorders in operation. Just look at the application: On one tape 13" wide are 101 announcements up to 90 seconds duration each. You simply move the index lever to the spot your log calls for, push the play button and let Spot Tape do the rest, including automatic rewind and perfect cue for split-second airing of the next spot. Let us tell you more about the exclusive Gates Spot Tape Recorder. Write today for Brochure No. 73 – yours for the asking.

Station Index tv service measurement expanded

A. C. Nielsen Co. announced last week a series of expansions of its Nielsen Station Index television service, including an increase that will mean all U. S. tv markets will be measured at least twice a year.

Simultaneous measurements will take place in all markets in the spring and fall, in addition to the more frequent measurements made in most markets. In another phase of the expansion move the survey samples in major markets have been enlarged.

The expanded service, officials said, will produce more precise station total audience data and also, for the first time, will provide audience data by advertiser sales figures.

Nielsen said the new total U. S. measurement means about 200 markets will be measured at least twice a year, as against 197 markets in the past. Nielsen reports quarter-hour metro (central city) and station total ratings for more than 180 of the larger markets. In the rest, where there is no substantial metropolitan area, station total audiences are reported.

Most of the expansion moves, officials said, have already gone into effect.

Also in advertising...

Coffee firms blend • Duncan Coffee Co., Houston, and Butter-Nut Foods Co., Omaha, Neb., announced June 20 their plans for merger. Under the plan, there will be no change in the corporate structures, personnel or distribution of the two regional firms.

GMM&B consolidates • Geyer, Morey, Madden & Ballar Inc., western division, has consolidated its Chicago operations, with headquarters now in the Blair Bldg., 645 N. Michigan Ave. The move brings together some 50 persons on the agency’s staff who formerly were located in two separate offices. New telephone: Mohawk 4-8000. The New York based agency also has branch offices in Racine, Wis., Omaha, Dayton, Detroit, Los Angeles and Portland, Ore.

In business • Tele-Video Productions, N.Y., has been formed to produce tv commercial films, tv film series and feature motion pictures. Tele-Video was established by Lew Pollack, president. Studios and offices are at 316 W. 57th St., New York 19, N. Y. Telephone is Judson 2-8095. Mr. Pollack formerly headed Lew Pollack Productions and earlier was with Elliot, Unger & Elliot and Video Productions Inc., both N. Y.

Move • Kirkland, White & Schell, At-
AFA-AAW ad campaign

Douglas L. Smith, advertising and merchandising manager of S. C. Johnson & Sons, Racine, Wis., has been named chairman for the 1962 national campaign, jointly sponsored by Advertising Federation of America and Advertising Assn. of the West, to improve public understanding of advertising.

George W. Head, manager of advertising and sales promotion, National Cash Register Co., Dayton, Ohio, is 1961 chairman.

The blanket identification will be changed from Advertising Week Year to Advertising Recognition Program, a continuous advertising campaign to "give the public a recognition and understanding of advertising's basic contributions to American leadership."

Atlanta, last week announced it has moved to new and expanded quarters on the fifth floor of the new 1252 West Peachtree Building in that city. The firm's new telephone number is 875-0021.

Newly appointed The Blair Cos., N.Y., have appointed Ketchum, MacLeod & Grove, Inc., that city, to handle publication advertising. The Blair Cos. consist of: John Blair & Co., radio representatives; Blair-Tv, dealers in national spot sales for tv exclusively; and Blair Television Assn., station representatives for key markets. Maxfield Gibbons, named account supervisor, and Laurence Donino, account executive by KM&G to represent the new account.

Latest list The Advertising Educational Foundation Inc., N. Y., has released a new bibliography, Advertising & Marketing Theses for the Doctorate in U. S. Colleges & Universities, 1944-1959. Theses are classified in 46 subject categories and are cross-referenced where more than one major emphasis is indicated in the thesis title.

Agency appointments...

- The Southern Greeting Card Co., Memphis, Tenn.; Leathercraft Inc. and The Child's World Encyclopedia, both Chicago, all appoint Bozell & Jacobs as their agency.
- Hurley Products Co., Chicago, for Hurley press ironer, to Kuttner & Kuttner, Chicago. Tv will be used.
- National Allied Products Co., Omaha, for Brit-Eyes bleach and Dr. Brit disinfectant cleaner, to Allen & Reynolds Adv. there. Radio-tv planned.

Broadcasting, July 31, 1961
Using own product would help radio

EMIL MOGUL POINTS TO PRESTIGE CAMPAIGNS OF PAPERS, MAGAZINES

One of radio's most consistent supporters among the agencies feels that radio could and should improve its stature and its financial structure by buying some of what it's selling—advertising.

The suggestion comes from Emil Mogul, president of Mogul, Williams & Saylor, New York. The campaign he advocates would be akin to the big promotions conducted by magazines and newspapers and would be placed, as theirs are, in prestige magazines, key newspapers in the top cities—New York, Chicago and Los Angeles, for example—as well as in leading trade publications.

Would Boost Billings • The idea has been accepted as good but dismissed as impractical or secondary in importance among other current radio-sales promotion activities, however. But Mr. Mogul contends it would help existing promotion activities do a much better job of increasing radio billings than they're doing now.

Mr. Mogul, a radio station owner himself, told Broadcasting that if each station in the U.S. would contribute one-tenth of one percent of its billing, the resultant war chest—some $675,000, based on total billings of about $675,000,000 last year—would finance a "terrific" campaign with "wonderful" results.

The campaign he envisions would be in addition to the regular promotion activities of the Radio Advertising Bureau and the NAB. He felt that existing organizations, despite all the promotion they have done and are doing, have not succeeded in moving spot billings upward as fast as they should move. An "impact" campaign pushed consistently in "a handful of magazines and newspapers," he said, would "do more than anything done to date" to provide that extra boost, giving billings a 7-8% increase each year.

Radio's low costs, wide reach and proven sales impact were among the values he felt should be promoted in the proposed campaign.

Mr. Mogul emphasized that radio's values exist. The job, he said, is to convince more advertisers and agencies.

Radio Pays Off • "In our experience," he said, "radio pays off as handsomely as any other medium—if not more so. For anything that is sold in the mass channels of trade, radio can sell it better. A $675,000 campaign would go a long way toward giving radio the stature it deserves—and make it easier to sell."

He recognized that buying space in big consumer publications for a radio promotion campaign would involve a great deal of "waste circulation," but pointed to the success of similar magazine and newspaper drives and noted that, despite the wastage, "they know Miami officials think twice after radio-tv editorials

City hall is beginning to feel the heat of aroused citizenry spurred to action by tv and radio editorializing.

The latest example of broadcasting's position as the voice of public conscience, in past years a responsibility almost solely that of newspapers, took place in Miami last week.

Led by editorials on WTVJ (TV) and radio stations WAM, WQAM and WINZ, an aroused public forced the Miami Board of Commissioners to reverse itself and rehire the city manager, who had been fired by a 3-2 vote just one week previously.

The council meeting which rehired Melvin Reese, Miami's city manager, was packed with people as the result of a tv and radio editorial campaign. The meeting itself was carried live by WTVJ, WCKT (TV) and WAME.

Fracas Starts • The fracas, which carried overtones of a political power play, and the suggestion of a competitive battle between two of Miami's tv stations, began July 19 when the Miami city fathers, by a one-vote majority, dismissed Mr. Reese as city manager. Mr. Reese had been in office 16 months.

Among the reasons given by the anti-Reese faction for the dismissal was his alleged lack of action in dealing with the city's slums. The slum-clearance issue was injected after a two-part documentary on Miami's slums by WCKT (TV) there.

Even while the commission's dismissal meeting was underway, WTVJ leaped into the fray with a stinging editorial advising the populace what was taking place. For the next five days the ch. 4 station carried editorials calling for public action against the three commissioners who had voted for the dismissal.

WTVJ was joined quickly by three radio stations in the campaign to undo the commissioners' action. WAME, one of the radio battlers, on one day ran one-minute "mini-torials" 10 times, on the next day ran a 30-second editorial 10 times and for the next three days ran the 30-second editorial 20 times daily. They urged Miamians to attend the next commission meeting.

The tv-radio campaign resulted in the initiation of a recall petition against the three commissioners and a public mass rally on July 24, the day before the next commission meeting.

Victory • Mr. Reese was rehired on a 4-1 vote on the morning of July 25. He also won a change in terms which bolstered his tenure and made it more difficult for the city manager to be railroaded.

Only one of Miami's three daily newspapers joined in the fight editorially.

The first one-hour part of WCKT's documentary on Miami's slums (Miami: Condemned) ran twice last May. On July 18, the ch. 7 station put on the second part of the series, showing that not much action had been taken on the subject over 90 days.

This was one of the reasons given by the city commission majority on July 19 when it fired the Miami city manager. When the city commission rehired Mr. Reese July 25, it also passed a minimum housing ordinance, the first for Miami.

The WCKT documentaries run on a budget of $2,000-$3,000 monthly. Earlier this year, WCKT ran a story on juvenile delinquency which sparked adoption in Miami of the Mott plan (used initially in Flint, Mich.) whereby school facilities are used all day long for youth activities.
they're going to reach advertisers and agencies" when they buy papers like the Wall Street Journal and New York Times.

Mr. Mogul suggested that RAB would be the logical organization to administer such a campaign. But inquiries there found the reaction that the idea is good, but impractical.

**Often Considered • RAB President Sweeney** said an advertising campaign of this sort had been considered "at least once a year since RAB's inception." He summarized RAB's position thus:

"We think Mr. Mogul's idea a good one, but one that we think cannot be financed out of present funds without giving up more valuable and productive functions; that the stations are unwilling to finance by a tithing method at a level sufficiently high to support a real campaign, and we are inclined to feel that if we could raise $200,000 from this industry that there are research projects and sales efforts that could be bought that would produce a far greater volume of business than the advertising would."

The $200,000 cited by Mr. Sweeney was the minimum he considered necessary for "a really important campaign." He said RAB authorities did not think stations would be willing to contribute that much. Even if the money could be raised, he said, "there are so many ways in which this amount of money could be translated into immediate dollars for radio that we would be reluctant to spend the funds that way."

**Half Million Total •** He said "radio has about $500,000 available to cover its national-level effort, including personnel and overhead—that is, a little less than half of the total RAB funds. This protects and tries to expand a volume of national business that is far smaller than TVB or the Magazine Advertising Bureau or the newspapers' Bureau of Advertising are working with. For example, MAB's campaign is financed out of gross national advertising revenues of $938,000,000 compared to radio's gross national advertising revenues of only $257 million."

Mr. Sweeney noted that radio once tried a campaign of this sort, and that since then "the judgment of successive boards of directors and plans committees [of RAB] has always been the same: It is a desirable step when RAB has the money but it cannot be given as high a priority as other functions financed by our national promotion and sales budgets."

---

**'Image Audit' service offered to stations**

**AIM: TO HELP STATION PROGRAM, SELL, PLEASE FCC**

A new "Station Image Audit" to evaluate the attitudes of audiences and advertisers toward their local television and radio stations was announced last week by Henderson & McNelis, New York research firm.

President John J. Henderson said the new service blends psychological and statistical research to produce station profiles that will help the stations program, sell and promote better—and also show the FCC how well the community thinks a specific station is doing its job.

The FCC applications are being stressed as an important collateral benefit in view of FCC Chairman Newton Minow's repeated emphasis on local opinion as a yardstick for measuring station performance.

**Four Uses •** A brochure explaining the needs service says a station manager can use the Station Image Audit in four ways:

1. It will provide him with promotion for the advertisers—documented evidence of the selling influence of commercials on his station (compared with competing stations).

2. It will provide him with a guide to program policy. It will enable him to create local programs and select music that will have the greatest appeal and favorable effect on the total station image.

3. It will provide him with a guide to promotional policy. It will furnish him with the insights that will enable him to prepare new compelling on-air and print promotional themes that will attract listeners to his stations more often and for longer periods of time.

4. It will provide him with evidence to the FCC that he is looking beyond raw ratings to find out what his listeners most want in programs."

The Station Image Audit is planned, according to Mr. Henderson, in two stages, the first based on psychological research and the second using the results of the psychological studies in conjunction with statistical techniques to produce "definitive answers" to practical questions about programming, promotion and advertising.

**Reports • Out of the results come two reports for client stations:** (1) a confidential Image Audit for the use of management in reaching policy decisions affecting programming, promotion and community relations, and (2) a promotional Image Audit for use in selling by "documenting for advertisers the ways in which your station excels over lesser stations in getting sales messages to listeners and viewers."

Each of these two reports will be based on telephone surveys of 2,000 listeners, but back of the telephone questionnaires are a series of in-depth psychological interviews with both individuals and groups, according to the research firm.

First there is a session with station management to clarify objectives. Then come interviews with five groups of six to eight participants each—one group of women, one of men, one of teenagers and children, one of married couples having no college background, and one of couples who have gone beyond the first year of college. Next come depth interviews with 50 individuals representing a cross-section of listeners or viewers. The principal purpose of all these interviews, which are tape recorded, is to arrive at questions which will produce the most meaningful answers in the "mass" stage of telephone interviewing, according to H&M.

**Findings •** In programming, the research firm said, the Audit provides answers to such questions as: "What are the specific interests, tastes, desires and convenience of each community? Which stations are best serving these interests, desires, etc? What specific needs or interests are not now being served but can practically be served by broadcasters? What practical new ideas or techniques in local programming are large segments of viewers or listeners ready to accept?"

In station promotion the Audit seeks to show the "total image each station is projecting to the community," how these images influence audience loyalty and how the client station's image might be reshaped to increase loyalty. The objectives in evaluating advertising effectiveness are to show differences in the way viewers or listeners react to commercials on each station, and to di-
KVII-TV's new home opened in Amarillo

This was the head table scene at a luncheon prior to the opening of the KVII Building, new home of KVII-TV Amarillo, Tex. The 10-story structure is named after Jack C. Vaughn, board chairman of the Trigg-Vaughn stations and of the Reva Corp. (which owns the building), and Grady Vaughn Jr., his brother and co-owner of the building. L to r: Richard Reeves, Reva Corp. president; Cecil Trigg, president, Trigg-Vaughn stations (KVII-TV, KOsa-AM-TV Odessa, KROD-AM-TV El Paso, all Texas); Charlie Keys, manager of KVII-TV; Julius Barnathan, ABC-TV vice president; Jack C. Vaughn; Grady Vaughn Jr.

termin which station's image can best engage the viewer or listeners in the content of the commercials.

Henderson & McNeil, at 342 Madison Ave., New York 17, specializes in marketing and communications problems. Its Image Audit service is new, but among the companies for which it has done other research work, according to Mr. Henderson, are Television Advertising Representatives (TvAR), WHDH Boston, WPIX (TV) New York, and Trendex.

KFWB STRIKES BACK

Hires 'permanent' help to replace AFTRA strikers

A new tactic was introduced into the AFTRA-KFWB Los Angeles strike Wednesday, when a disc jockey who had joined the station on July 11, the opening day of the strike, was made a permanent member of the KFWB staff.

The next day Richard Lee Dobryn was given a permanent berth at KFWB as a newsmen.

Chuck Blore, vice president in charge of programming for Crowell-Collier Broadcasting Corp. (owner of KFWB Oakland-San Francisco and KDWB Minneapolis-St. Paul as well as KFWB), in announcing the appointment of Art Nelson, stated: "This action was taken under the law which protects management and labor alike, stating that we have the right to replace permanently any worker out on an economic strike. Should the strike be settled, we are not obligated either to reinstate the striker nor terminate the people we've employed during the strike."

Mr. Nelson, who worked at KABC Los Angeles until 1958 when he joined KLIF Dallas, withdrew from AFTRA at that time because KLIF does not operate with an AFTRA contract. Mr. Blore refused to comment as to which of the striking disc jockeys is being replaced. All seven of the KFWB staff d.j.s voted to support the station's newsmen in their wage dispute with the KFWB management and walked out with the newsmen, although their own wages are not in dispute. For this action, the d.j.s were commended by AFTRA at its national convention in Detroit July 20-23.

AFTRA "emphatically does not agree" with KFWB's contention that it has the right to make a permanent replacement for one of the men now out on strike, Claude McCue, executive secretary of the union's Los Angeles local, declared. The union has so notified the station management, Mr. McCue said. Further, he stated, "Mr. Nelson is a member on withdrawal and is subject to the same disciplinary action as any other member found guilty of scabbing."

Mr. Dobryn, previously with the news department of KXYZ Houston, was appointed to the KFWB news staff by Jim Hawthorne, program director of KFWB. As Mr. Blore had done in the case of Art Nelson, Mr. Hawthorne declined to say which of the striking newsmen was being replaced by Mr. Dobryn. The new KFWB newsmen is not now and has not been an AFTRA member.

Short Meeting • Representatives of the station and the union met briefly Tuesday (July 25) in the office of Jules Medoff, federal mediator, but no change in the situation resulted. Mr. Medoff, who called the Tuesday meeting, on Thursday contacted the station and the union and arranged for another meeting on Friday afternoon. He said such a meeting may be just a matter of exchanging pleasantries and an agreement to meet again or it may be that one side or the other is ready to make a move. There may be some hope, although there didn't seem to be any when they met earlier this week, he said.

Barring a sudden change, both sides are standing pat. Commenting on the Tuesday meeting, James F. Simons, KFWB station manager, said: "KFWB reaffirmed its position regarding AFTRA's refusal to agree to our offer and that's where we left it. We stated that we are still willing to listen to any reasonable approach to the problem."

Prior to the strike, AFTRA asked for an increase in minimum scale from $155 to $255. (The comment was made that the requested increase would actually amount to only $52, since KFWB has been paying $173 a week to its news announcers, but the station replied that one full-time and several part-time newsmen were working at the base rate.)

KFWB countered with an offer to raise the minimum from $155 to $170 a week for newly employed personnel the first year, to $177.50 the second year and to $185 the third year of a new three-year contract. For personnel employed at the station before the strike, KFWB proposed a minimum of $195 the first year, $200 the second and $207.50 the third.

AFTRA rejected this as a "dual pay scale for the same job classification," contrary to union policy.

NAB fall conferences to be one-day affairs

NAB's fall conferences this year will be one-day meetings, open to non-members as well as members.

The eight meetings will consist of a morning report by the NAB staff to members on what they are doing, a noon report by NAB President LeRoy Collins, and an afternoon session answering questions from broadcasters.

The one-day meetings (Closed Circuit, July 17) will make it more economical for members and for the NAB, Gov. Collins stated in an announcement to members, and will also make it possible for more broadcasters to attend. The schedule:

Cold premeditated murder, or self-defense? WFAA-820 listeners were amazed at the stark, real-life, on-the-air confession from the lips of the accused man. Once again "Southwest Central" newsmen had scored a beat by taping an interview from just outside the jail cell. But WFAA-820 is where the unusual usually happens. And that's why it's fast becoming the most listened-to spot on the dial... with more reports first and first hand!

You can reach this huge news-conscious highly informed audience almost any time of day. Call your Petryman now for the full story on "Southwest Central"—home of electronic journalism for all North Texas!

"Yes, I killed him, but..."
WHAT IS A TELEVISION NETWORK?

Pulse study shows half the viewing public doesn't know

Network television with all its ramifications remains a mystery to many viewers, a Pulse survey of the Philadelphia metropolitan area released last week revealed.

Some results of the survey:
- Almost one of five viewers (19%) never heard of a television network.
- Almost one of four (23%) were unable to name any of the three networks.
- Only half (51.2%) could give an acceptable meaning for the term "television network."
- 73% could name CBS, 72% could name NBC and 67% could name ABC.
- ABC is associated mainly with westerns (32%) and adventure-detective shows (25%) and is identified more closely with sports than are CBS and NBC.
- NBC is associated mainly with news (29%), quiz shows (22%) and musical-variety (16%).
- CBS associations are more widely scattered over program types. Soap operas and serials (22%); musical-variety (15%).
- NBC got the viewers' votes for presenting the "best tv programs" and the "best news and special events programs."
- Only 61% correctly identified WFLI-TV with ABC; 65%, WRCV-TV with NBC; 71%, WCAU-TV with CBS. See detailed charts below:

MEANING OF TERM "TELEVISION NETWORK"

| Stations linked together across the country | 19.4% |

NETWORK WITH BEST TELEVISION PROGRAMS

Question: In your opinion, which of these three television networks—if any—provides the best television programs?

| CBS | 25.8% | ABC | 20.6% |
| NBC | 28.0% | No Preference | 25.6% |

NETWORK PREFERRED FOR NEWS AND SPECIAL EVENTS

Question: Which of the three—if any—does the best job when it comes to news programs or televising special events?

| CBS | 26.0% | ABC | 7.8% |
| NBC | 42.6% | No Preference | 23.6% |

ABC-TV will video tape symposium for the record

The freedom of broadcasting symposium at the Northwestern U. School of Law in Chicago on Thursday and Friday will be video taped by ABC-TV "for the record" and for possible subsequent use on the air.

In reaching this decision the network was motivated by the thought that the two-day symposium may emerge as an historic encounter between "the regulators and the regulated" in broadcasting (Closed Circuit, July 24). FCC Chairman Newton Minow and NAB President LeRoy Collins will appear as speakers at one public session.

In addition to taping the entire symposium, ABC-TV is installing cameras and monitors to carry the proceedings of closed or limited-audience sessions to newsmen and invited guests in nearby rooms. The operation is under the direction of Bill Kusack, head of the ABC-TV engineering department in Chicago.

Catv sold for $550,000

The sale of an Oil City, Pa., community antenna system, by NWL Corp. to National Trans-Video Corp. for $550,000 was announced last week. The Oil City catv serves 4,200 subscribers and will be managed by Systems Management Co., Denver, Colo. National Trans-Video is principally owned by C. A. Sammons, Dallas, Tex., and owns 15 catv systems in Pennsylvania, Massachusetts, New York, Vermont, New Hampshire, Virginia, Arkansas and Oregon. The broker in the Oil City transaction was Daniels & Assoc.

BROADCASTING, July 31, 1961
Surprising how trends can be stopped

Maybe they're right. Maybe there is nothing harder to stop than a trend. Maybe. But we stopped one... cold!

In Minneapolis-St. Paul, the TV viewing trend was down. All three network affiliates (called X, Y & Z) played to fewer people in June than in May. A lot fewer.

Not so at WTCN, the Channel 11 independent.

Audience was up. 20% more viewers over-all, a whopping 37% more viewers in the big-time slot from 6 P.M.-10 P.M. Slice it any way you want. Hours per day, days per week... WTCN spells UP.

And we've just begun to fight. From now on, things get bigger and better. If the Twin Cities figure in your marketing plans, climb aboard. Call the man from Katz and ask him to bring along the June ARB book. And the May book, too. Nielsen, if you prefer. Check the trend, the new Channel 11 trend in the Twins.

TAPE COMMERCIALS COVER U.S.A. ON NETS OR SPOT on SCOTCH® BRAND Live-Action Video Tape!

Today your TV commercials on "SCOTCH" Brand Video Tape can reach the TV families in 126 top market areas . . . over 90% of the potential market for any product! In the 1960-61 season, "live-action" taped commercials have sold successfully in practically every product category, e.g., foods, coffee, beer, toothpaste, cosmetics, soaps and cleansers, automobiles, gasoline, appliances, etc.

Network and spot coverage are both excellent. The three major networks have complete tape facilities that enable your message to reach every TV family within range of a net's 150 to 200 affiliated stations. Spot coverage is virtually national and grows every day. All stations equipped for tape, located in major cities from coast to coast, will deliver your video-taped commercial. Altogether they cover more than 90% of all TV homes on either a regional or national campaign basis.

Today's trend to tape and resulting volume of use has reduced the cost of "SCOTCH" Brand Video Tape significantly since its introduction, and has lowered the cost of making duplicate prints. Also, many "extras" such as station charges for roll-in or playback of tape have been virtually eliminated.

Any way you look at it . . . the comprehensive market coverage, the superior picture quality, the production advantages such as immediate playback and no processing (even for color!) . . . today's video-taped commercial is a better advertising buy than ever! Why not ask your local video tape producer to bid on your next storyboard? No cost or obligation.

...WHERE RESEARCH IS THE KEY TO TOMORROW
THERE'S NO TURNING BACK FOR TV
Competitors' troubles only beginning, says Pinkham

A prominent advertising agency executive bearded a group of magazine zealots in their den last week and left them speechless.

Richard A. R. Pinkham, senior vice president in charge of broadcast operations, Ted Bates & Co., addressed a luncheon meeting of the Magazine Promotion Group in New York on the subject, "Where Is Television Headed?" and his unequivocal answer to the rhetorical question was, "Why, up, of course." The reasons for Mr. Pinkham's optimism: tv "is free, it amuseds and it sells merchandise."

In terse, hard-hitting terms, Mr. Pinkham alerted the magazine executives to tv's coming technical advances. He predicted the 1970s will find many homes equipped "with a veritable communications center in the living room," offering "more in performance and less in size," and featuring three-dimensional, four-color, eight-square-foot tv pictures.

"You think you've got competition now?" he asked. "It's going to get worse. And I would suggest that if you have lulled yourself into a trance of comfortable security because of the heavy barrage of criticism that has been leveled at television lately, you need psychiatric help."

Discussing the current state of tv programming, Mr. Pinkham said its quality may not be "defensible," but "it is explicable." He maintained that tv is so much a part of "our hedonistic way of life," that no matter how bad it gets, people will still watch it and "it will still remain a superb advertising medium."

New York agencies try Tidewater for size

Norfolk-Tidewater, Va., is the nation's 29th market, and when agencies rank Norfolk-Portsmouth as 46th and Newport News-Hampton as 120th, they are missing one of the most important markets in the country. So claim Norfolk's three tv stations—WVEC-TV, WTAR-TV and WAVY-TV—which brought a jointly-produced film presentation to New York recently to set the record straight among ad agencies. The stations were hosts to more than 25 media and research personnel, representing 18 agencies at a luncheon.

The 15-minute film, produced to clear up some often misunderstood features of the quad-market area, portrays the compactness of the market and emphasizes that the cities of Norfolk-Portsmouth and Newport News-Hampton are all within a 20-mile radius. Their combined population, the film points out, exceeds that of Boston, Pittsburgh or Milwaukee.

Among those attending the presentation: (1 to r): Bill Gietz, of WTAR-TV; Carol Hecht, Compton Adv.; Jerry Baldwin, Young & Rubicam; John Harris, Ogilvy, Benson & Mather, and Harrol Brauer, of WVEC-TV.

Twelve copies of the film have been distributed among the stations' reps for presentations to agencies and advertisers throughout the country. The reps are: Katz (WVEC-TV), Petry (WTAR-TV) and H-R (WAVY-TV).

Therapy • The Bates executive said FCC Chairman Newton Minow's "vast wasteland" speech may have been just the shock therapy that tv needs. He claimed the medium is suffering most from putting too many "program eggs into the Hollywood basket." Television, he charged, has satisfied the insatiable appetite of programming schedules by abdicating to Hollywood at the expense of live experimenting with programming.

The answer for tv programming, he feels, was indicated in the success of last season's The Flintstones and Candid Camera. Both programs were successful, he indicated, because they dared to be different, were experimental, and had imagination and courage. "Television," he said, "must stop being Hollywood so much and become television again... an entity of its own... doing the things it does best."

Mr. Pinkham believes that by next year "the pendulum should start to swing back toward live, experimental, fresh programming," with ample room for "young idea men" in the industry.

The agency programming veteran, who once headed NBC-TV's programming department under Sylvester (Pat) Weaver, had some final, unrelenting words for his magazine-minded listeners: "Don't overestimate our troubles, gentlemen. If television is a sick medium, it is just a slight head cold—not terminal cancer."

After the speech, the audience was invited to participate in a question-and-answer session. But the magazine men were apparently left speechless. The luncheon ended without a single question to Mr. Pinkham. The magazine group is made up of promotion writers from various consumer magazines. Their function is to tell the public of the importance of magazines in the American way of life.

Mutual's shy just one in top 50 U.S. markets

Mutual's signing of KLIV San Jose, Calif., and WRVM Rochester, N.Y., gives the network affiliations in all but one of the nation's top 50 markets. Dayton, Ohio, is missing from the MBS station lineup, but coverage there is achieved through Mutual's Columbus affiliate, the network claims.

KLIV, a 1-kw outlet at 1590 kc but granted an increase to 5 kw by the FCC, began airing Mutual service July 23. The station is owned and operated by Cal-Radio Inc., of which Riley R. Gibson is president and general manager. WRVM, owned and operated by State Broadcasting Co. (Frank W. Miller Jr., president), operates with 250 w at 680 kc.

Charles W. Godwin, MBS stations
DAY AND NIGHT... an average of 4 out of every 10 Atlanta radio listeners are tuned to WSB. The latest Nielsen report shows a 43.5% average quarter-hour share of Atlanta area audience (March - April, '61.) Four times as many people listen to WSB Radio as to any other station in metropolitan Atlanta. (And, there are 16 stations here, too.) WSB's consistent dominance of Atlanta radio results in consistent sales for WSB advertisers!
Broadcasters injured in Philadelphia rioting

Philadelphia, the city of brotherly love, turned into a hotbed of chaos last Monday (July 24) in protest against Mayor Richardson Dilworth's proposed overnight parking fee, leaving three injured newsmen attempting on-the-spot coverage.

WRCV reporter Herb Dundrick was hit in the face with a dirt clot, resulting in eye injuries while his soundman Don Bustard suffered a cut hand and leg bruises. Seven others of the nine-man news team escaped injury at the hands of the angry mob.

Jim Klash, a newswoman for WPEN, was splattered by thrown eggs and fruit and was hit on the head with a rock, causing a mild concussion which required hospital treatment.

In another incident, WRCV newsroom assistant Ed Lain was trapped in the station's news station wagon by a mob which rocked the car back and forth violently, shattered windows and tore off chrome strips, windshield wipers and short wave radio antenna. He finally managed to drive off slowly, virtually backing the rioters away.

WRCV, which aired a tape recording of the stormy session from 9:05 to 10:00 p.m., had planned to present the entire two-hour meeting but was foiled when its broadcast lines were ripped out. Portions of WRCV-TV's film sequences were shown on NBC-TV's Today Show Tuesday morning.

Changing hands

ANNOUNCED • The following sales of station interests were reported last week, subject to FCC approval:

• WDBF Delray Beach, Fla.: Sold by Boca Raton Bible Conference to Dr. Roscoe R. Miller, Fort Lauderdale, Fla., for $350,000. WDBF is a 5 kw daytimer on 1420 kc. Broker was Associated Media Brokers, Fort Lauderdale, Fla.

• WEOA Evansville, Ind.: Sold by Edwin G. Richter Jr. and associates to J. B. Fuqua for $75,000 and $48,000 not to compete. Mr. Fuqua owns WJBF-TV Augusta, Ga. WEOA is a 250 w fulltimer on 1400 kc.

• WEIC Charleston, Ill.: Sold by Jack G. and Betty Jane Owens to William L. Kepper, Philip A. Thompson and Marvin Homer for $105,000. Messrs. Kepper and Thompson are on the sales staff of WBBM Chicago. Mr. Homer is in the furniture business. Station is 1 kw daytimer on 1270 kc. Transaction was handled by Hamilton-Landis & Assoc.

• WXXX Hattiesburg, Miss.: Sold by David A. Matison to George Mooney, Abe Waldauer, F. E. Walker and D. F. Prince for $100,000. Mr. Mooney owns WKGN Knoxville, Tenn.; Mr. Waldauer is a Memphis attorney with interests in radio properties; Mr. Walker is manager of WXXX and Mr. Prince is a Washington communications attorney. Station is a 1 kw daytimer on 1310 kc. Broker was Hamilton-Landis & Assoc.

• WTKM Hartford, Wis.: Sold by John Shinnners (Hartford Times-Press), John Cleary and others to Ralph Schewe and Galen Brunner for $63,000. Mr. Schewe is an appliance dealer; Mr. Brunner has been in radio work in Wisconsin and Minnesota in various capacities. WTKM is a 500 w daytimer on 1540 kc. Handling the transaction was Hamilton-Landis & Assoc.

• KDUO (FM) Riverside, Calif.: Sold by Southeastern Conference of Seventh Day Adventists to Howard L. Bullis, Los Angeles advertising executive, and John P. Hearne, Hollywood attorney, for $60,000. Messrs. Bullis and Hearne are also owners of KFSM San Bernar-dino, KDEO El Cajon (San Diego) and KAFY Bakersfield, all California. KDUO operates on 97.5 mc with 72
Chairman Newton N. Minow and Commissioner Robert E. Lee voted to send a McFarland letter; Commissioner Robert T. Bartley dissented.

**$9.65 million sale of KMBC**

METROMEDIA WINS AWARD DESPITE SPLIT VOTE

A $104 million station sale transaction was approved by the FCC last week as it ground through an above-average number of assignments and transfers in its penultimate meeting before the August recess (see CHANGING HANDS, this page).

The commission approved the sale of KMBC-AM-TV Kansas City, KMOS-TV Sedalia (Mo.) and KFRM Concordia (Kan.) to Metropolitan Broadcasting (Metromedia Inc.).

Metropolitan, which paid Cook Broadcasting $9.65 million for the Kansas City properties, is selling the Sedalia station to a group headed by William H. Weldon, former senior executive of the John Blair station representative firm, for $200,000 for the tangible property. Cook is assigning the license to the same group without charge. Mr. Weldon's group operates KCRG-TV Jefferson City, Mo., and intends to operate KMOS-TV as a satellite of that station.

The purchase of KFRM by Metropolitan for $400,000 is scheduled to go a second step when Metropolitan sells the Kansas station to N. E. Knightinger and associates for $201,000.

**Opposition** — The transfers did not go through without dissent. In the Kansas City transaction, Chairman Newton N. Minow and Commissioners Robert T. Bartley and John S. Cross voted for a hearing. In the Concordia and Sedalia arrangements, Chairman Minow and Commissioner Cross voted for a hearing; Commissioner Robert T. Bartley did not participate.

The Kansas City grant was conditioned on the outcome of the hearing into ex parte charges in the Orlando ch. 9 case. An initial decision from the hearing examiner is awaited.

The Concordia deal included a grant of a waiver permitting KFRM to continue to operate with its transmitter 10 miles south of that city and its main studio in Kansas City, 170 miles away. The commission said that when a continuation of this waiver is requested

---

**EXCEPTIONAL QUALITY BUYS**

Northwest—Fulltime radio station operating in black with fixed assets, including land & building, over $80,000.00. Priced at less than 1½ times gross. Total price $95,000.00 with 29% down and balance over ten years.

New England—1000 watt daytimer with FM. Crossing $130,000.00, owner-operator potential, cash flow—very lucrative. Priced at $200,000.00 on terms.

kw. Broker was Wilt Gunzendorfer & Assoc.

**APPROVED** — The following transfers of station interests were among those approved by the FCC last week (for other commission activities see FOR THE RECORD, page 80).

- KMBC-AM-TV Kansas City, Mo.; KFRM Concordia, Kan.; KMOS-TV Sedalia, Mo.; sold by Cook Broadcasting Co. to Metropolitan Broadcasting (Metromedia Inc.), which in turn is selling KFRM and KMOS-TV to other parties (see story this page).
- WBOC-AM-TV Salisbury, Md.; sold by John W. Downing, Charles J. Triutt and associates to A. S. Abell Co. for $1,211,246 and agreement not to compete. Transaction includes 80% interest in community antenna system in Salisbury. The A. S. Abell Co. (Baltimore Sunpapers) is licensee of WMAR-TV Baltimore.
- KPRO Riverside, KREO Indio, KROP Brawley, KYOR Blythe, all California: sold by Morris Pfalzer and Sherrill C. Corwin to Tom E. Foster, Tolbert Foster, W. E. Dyche Jr., John Blake and Edgar B. Younger for $450,000. Messrs. Foster and Dyche own KGUN Tucson, Ariz., and KDET Center, Tex. Commission notified buyers that it intends to review overlap and concentration questions when license renewals are submitted or before then if applications for increased powers are filed. Chairman Newton N. Minow dissented; Commissioner Robert T. Bartley did not participate.
- KSEL Lubbock, Tex.; sold by David R. Worley and Gerald H. Sanders to R. B. McAlister and associates for $450,000. Mr. McAlister owns KZNN Littlefield (see below) and KBYG Big Spring, both Texas.
- WKIB New Britain, Conn.; sold by Sheldon Smerling to Louis A. Sodokoff and group for $270,000.
- KZNN Littlefield, Tex.; sold by R. B. McAlister to Gerald H. Sanders for $125,000, conditioned that sale not be consummated until Mr. Sanders disposes of his interest in KSEL Lubbock, Tex. (see above).
- WSOK Savannah, Ga.; sold by Albert T. and Elizabeth B. Fisher Jr. and James J. Duffy to Joe Speidel III for $100,000. Mr. Speidel controls WWBD Bamberg, WPAL Charleston, WOIC Columbia and WYNN Florence, all South Carolina.
- KBAY-FM San Francisco, Calif.; sold by Sherrill C. Corwin to International Good Music Inc. for $100,000. International Good Music is headed by Rogan Jones and is the licensee of fm stations KGMI (FM) Bellingham, KGJ (FM) Seattle, both Washington; KGMG (FM) Portland, Ore.; KFMU (FM) Los Angeles and KFMW (FM) San Bernardino, both California.
Triangle executives meet, map course

Present and future plans regarding all aspects of The Triangle Stations (WFIL-AM-FM-TV Philadelphia; WNBK-AM-FM-TV Birmingham, N.Y.; WNHC-AM-FM-TV New Haven, Conn.; KFRE-AM-TV and KRFT (FM) Fresno, Calif.; WFBG-AM-TV Altoona, Pa.; WYLI-TV Lebanon, Pa.) were discussed in a three-day management conference of the firm's radio-tv division last week in Philadelphia.

Some 40 Triangle and John Blair & Co. (Triangle's representative firm) executives attended the session presided over by Roger W. Clipp, vice president, Radio & Television Div., Triangle Publications. Of major interest at the session was the time sale discussion (see photo above) composed of (1 to r) Arthur H. McCoy, executive vice president, John Blair Co.; Edward H. Benedict, national sales director, The Triangle Stations; John Blair, president, John Blair & Co.; Mr. Clipp; Kenneth W. Stowman, general sales manager, WFIL-AM-FM-TV Philadelphia; and Edward P. Shurick, executive vp, Blair-TV.

again, it will have to be supported with a detailed showing. The commission answered a request by WIBW Topeka that this application be set for hearing by advising the Topeka station of the conditions.

McLendons buy Chicago station for $2 million

Sale of WGEC Chicago for a record $2 million in cash—the second highest sum for a Chicago radio station—was announced last week.

The 5-kw fulltime independent (on 1390 kc) is being bought by Gordon and B. R. McLendon, who announced also they are seeking a buyer for WAKY Louisville, Ky.

Only two weeks ago the McLendons bought WBNY Buffalo, N. Y., which they plan to substitute for their WYSI there. They are paying $650,000 for the Buffalo outlet (CHANGING HANDS, July 24).

Other McLendon stations are KLIF-AM-FM Dallas, KILT-AM-FM Houston, KTSA San Antonio, all Texas, KEEL Shreveport, La., and KABL San Francisco, Calif.

The highest sum paid for a Chicago radio station was the $4 million paid by Westinghouse Broadcasting Co. for WIND in that city in 1956.

WGEC was founded in 1924 and has been under John A. Dyer ownership for the 35 years. In recent years it has programmed particularly for the Negro audience, in addition to foreign language specialties.

CBS rumors ‘utter nonsense’

CBS Chairman William S. Paley and President Frank Stanton dismissed as “utter nonsense” reports published last week speculating on far-reaching changes in the CBS organization.

In a one-sentence memo distributed to the CBS organization late Wednesday Messrs. Paley and Stanton used this two-word label to characterize a story published earlier that day. The story had suggested that Mr. Paley may take a cabinet-level post, that Dr. Stanton may leave for a post in government, education or public service, that the CBS Radio Network may be abandoned and that the CBS-TV network may change its sales format entirely to the so-called “magazine concept.”

In addition CBS Radio President Arthur Hull Hayes went on closed circuit to the network’s affiliates Wednesday afternoon to deny the story generally and to give assurance specifically that the radio network is not going out of business. Actually, he said, the outlook for CBS Radio has not in years been as bright as now, and promises to be brighter.

Gilmore heads AFTRA; group commends Minow

Art Gilmore of Los Angeles was elected president of the American Federation of Television & Radio Artists at the union’s annual convention in Detroit July 23. He succeeds Virginia Payne of New York.

The convention adopted a resolution praising FCC Chairman Newton N. Minow’s decision to “give a long, hard look” at applications for radio-tv station license renewals, and called upon Mr. Minow to hold public hearings in the broadcaster’s own community when requests for such hearings are made. (Broadcasting, July 24).

Media notes...

NBC affiliate to be • WEPA-TV Erie, Pa., will become an affiliate of NBC-TV on Oct. 1, according to Tom Knodle, NBC vice president for station relations. The station, now under construction, has been assigned uhf ch. 66, but applied to FCC for switch to ch. 24.

MBS signer • WCKY Cincinnati affiliated with Mutual on July 23. Mrs. Jeanette Heinzl, now president and general manager of the 50 kw outlet on 1530 kc. The present MBS affiliate, WZIP Cincinnati, changed its programming format effective the date of the changes.

BROADCASTING, July 31, 1961
New v for 11 markets, 8 will lose

COMMISSION SAYS NO NEW CITIES WILL BE CONSIDERED FOR DROP-INS

A brilliant “go” sign in deintermix-ture and vhf drop-ins was turned on by the FCC last week.

By a bare majority of one, the com-mission decided to ask for comments on rulemaking which would add a third commercial vhf channel in eight major markets and delete the single low band channel in eight intermixed markets (BROADCASTING, July 17). These cities will gain a vhf channel under the propo-sal:

Baton Rouge, La. (ch. 11); Dayton (ch. 11); Birmingham, Ala. (ch. 3); Jacksonville, Fla. (ch. 10); Knoxville, Tenn. (ch. 8); Johnstown, Pa. (ch. 8); Charlotte, N. C. (ch. 6), and Oklahoma City (ch. 5 KOCO-TV Enid, Okla.). Most if not all of the new allocations would be added at reduced mileage separations. Comments are due Oct. 2.

And the commission added, these are ALL the cities where it is prepared to consider vhf drop-ins now and in the future.

The following vhf channels would be deleted from present uhf-vhf mar-kets: Ch. 12 Erie, Pa. (WICU TV); Ch. 13 Rockford, Ill. (WREX-TV); Ch. 3 Madison, Wis. (WISC-TV); Ch. 10 Columbia, S. C. (WS-TV); Ch. 3 Hartford, Conn. (WTIC-TV); Ch. 3 Champaign, Ill. (WICA TV); Ch. 12 Binghamton, N. Y. (WNBF-TV), and Ch. 12 Montgomery, Ala. (WSFA-TV).

No announcement of the commis-sion’s decision, reached in a special meeting last Thursday, was made pending notification of the Federal Aviation Agency of the new allocations.

This was an effort by the commission to improve relations with the FAA, somewhat strained at times in the past (BROADCASTING, July 10), by giving that agency advance knowledge. It also is in line with a new FCC-FAA agreement on tall towers calling for closer liasion (BROADCASTING, July 24).

The Voters All commissioners participated in the decision to issue the deintermixturer-drop-in rulemaking, with Commissioners Rosel H. Hyde, T. A. M. Craven and John S. Cross dissenting. The majority was composed of Chairman Newton N. Minow and Commissioners Frederick W. Ford, Robert T. Bartley and Robert E. Lee.

At the same time the new comments were invited, the FCC dropped in ch. 13 to Rochester, N. Y., and finalized rulemaking which adds ch. 13 to Grand Rapids, Mich., and ch. 9 to Syracuse, N. Y.

These changes were accomplished by shifting ch. 5 from Rochester to Syra- \( \text{cuse} \) and ch. 8 from Syracuse to Roch- \( \text{ester} \), substituting ch. 9 for ch. 13 in Cadill \( \text{ac} \), Mich., ch. 6 for ch. 9 at Al- \( \text{pena} \) was moved to ch. 11 and ch. 13, WWTV (TV) Cadill \( \text{ac} \) was shifted to ch. 9. Chairman Minow dissented to this phase. In Rochester-Syracuse, Com- \( \text{missioners} \) Lee and Ford dissented. WHEN-TV Syracuse, ch. 8, was shifted to ch. 5 and WROC-TV, ch. 5, Roch- \( \text{ester} \) to ch. 8.

The FCC has had various phases of deintermixture under consideration for several years trying to reach a solu- \( \text{tion} \) on the uhf-vhf problem. Last week’s action is a culmination of a January 1960 rulemaking seeking comments on a proposal to break down mileage separations to permit vhf drop-ins (BROADCASTING, Oct. 3, 1960, Jan. 9). Congress has been highly critical of the FCC’s failure to reach a decision, “whether it’s right or wrong,” as one senator put it.

The Criteria Among criteria listed by the commission as reasons for select-ing the 8 cities to get a third vhf: (1) all are in the top 75 markets; (2) two commercial stations already are in operation in each; (3) a minimal dis-location of existing stations will be caused; (4) all meet international agree- \( \text{ments} \), and (5) reduced separations will be held to 120 miles for co-channel as-signments (presently 170 and 190) and 40 miles for adjacent channels (presently 60).

As part of its plan, the commission will continue its all-out push to en- \( \text{sure} \) uhf development. This will in- \( \text{clude} \) such facets as all-channel legisla- \( \text{tion} \); encouragement of vhf assign- \( \text{ments} \) for both commercial and educa-tional operators and opening of a uhf preserve on a first come, first served basis.

ABC, which has been striving for years for a third v in principal mar-kets, stands to benefit most from the commission’s proposal. There still are several cities where the network does not have a full-time primary affiliate be-cause of the allocation shortage.

The Vital Statistics Each of the eight cities losing vhf channels currently have uhf stations in operation. This is the lineup:

Madison — Losing ch. 3, has WKOW-TV (ch. 27), WNMTV (TV) (ch. 33) and educational WHA-TV (ch. 21).

Rockford — Losing ch. 13, has WTVO (TV) (ch. 39).

Binghamton — Losing ch. 10, has WNOX-TV (ch. 19).

Bing-hamton — Losing ch. 12, has WINR-TV (ch. 40).

Hartford — Losing ch. 3, has WHCT (TV) (ch. 18), slated for pay tv test, WHNB-TV (ch. 30) (New Britain), plus a New Haven uhf and Waterbury uhf.

Champaign — Losing ch. 3, has edu-ca-tional WILL-TV (ch. 12) and WCHU (TV) (ch. 33), plus other uhfs in the immediate area.

Erie — Losing ch. 12, has WSEE (TV) ch. 35.

GOVERNMENT

FCC inquiry involves Mrs. Lyndon Johnson

Is the wife of the vice president of the U. S. attempting to gain an “undue concentration of control” in Texas tv stations?

That is one of the questions the FCC said it wants answered last week in setting for hearing the applica-tion of KWTX-TV Waco to increase power from 107 kw to 225 kw and increase antenna height from 520 to 1,140 feet.

The LBJ Co. (of which Mrs. Lyndon B. [Lady Bird] Johnson, wife of the vice president is board chairman and 60% owner) owns 29% of KWTX-TV. LBJ Co. also owns KTBC-TV Austin and KRGV-TV Weslaco. KWTX-TV in turn owns 50% of KBTX-TV Bryan and 75% of KXII (TV) Ardmore, Okla.

The commission ordered the hear-ing to determine whether KTBC-TV and KWTX-TV are under com-mon control, to the extent of over-lap between the two stations if the KWTX-TV application is granted and whether the proposed Waco power increase and taller tower would result in undue concentration of control.

48 BROADCASTING, July 31, 1961
WRCV-TV was honored as America's "outstanding television station." It received the coveted Gold Bell Award of the Catholic Broadcaster's Association. This is the first Gold Bell Award ever presented to a Philadelphia station. Announcing the honor, the awards committee said: "In both quantity and quality of broadcast WRCV-TV has performed exceptional service during the past year. Throughout a wide range of programming, WRCV-TV has shown itself truly desirous of assisting Catholic Broadcasters in every way possible." And in every way possible, from pure entertainment to public service, WRCV-TV serves Philadelphia with award calibre television programming.
Committee restores FCC budget cut

The Senate Appropriations Committee last week voted to grant the FCC every cent of the $12,525,000 it is seeking for its 1962 budget.

The action, which looks to restoration of the $125,000 cut by the House, was taken in connection with committee approval of an Independent Offices appropriations bill totalling $9,098,614,-500.

This is $694,516,500 more than the House approved for the independent agencies, boards and commissions that are lumped together in the Independent Offices category. Any difference between the House and Senate figures remaining after upper chamber action expected this week, will have to be settled in conference.

The report accompanying the Independent Offices bill was submitted by Sen. Warren G. Magnuson (D-Wash.), who is chairman of the Independent Offices Subcommittee as well as the Commerce Committee, which has jurisdiction over the regulatory agencies.

The report said the proposed $125,000 cut in the FCC budget for salaries and expenses would lead to increased workloads without reducing any of the case backlogs.

The committee recommended that the commission be given an additional six months in which to use the $2 million granted it last year to conduct a uhf television study. The present deadline is July 1, 1962.

The Federal Trade Commission was treated well by the committee, too. The report recommended that it be given its full budget request of $10,690,000. This is $690,000 more than the House voted.

Akron slighted for vhf, WAKR-TV charges to FCC

Noting reports in the trade press of imminent vhf drop-in considerations by the FCC (Broadcasting, July 17), WAKR-TV (ch. 49) Akron, Ohio, renewed requests that a vhf be assigned to that city.

WAKR-TV said Akron was not included in the published reports of these cities which would get a vhf and maintained the city should be given the “highest priority.” The station said that “certain large interests, for purposes of their own, would like to consider Akron as being served by the Cleveland [vhf] stations.” All authoritative sources, including the U. S. Census, list Akron and Cleveland as entirely separate communities, WAKR-TV said.

Foley Square, again

The FCC’s long-running investigation of television network broadcasting practices (Broadcasting, July 3) will resume in New York Sept. 26 (Closed Circuit, July 24), the commission announced last week.

Sharing the witness spotlight before Chief Hearing Examiner James D. Cunningham upon the resumption of the hearing will be numerous blue chip advertisers, a list of which the commission will release at a later date. Key point of the probe will be advertising’s relationship to the networks.

The station said it has lost money each year it has operated and that it cannot continue to compete against the vhf competition from Cleveland. Akron has not received “fair, efficient and equitable” allocations treatment as required by Sec. 307 (b) of the Communications Act, WAKR-TV maintained.

Commission tightens local notice requirements

The FCC moved last week to tighten its rules requiring applicants to give local notice of their filings or designations for hearing, by amending Secs. 1.359 and 1.362. The new rules also are designed to help eliminate past confusion on what is required of stations. They provide:

- Publication: (once a week for three weeks) can be made in a weekly newspaper published in the community if it has no daily newspaper.
- If the application involves the only operating station of its kind in the community, notice can be accomplished solely by broadcasting (at least once daily for four days) with no publication required.
- Where broadcast announcements are permitted or required they are to be made between 7 p.m. and 10 p.m. on television stations, and between 7 a.m. and 10 a.m. on radio.
- In the case of notices relating to the filing or designation for hearing of renewal applications, additional statements are required to inform the public that those desiring to do so can write to the commission to call its attention to facts for consideration in determining whether a grant of an application would serve the public interest.

Commissioners Rosel H. Hyde, Frederick W. Ford and John S. Cross each dissented in part.

Complete text will appear in next week’s For The Record.

FCC would combine STLs

The FCC has invited comments on its proposal to make rules to combine am, fm and tv (aural) studio-transmitter links into one station through the use of improved multiplex techniques. The FCC thinks this can conserve spectrum space without sacrificing aural quality.

The FCC proposal also would permit a tv STL to carry one or more aural program circuits used by the same licensee for am or fm, would combine fm and tv (aural) intercity relay circuits into one category to which am would be added, and would provide for operational communications for use by stations or fm background music transmission.

Antenna notification asked

Applicants who seek FCC grants for nonbroadcast land radio stations from now on will be queried on whether they’ve notified the Federal Aviation Agency if they plan an antenna more than 20 feet high. The FCC said last week it’s asking the information as a step in implementing discussions with the FAA for coordinated handling of antenna construction.

FCC questions Estes’ character

SAYS HE COMPELLED EMPLOYEES TO VIOLATE RULES

Edwin H. Estes, licensee of WMOZ Mobile, Ala., and WPFA Pensacola, Fla., was accused by the FCC last week of compelling employees to violate commission rules and of making forged, false and misleading statements to the agency.

Consequently, the commission set the WMOZ renewal application for hearing and instituted license revocation proceedings against WPFA. A combined hearing will be held in Mobile on a date to be announced.

The commission said consideration of the renewal application has raised “serious questions” as to Mr. Estes character qualifications because it appears: (1) that false and forged program logs were knowingly and willingly submitted with the WMOZ application; (2) gross revenues in the annual financial report contained misrepresentations; (3) the renewal application contained false and misleading information on programming, particularly with respect to news and public affairs programs which were not in fact broadcast, and (4) that Mr. Estes compelled employees to violate FCC rules under a threat of being fired if they refused to comply.
RERUN ON BOSTON CH.5

Three applicants agree on one thing: each thinks it should have the grant.

Battle lines were drawn once more on the long-bloodied terrain of Boston ch. 5 last week. Each of the veterans—applicants WHDH Inc., Greater Boston TV Corp. and Massachusetts Bay Telecasters—held firmly that it alone should receive the victory.

The FCC Broadcast Bureau, a non-combatant in the hall of findings showered on the commission last week, claimed two of the participants had been dishonored in the course of the four-year war and should not even be considered. The two, WHDH and MBT, were besmirched by allegations of off-the-record approaches to former FCC Chairman George C. McConnaughey.

Said the bureau: “WHDH and Massachusetts Bay Telecasters having sustained determinative comparative disadvantages in this proceeding, Greater Boston” should have the grant for the channel. The bureau cited contacts of Robert Choate, WHDH principal, and Forrester A. Clark, vice president and director of MBT, with Chairman McConnaughey as the disqualifying taints. The bureau called these “attempts” to influence a commissioner outside the merits of the direct case and claimed that attempts should be as disqualifying as success.

WHDH claimed it was clearly entitled to preference on the original hearing record and further added that the FCC’s July 14, 1960 decision re-opening the case in light of ex parte considerations does not attach to WHDH an onus which overcomes the preference so clearly established in the hearing record. It charged MBT with attempts to influence the FCC more heinous than its own and in addition to the Clark-McConnaughey entente, detailed an alleged letter from Gen. Robert Cutler, an aide of Gen. Eisenhower, to Sherman Adams, which (WHDH claimed) made a blatant political plea for preference. The fact that Mr. Adams did not forward the letter to the FCC does not alleviate MBT of its attempt to coerce the FCC through the White House, MBT maintained.

As for GBT—WHDH referred to that company’s “lack of candor” in not revealing in its application that Michael Henry, vice president and general manager, had been disbarred in Missouri some 15 years prior. The FCC, in its original decision, had chided GBT for this omission, but did not find it a disqualifying factor.

WHDH also claimed that GBT was no longer the same applicant as originally considered because Richard Maguire, one of 36 stockholders had sold 2.77% to another stockholder ( Broadcasting, July 24).

GBT’s Retort • Greater Boston held, much as had the Broadcast Bureau, that its two rivals should be summarily disqualified. Aside from that, it said, it was the superior in the fields of local residence, civic participation, diversification of occupations of principals, experience, integration of ownership with management, programming and studios and equipment.

MBT said of the ex parte charges against it “Mr. Clark’s only infraction was that which was but the least of Mr. Choate’s infractions—seeking to demonstrate the responsible nature of the MBT group.”

MBT also stated that it is far superior to WHDH in areas of local residence, civic participation and diversification of occupations. MBT further claimed its superiority to GBT in many of these fields. The MBT also criticized WHDH for maintaining an “anti-competitive” policy and tending toward massing of media interests in the Boston area.

MBT also boasted it would provide superior programming to the others by utilizing the talents of several of its talented stockholders, such as Boston Pops conductor Arthur Fiedler and Atlantic Monthly editor Edward Weeks.

Machine age at the FCC?

A wonderful system whereby the FCC can dispose of the computing aspects of engineering data and also keep a running up-to-date file of ownerships and frequencies by means of an “intelligence center,” is described to FCC Executive Officer Robert Cox (c) by Gerald Galler, (1) who has been working on the project. Jasper Hand, another architect of the FCC automation scheme, (r) stands by approvingly.

The chart was used to “sell” first the Broadcast Bureau and then the commissioners on the job the computers could do in cutting the FCC’s routine backlog. Target date for the first installation is July 1965.

Mr. Galler explained that the printer and plotter units of the proposed computer would expedite material mainly in three areas—radiation patterns, contour predictions and channel studies.

The machines would enable an engineer to spend “his time and talent” in analyzing applications instead of on the menial task of computing the figures to fill out the patterns and studies.

Mr. Cox declined to discuss cost since the computers were being set out for bids to 14 leading electronic companies, but he said that some comparable systems in Washington are currently rented for $20,000-$25,000 per month. (Computer systems are customarily rented rather than sold outright and the commission gave indication that this was the basis upon which it anticipates bargaining.)
**FCC attorney dies after heart attack**

James T. Brennan, 46, attorney in the general counsel’s office of the FCC and prominent in rehearing of the tv ex parte cases, died of a heart attack last Tuesday (July 25). He was on a family vacation at Rehoboth Beach, Del., and collapsed while swimming.

On the FCC’s staff since 1957, Mr. Brennan served as a commission counsel in the re-opened Miami chs. 10 and 7, Boston ch. 5, St. Louis ch. 2 and the recently concluded Orlando ch. 9 ex parte cases. He was in the process of helping prepare the government’s case in the Jacksonville ch. 12 hearing, scheduled to begin Sept. 6.

Last December, the commission commended Mr. Brennan, along with Ed Holtz and Joel Rosenbloom (other FCC counsel in all except the Orlando case), for “sustained superior performance.”

Mr. Brennan, a native of Wilkes-Barre, Pa., is survived by his wife, Florence, a son and a daughter. Final services were held Friday.

---

**Its old tower sold, WOOD-TV tells FCC**

WOOD-TV Grand Rapids, Mich., told the FCC last week it no longer owns or has any control whatever over its old tv tower, being dismantled by RCA. Answering charges by WILX-TV Onandaga, its licensee, that WOOD-TV is attempting to circumvent due process (Broadcasting, July 24), the Grand Rapids station said the underlying premise of the WILX-TV charge is “patently false.”

The Time-Life station first received permission to move its tower-transmitter to a new site in 1959. WILX-TV protested to the FCC and the court and the latter remanded the case to the former in a blistering decision two weeks ago (Broadcasting, July 17). WOOD-TV said one condition of the grant was that the old tower be dismantled within 90 days after the station begins operation from its new site; this period expires next month. WOOD-TV at present is operating from the new site under special temporary authority.

WOOD-TV said it sold the tower May 31 “in good faith” to RCA which in turn sold it to WPBN-TV Traverse City, Mich. The station charged that the latest WILX-TV move is an effort to secure a stay of the FCC grant. Such a stay already has been denied by both the commission and the court.

---

**Commission upholds GE, tells MDC to cool heels**

Multiplex Development Corp., New York, was told by the FCC last week it had little reason to get hot under the collar about the fee charged by General Electric Co. for attendance at a GE seminar on multiplex stereo broadcasting last May 15, at Utica, N. Y.

MDC before the seminar complained to the FCC that GE reportedly planned to charge a $1,000 fee against future royalties for GE fm multiplex stereo equipment designs and that this amounted to “extortion” (Equipment & Engineering, May 15). The company also was worried lest the GE-Zenith stereo system result in interference to fm background music broadcasting.

The FCC said last week that the GE fee was only $250, not $1,000, for MDC, and that GE feels no obligation to give free training to other companies to do what it learned at considerable expense.

The FCC thought the GE-Zenith royalties would be “reasonable,” but said MDC should feel free to develop its own circuitry as long as equipment performance meets FCC standards. The FCC cares little about design, so long as the equipment works as specified, MDC was told.

Cross-talk interference should be no trouble in properly designed equipment, the FCC said, but since any interference to a licensee would be “self-induced,” the licensee has only to choose between multiplex stereo or background music.

---

**KRLA, Bureau differ on examiner’s stand**

The Broadcast Bureau and KRLA Los Angeles took conflicting views in exceptions filed Friday, July 21 to an initial decision recommending that KRLA be given a one-year license renewal (Broadcasting, April 24). The bureau repeated its earlier contention that the license should not be renewed for any period and, while KRLA expressed willingness to accept a short renewal, the station took strong exceptions to most of Chief Hearing Examiner James D. Cunningham’s conclusions.

Most of the bureau’s proposed findings were incorporated into the initial decision, the Broadcast Bureau said. “We urge that these findings are irreconcilable” with the ultimate conclusion that KRLA’s license should be renewed. The commission staff repeated the charge that the licensee, Eleven-Ten Broadcasting Corp., had been guilty of bad faith in programming, fraud in contests and an unauthorized transfer of control.

KRLA did not except to the ultimate conclusion of the examiner—recommending a one-year renewal—but the licensee did submit 135 exceptions to findings plus 52 paragraphs on objections of the stations. The decision was based on “interpretation and selection of the evidence which was prejudicially unfavorable to the applicant,” KRLA stated.

In spite of this, the station said, the examiner still correctly found that there had been no unauthorized transfer and no evidence that KRLA program proposals were not made in good faith. KRLA said it would accept a short-term license “as an opportunity to demonstrate its ability to render a responsible and meritorious service.”

**Governor told to go through FCC channels**

When the governor of Maine strongly urged FCC Chairman Newton N. Minow to cooperate and allocate certain Maine channels for etv, the chairman politely told the governor he would have to go through the FCC’s administrative channels just like anyone else.

Chairman Minow sent a long letter July 11 to Maine’s Republican Gov. John H. Reed giving in detail the procedures relating to allocation of tv channels, comparative hearings and reservations for noncommercial educational channels.

Seven days later the governor wired Mr. Minow: “I strongly urge” that ch. 7 be reassigned to Calais for educational tv and that ch. 10 be reserved for etv in Presque Isle. This was the subject of rulemaking proposed by a Maine educational group in early 1961 and on April 19 the FCC decided to reserve ch. 10 in Augusta and ch. 10 in Presque Isle for educational use but to shift commercial channel 7 in Calais to Bangor instead of leaving it in Calais for the educators.

Chairman Minow July 20 informed the governor that if he had “new or significant information” to present the commission bearing on the allocation he could formally petition the FCC to accept such comments, giving good cause and requesting waiver of the normal rules, but that his telegram did not constitute a formal comment and was sent long after the matter was considered by the FCC.

The U. of Maine, which had petitioned the FCC to reconsider its decision and leave ch. 7 in Calais for etv, last week asked that no action be taken on this petition until September.
Armchair Education Via Radio

This June 13, Radio Station WSM and the University of Tennessee, Nashville Branch, began a unique experiment in Educational Radio. The experiment was Music 131, a ten week 3 college credit hour course in music appreciation to be broadcast from WSM's studios each Tuesday evening from 6:45 to 9:45 P.M. UT furnishes the instructor with WSM's David Cobb assisting. WSM also rebroadcasts the entire program to its vast clear channel audience each Sunday evening.

These are the results of the experiment:
37 classroom students, officially registered at $24 each, by UT, are attending and participating in the broadcasts each Tuesday evening at WSM.

Over 500 Registered Certificate students from 12 states have also enrolled at $1.00 each and are taking the course at home by radio. These certificate students will take all tests and examinations and will be graded by the course instructor.

Radio Station WSM considers this response as indicative of a deep public interest in and a desire for more Educational Radio. WSM, therefore, plans to devote an increasing amount of air time to programs of an educational nature. This, WSM believes, is broadcasting in "the public interest, convenience and necessity."
They're starting over in St. Louis ch. 2
EVALUATION OF 1957 MOVE NOT SUFFICIENT, COURT SAYS

A federal court told the FCC last week that its plan for re-evaluating the 1957 move of ch. 2 from Springfield, Ill., to St. Louis was not sufficient.

The U. S. Court of Appeals in Washington told the commission to start afresh in this rule-making case which was remanded by the Supreme Court in 1959 because of allegations of off-the-record approaches to commissioners.

The commission held hearings on these charges and determined that Harry Tenenbaum, a principal owner of what is now KTVI (TV) St. Louis, had made private approaches to commissioners. It held that the 1957 decision was voidable but that no commissioner should be disqualified and that no absolute qualification was necessary against KTVI. It decided that it would reopen the original rulemaking case in order to give interested parties the right to answer or comment on matters not made on the public record.

It was this proposal that Circuit Judge Henry W. Edgerton, for himself and Judges Charles Fahy and Walter M. Bastian, said was unsuitable. Alluding to the Dept. of Justice's contention that the entire proceeding should be started afresh, Judge Edgerton noted that the FCC's original order was issued over four years ago, that three new members have been appointed to the commission and "we think it would not be appropriate for the commission to determine in 1961 on the basis of a somewhat supplemented 1957 record where and to whom vhf ch. 2 ought to be assigned."

The court said that the commission does not have to withdraw its decision that no commissioner is disqualified and that no party is absolutely disqualified. It added, however: "But we do not doubt that conduct of the type Tenenbaum engaged in, occurring since the commission's earlier decision on this point in this case, would be grounds for disqualification."

The commission can continue existing services, the court said.

The St. Louis ch. 2 case was taken to court by Sangamon Valley Telecasting Corp., an applicant for ch. 2 in Springfield originally.

Low-cost tv packet may include engineering data

A television equipment manufacturer which sells equipment packages to applicants who plan to build low-cost television stations was told last week it may include with each package the engineering information required by the FCC in the application for a grant.

But, the FCC cautioned Electron Corp., Dallas, the information furnished to such applicants may not include any "legal services," such as that which would be employed in advising an applicant on the interpretation or applicability of statutes or FCC rules and regulations.

Attorneys Protected - Above all, the FCC said, Electron Corp. may not represent one of its clients before the FCC —a function clearly reserved only to attorneys in good standing. And the applicant continues to be ultimately responsible for the accuracy of any information in his application, the FCC said.

And, speaking of that, the FCC in another letter told Electron that the agency is withholding action on the company's own application for ch. 8 at Missoula, Mont., because ownership reports for KCDA (TV) Douglas, Ariz. (ch. 3) were filed by the wrong party, Electron Corp., instead of Electron's parent company and KCDA's licensee, Ling-Temco Corp.

The FCC's report to Electron Corp. was in answer to the company's inquiry as to whether it may give stations non-legal advice in filling out applications for new tv stations. The FCC acknowledged it has never before set up rules or procedures covering assistance of a non-legal nature in filing applications.

WITT loses in move to postpone hearing

WITT Lewisburg, Pa., lost a final appeal to the FCC last week when the agency refused to postpone a hearing beginning today (Monday) on the station's license renewal application (Broadcasting, July 24). The issues include one alleged unauthorized transfer of control (and possibly two), misrepresentation and lack of candor and of character qualifications, according to the commission order.

Interlocutory pleadings have been hotly contested for several weeks and the hearing site was moved two weeks ago from Washington to Lewisburg over WITT's protests. The station maintains the FCC should have instituted revocation proceedings with the burden of proof on the agency rather than on WITT.

The FCC charges that there was an unauthorized transfer of control in December 1959 to Robert L. Wilson or Central Broadcasting Co. or both, and that WITT violated 18 commission rules. Further, FCC counsel said in a pre-hearing conference, the telephone company cut off WITT's telephone facilities June 1 for non-payment of bills and the station was off the air until June 11 when it resumed with new management over which the board of directors had no control.

N.Y. uhf experiment proceeds on schedule

A $2 million plus experiment in uhf telecasting and reception in the "canyons" of New York City is moving ahead on schedule with all major contracts having been let, the FCC announced last week in a progress report.

The study was authorized by Congress in appropriations for fiscal 1961, with the government station scheduled to go on the air late this fall. Commissioner Robert E. Lee is pushing the project for the FCC with Arnold Shrivseth officially the FCC project representative.

Using ch. 31, WUHF (TV) will be operated by the City of New York under control of the federal government. WUHF will duplicate the programs of New York stations during specified hours and the rest of the time the city will be free to broadcast its own programming. The following contracts have been signed by the government for the experiment: lease of transmitter space from Empire State Building; RCA for lease of transmitter and transmission lines with installation to be completed by Aug. 1.

Also, Smith Electronics Inc. for 12 light-weight field strength meters to measure both uhf and vhf; Mel- gis Inc. for an antenna to be mounted atop the Empire State Building and a temporary window mount antenna on the 80th floor; RCA Sales Corp. for 100 monochrome, 15 portable and 10 color receivers; Jerrold Electronics Corp. for installation of the receivers and observations and measurements, and the U.S. Census Bureau for determining locations of the receivers.

The commission also is seeking cooperation of the tv industry for the test and an advisory committee has been formed. Various music licensing groups have given free rights for music aired over WUHF and similar service is being sought from labor unions, guilds and program suppliers.

The New York City Board of Estimates has also approved an allocation of $384,000 as the city's share of WUHF's operating costs.
“Sylvania GB-5749 cuts costs 50%!”

Paul F. Rex, Chief Engineer, WISR, Butler, Penna., says—“Sylvania Gold Brand 5749 has solved our limiter amplifier problem. Proper operating curve adjustments are now routine—with unselected tubes—at less than one-half our former cost.

“Now we enjoy excellent fidelity—no thumps—with 15 to 17db of compression. This means good high level audio at the receiver. We recommend Sylvania Gold Brand Tubes for those tough problems.” If, like WISR, you have a critical tube job—replace with Sylvania Gold Brand Tubes.

Commission vacates Miami ch. 7 grant

WINNING BISCAYNE TV DISQUALIFIED FOR EX PARTE CONTACTS

A second Miami vhf tv station grant was set aside by the FCC last week because of ex parte contacts with members of the commission.

Just as in the ch. 10 case, the commission disqualified the winning ch. 7 applicant—Biscayne Tv Corp. (WCKT [TV])—plus all other applicants save one and granted the application of Sunbeam Tv Corp. Sunbeam, principally owned by Miami businessman Sidney D. Ansin, was the only one of four aspirants found untainted by illegal contacts.

The other two applicants, also disqualified by the commission, are East Coast Tv Corp. and South Florida Tv Corp.

The FCC’s decision, by a 5-1 vote, will not become effective until further orders from the agency. Specifically, it sets aside the January 1956 grant to Biscayne and orders WCKT to cease operations on ch. 7. In addition, the commission stated that any license issued to Sunbeam will be for four months only, after which new applications will be accepted for the channel.

As in other ex parte cases remanded to the commission, the charges first were aired by the House Legislative Oversight Subcommittee in 1958. The commission asked the court to remand the ch. 7 case following earlier remands and the Hill disclosures. Hearings were held in Philadelphia before Judge Stern in June 1960.

WCKT and its companion station, WCKR-AM-FM, are owned by principals of the Miami News (Cox) and Miami Herald (Knight) and Niles Trammell (15%), former president of NBC. The am-fm stations were not involved.

Ex Parte Principals • Biscayne was disqualified for enlisting the aid of Ben A. Fuqua, personal friend of former Commissioner Richard A. Mack, to contact the commissioner. Also, the de-

DODD RESUMES ATTACK

Juvenile Delinquency hearing sure of linkage between youthful crimes and television violence

Sen. Thomas Dodd (D-Conn.) wal-
lked the television industry last week with his biggest cudgels to date as his Juvenile Delinquency Subcommittee re-
sumed its hearings on the possible ef-
fects of television crime shows on the zooming juvenile-delinquency rate.

Convinced that there is a link be-
tween such shows and juvenile delin-
quency (“We have established a defi-
nite connection,” he told his home state in a tv-radio broadcast Wednesday night), he proposed that Congress au-
thorize the FCC to regulate the net-
works “to eliminate broadcasting of violence for its own sake.”

Furthermore, he wants action now. Taking issue with FCC Chairman New-
ton N. Minow, who has said that net-
work commitments would prevent sig-
nificant programming changes until 1962, Sen. Dodd said the time has already arrived to curtail tv violence.

When a certain polio vaccine was found several years ago to be dan-
gerous to children, he said in his open-
ing statement, it was pulled off the market, without regard for the finan-
cial loss to the manufacturer. “I insist that our stand be the same regarding dangerous television shows,” he said.

He accused broadcasters of making “a mockery” of the industry’s stand-
ards regarding television’s responsi-
bility toward children “by program-
ing a diet of murder, extortion, ec-
centric sex, and subhuman brutality.”

Violence Leads to More • “The sad truth,” he said, is that “the industry has not tried to rid itself of the overabun-
dance of crime and violence which their productions contain.” On the contrary, he charged, the networks are engaged in a competition to determine which can program the most violence.

Consequently, he said, Congress should “authorize the FCC to assume a regulative and coordinative function over the networks in order to eliminate broadcasting of violence for its own sake, in order to enable television to develop to its true capacity, and in order to assure that networks and in-
dependent stations operate in the best interests of the American people.”

But if Sen. Dodd is convinced there is a direct connection between tele-
vision crime and juvenile delinquency,

Pay raise for FCC?

Members of the FCC and other regulatory agencies would get pay raises of $2,000 a year under legislation introduced last week by Sen. Warren G. Magnuson (D-Wash.).

The bill (S-2307) would in-
crease commissioners’ annual sal-
aries from $20,000 to $22,000. The chairman’s pay would be boosted from $20,500 to $22,400. Secretary Abraham A. Ribicoff of the Dept. of Health, Education & Welfare isn’t.

“Let’s be perfectly frank about it,” he told subcommittee. “We cannot say with certainty that a bad program causes a child to do bad things, or that a good one guides him towards better things. We have our strong suspicions, but we do not know for sure.”

In any event, he declared, the causes of juvenile delinquency are complex, and television can only be regarded as one aspect.

He said many authorities have ex-
pressed differing views on the question of television’s influence on the juvenile-
delinquency rate, and added that an intensive, long-term research project in this area would be helpful.

He said his department would be willing to cooperate with the subcom-
mitee and NAB in setting up such a study. NAB President LeRoy Collins proposed a similar project in his ap-
pearance before the subcommittee last month (Broadcasting, June 26).

Programs Could be Better • But while he declined to put the finger on television crime as a proven factor in the juvenile delinquency problem, he did say that “the programs our boys and girls watch could be better—much better.”

And he not only called on the in-
dustry to provide this better program-
ning, he offered a suggestion as to where the material could be found—in American history books.

“The greatest stories that can be told to inspire our children are the stories of the people who built our country,” he said. “They don’t have to get fancy
cision of the examiner adopted by the commission found that Mr. Trammell and James M. Cox Jr., (president of the Miami News and principal owner of the Cox radio-tv stations) had off-the-record contacts with Mr. Mack while the case was pending.

South Florida (headed by Jack Stein) was disqualified for using Perrine Palmer Jr., and the late Thurman Whiteside, also friends of Mr. Mack, to intercede with the former commissioner. East Coast (whose principal owner is Richard Mead) also was found guilty of hiring a Florida friend of Mr. Mack's—Miles H. Draper—to contact the then commissioner.

The commission said that the activities of Biscayne, South Florida and East Coast reflect so adversely on their character as to show that they lack the necessary qualifications to be a licensee.

Further, the commission said, the public interest can best be served by a grant of ch. 7 to Sunbeam. Also, the commission stated that it is aware such a grant results in an award by default and therefore the initial license period will encompass only four months.

This is identical to the action taken in the Miami ch. 10 case—relied upon heavily by the examiner's decision adopted by the commission. In ch. 10, the commission disqualified the winning applicant, National Airlines (WPST-TV) and awarded a four month grant to L. B. Wilson Inc. Two other applications also were absolutely disqualified in that case.

While the commission gave no reason for leaving the effective date of its order blank, it is understood this move was taken because the agency is not absolutely sure of its legal authority to go as far as it did. Such authority presently is awaiting a test in the Supreme Court in the Miami ch. 10 case. The court of appeals has affirmed the stiff FCC action but a notice of appeal with the Supreme Court has been filed.

A spokesman for Biscayne already has indicated that an appeal would be made as soon as the decision becomes final at the FCC.

In dissenting, Commissioner Lee said absolute disqualification of three of the applicants was "harsh justice." He said they should be given a comparative demerit (as was done in the Boston ch. 5 case, see page 51). Another vote should be taken by the FCC with consideration given to the three demerits, he maintained.

In light of the language of the decision finding that the activities of Biscayne reflects so adversely on their character, the question of the eventual fate of other Cox and Knight broadcast properties was raised in case the FCC decision withstands the court tests. The Cox interests also own WHIO-AM-TV Dayton, Ohio, WSOI-AM-TV Charlotte, N. C., and WSB-AM-Atlanta. The Knights also own 45% of WAKR-AM-TV Akron, Ohio.

scriptwriters to invent stories; they can go back to the stories of Washington and Jefferson" and other figures in American history.

He said he would give "short shrift" to the argument that because people like crime and violence shows, the television industry must concentrate on them. "Television shouldn't pander to the worst in human nature," he said.

But he also declared he is opposed to government censorship, adding, "There are enough high-minded and intelligent people in the television industry who know what must be done."

Parents, too, are deeply involved in the problem, he said, for they are primarily responsible for the viewing habits developed by their children. "A child watches what he is permitted to watch, and listens to what he is permitted to listen to," he said.

"If he is permitted to sit like a vegetable, pursuing moronic murders, and ceaseless crimes, he suffers, and his parents do, too."

"Parents," he added, "must learn to get tough with themselves and their children, as well as with the television industry."

Another Hard Line • Industry representatives in the hearing room who had begun to breathe more easily during Secretary Ribicoff's testimony, found themselves wincing again when the Rt. Rev. Monsignor Joseph E. Schieder took over the witness table.

The monsignor, who is director of the Youth Dept. of the National Catholic Welfare Conference, urged that immediate steps be taken to eliminate crime and violence shows from tv.

He said he "cannot dismiss the idea of a basic relationship" between soaring crime figures and television's "almost totalitarian grip on the minds of the people."

He said "the diet of terror" fed young people by the mass media and particularly television has induced in them "a tolerance of evil."

He said the situation he portrayed could be remedied by industry self-policing, and the enforcement and expansion of legislative controls. Perhaps the most important step, he said, would be "the relief of advertising and sponsorship pressures on program directors—pressures related to the 'giving the public, or the kids, what they want' school of thought."

He described as "a step in the right

Washington's uhf television exhibit

direction” the bill (HR 8109) introduced by Rep. Harris B. McDowell (D-Del.) to make it a crime to exploit sex and crime and violence on television (BROADCASTING, July 17).

The monsignor was only the first of several clergymen expected to testify before the hearings conclude.

WMIN sales hearing set on trafficking issue
BOTH BUYER (TEDESCOS), SELLER (JOHNS) UNDER CLOUD

The proposed $200,000 sale of WMIN St. Paul, Minn., was set for hearing by the FCC last week on questions of trafficking in licenses by both the buyer and seller. Also set for hearing on the same issue was the application of Plains Broadcasting Co. to sell its construction permits for five new fm stations to United Communications Inc. for $21,008.

Tedesco Inc. (Victor and Nicholas Tedesco) is buying WMIN from William F. Johns Jr. and associates (BROADCASTING, Feb. 20). In ordering the hearing, the commission said that both parties have acquired and disposed of numerous stations in the past. This raises the question “whether a grant would be consistent with the commission’s policy against trafficking,” a one-man FCC majority said.

Voting for the hearing were Chairman Newton N. Minow and Commissioners Robert T. Bartley, Frederick W. Ford and Robert E. Lee. Dissenting were Commissioners Rosel H. Hyde, T. A. M. Craven and John S. Cross.

The Johns group bought WMIN in 1955 for $75,000. The family (including William Sr., William Jr., Miles, and Mrs. William Sr.) has individually and collectively held interests in a total of 35 broadcast properties between 1943 and 1960, according to the FCC. William Jr. held interests in 14, William Sr., 8; Miles, 8; and Mrs. Johns, 5. Many of these involved the same station, it was pointed out.

Mr. Johns purchased WWOM New Orleans in April 1960 and since that date has acquired WEW St. Louis, WWOM New Orleans, KOME Tulsa and WOLD Pompano Beach, Fla., according to the FCC.

The Tedescos, the commission staff said, have acquired or owned interests in 12 stations since 1948. They presently own KWKY Des Moines, WXKX New Richmond, Wis., KKFN Shenandoah, Iowa, KCUE Red Wing, Minn. (sale to third party is pending FCC approval). In addition, Tedesco Brothers have applications pending for their purchases of KBLO Hot Springs, Ark., WRNE Wisconsin, Rapids, Wis., and have applied for a new am in Chisholm, Minn.

Plains Broadcasting holds construction permits for KRKY (FM) Denver, WFWM (FM) Cincinnati, KFMV (FM) Minneapolis, KFCM (FM) Portland, Ore., and KPRN (FM) Seattle. The commission said that no actual construction has been started and now pending are applications for extension of completion dates. The commission questioned the “good faith, diligence” and programming plans, among other matters, of Plains in announcing the hearing.

Commissioners Lee and Cross voted for a grant of the Plains applications; Commissioner Ford did not participate.

Illegal contacts charged to Minow

An Illinois congressman accused FCC Chairman Newton N. Minow last week of allowing “conflict of interest and ex parte contacts to influence him” to turn his back on the commission’s own professed standards.

Rep. Robert H. Michel (R-Ill.) made the charge in connection with the FCC’s proposed grant of ch. 8 Moline, Ill., to Moline TV Corp. Three other applicants for the channel have already accused the FCC of inconsistency in the case (BROADCASTING, July 24).

An Incredible Grant • Like the three applicants (Community Telecasting Corp., Midland Broadcasting Co., and Illiway TV Inc.), Rep. Michel said it is “incredible” that the FCC should grant the Moline application on the same day (June 28) that it denied the application of Suburban Broadasters for an fm license in Elizabeth, N. J. Suburban was turned down on the ground that it had made no effort to determine local needs, he noted. Yet, Moline TV Corp., he said, was “the only one of five applicants which made no effort to determine local program needs.”

Rep. Michel said Moline TV Corp’s president, Frank P. Schreiber, has no record of civic activity anywhere but that Richard Stengel, “one of the controlling principals,” has a considerable background in Illinois Democratic politics.

And, Rep. Michel indicated, this background was the company’s main advantage in seeking the tv grant.

[Note: Chairman Minow did not participate in the instructions to the FCC staff to write a decision granting the Moline TV application.]

He said Mr. Stengel served four terms in the Illinois legislature and was the Democratic nominee for the U. S. Senate in 1956. President Kennedy, then a senator, was one of the speakers at a fund-raising luncheon given Mr. Stengel during that campaign, Rep. Michel said.

The congressman did not say specifically that Mr. Stengel knew Chairman Minow. But he asserted that Mr. Stengel’s “political activities obviously brought him in close contact with Chairman Minow and President Kennedy, not only during the 1956 campaign, but during his years in the state legislature,” from 1948 to 1956.

Chairman Minow, whose home is in Chicago, was administrative assistant to former Gov. Adlai Stevenson from 1950 to 1952 and participated with him in his unsuccessful campaigns for the presidency in 1952 and 1956.

Rep. Michel said he “had to gag” when he read Chairman Minow’s NAB convention speech in which he promised the FCC would steer clear of ex parte contacts to such an extent that the commission would be called The Seven Untouchables.

“It is obvious to me,” Rep. Michel said, “this is just another case where the deeds of the New Frontiersmen do not measure up to their sanctimonious public pronouncements.”

He said “Chairman Minow has permitted his conflict of interest and ex parte contacts to influence him to ignore and ingeniously explain away announced standards in such fashion as to make a mockery of justice.”

He said the commission should set aside its proposed order, “schedule a re-argument at the earliest possible date, and reconsider this case strictly on its merits, rather than on what clearly appears to me to be political considerations.”

KOB-ABC feud reopens in consolidated case

A decades-old feud between ABC and KOB Albuquerque, N. M., flared anew last week when the FCC consolidated a KOB application for modification of its construction permit with the application for renewal by WABC New York, owned by the network.

Both stations operate on 770 kc. For 15 years ABC tried to get KOB off that frequency, claiming that WABC was a Class 1-A station and no other facility should be permitted to operate on the same frequency at night. In 1958 the commission ordered both stations to operate on 770 kc with 50 kw and directional antennas for mutual protection.

The commission ordered that the application of KSTP Inc. for 770 kc in New York (in opposition to the WABC renewal application) be withheld pending the outcome of the consolidated hearing. KSTP Inc. is the owner of KOB.

"RCA Color TV Tape... Equal of Color Live!"
— says William B. McGrath, V.P. and Managing Director, WHDH-AM, FM, TV, Boston

"Here at WHDH-TV we are enjoying great success with our RCA Color Television Tape operation. Taped programs, commercials and special events sparkle in color. We find color tape the equal of color live—and with the convenience and ease that only RCA TV Tape can give.

"RCA Color TV Tape Recorders have completed our RCA color facilities. We do all our local programs in color. By adding the client convenience of television tape to the new dimension of color, we have an unbeatable combination for success."

RCA Color TV Tape Recorders are proving themselves in installations like WHDH because they are designed for color. Picture quality is virtually built in, thanks to multiple monitoring checks. You can check through the entire system for the very best picture. Precision head-wheel interchangeability for color, too, means you can play back tape on any machine, regardless of where it was made.

More and more broadcasters are specifying RCA TV Tape for color operation because it is part of a completely matched line of color equipment available from one single source—including color TV tape recorders, studio color cameras, 3-V film cameras and projectors, color monitors, switching and special effects. They find service before and after the sale of the kind that only RCA with its broad background in color television can perform.

Find out how you can get live color quality with tape convenience. See your RCA Representative. Or write to RCA, Dept. XE-22, Building 15-5, Camden, N.J.

Radio Corporation of America
COMMISSION TRIES OUT NEW TEETH

Bites Crowell-Collier for $2,500 in KDWB case

The FCC has completed its first case since new teeth were put into the Communications Act by Congress last year. The agency last week put a $2,500 bite on Crowell-Collier Broadcasting Corp. for operating KDWB Minneapolis from midnight to 4 a.m. daily for more than a year and a half with power and type of antenna authorized only for daytime (daylight) operation.

But even so, the FCC's bite was $7,500 less than its bark last March when the agency issued its “first notice of liability for forfeiture” in the amount of $10,000. (BROADCASTING, March 27.

The FCC, in announcing the reduced forfeiture, did not explain the reason for its change of heart—whether it was merely leaning away from excesses in the first monetary forfeiture case or whether it felt there were mitigating factors in KDWB's explanation of the engineering violation.

Minow Outvoted • The reduced fine was imposed by a vote of six commissioners, who overrode FCC Chairman Newton Minow's holdout for the maximum of $10,000.

Crowell-Collier may now ask the FCC to remit or mitigate the fines, or may pay it. The money is payable to the U.S. Treasurer. If the station refuses to pay, the amount is recoverable by a Justice Dept. civil suit. A suit for recovery must be held on the merits of the case, and additional safeguard given licensees.

The FCC charged that KDWB (630 kc) was operated by Crowell-Collier from midnight to 4 a.m. with 5 kw power and a directional antenna pattern authorized only for the daytime. KDWB's nighttime authorization is for 500 w only with a different directional pattern than that for daytime.

Crowell-Collier denied that the violations were willful on its part, explain-

Kentucky asks new etvs

Submitting an educational tv report by a special state legislative committee, Gov. Bert Combs of Kentucky last week asked the FCC to reserve nine uhf channels assigned to that state for etv. The channels and cities: ch. 59 Ashland, ch. 19 Hazard, ch. 24 Maysville, ch. 14 Pikeville, ch. 54 Covington, ch. 17 Bowling Green, ch. 26 Madisonville, ch. 33 Murray and ch. 29 Somerset.

The governor said all the channels are unused and to date have not been applied for.

ing that the station was using the contested power-antenna pattern before the company purchased it in August 1959. Crowell-Collier engineers discussed the midnight-4 a.m. operation and it was continued on the advice of John H. Mullaney, Washington consulting engineer, the FCC was told. The station discontinued the practice upon receipt of a notice of violation from the FCC last January.

In imposing the fine last week, the FCC said the forfeitures were authorized to obtain greater compliance by licensees with the terms of their licenses and FCC rules and to deter non-compliance. If serious, repeated violations go unpunished, the forfeiture sanction will not be “the effective tool it was intended to be,” the statement said.

The agency said it intends to use the forfeiture to “impel” broadcasters to become familiar with the terms of their licenses and FCC rules and to adopt procedures, including periodic review of operations, to insure station operation in substantial compliance with licenses and FCC rules.

WILD, WAVA get short-term licenses

The FCC struck again last week with its authority to issue short-term licenses by granting renewals for only one year to WILD Boston and WAVA Arlington, Va.

In renewing WILD, the commission said it has information indicating that several tax liens are outstanding against the station for non-payment of employee withholding taxes. Also, the FCC said, questions are outstanding concerning the financial condition of WILD and the station has been guilty of technical violations of a “serious nature.”

Considering this, the FCC said, it is of the opinion that WILD’s “past actions have fallen considerably short of the exercise of that degree of responsibility in the operation of a broadcast station which the commission has a right to expect. . .”

At the same time, the FCC denied a petition by Local No. 9 of the American Federation of Musicians seeking a hearing on the WILD application on the grounds that the station had not originated live music programs. However, the commission advised the AFM local that it is considering this question with respect to its new programming forms.

WAVA (formerly WARL) was given a one-year renewal “to afford the licensee opportunity to demonstrate continued improvement of its program-

Kentucky asks new etvs

Submitting an educational tv report by a special state legislative committee, Gov. Bert Combs of Kentucky last week asked the FCC to reserve nine uhf channels assigned to that state for etv. The channels and cities: ch. 59 Ashland, ch. 19 Hazard, ch. 24 Maysville, ch. 14 Pikeville, ch. 54 Covington, ch. 17 Bowling Green, ch. 26 Madisonville, ch. 33 Murray and ch. 29 Somerset.

The governor said all the channels are unused and to date have not been applied for.

ming and commercial policies and practices.” The licensee, U. S. Transdynamics Corp., had been questioned by the commission on long-pitch announcements, “objectionable references” of announcers and improper identification of sponsors. The station said that it intended to honor the commercial contracts from previous owner (Transdynamics acquired the station in August 1960) and has been trying to eliminate the spots of five minute duration or longer. Ad lib statements had been made by one personality about “amusement machines” (slot machines) in a Maryland restaurant he owned and the station said this practice has been stopped.

PROBE SPORT PACKAGE

Dept. of Justice will decide if pacts violate antitrust

The future of tv sport packages is hanging in the balance as the Dept. of Justice acknowledged last week that it is looking into three such deals to see whether they violate the antitrust laws.

Such investigations have been going on for some time, a Justice Dept. spokesman said. Their existence came to light after a federal judge ruled that the National Football League-CBS two-year, $9.3 million package violated a 1953 antitrust judgment.

In that ruling, Philadelphia U. S. District Court Judge Allen K. Grim held that the NFL-CBS package deal was illegal because it eliminated competition among the teams of the senior pro football league for sales of rights to tv (BROADCASTING, July 24).

Suspension Asked • The National Football League early this week asked Judge Grim to suspend this ruling until Dec. 31. This would permit the NFL-CBS contract to be executed for half of its two-year term. Arguments on this request took place July 27 and 28. NFL asked the judge to reverse his ruling because the banned contract is similar to several others that have not been challenged. These are the American Football League's five year $11 million deal with ABC; National Collegiate Athletic Assn.'s two-year, $6 million deal with ABC; and National Basketball Assn.'s year-to-year contract with NBC amounting to about $500,000 a year.

Blackouts Okay • The 1953 decree, handed down also by Judge Grim, resulted from a government antitrust suit against the National Football League. It held proper a clause in NFL's bylaws which permitted a tv blackout when one of its teams was playing at home. The court, however, ruled that it was illegal to blackout radio broadcasts of home games since radio did not affect local attendance.

In March of 1960, the National
How to survive your season in the sun...

To help you have a wonderful time during your season in the sun, the following do's and don'ts are worth remembering.

**Do get your suntan gradually.** Never expose more than a few minutes at first. Increase sunning five minutes daily thereafter. Use a protective cream or lotion. Should you get a severe burn with blisters, have your physician treat it.

**Do take it easy.** If you suddenly plunge into strenuous activities, you'll risk muscular aches and pains and perhaps a strain on your heart. Pace yourself. Stop when you begin to feel pleasantly tired.

**Do be a careful camper.** If you plan a camping trip at some faraway place, take along adequate first-aid supplies—plus a few household remedies.

When building a fire outdoors, keep it small, watch it constantly and have pails of water or sand nearby. Never leave a fire until it is out completely.

**Don't take chances in the water.** Always follow a most important rule of water safety . . . never swim alone. And when toddlers are around water, watch them constantly. Even if you think you're an expert swimmer, be extra careful in strange waters.

Stay out of water during thunder storms. Learn rescue breathing. This simple technique—when applied promptly and properly—can save many lives.

**Don't be a risky boater.** Know and obey all the marine "rules of the road." Provide life jackets for every passenger at all times. If possible, stay with any small craft that upsets, and signal for help.

Metropolitan Life

INSURANCE COMPANY

A MUTUAL COMPANY • Home Office—NEW YORK—Since 1868 • Head Office—SAN FRANCISCO—Since 1901
Head Office—OTTAWA—Since 1924 • Over 1,000 Local Offices in U.S.A. and Canada

BROADCASTING, July 31, 1961
Football League informally asked the Dept. of Justice to approve the proposed contract with CBS. The government, it is understood, indicated disapproval. In April of this year the transaction was signed, and the NFL asked the U. S. District Court in Philadelphia to approve the contract as within the bounds of the 1953 decree. The transaction was opposed by the Justice Dept. and Judge Grim's ruling two weeks ago was the result.

It was stressed at the Dept. of Justice that the fact it was looking into the other tv sports contracts did not indicate that the government felt they were illegal or legal.

New issue added to WSPA-TV case

The often-heard 1953 grant of ch. 7 Spartanburg, S. C. to WSPA-TV (Spartanburg Radiocasting Co.) will be heard again by an FCC hearing examiner.

The record was ordered reopened last week by the commission for the taking of testimony concerning a purported 1956 ex parte contact made by WSPA-TV President Walter Brown. A 5-2 commission majority ruled that the rights of protestant Wilton Hall, president of ch. 40 WAIM-TV Anderson, S. C., were unduly restricted when the hearing examiner prohibited questions on the ex parte contact.

Mr. Brown admitted contacting Commissioner Rosel Hyde in September 1956 but said he did not discuss the merits. The examiner ruled out further questions on the ground the case was not before the FCC at the time because it was not remanded by the court until December of the same year.

Such a ruling, the commission said, places an unjustifiable restrictive interpretation on the term "adjudicatory status." Also, the FCC said, it is the commission's function to determine whether merits were discussed.

Another issue in the newly-ordered hearing concerns what role Mr. Brown played, if any, in influencing Sen. Strom Thurmond (D-S.C.) to write a letter regarding the case to former FCC Chairman George C. McConnaughey. The issues will be limited to these narrow areas, the commission stated.

Remanded Three Times • The grant to WSPA-TV has been remanded to the commission three times by the court in a continuing legal fight. Last week's decision is the first time that official notice has been taken of the ex parte aspect, however. Last January, Hearing Examiners James Cunningham and Herbert Sharman issued an initial decision which found Spartan qualified to hold a license but at the same time found the licensee mis-represented to the commission (Broadcasting, Jan. 9).

The misrepresentation concern a move of the WSPA-TV transmitter to Paris Mountain from the originally authorized site on Hogback Mountain. No ruling was made by the FCC last week on the examiners' recommendation that the grant of the move to Paris Mountain be set aside. Voting for the new hearing were Chairman Newton Minow and Commissioners Rosel Hyde, Robert Bartley, T. A. M. Craven and Frederick W. Ford. Disenting were Commissioners Robert E. Lee and John S. Cross.

WHAS-TV tall tower would hurt uhf-FCC

Protection of two existing uhf stations from vhf competition was the reason given by the FCC last week for refusing to approve the plans of WHAS-TV Louisville (ch. 11) to build a 1,859-foot tower (Broadcasting, July 10).

The proposed WHAS-TV tower would have been located 19 miles from Louisville and 38 miles from Lexington, Ky. —the home of WLEX-TV (ch. 18) and WKYT (TV) (ch. 27). The commission said that economic failure of the Lexington stations would do violence to the Sixth Report and Order and cause 61,336 persons to lose their only tv service. The commission added: "The very real possibility that either or both Lexington stations would be forced off the air in the event of a grant to WHAS-TV makes it patently clear that violence, rather than observance, of the priorities of the Sixth Report would result: ...

Movie men say FCC lacks pay tv power

Connecticut theatre owners told a federal court last week that the FCC has no power to approve any system of pay tv requiring a direct payment by the public.

That point was the first and most significant of five made by the Connecticut Committee Against Pay TV in a brief submitted to the U.S. Court of Appeals for the District of Columbia. The theatre-backed committee is fighting the FCC's decision last February authorizing RKO General to try out the phonevision system of pay tv for three years over WHCT (TV) Hartford, Conn. (Broadcasting, Feb. 6).

The brief was submitted in behalf of the committee and also five area theatre owners (Stanley Warner Management Co., Loew's Inc., Connecticut Theatres, Manchester Drive-in Theatre Corp. and Out-Door Theatres Corp.). Among other charges, the theatre group claimed that the FCC erred in:

• Finding that subscribers will not have to "purchase" special decoding equipment.
• Concluding that the arrangements between RKO General, licensee of WHCT (TV) Hartford, Conn., and Zenith and Tecno does not impair the licensee's freedom. Zenith is the promoter of the Phonevision system of subscription tv; Tecno holds the license on Phonevision from Zenith.
• Making the grant without knowing what programs would be telecast.

FCC reorganization bill passes the Senate

HOUSE VERSION HITS SNAG IN RULES COMMITTEE

The FCC-reorganization bill (S-2034) sailed through the Senate on a voice vote last week without an audible "nay" in its course.

Clouds of opposition had gathered in advance of the vote but were dispelled by floor amendments.

None of the changes, however, affect the substance of the bill, which was drafted in cooperation with the FCC and introduced by Sen. John O. Pastore (D-R. I.), as a substitute for the ill-fated Presidential reorganization plan.

The key provisions of permitting the commission to delegate adjudicatory functions to commissioners, employees or employee boards, and to exercise discretion in granting review, remain.

One amendment was offered by Sen. Pastore himself to satisfy the objections of Sens. Everett Dirksen (R-Ill.) and Frank Lausche (D-Ohio). It spells out the requirement that those to whom the commission delegates a review function must have qualifications at least equal to those of a hearing examiner.

Two other amendments were offered by Sen. Dirksen. One specifies that the commission may not delegate a review matter to the same person who made the original decision. The other merely tightens up the language in a section dealing with ex parte matters.
On the ground...

"Thank you for forwarding to me your station's editorial in recognition of the superior manner in which a member of the Force carried out his duty on a recent occasion. The officer referred to in your release has been identified as Private Daniel D. Boccabella, and he has been commended by his supervisory official for the action taken. I am particularly pleased that you used your facilities to convey this act to the public. Your editorial will be forwarded for the information of Officer Boccabella and his Commanding Officer and placed in his personnel folder."*

- ROBERT V. MURRAY, Chief of Police
  Government of the District of Columbia

*Officer Boccabella rendered full assistance, including first aid, to a pedestrian who slipped on an icy street and injured himself. Boccabella used his own winter overcoat, gloves and hat to keep the victim warm and comfortable.

...and in the air

"I want to thank you for your editorial "Air Force Damage to Private Property." You are doing us a great service to bring this deplorable situation out in the open. We are faced with still another major problem: the danger and noise disturbance to our elementary school. Due to the construction of these runways, our school now finds itself midway between the centerline of the 2 runways in an area that will experience noise levels of over 100 decibels. The noise is so great that instruction is interrupted many times every day. We are appealing to our Congressman, Prince Georges County officials and the P.T.A. to relocate our school."

MRS. GRETCHEN KLEE

...the station that keeps people in mind

As a public servant, we believe in being of public service. That's why, several years ago, we were the first station in Washington—and one of the first in the nation—to express our views through the medium of the radio editorial.

We don't pussyfoot. We speak out on all manner of subjects concerning our listeners and community—from praising a policeman to frowning at the Air Force. Controversial issues are grist for our mill—not because they are controversial, but because they are important. We may not be always right, but we call them as we see them—and we seem to have the respect of our public. They've made us far and away first in ratings.

The station that keeps people in mind? That's us—for you—in the rich Washington market.

BROADCASTING, July 31, 1961  63
from General Electric
TWO NEW CAMERA TUBES
DEVELOPED TO MEET
YOUR TELECASTING
NEEDS
TV STATION-DESIGNED...

...for flexibility in your color and special telecast work

ZL-7802 represents a significant advance in image orthicon design. It will pay dividends every day in your studio and remote telecasting. A high-gain, thin-film semiconductor target is the key to ZL-7802 sensitivity and ability to handle wide ranges of scene illumination. This supersensitive target improves depth-of-focus, effectively reduces "stickiness," and permits pickup of dramatically lighted scenes with a minimum of set-up time. The thin-film target also provides excellent high-amplitude response, greatly reduces susceptibility to permanent burn-in damage, affords stable operation during life and eliminates raster burns.

The addition of a field mesh in the scanning section provides excellent landing, shading and dynamic match in color cameras using three image orthicons. Because of this field mesh, only simple adjustments are required and you save on set-up time.

ZL-7803† is interchangeably with the 7629, 7513, 7293, 7293A, 5820 and 5820A.

...for quality you require in critical video tape recording

ZL-7803 is specially designed for studio pickup service where you control lighting and demand high-quality performance. An improved target-mesh assembly assures you of a high signal-to-noise ratio (peak-to-peak signal vs. [RMS] noise —min.; 38, av.; 50). A special field-mesh in the scanning section enhances picture quality by providing sharp transition from black to white without spurious effect (white edges). This feature, by equalizing the decelerating field which the scanning beam encounters, causes the beam to strike the target in a more even perpendicular direction over the entire target area. This improves flatness of field and corner resolution, helps prevent distortion. The ZL-7803 will noticeably shorten your set-up time and reduce the need to compromise between sharpest focus and minimum background blemishes.

Now you don't have to use a costly color tube to achieve the quality you require in video taping. The ZL-7803 is competitively priced with standard camera tubes. Yet, the high signal-to-noise ratio provides premium video taping quality.

ZL-7803 is interchangeably with the 5820, 5820A, 7293, 7293A and 7513.

Try these new General Electric Image Orthicons in your own cameras. Put them on the tough jobs—for the ZL-7802, demanding special application, color, or low light-level work; for the ZL-7803, critical video taping or quality studio pickup service in black and white or color. You'll appreciate the way these tubes perform.

For additional information, call your General Electric industrial tube distributor or write for descriptive literature...ZL-7802 (ETR-2800) and ZL-7803 (ETR-2801)...to General Electric Company, Room 7249 B, Owensboro, Kentucky.

Progress Is Our Most Important Product

GENERAL ELECTRIC
Audience group finds tv ‘mediocre’

OPINION LEADERS LIKE PROGRAMS, COMMERCIALS LESS THAN IN 1959

Television programming and commercials, with few exceptions, are rated as “mediocre” by so-called opinion leaders throughout the country.

This conclusion was reached by the National Audience Board last week from the results of a survey conducted by the board among its non-dues-paying membership. The board, a non-profit organization representing civic, business, educational and cultural groups, conducted its study by distributing more than 20,000 questionnaires among these groups by mail and at meetings and conventions. More than 2,400 replies were received. The group works in conjunction with such organizations as the General Federation of Women’s Clubs, the American Legion and the National Council of Churches.

The board stated that the size and status level of its sample, as well as the high proportion of homemakers represented (the sample is 82.8% female) should make the survey findings of “vital concern to virtually every tv advertiser in the country.”

Survey respondents were asked to rate 10 categories of tv programs and 12 categories of commercials on a four-point scale: “excellent,” “good,” “fair” and “poor.” Respondents also were asked to indicate, on an identical scale, how they felt they would have rated these same categories two years ago. In arriving at scores for categories of programs, the board applied a statistical weight for each scale.

The following are highlights of the findings:

- Today’s programming scores less than 70% in 6 out of 10 categories, whereas only 4 out of 10 categories score below 70% in respondents’ ratings of tv programming two years ago.
- Tv programming in three categories has dropped in quality in the past two years: drama, children’s and variety shows.
- Programming in four categories—public affairs, mystery-detective-adventure, news-weather, and sports—rates higher today than they would have two years ago.
- Public affairs programming made the highest gain. Respondents give it an 80% score today; only 70% two years ago.
- News and weather programming scores highest of all categories with 88%; sports is second with 83% and public affairs is third with 80%.
- Lowest scores are for westerns: 48%.

A closer examination of the survey shows a sharp decline in ratings on dramatic programs. Twice as many respondents rate drama “poor” today as they did two years ago (6.2% versus 3.1%) and only 39.1% rate it “good” as compared to 43.8% two years ago.

No Indignation • Contrary to what might be expected, the board said, strong public concern over violence on tv is not borne out by the survey findings in the mystery-detective-adventure category. These programs are rated “excellent” by 17.4% of respondents while only 6.2% said they would have rated them “excellent” in 1959. But this category scores second highest in the “poor” ratings, with 28.1% of respondents indicating that judgment, as compared with 29.2% two years ago.

Westerns received the highest number of “poor” responses, both for programming today (36.1%) and that of two years ago (35.9%).

In the study on commercials, the board concluded that ratings were about the same today and in 1959 for 10 categories, while two classifications—beer and wine and cigarettes—dropped in ratings.

Auto commercials are rated the highest with a score of 68%, followed by foods (65%) and gasoline and oil (63%). Rated among the lowest are deodorants (43%), women’s undergarments (43%), drugs (45%) and cosmetics (50%).

Questioned about network public service programming, the respondents said the top programs they “watched regularly” are CBS Reports (68.6%), Chet Huntley Reporting (62.9%) and Twentieth Century (54.3%). Asked to rate public service programs as “most outstanding,” they chose Chet Huntley Reporting for the top ranking (38.9%), followed by CBS Reports (16.9%), Twentieth Century (11.5%), and 11 other programs.

The results of the survey will be available for review and discussion at the “National Symposium on Freedom and Responsibility in Broadcasting,” sponsored by the Northwestern U. Law School in Evanston, Ill., on Thursday and Friday (Aug. 3-4). Peter Goelet, president of the National Audience Board, will attend the seminar and make the study data open for roundtable discussion.
Radio network for teenagers starts

A new concept in programming—a radio network for teenagers—has made its debut in the Washington area under the auspices of Milt Grant, a popular local air personality-turned program package.

Participation in the new Teen Network are WPAC Morningside and WINX Rockville, both Maryland, and WAVA Arlington and WEEI Fairfax, both Virginia. All are suburban Washington facilities. Two other stations, according to Mr. Grant, are in the midst of negotiations which may bring them into the network next month.

The show, handled by Mr. Grant’s own production firm, Milt Grant Productions, Washington, is sponsored on a package basis. Thus far 90% of the sponsorship has been assumed by advertisers who sponsored Mr. Grant’s record hop show on Washington’s WTTG (TV) before it was dropped three months ago when the station “changed its programming format.”

The broadcasts, heard each Saturday and Sunday from 1 to 4 p.m., originate from various locales.

Though Mr. Grant was not specific, he said another major northeastern city is near accord on a Teen Network of its own—under his guidance. He said he hopes to have a number of other Teen Networks in operation by year’s end, some incorporating television.

MGM-TV may expand international setup

There are strong indications that MGM-TV plans a major expansion of its international sales operation before the end of the year. Richard S. Harper, the film company’s director of worldwide syndicated sales, returned to New York from a five-week trip through Europe, during which time he met with representatives of MGM International in England, Germany, Italy and France. Purpose of Mr. Harper’s visit was to coordinate MGM’s distribution and sales activities in European markets, and to strengthen the company’s licensing of various MGM-TV properties with representatives of several national tv networks including Television Luxembourg and Tv Monte Carlo.

The trip was Mr. Harper’s second overseas jaunt in the last nine months. He previously met with MGM International people and executives of national tv networks in Australia, Japan, The Philippines and Hong Kong.

On the domestic front Mr. Harper announced the sale of The Passing Parade, MGM-TV’s package of 69 short subjects, to WPIX (TV) New York. The short subjects have been sold in 22 markets including two Canadian stations, CFTO-TV Toronto, and CKCO-TV Kitchener, Ont.

PUBLICISTS EXPAND

Union reports organizing
40 agencies, free-lancers

The Publicists Assn., Hollywood Local 818, IATSE, “now has, or is in the process of writing, some 40-odd agreements with the agencies and free lance publicity offices in the Los Angeles area,” Lloyd Ritchie, business representative of the local, has notified its membership in an informational bulletin dated July 21.

For the past several years, the local “has expended considerable time and effort in establishing minimum salaries and working conditions for publicists in the agency field of the entertainment industry,” Mr. Ritchie states. “The first
contract between the association and a publicity agency was signed in July of 1956. It was not until last week, however, that the first contract between the Publicists Assn. and a national advertising agency (Young & Rubicam) was ratified by our executive board.

"With the signing of this agreement, the association has firmly established the union shop principle in this rapidly growing field of employment and has established minimum salary rates which are identical to those in motion picture production . . . ."

Originally composed almost entirely of studio publicists employed by the motion picture production companies, Local 818 today also represents the staff publicists at CBS. (ABC and NBC publicity staffers are members of NABET.) With the growth of tv and the increase in the number of tv filmed programs being produced in Hollywood, much of the publicizing of the tv films was being done by independent publicity firms instead of studio publicists, the union noted, so it began an organizational drive among these firms, with the result that most of them now have agreements requiring membership in the Publicists Assn. for all employees who need entry to the film studios in their tv program publicity work.

About a year ago, Local 818 began an organizing drive for publicists at the advertising agencies. Young & Rubicam is the first to sign such an agreement, covering two employees with four- year contracts starting at the senior publicist's rate of $245 a week, with an additional 5% to be added next January. J. Walter Thompson Co. and BBDO have discontinued their program publicity activities. These presumably will be taken over by independent publicity organizations which already have agreements with the Publicists Assn.

Program publicists working directly for advertisers, like Frances Seully of Lever Brothers and Joseph Santley Jr. of Liggett & Myers, will also be expected to become members of Local 818, Mr. Ritchie said.

**GAC-TV re-formed to develop tv programs**

SHARPE HEADS TALENT AGENCY'S EXPLOITATION UNIT

General Artists Corp., New York, the nation's third largest talent agency, has reactivated GAC-TV to compete more closely with the Music Corp. of America and the William Morris Agency (the two front-running talent companies) in the development and preparation of television programs.

The strategy on the part of GAC was revealed last week by Don W. Sharpe, who was appointed president of GAC-TV. Mr. Sharpe believes the "time is ripe" for another organization with a variety of talent at its disposal to prepare tv programs for networks and sponsors.

Mr. Sharpe explained that GAC-TV's role will be to "initiate an idea for a program, develop a format and perhaps make a pilot with one of the stars it has under contract." GAC-TV will serve as sales agent for a projected series or program specials and present them to networks, advertisers and agencies. Unlike MCA-TV, which produces programs through its subsidiary, Revue Productions, GAC-TV has no plans at present to handle its own production.

"The chances are that once we have developed a project and sold it to a network, sponsor or agency, we will turn the property over to a star's production company or help him start a company if he doesn't have one," Mr. Sharpe said.

Mr. Sharpe was named to his post last week by Herbert J. Siegel, board chairman of GAC. Mr. Sharpe has been an independent radio-tv producer and agent for 20 years, and has produced or represented more than 20 tv program series, including I Love Lucy, Four-Star Playhouse, Douglas Fairbanks Presents, Desilu Playhouse and Peter Gunn.

GAC-TV was named two weeks ago as sales agent for Desilu Productions (BROADCASTING, July 24). Mr. Sharpe indicated that GAC-TV would represent other production organizations but none has been signed as yet.

Mr. Sharpe said he was "hopeful" that by January, GAC-TV will have about 25 properties in various stages of development. He declined to name any immediate projects but said programs would "run the gamut of the entertainment spectrum with film, live and tape shows covering drama, music, variety, comedy and other types." The accent, he said, would be on live programs at the outset.

Among the performers handled by GAC are Fabian, Paul Anka, Connie Francis, Nat "King" Cole, Sidney Poitier, Jackie Gleason and Lee J. Cobb.

**New name for Niles firm**

Fred A. Niles Productions Inc., Chicago and Hollywood, has changed its name to Fred Niles Communications Centers. President Fred Niles, expecting $3.5 million volume this year, said the name change more accurately describes the outfit's diversification in the fields of tv, industrial films, live "business theatre" presentations and other business development services.

**Record lineup claimed for 'Digest' series**

What was described as the largest station lineup ever to carry a regularly scheduled program series was slated to broadcast the premiere of All America Wants to Know yesterday (July 30).

The monthly half-hour public service series for both radio and tv, produced by Reader's Digest at no cost to stations, is being carried on tape on 1,016 radio stations in 50 states and on film on 144 tv outlets in 45 states.

Three one-minute breaks during each program are available for local sale, public service announcements or station promotion spots. The Digest itself will have no commercials as such during the programs, but will identify its role as producer and use visual promotions on television for the magazine at the beginning and end of each program.
Adlai Stevenson set for ABC series

In step with the Kennedy administration's push for making the most effective use of television in explaining its policies, problems and progress to the American public, Adlai Stevenson, head of the U.S. Mission to the United Nations, will be featured in a half-hour report on ABC-TV on alternate Sundays, 3-3:30 p.m., starting Oct. 1. A sponsor for the series of 13 *Adlai Stevenson Reports* programs is being sought by the network.

To be produced by Arnold Michaelis and Stanley Frankel in association with ABC-TV, the series will feature Mr. Michaelis in conversations with Mr. Stevenson and his guests, including heads of state and other foreign and U.S. officials, as well as key figures from other fields. Mr. Stevenson said, "There is certainly little doubt that television at its best can add a dimension to the appreciation of almost any of the great problems and issues of the day. We of the U.S. Mission are hopeful that the ABC series will provide a new insight into the workings of the U.N."

Film sales...

The Beachcomber (Filmmaker): Sold to American Stores Inc. for showing in Philadelphia, Baltimore, Wilkes-Barre, Pa., and Syracuse through Gray & Rogers Adv. Also purchasing was Streitmann Biscuit Co. for showing in Nashville, Tenn., Roanoke, Va., Orlando, Fla., Bristol, Va., Clarksburg, W. Va., and Birmingham, Ala., all through Ralph H. Jones Co., Cincinnati.

King of Diamonds (Ziv-UA): Sold to Jackson Brewing Co. for KGNC-TV Amarillo and WAFB-TV Baton Rouge; Fels and Co. for alternate week sponsorship on WXEX-TV Richmond, Va.; WBRE-TV Wilkes-Barre, and WNEM-TV Saginaw-Bay City, Mich., and to Kroger Co. for KSLA (TV) Shreveport, La.; WJW-TV Cleveland, and WFMJ-TV Youngstown. Also sold to Acme Building Supply for WTOK-TV Meridian, Miss.; G. D. Reddick Inc. for WFMY-TV Greensboro, N. C.; Duke Supply Co. for WJIC (TV) Pittsburgh; Stag Beer for WTVP (TV) Decatur, Ill.; International Harvester for KFBC-TV Cheyenne, and Streitmann Biscuit for WTVN (TV) Columbus, Ohio. Stations signed are: KGO-TV San Francisco; WJAR-TV Providence; WMCT (TV) Memphis; WINK-TV Ft. Myers, Fla.; KHSI-Channel Redding, Calif.; KOLO-TV Reno; KOLN-TV Lincoln, Neb.; WEHT (TV) Evansville, Ind.; WTVH (TV) Peoria; and WSFA-TV Montgomery, Ala. Now in 171 markets.

Bozo the Clown (Jayark Films Corp.): Sold to WKBT (TV) La Crosse, Wis. Now on 199 stations.

Big Time Wrestling (Barnet-Doyle, Indianapolis): Sold to KGW-TV Portland.

**WHAT! the new KAKC FIRST AGAIN!**

That makes almost *5 Years in a Row!*

Yes sir, and to top it off, advertisers who use the new KAKC are selling like never before because the new KAKC is not only the "Quality" station in the Tulsa market but also the "Quantity" station. Yes, you get the best of everything when you use the new KAKC. It's the best "IMAGE BUY" in Tulsa and Northeastern Oklahoma, too. It's been that way quite awhile . . . and we intend to keep it that way.

*According to Hooper and Pulse.*
ABC-TV newsman risks life for POWs

Jack Begon (l), ABC-TV newsman who accompanied French Foreign Legion troops during the recent fighting in Bizerte, found himself in dead center of one skirmish. Here he talks to a French paratrooper, while three Tunisian prisoners stand by at right. The Tunisians were engaged in street fighting with French paratroopers when they attempted to surrender to AP photographer Joseph Babout. The French troops threatened to shoot the three men, so Mr. Begon shielded them with his body until assured that they would be treated as prisoners of war.

Fountainhead to handle W-S sales regionally

Sterling Television Co., New York, has formed a new distribution organization, Fountainhead International Inc., to market tv specials produced by Wolper-Sterling Productions Inc. Fountainhead’s initial purpose is to handle regional sales of the Wolper-Sterling output.

Saul J. Turell, Sterling president, announced that if conditions warrant, Fountainhead may draw specific sales assignments in other fields also. Regional selling, he noted, presents a unique set of marketing problems for the tv package. Wolper-Sterling Productions, an affiliate of Sterling Television, which owns 50%, was formed last year and has grossed approximately $750,000 in its first 12 months of operations, according to authorities.

Agricultural reporting service made available

The formation of Washington Farm Broadcasters, an agricultural reporting service providing packaged tape programming and spot-feature coverage for radio stations, was announced last week.

Partners in the new firm are John F. Lewis, president of John F. Lewis Assoc., an agricultural information and analysis firm, and producer of Farm Review, heard each weekend on NBC Radio, and Claude A. Mahoney, Washington farm editor for the Mutual Network.

The firm will provide a wide variety of tape and “beeper” coverage programming pertinent to agriculture in addition to material available from the U. S. Dept. of Agriculture.

Washington Farm Broadcasters headquarters in the Homer Building, 601 13th St., N.W., Washington, D. C. Telephone: District 7-5506.

We won’t do it again, folks

Executives of CBS News and NBC News acknowledged last week they may have confused viewers when they ran a day-old tape of Commander Alan B. Shepard talking with Capt. Virgil Grissom during their live tv coverage of Capt. Grissom’s flight into space on July 21. The tape was an “exact simulation” of this part of the space flight but was shot at a rehearsal during the previous day.

Through both CBS-TV and NBC-TV carried brief announcements that the tape portion was an “exact simulation,” network news officials said they realized that some viewers were confused.

A spokesman for NBC News said he doubted the network would integrate simulated or prepared tape with live tv in the future except in rare instances and, if it did, it would carry several explanations during the telecast. A spokesman for CBS News conceded he was “not satisfied that we did everything humanly possible” to avoid confusion in the Grissom-Shepard episode, and said steps would be taken in the future to prevent a repetition of the incident.
TAC signs first tv station subscribers

WEST COAST OUTLETS JOIN DURING PROGRAM HUNT

Six west coast tv stations have signed as the initial member subscribers of the recently-formed Television Affiliates Corp., New York, which will make locally produced cultural, informational and educational television programs available to members, Richard Carlton, TAC executive vice president revealed last week.

Mr. Carlton said more than 30 programs have been submitted to TAC by stations for incorporation in the organization's library. TAC hopes to have at least 100 programs ready for release to member stations by Jan. 1, 1962, when distribution begins.

The charter stations were signed up two weeks ago by Robert Weisberg, vice president of TAC, who reported he had made a business trip to the West Coast primarily to obtain programming. He said station officials there expressed "such enthusiasm" that many asked to sign as members. The first outlet to sign as a TAC member was KTTV (TV) Los Angeles, and others who joined shortly thereafter were KRON-TV San Francisco, KOGO-TV San Diego, KOIN-TV Portland, KOMO-TV Seattle and KCRA-TV Sacramento.

Program notes...

Presented jointly - Dahlia Ltd. will produce, and ABC-TV Films will distribute, a series of 65 quarter-hours of filmed beauty and fashion programs starring Arlene Dahl, with rights to be held jointly by the syndicator and the production company, owned by Miss Dahl. In announcing the series, which will be completed by the end of the year and ready for use during the coming season, Henry Plitt, president of ABC-TV Films, said that the programs are being made for twice-weekly broadcast, but are so designed that they can be turned into a five-minute daily strip if the stations prefer. He estimated that Dahlia's portion of the proceeds would exceed $225,000.

Return of 'Macbeth' - The two-hour color film production of "Macbeth," televised on Hallmark Hall of Fame by NBC-TV last November will be repeated on the network and again sponsored by Hallmark on Oct. 20, 8:30-10:30 p.m. (CLOSED CIRCUIT, July 10). The show, which won five Emmy awards, also is being shown in foreign art theatres in an effort by the producers to recoup its more than $500,000 production cost. The repeat TV showing in this country, however, rules out any near future attempt to show the play in domestic movie houses.

New film house - Tele-Video Productions Inc., N. Y., a motion picture production firm, specializing in films for tv, as well as tv commercials, has been formed. Address is 316 W. 57th St.

Wolper engaged - David Wolper has signed a $2 million deal with Ziv-United Artists to produce a series of 39 "documentaries," half-hour dramatizations of the life stories of prominent people, with the individual portraying himself.

**MOVE TO LONGER PROGRAMS**

Canadian proposal on radio ads would discourage fragmentation of programs into shorter periods

Proposed changes in Canadian broadcasting regulations would encourage a return of unbroken programming to radio by permitting commercials to be lumped together.

The new regulations proposed for am and fm broadcasting, announced by the Board of Broadcast Governors, will be discussed at public hearings of the board beginning Aug. 22 in Ottawa. The current regulations were put into effect before the board was created as a national regulatory body in 1958.

The board's proposals stipulate only that the time devoted to commercials shall not exceed 20% of total broadcasting time between 6 a.m. and midnight, and that total advertising time shall not exceed 30% of any clock hour. At present, radio stations are limited to five spot advertisements during any 15-minute period—a regulation which has led to fragmentation of programs by commercials.

"We intend to send a directive to stations urging, but not forcing, them to leave two hours a day clear of ads except at quarter-hour intervals. It is more or less an experiment to see whether advertisers will sponsor such programs and whether people will listen," a board spokesman was quoted as saying.

Radio stations would not be required to carry a minimum proportion of programs of Canadian origin, as tv stations are required under BBG rules. However, radio stations would have to file annual reports showing how they have "promoted and ensured the greater use of Canadian talent" during the previous year.

Network regulations, similar to those in force for tv, would require radio networks and their affiliate stations to sign formal affiliation agreements and file them with the board within 30 days of signing. No station would be permitted to enter into an affiliation agreement with more than one network or with a non-Canadian network.

The board looked forward to a time when it might grant permission to a private radio network to begin operations in Canada in competition with the CBC. However, there is little likelihood of a new network for radio in the near future, due primarily to lack of available money.

Under the proposed regulations, no advertising would be permitted in the body of a newcast, including the time between an introductory summary of the news and the detailed reports.

Bringing radio into line with tv on beer and wine advertising, the proposed regulations state that in provinces where such advertising is permitted, wineries may sponsor programs of not less than 10 minutes duration. Sponsorship announcements—the only form of advertising which would be permitted—would be allowed only at the beginning or end of each program unless the program were more than 10 minutes in length, when the name of sponsor might be introduced at 15-minute intervals. Program format, form of sponsorship announcement and continuity would have to be approved in advance of broadcast by a board representative.

The hearing opening Aug. 22 will be the second comprehensive hearing the board has held into radio regulations. The first, in 1959, left regulations basically unchanged.

Persons who want to make representations at the hearings should file written briefs with the Secretary of the Board by Aug. 12. Ten copies of each brief are required.

**CBC-TV fall lineup has 15 new shows**

The Canadian Broadcasting Corp. has announced details of its fall and winter English-language tv schedule, including nine new Canadian program series.

The new American series beginning over CBC in the fall include Bonanza, whose star Lorne Greene is Canadian (9 p.m. Sun.), The Garry Moore Show (8 p.m. Tue.), Fasten Your Seat Belts (9 p.m. Mon.), Hazel (8:30 p.m. Thur.), Car 54 (8:30 p.m. Fri) and The Defenders (9 p.m. Thurs.). CBC has rights to pre-release in Canada for all these programs except Bonanza, which will appear simultaneously with its U.S. release.

Some public affairs programs will be moved into prime evening time, among them CBC News Magazine, switching from 5 p.m. Sunday to 10 p.m. Wednesday. The time devoted to in-school educational programs will increase from 13 to 58 half-hour broadcasts on the national network.

For the first time, CBC coast-to-coast network will carry National Football League games on World of Sports in co-operation with CBS.

The new Canadian network shows will include the musical Tommy Ambrose Show (9 p.m. Fri.); Mademoiselle de Paris (2:30 p.m. Wed.), carrying tours and interviews from Paris and directed towards women; Playdate (8 p.m. Wed.), hour-long Canadian productions of plays by top Canadian and U.S. writers; Concert (3 p.m. Sun., beginning Dec. 31), classical music; Almanac (5 p.m. Sun., also beginning Dec. 31), outside broadcasts; The Lively Arts (10:30 p.m. Tues.), 20-week series on the arts; Ensemble (3 p.m. Fri.), semi-classical music; Discovery (5 p.m. Sun.), a semi-documentary series; Canada at War (10 p.m. Tues.), a history using official film footage to appear over 13 weeks early in 1962.

**CTV reports policy on CBC affiliates**

CTV, Canada's new private tv network, has reiterated its stand that it has a right to use CBC network stations outside reserved time, in cases where sponsors want to extend coverage beyond the eight CTV members. It added, however, that it intends to do nothing to interfere with CBC's present relations with affiliates.

The CTV statement, aimed primarily at advertisers and agencies, follows a warning by CBC President Alphonse Ouimet that any move to split the CBC network in this way could prove disastrous to Canadian broadcasting in the long run. CTV affiliates may not join another network without consent.

In its new statement, CTV pointed out that until its microwave link is completed—a matter of 18 months or more from now—it can supply CBC affiliates only with programs on film or videotape. And—apparently distinguishing between such a service and network affiliation—CTV pointed out that according to section 14.5 of the broadcast regulations, no station shall be prohibited from broadcasting programs supplied by any person in broadcast time other than reserved time.

**NBC unit to produce live Canadian tv fare**

NBC, operating through its subsidiary, NBC Canada Ltd., has organized a tv production unit in Toronto. The new unit will deal exclusively with development and production of live tv programs for Canadian viewers.

Roger Muir and Robert Nicholson were named as executive producers of the first programs, which will soon be offered to the Canadian networks and stations.
Motorola introduces 23-inch color tube

SEeks MANUFACTURER FOR SHORT-NECKED PRODUCT

Motorola Inc. last week showed a 23-inch, 90-degree rectangular color picture tube and said it was ready for mass production.

The company expressed the hope that tube manufacturers would become interested in making the tube. Motorola is a radio-television receiver manufacturer and does not make picture tubes.

The announcement was greeted with some skepticism by RCA.

Edward R. Taylor, executive vice president of Motorola, told a New York news conference that "for years tube makers have told us that a wide angle, short-necked color tube was several years away, if ever. Well, here it is today." He said the working prototype color tube, which had its first public showing in New York, climaxed a "night-and-day" effort that began two months ago.

The significance of the Motorola-developed color tube is its shorter and "less bulky" size than color tubes used in receivers currently marketed. The Motorola tube is five inches shorter than RCA's 21-inch 70-degree round color tube, which is used in all color sets now on the market. Motorola executives expressed the opinion that it's chiefly the large size of today's color sets that is holding back color set sales. The prototype tube shown was housed in a modern Drexel cabinet of a size similar to those used for conventional black and white TV receivers.

Color By Summer • Mr. Taylor, who expressed Motorola's hope that Motorola would be able to introduce a complete line of color TV receivers next summer, said Motorola had spent nearly $100,000 to prove its prototype tube could be developed. "This money will not have to be spent again by anyone in the industry to get the basic answer to the question," he said "it is reasonable to expect tube makers to pick up the ball and run with it the rest of the way."

He said Motorola will not go into the manufacture of picture tubes, and will share its technical findings with the industry. Mr. Taylor predicted cost of receivers using the new wide angle tube would be "comparable" to the price range presently available.

W. Walter Watts, group executive vice president, RCA, issued a statement on RCA's position in reference to the Motorola development. Mr. Watts said:

"Over the years, there have been a number of announcements made regarding the development of color television tubes. However, there is today only one color television tube on the market and that is the three-gun shadow mask tube manufactured by RCA.

"This tube produces an outstanding color picture. Primarily because of its performance, practically every major manufacturer has announced plans to market color receivers this year.

"We are, of course, interested in any developments in this field. We have experimented with a number of different color tubes including 23-inch rectangular types but the color tube currently in use is the only one that meets our rigid standards."

Mr. Watts concluded that RCA would be happy to evaluate the Motorola color tube, but, "as a practical matter, it has been our experience that it would take several years for a manufacturer to get a new tube to the market place in any quantity."

Technical topics...

New manufacturer • Now in the process of selecting distributors and manufacturer representatives, the newly formed Comrex Corp. has announced three models of wireless microphones as its first products. Subsequent products will include different types of high frequency and transistorized communications equipment for both commercial and consumer use. Information may be obtained by writing the company at box 51 Sudbury, Mass.

New occupant • Raytheon Co. has agreed to lease the building formerly occupied by CBS Electronics in North Windham, Me., and has arranged to purchase the plant's specialized machinery from CBS. The new firm will employ about 100 people, mostly women, in assembling tube mounts for television sets.

Rep named • Stoklos Sales Co., Pacific Palisades, Calif., named sales representative by Electronic Applications, Stamford, Conn., in Arizona, California, and Nevada for AKG, EMT and Nagra. Electronic Applications Inc., imports headphones and microphones for mono and stereo applications from AKG of Vienna, Austria; studio turntables and high-precision electrical equipment from EMT, West Germany; and battery-powered Nagra professional tape recorders from Nagra, of Lausanne, Switzerland.

Groundbreaking • Ground has been broken for Prodelin Inc.'s new plant in Millstone Township, New Jersey. The firm designs and manufactures antennas and transmission line systems. The 60,000 square foot facility has a scheduled completion date of late fall.

Today's modern stations are using an ever-increasing amount and variety of broadcast material. AUTOMATIC TAPE CONTROL allows unlimited use of taped spots, programs and production aids without threading, cueing or rewinding. Material is recorded on tape in plastic magazines and stored for instant use. Operator simply slips the magazine in a playback unit, pushes a button and the material is on the air. The tape resets itself, ready for reuse or storage. All ATC units provide for a second auxiliary control tone which can be used to automatically start other equipment. ATC is made by the originator and largest manufacturer of automatic tape control systems...now in use in over 600 radio and TV stations.

SPECIFICATIONS
Frequency Response, ±2 db from 70 to 12,000 cps, ±4 db from 50 to 15,000 cps; Signal-to-noise Ratio - 55 db; Wow and Flutter-Under 0.2% RMS.

NEW ATC 55

Newly developed unit permits playback of 55 consecutive magazines without resetting or reloading. Used in sets of two or more, ATC 55 can give you completely automated broadcasting.
Space system, trans-ocean tv by 1963
KENNEDY FOR PRIVATE OWNERSHIP; SENATE HEARINGS TO BEGIN

A space communications system, including intercontinental tv, on a regular, commercial basis is foreseen by 1963, FCC Commissioner T. A. M. Craven, who is assigned to handle the FCC's part in developing U.S. policy on international space communications, told the House Commerce Committee last week when the committee, headed by Rep. Oren Harris (D-Ark.) heard witnesses from various government agencies and departments.

Early in the week, the FCC issued a call for existing international communications carriers to set up a committee to develop plans for a joint venture to combine to handle space communications.

Kennedy Statement • The FCC's announcement followed by one day a policy statement by President Kennedy upholding the principle of private ownership of the space communications facility and system.

On Thursday, Sen. John O. Pastore (D-R.I.) announced that his Senate Commerce communications subcommittee will begin hearings on space communications tomorrow at 2 p.m. in the new Senate Office Bldg. First witness will be FCC Chairman Newton N. Minow.

Speedy Action • Running throughout the testimony of witnesses, the FCC's announcement and the President's statement is the need for speed in putting space satellite communications on a regular basis.

As has been predicted for some time, one of the first benefits of the country's space program is expected to be in communications.

Congressional interest was expressed on two fronts: (1) How long will it be before there is an operating space communications system? And, (2) Is there duplication in this field among several federal agencies.

Space communications programs are underway by the National Aeronautics & Space Administration and the U.S. Army.

A third question, raised at the congressional hearings, is whether the FCC's plan for a joint-venture company to operate and own the satellite system might permit one company, or a group of companies, to dominate the field.

Fear has been expressed in a number of quarters that the AT&T might end up in a monopolistic position in the carrier's carrier.

Limited Ownership • The FCC position tentatively looks to a jointly owned company comprising the existing and future international communications carriers. This has run into opposition from General Electric Co. and General Telephone & Electronics Corp. Both have asked that they be permitted to join in the ownership of the system. Last week, however, the FCC turned down petitions by both companies.

The commission stated, however, that these denials were without prejudice—which has led to the belief that it may reconsider this limitation after it has received a proposal for the establishment of the joint venture.

Credence is laid to this possibility, it is pointed out, because Lee Loevinger, antitrust chief of the Dept. of Justice, is on record in favor of opening the satellite syndicate to domestic carriers and possibly "hardware" manufacturers as well as to existing or future international carriers. He so expressed himself last week in testimony to the House committee.

Ad Hoc Committee • Urging speed, the FCC asked the present 10 international carriers to establish a committee to formulate the organizational and operational formulae for owning and operating a joint venture space communications company. It asked that the committee report back no later than Oct. 13. After that time, the FCC said, it would reassess the whole picture in the light of all proposals—and presumably expressions from Congress.

The committee will consist of representatives of these carriers, the FCC said:

American Cable & Radio Corp., (Mackay Radio, Commercial Cable, All America Cables & Radio and Globe Wireless, all AT&T subsidiaries); AT&T, Hawaiian Telephone Co.; Press Wireless Inc.; Radio Corp. of Puerto Rico; RCA Communications Inc.; South Puerto Rico Sugar Co.; Tropical Radio Telegraph Co.; U.S.-Liberia Radio Corp. and Western Union Telegraph Co.

The committee, due to meet for the first time Thursday of this week, will have these objectives as the basis for discussion:

- Global coverage.
- Ownership of the satellite to be open to interested governments.
- Access to use of the space system by other carriers and foreign governments on an equitable basis and on reasonable, non-discriminatory terms.
- Structure of the holding company shall be so arranged that no one participating company will be able to dominate or control and no one participating company will be able to benefit from equipment procurement through its subsidiaries. IT&T, AT&T, RCAC are connected with manufacturing electronic companies.

The meeting on Thursday will be chaired by Commissioner Craven. This is the chaperonage which permits competing companies to meet together without running afoul of the antitrust laws. Bernard Strassburg, assistant chief of the FCC's Common Carrier Bureau, is expected to spell Commissioner Craven in presenting at the meetings.

Uncle Sam Still In • That the government will continue to play a role in the space communications field was made clear by President Kennedy in his statement on communication satellite policy. This was based, it is understood, on the recommendations of the National Space Council.

The President said that the government will "conduct and encourage" research and development: conduct and maintain supervision over all international agreements and negotiations; control all launchings; make use of the commercial system for general government purposes (and establish a separate
Experimental Permission • From various sources in Washington last week it seems evident that NASA has decided to agree to AT&T's request for permission to send up an experimental satellite—with the Bell company paying the cost of launching facilities and the rocket booster. This is now undergoing final negotiations on the contract form and other details. The cost, it is believed, will reach over $150 million.

At the same time, NASA said it was close to a final $314-million contract with RCA for that company to build the satellite which NASA hopes to put up soon under the name Project Relay. All of these are considered low-level satellite orbits.

The Department of Defense has under development a space communications system, Project Advent, which looks to putting up an active satellite repeater 22,300 miles above the earth, as a "stationary" relay platform.

6.2 million tv sales in 1961 predicted

Prediction that there will be 6.2 million tv sets sold to the public in 1961 was made last week by an EIA committee chairman.

Frank W. Mansfield, Sylvania Electric Corp., chairman of EIA's marketing data policy committee, pointed out that current manufacturer, distribution and dealer inventories are at one of the lowest levels in the last six years and that current monthly production rate is running "below" the requirements of the market.

He pointed out that inventories, which reached a high of 2.8 million in late 1956, were at 1.7 million through May of this year. Since the going rate of retail sales for April and May has exceeded 7.1 million receivers, Mr. Mansfield said, industry sales should exceed 6.2 million sets this year.

Monthly tv set production through May, Mr. Mansfield said, averaged only 435,000 sets. Production therefore, he estimated, must average 680,000 sets monthly for the rest of the year. "We can expect either a rapid increase in production rate by mid-summer," he added, "or a shortage of sets this fall."

Mr. Mansfield made his remarks in a report to the EIA Consumer Products Div., reviewing its decision to discontinue gathering statistics on retail sales. The last such report, which was begun in 1951, will be for July, EIA reported.

Sylvania to re-enter color set production

Sylvania Electric Products Inc. will put a 21-inch color tv set on the market in mid-September. The set is the first color receiver to be introduced by Sylvania since 1956. Deluxe console model is equipped with three-gun shadow-mask color picture tube and transformer powered chassis. Manufacturer's suggested list price: $825. Sylvania will begin a series of color-tv clinics for its distributors in August.

Sylvania's re-entry into color set production leaves only two major manufacturers—Westinghouse and Motorola—which have not yet gone into the color field.

Eastman Kodak develops 16mm reflex camera

Eastman Kodak Co., Rochester, N.Y., announces the availability of a new professional 16mm reflex camera, a low cost, compact unit allowing its user to view the image photographed through the taking lens while the unit is in operation.

The camera is suited for the shooting of footage that will later be released for showing with an 8mm sound projector. A mirrored surface on the shutter reflects the image into the finder.

Shipped with one 400-foot magazine as standard equipment, the chamber can also be used with 100-ft or 200-foot rolls of film on the spool. Also available are 1,200-foot magazines. The 25mm f/1.4 Ekton lens mounted in a three-position turret also is standard.

Eugene F. Burke and Frank G. M. Corbin, vps of Milburn McCarty Assoc., New York pr firm, elected to board of directors.

Reginald W. Twiggs, vp and manager of Los Angeles office of Cunningham & Walsh, named vp and principal in J. W. Raymond Adv. there.

Robert J. Livingston, vp and manager of Geyer, Morey, Madden & Ballard, regional office in Portland, Ore., will transfer Aug. 1 to agency's Omaha, Neb., branch, but will continue to supervise Portland office for present. He will succeed Lester M. Branch, vp and manager of Omaha office, who is retiring after 32 years with company. Mr. Branch will serve GMM&B as consultant on part-time basis.

Alice Moseley, copy supervisor, McCann-Erickson, N. Y., appointed vp and associate creative director.

Al Johns, real estate editor of Los Angeles Times, named vp of Coleman-Parr, Beverly Hills advertising agency, where he will head pr division.

Cecil E. Summers appointed sales manager for R. J. Reynolds Tobacco Co. He previously served as assistant to company's sales manager, John S. Benson and Charles B. Coe named assistant sales managers.

Bill Hillinck, publicist in Hollywood office of Young & Rubicam, resigns to form own pr firm in San Francisco.

Lawrence S. Reynolds, Frank P. McDonald and Peter T. McLean, assistant broadcast buyers for Doherty, Clifford, Steers & Shenfield, N. Y., appointed broadcast buyers.

Frederic Lyman Horton, general sales executive with NBC Radio and TV Spot Sales, named vp of Norman, Craig & Kummel, New York. Mr. Horton joined NBC as sales representative in 1940, remaining for six years before leaving to become salesman for Metropolitan Sunday Newspapers. In 1951 he rejoined NBC and seven years later was appointed general sales executive for NBC Radio network. His duties were expanded in 1960 to include radio and tv spot sales.

William Ohle, formerly with Needham, Louis & Brorby, joins Leo Burnett Co., Chicago, as account executive. Jack Siegel, tv art director with McCann-Erickson, appointed tv art director in tv commercial department and former vp, appointed vp with Compton Adv., named commercial producer in tv commercial department in New York.

Lee Hughes, with J. Walter Thompson, N. Y., joins Doherty, Clifford, Steers & Shenfield, that city, as account executive.

Donald M. Mullen joins Zimmer, Keller & Calvert, Detroit advertising agency, as account executive.

Frank Hovore, manager of advertising, promotion and press for KRCA (TV) Los Angeles, joins Jack Packard Adv., Glendale, Calif., as account executive.

E. Gordon Gibbs, assistant manager, traffic department, Young & Rubicam, N. Y., succeeds Harold O'Sullivan as manager.

Bryan Houston, president, Fletcher Richards, Calkins & Holden, N. Y., appointed to board of directors, Advertising Federation of America.

James R. Cashel joins Street & Finney as research director. John A. Zalud, research director, promoted to account executive.

Charles H. Newbrand, with Foote, Cone & Belding since 1941 in both New York and Chicago, elected treasurer at Chicago headquarters, succeeding Joseph W. King, retired.

Ruth Andre, who has represented The Pillsbury Co. as Ann Pillsbury for past 11 years, resigns as director of company's home service center.

Austin H. Gedney, account executive, Lambert & Feasley, N. Y., named account supervisor on Richard Hudnut account.

Ronald L. Bouck, properties manager and assistant in radio-tv production for Evans & Assoc., Salt Lake City advertising agency, joins William Kostka & Assoc., Denver pr and advertising consultants, as assistant advertising manager.
Frederick A. Peck appointed head of art department for Maxon Adv., Detroit.

Jack Lovell, formerly art director for American Optical Co., N. Y., joins Fuller & Smith & Ross, Boston, in same capacity.

Victor L. Olsen, copywriter for Campbell-Ewald, Detroit, joins Kenyon & Eckhardt, that city, in similar capacity.

Jim Carling, copy chief of Los Angeles office of CCI division of Communications Affiliates, joins Kennett PR Assn., as chief of news bureau services.

Barbara Mary Harrison joins Louis Benito Adv., Tampa, Fla., as member of copy department.

**THE MEDIA**

Peter M. Affe, manager of daytime program operations, NBC-TV, named station manager, WNBC-TV New York. Mr. Affe joined network in 1943. In 1951 he transferred to WNBC-TV as supervisor of production and operations, later becoming program manager, manager of operations, manager of studio and film operations, and in August 1956, director of operations for WNBC-AM-FM-TV. He rejoined NBC-TV network in 1959 as manager, facilities planning and operations control. He has been daytime program operations manager since June 1960.

Keith T. McKenney, general sales manager of WJKY-TV Detroit, named managing director of WSPD-TV Toledo, Ohio. He succeeds Joe Evans, recently appointed general manager of Storer Programs, newly formed tv programs company. Floyd E. Beason resigns as general sales manager of WSPD-TV.

Albert J. Gillen, vp and director of sales for WAPI-AM-FM-TV Birmingham, Ala., named general manager of WPRO-TV Providence, R. I.

Richard H. Harris, vp of Dandy Broadcasting Co., with which he served as general manager of KLEO Wichita, Kan., and KQEO Albuquerque, N. M., named general manager of WDGY Minneapolis, Minn.

Dick Pike, WJW-TV Cleveland, air personality, appointed general manager of WNOP Newport, Ky.

George E. Le Zotte resigns as program manager of WTRY Troy, N. Y., to become station manager of WEIE Albany-Troy, N. Y. (WEIE plans to begin broadcasting Sept. 1.) Mr. Le Zotte had previously been chief announcer for WAVZ New Haven, Conn., owner of WTRY. He had been connected with stations for 13 years.

Frank Boehm, vp and director of research, promotion and advertising for Adam Young Inc. and Young TV Corp., station representatives, resigns. Mr. Boehm, who joined Young more than five years ago, will announce his future plans shortly.

William J. Griffiths, formerly with WELM Elmira, N. Y., and recently in real estate development in Horseheads, N. Y., appointed general manager of WJOY Jamestown, N. Y.

Robert F. Schloff, appointed station manager of WDTM (FM) Detroit.

Martin Ross, assistant to general manager of WPTR Albany, N. Y., promoted to station manager. Anthony Rocco, sales manager of WKBW-AM-TV Buffalo, joins WPTR as general sales manager.

George H. Rogers Jr., and Donald E. Hardin appointed national sales manager and national sales service manager, respectively, for WKRC-TV Cincinnati. Mr. Rogers replaces Charles P. Dwyer, who resigned to become director of ABC-TV's international sales organization. Mr. Rogers has been with station for seven years, serving as commercial production manager, sales account executive and national sales service director. Mr. Hardin, advertising merchandising director, replaces Mr. Rogers.

William Beindorf, J. Robert Cole, Kenneth M. Johnson and Briggs S. Palmer appointed account executives on New York staff of CBS-TV Stations national sales department. Mr. Beindorf was account executive with WCBS-TV New York; Mr. Cole was sales service manager for KNX-TV Los Angeles; Mr. Johnson's most recent post was executive vp of Daren McGwire, N. Y. rep firm, and Mr. Palmer was account executive for Harrington, Righter & Parsons, station rep., that city.
Ruth Supiamo, member of research staff since 1958, named operations head of tv research for Blair Television Assoc., N.Y. Earlier she was on media research staff of N. W. Ayer & Son, N. Y. and with A. C. Nielsen Co., N. Y.

Lawrence Walker, executive vp and general manager, WSOC-TV Charlotte, N. C., appointed to newly-created advisory committee on etv by N. C. State Board of Education.

Samuel J. Slate, vp and general manager, WCBS New York, appointed chairman, legislative committee, Radio & Television Executives Society, New York.

Paul Wigand and John O'Connell, members of CBS-TV Network accounting department, promoted to manager of cost accounting and general accounting, respectively. Louis Werle, supervisor of payables, named manager of accounts receivable and payable.

William J. Hendricks, account executive for WXYZ-TV Detroit, named manager of newly formed ABC-TV national station sales office in Detroit.

W. C. Pulley appointed account executive for WXEX-TV Richmond-Petersburg, Va. Lou Caplan, previously with Variety Food Brokers of Richmond, appointed merchandising manager of both WXEX-TV and WLEE Richmond.

John R. Fisher Jr., formerly in WAKE Atlanta, Ga., sales department, to WGKA-AM-FM, that city, as account executive.

Charles Warner, formerly on sales staff of WCBS-TV New York, named local and regional sales manager for WSPA-TV Spartanburg, S. C.

Harry M. Brawley, director of public affairs and promotion for WCHS-TV Charleston, W. Va., appointed chairman of group organized for furtherance of educational radio and tv in that state.

John P. Duffy, radio account executive with George P. Hollingbery Co., appointed to New York radio sales staff of Edward Petry & Co. Joseph V. Devlin, media supervisor for Dancer-Fitzgerald-Sample, also named to sales staff.

Anthony Reda named tv director of WTWS (TV), etv outlet located on campus of U. of Detroit. Mr. Reda, production manager for station since 1959, now heads reorganized tv production operation newly assigned to College of Arts & Sciences.

John M. Schinkner, news director of KOYN Billings, Mont., and KBON Great Falls, Mont., named chief engineer. Larry K. Brownfield, appointed to WSFA Sarasota, appointed air personality. Rob Payne, air personality with WSBD Hedstrom, Fla., joins WHYS in similar capacity.

Gene S. Ball, advertising director of H. A. Murr Grocery Corp., Denver, Colo., appointed promotion manager of KLZ, that city.

George R. Dunlevy, program director for KOIL Omaha, Neb., named national program director for WICE Providence, R. I., and WLOW Norfolk, Va.

Edward F. Ryan, sales promotion manager for WHTN-TV Huntington, W. Va., appointed advertising and promotion manager for WRC-TV Washington.

GOVERNMENT

Bernard H. Linden, engineer-in-charge of Los Angeles FCC office, retires after 44 years of federal service.

ALLIED FIELDS

Harold G. Cowgill, chief of FCC's Broadcast Bureau, joins Washington law firm of Smith, Hennessey & MacDonald. Mr. Cowgill was with prede-
censor law firm when he was appointed chief of FCC’s Common Carrier Bureau in 1954. He was appointed to Broadcast Bureau leadership in 1957, resigning early this year with charge in administration. From 1953 to 1954 he served as vp and general manager of WTVP (TV) Decatur, Ill.

Robert D. Welsh appointed account representative for advertiser service department of American Research Bureau, Beltsville, Md. He replaces Gene Thompson, who was named to head sales promotion and graphics department.

DEATHS
Bernard W. Cruger, 59, manager of transmitters and technical maintenance for General Electric broadcasting stations, died July 23 of heart attack in Schenectady, N. Y.

John B. Kennedy, 67, radio and newsroom commentator and magazine editor, died July 22 in Toronto hospital after investigations, Mr. Kennedy’s most recent broadcast activity was five-minute weekday news and commentary show on Mutual in 1957-58. Program originated at CKLW Detroit-Windsor, Ont., where he has lived since leaving New York in 1956. His broadcast career began in 1934 as m.c. of Voice of Collier’s program on NBC. Several years later he became news commentator and political analyst, first on NBC and later on ABC, and WNEW and WOR, both New York. In earlier years he had served as narrator of MGM’s “News of the Day,” and was managing editor of Collier’s magazine. Mr. Kennedy had a hand in birth of tv, but was not associated with it afterwards. He was m.c. of RCA’s first tv transmission in Camden, N. J., in 1936.

Hyland L. Hodgson, 69, retired advertising agency official, died July 24 in Norwalk, Conn., after long illness. He began advertising career with N. W. Ayer & Son, Philadelphia, in 1919, serving as vp and New England manager from 1926-1931. He left Ayer in 1935 to become partner in J. M. Mathes agency, remaining until 1945 when he became vp and director of Ellington & Co. He retired in 1955.

People register trademarks because trademarks register with people

The "BAND-AID" trademark means Johnson & Johnson. Not any one product in particular, but a whole family of Johnson & Johnson products. That's why it must always be followed by a product name: BAND-AID Plastic Strips, BAND-AID Sheer Strips, BAND-AID Plastic Tape, BAND-AID Clear Tape, BAND-AID Moleskin Adhesive, and so forth. Please mention our trademark as often as you please, but be sure it's followed by a product name. Thank you.

Johnson & Johnson
OUR RESPECTS to Robert Wilson Breckner, KTTV (TV) Los Angeles

Where the excitement of television is

The primary function of an independent television station in a multi-station market like Los Angeles (where seven stations vie for viewer attention) is to provide news, sports and special events coverage of interest to the people of the community.

"That's where the excitement of television is and where the community service is too," says Robert Wilson Breckner, vice president and general manager of KTTV (TV) Los Angeles, "and that's where we at KTTV try to be." How successful the station has been in that endeavor can be succinctly summarized in a single statistic—the more than 5,000 hours of remote broadcasts KTTV has aired in its 12½ year history, far more than any other single TV station, Mr. Breckner believes.

He is proud of that total, proud that it includes great Churches of the Golden West, a Sunday morning full-hour broadcast from a different Southern California place of worship each week, which will celebrate its 10th anniversary this fall, as well as a variety of special events and sports coverage ranging from midsummer beauty pageants to New Year's Day Rose Parades and from football games to bridge tournaments. Bob Breckner produced and directed KTTV's coverage of the National Bridge Championship Tournament a few years back, devising a new TV technique which let viewers at home see the cards in magnified dimension so they could follow the play easily. While completing arrangements for the telecast, he and Richard A. Moore, KTTV president, found themselves with a little time to spare, so they entered a preliminary contest and emerged the victors. "So now I have 1½ masters' points to my credit," Mr. Breckner mused, "and I wish I could find time to improve my game and add to that total."

Sports—Wet and Dry • A year ago Mr. Breckner created a year-round package of more than 100 hours of sports-events telecasts specially designed to suit the interests of Southern California sports enthusiasts. In addition to collegiate football, baseball, basketball and track, the Sports Special also includes swimming, golf and tennis matches and sports car races in its agenda and in the year ahead "we'll also have a water polo game," Mr. Breckner asserts. (He was on the varsity water polo team at Stanford.)

Another Breckner creation is Divorce Court, a video tape series which KTTV started in 1958 and syndicated to some 30 top market stations before selling the complete package of 130 hour-long tapes to Storer Broadcasting Co. earlier this month as the starter for SBC's new program subsidiary. A good station manager ought to know his market and his station and Bob Breckner can qualify on both counts. A native Southern Californian (born July 15, 1920, in Fullerton), he grew up in Los Angeles and its western neighboring communities graduated from Beverly Hills High School and has lived in the area all his life, except for his undergraduate days at Stanford and three years as a naval communications officer with Admiral Halsey in the South Pacific.

Following the war, Bob went to work for CBS Hollywood in the transcription division, was made a contact producer (today the post would be called assistant director, he says), working on such shows as Lux Radio Theater, Suspense, The Whistler and Houseparty, and later became national sales service manager. When CBS bought 49% of KTTV from the Los Angeles Times, which had obtained the ch. 11 grant, Bob launched a persistent campaign to get transferred to the TV side of things and succeeded in getting the job of film director of the new station. This was in the fall of 1948, just before the station's inaugural telecast on Jan. 1, 1949.

Up and Up • Bob has been with KTTV ever since, although CBS pulled out two years later when it acquired full ownership of KTSF (TV) ch. 2, now KNXT (TV) Los Angeles, leaving KTTV as an independent station. From film director, he moved steadily up the ladder to producer, director, sports and special events director (in 1950), assistant program director (fall of 1951), program director (May 1952), vice president in charge of programs (June 1955), general manager (January 1960). Earlier this month (July 1961), he was elected to the Board of the Times-Mirror Broadcasting Co., Licensee of KTTV.

Bob Breckner is married to the former Sally Kendrick, lives with her and their 13-year-old daughter, Betsy, in Brentwood, just west of Beverly Hills. Taller than most (6' 4") and "heavier than I ought to be" (220), Bob lists his hobbies as golf (his wife is usually his golfing partner) and bridge, says he wishes he had time to get to be better at both of them than he is.

Singing is another favorite occupation of Bob Breckner's, so much a part of his way of living that it wouldn't occur to him to call it a hobby. In high school he combined music and athletics with his studies; as a Stanford senior he was a featured singer in the Big Game Gaities and had the male lead in the musical comedy spring show. He also performed in the Navy's own "South Sea Scandals," which had a limited engagement in New Caledonia.

About a dozen years ago Bob and some neighbors who like to sing formed an informal yuletide carol group to entertain themselves and the patients at local hospitals. They took the name of the Voices of Christmas, got orchestra leader Les Brown to direct them and leading motion picture scorers to create original arrangements of the familiar carols for them. At first it was all in fun. Then, four-year-old Michael Burke, son of one of the original members, died on the operating table because his heart failed without the anesthetist knowing of it until it was too late. Now the group had a purpose. They made some records, bought them themselves and sold them to friends, used the money to purchase equipment for St. John's Hospital in Santa Monica to prevent any recurrence of such a tragedy. Today, the group's informal get-togethers have been replaced by a $40-a-plate concert and dinner dance which provides funds for cardiac research sponsored by the Michael Burke Foundation, whose president is Robert Breckner.

Bob also belongs to the Los Angeles County Club, the Hollywood Advertising Club and the Academy of Television Arts & Sciences. He is a member of NAB's committee on video tape. He also belongs to the Directors Guild of America and, in 1950-51, when it was the Screen Directors Guild, was first president of its tv council.

BROADCASTING, July 31, 1961 93
Ray of light

AFTER an anguished half-year, American business should take comfort in President Kennedy's policy statement on satellite communications. Over the opposition of the State Department, some members of Congress and his own braintrusters, he has endorsed private ownership by a joint venture of communications companies within the framework of our free enterprise system.

What is important is that the action implements the policy advocated by the FCC—the same FCC that is making life miserable for broadcasters by applying extraordinary, if not illegal, pressures on programming. Could it be that when the chips are down, as is the case in space communications, the FCC will forget this censorship nonsense?

Hyde and hares

WITHOUT his permission, but in full sympathy with his views, we are impudent enough to attempt in the paragraph below to summarize what FCC Commissioner Rosel H. Hyde told the Idaho Broadcasters Assn., July 19.

Mr. Hyde said broadcasters haven't had guts enough to fight for their honor and their freedom. They have been willing to let the government steal both.

Mr. Hyde, an FCC member since 1946, is too much the gentleman to use language that blunt, which puts him at a disadvantage when debating with certain of his present colleagues. In his lawyer-like way, he is the first member of the FCC to take a strong public stand against the policies of the FCC's new chairman.

Mr. Hyde traced a pattern of growing government control that has been developing for the past year and a half. This pattern was not the invention of the current administration although it has been crystallized since the new administration came into power.

It started December 30, 1959 with a recommendation of President Eisenhower's attorney general that the FCC institute a system of comparing a licensee's performance with the promises he had made.

It was accelerated by a recommendation of the House Oversight Subcommittee that the FCC monitor programs to determine whether "the program balance is in the public interest."

On Sept. 28, 1960, the FCC established a probationary system for checking performance against promise when it issued a regulation providing for the granting of licenses for terms of less than three years.

In December 1960 James M. Landis, special advisor to the President, reported that broadcast programming "bears no reasonable similitude" to the programming that licensees had proposed. Mr. Landis said the FCC "ignores these differentiations at the time when renewal of licenses of the station is before them."

This year the FCC has proposed extensive changes in the program reporting form accompanying license applications. If adopted, this form will require meticulous descriptions of past performance and future plans. As Mr. Hyde put it in his Idaho speech: "Detailed reporting and accounting are characteristics of utility regulation."

The law and court interpretations of it forbid the FCC from entering the area of program control. Yet the advocates of government regulation may have found a way to exercise censorship under the guise of doing something else.

"There are real possibilities, it seems to me," said Mr. Hyde, "that the commission will find applicants making promises in their applications designed to satisfy the commission's wishes as to programming. The operator thus committed must then perform in the manner designed to please the commission or risk being brought to task on the issue of good faith. It does not take much imagination to find elements of prior restraint in such a system."

Yet through this device, said Mr. Hyde, "the unattractive office of censor can be made to appear as guardian of integrity."

And how has all this come about? Said Mr. Hyde:

"I make the suggestion, with concern for the future of broadcasting, that operators of stations haven't made their works or their position adequately understood—a reflection on their efficiency as communicators—or that their demonstration of the advantages of the free-enterprise system should have improved attention."

Again we dare to paraphrase. What Mr. Hyde said was that broadcasting is better than broadcasters have the courage to say it is. It is better than a government could make it. It deserves a strong defense against the sterilization that is inevitable under government control.

If broadcasters put up no more fight against the FCC's proposed program form than they have so far indicated, it may be said that Mr. Hyde has a higher regard for their profession than they have.

Imagery

ON another page in this issue we report on a new research service which is being offered to broadcasters. What we are about to say on this page should not be taken as either criticism or endorsement of that or any other specific service. But the current regulatory mood calls for some admonition, and it is in that context that we enter this caveat.

One of the selling points of the new research project is that it will give broadcasters something tangible to show to the FCC about their service to and interest in their local communities. This can be a powerfully compelling sales point in these times when the FCC mood is hometown oriented to the point where, apparently, license renewals may hinge on the number of local viewers or listeners who can be mustered to testify for or against a station.

In this sort of atmosphere we venture that broadcasters may soon be beset by many "experts" offering ways to get them off the FCC hook. The impulse to buy would be natural. We suggest only that broadcasters look before they jump: Investigate thoroughly before they buy. Legitimate services cannot object to that.
CREATIVITY ... wfmy-tv creates
sales in the nation's 44th market*

This intricate mosaic based on the sculpture of Queen Nefertite is an example of one of the oldest known forms of art . . . the creation of a design from many small pieces of stone.

For the creation of sales, depend on WFMY-TV to bring together 2.3 million viewers and produce results for you in the nation's 44th TV market.*

For full details about WFMY-TV's creative abilities in the growing Industrial Piedmont, call your H-R-P representative today.

Your message on KRLD-TV reaches more homes in the Dallas-Fort Worth market than on any other station. The June, 1961 ARB Market Report shows KRLD-TV far ahead of the field. For instance, in the Average Quarter-Hour Homes Reached Survey, 9 a.m. to Midnight, Sunday through Saturday, Channel 4's share was 39.2% greater than that of Station B, 27.2% greater than Station C, and 246.4% greater than Station D.

*Reach the Dallas-Fort Worth market EFFECTIVELY With Channel 4.*
CLOSED CIRCUIT®

News nears profit

Radio Press International, voice news service which 18 months ago had 14 station clients and was deeply in red, today has 80 station subscribers in U. S. and Canada and is doing volume of roughly half million—close to break-even point. R. Peter Straus, president (and also president of WMCA New York), and Michael J. Minahan, general manager, last week indoctrinated members of FCC and of its Broadcast Bureau with purpose, scope and aspirations of CPI. Service is designed for independent non-net-work stations and is provided through 100 global correspondents, with key bureaus maintained in London, Washington and New York.

Profitable exile

Goar Mestre, Cuban broadcaster whose CMQ radio and tv networks were commandeered by Castro as one of dictator's first acts, has achieved success in Buenos Aires. For several months his ch. 13 station (half-owned by CBS), which has been on air since October 1960, has been No. 1 in audience in four-tv station market—largest in Latin America, with 850,000 tv homes. With him are 14 Cubans formerly on his CMQ staff to whom he gives major credit for his success in Argentina.

Program form hearing?

Those complicated program reporting forms that FCC proposes to add to license applications may be headed for congressional investigation. Rep. William Avery (R-Kan.) is behind move to get audience for protesting broadcasters before House Small Business Committee's Subcommittee No. 6 which may hold hearings on other radio-tv subjects (see story page 74). Rep. Avery wants to explore question whether proposed forms threaten censorship. He also wants Congress to be shown how much clerical work preparation of forms would entail.

South American way

Broadcasting has representative on delegation of businessmen-observers at Inter-American Economic and Social Council meeting this week in Uruguay. He's Theodore F. Koop, CBS Washington vice president. There are 14 in observer group which is attached to official U. S. government delegation.

Come again

Northwestern U. Law School was so pleased with seminar on broadcasting regulation it sponsored last week (see page 62) that it asked some seminarists to come again. When NAB President LeRoy Collins, during seminar, suggested fall conference of broadcasters and FCC to thresh out program and regulation problems, FCC Chairman Newton Minow endorsed idea, and Northwestern Law School dean, John Ritchie III, promptly invited conference to meet at Northwestern.

ABC-TV made video tapes of Northwestern sessions and will offer them to all stations, affiliated with ABC-TV or not, as well as to other networks. Leonard Goldenson, president of ABC's parent AB-PT, and Ollie Trey, ABC president, attended seminar as observers. They figured it cost ABC $10,000 for tape recording.

Getting ready

U. S. Census Bureau, anticipating storm of squawks over its new and shrunken radio-homes saturation of 91.3% for 1960 census (see story page 82), is considering special study of homes that reported they had no radios in working order. Do-it-yourself census method in 1960 had no built-in accuracy check of answers in housing-appliance questionnaire.

Specials for specials

Rising esteem of news specials as vehicles for special advertising pushes was seen Friday with report that Elgin Watch Co. had signed for three hour-long actuality programs on NBC-TV to promote watch-watching at Christmas. Advertisers usually have favored entertainment shows or print spreads for such special promotions. Elgin programs will be seen Nov. 28, Dec. 7 and Dec. 15 in prime-time. McCann-Erickson, New York, is agency.

Network representation

For first time in years a network-owned station representation organization is thinking of taking on new station clients. It's CBS Radio Spot Sales which would add couple of clients if right stations came along. They'd be replacements for two recently lost: WRVA Richmond and KSL Salt Lake City.

NBC Spot Sales which now represents no stations except network's own also is reported "willing" to add outsiders. FCC ban against non-owned television station representation by networks does not apply to radio. At moment CBS Spot represents WBT

Charlotte, WTOP Washington and KOIN Portland, Ore., in addition to network's o&o's.

Return of the native

Climate at FCC hasn't been such in recent years that New Dealer James Lawrence Fly, 1939-1944 FCC chairman, would feel at home. Attitude in recent months has changed, so Mr. Fly presumably now feels more at ease about visiting his old battleground. Last Monday he had private lunch with Chairman Minow, and on Tuesday said hello to many former colleagues—commissioners and staff. Former chairman was in Washington for national bridge tournament.

Votes for violence

Touring hinterlands during past few weeks have been radio-tv program and account executives at number of agencies involved in action-adventure series slated on networks next season. Reason: some stations are showing reticence about carrying "too many" so-called "violent" programs, particularly new ones, in current anti-violence climate. Agencymen's mission is to convince reluctant stations that these programs are suitable fare.

Another monopoly probe?

Capitol Hill observers are speculating that Senate Antitrust and Monop- oly Subcommittee will pick up where Senate Juvenile Delinquency Subcommittee leaves off in its inquiry into tv crime and violence. Question of monop- oly control by networks has been raised in charges of Ziv-UA officials, at juvenile delinquency hearings. Ziv- UA said networks have virtual control of airwaves and use their power to dictate terms to independent pro- ducers. And one of Juvenile Delinquency Subcommittee members is Sen. Estes Kefauver (D-Tenn.), chairman of Antitrust Subcommittee, which has been zealously investigating similar complaints in other fields.

Jingle king

Richard H. Ullman Inc. may become exclusive sales agent for CRC jingles produced by Commercial Recording Corp. of Dallas. If contract is signed (perhaps this week), Ullman will be biggest jingle peddler in country. It already handles jingles made by IMN, Target and Ew Wren Productions. CRC jingles are mostly station promotion spots.
A because Atlanta is different from Milwaukee…

and because people are different in different markets… Storer programming is different! We put together a flexible format to fit the needs of the community… making it local in every respect. That’s why Storer Stations are liked, watched and listened to—why they rate high in the 9 key markets where they are located*. Local programming—quality-controlled—assures you the best is being presented. You know you’ve made the right buy when you buy a Storer Station. Storer representatives have up-to-the-minute availabilities at their fingertips. Important Stations in Important Markets.

THAT'S WHAT WE CALL "REACH"!

There were only FOUR instances of Nielsen-surveyed stations in the U. S. reaching more than 1-million unduplicated homes for a 3 hr. day part in the month of May. WLS did it THREE out of the four times.

Look 'em over. These are the three day parts in which WLS reached over 1-million unduplicated homes (three-hour day part, Monday-Friday...four-week cume):

3-6 PM. . . . . . . . . . . . . . . . . . . . . . . . . . . . . .1,142,900 homes
6-9 PM. . . . . . . . . . . . . . . . . . . . . . . . . . . . . .1,202,300 homes
9-12 Mid. . . . . . . . . . . . . . . . . . . . . . . . . . . . . .1,084,900 homes

That's what we call reach. The Nielsen Station Index for the Chicago Area, May, 1961, showed WLS was reaching 975,000 different homes in four weeks in an average day part...49 percent more than the next Chicago station!

So...see your JOHN BLAIR man, put on your goggles, and climb in. WLS is flying high and reaching your customers!

WLS

Owned and operated by
AMERICAN BROADCASTING-PARAMOUNT THEATRES, INC.
Vermont tv saturation

Vermont had 87.8% tv home saturation in April 1960, according to first state figures released by U. S. Census Bureau. Bureau found 90,019 homes had one tv set, 7,325 had two or more sets.

Census Bureau found 102,736 of 110,732 homes had one or more radios, or 92.8%. This compared with 96.8% saturation in 1950.

90 NFL games scheduled for telecast by CBS-TV

CBS-TV is prepared to announce today (Aug. 7) that it will televise at least 90 games of nine National Football League teams this season. Decision is in wake of federal court decision nullifying NFL’s $9.3 million, two-year “package plan” contract with CBS-TV (BROADCASTING, May 1 and July 24) and football league’s subsequent unsuccessful appeal of decision.

Nature of network’s coverage of games this season is similar to provisions of last year’s contracts with NFL. Teams to be covered include New York, San Francisco, Detroit, Los Angeles, Chicago, St. Louis, Green Bay, Philadelphia and Dallas. Ford Motor Co. and Philip Morris will sponsor games nationally, with American Oil Co., Falstaff Brewing Co., P. Ballantine & Sons, Theo. Hamm Brewing Co., and Sun Oil Co. as regional advertisers.

RTES may change mind on sponsoring awards

Radio & Television Executives Society, N. Y., will not launch own radio-tv awards program next October, as previously announced (April 19).

Matthew J. Culligan, RTES president, has confirmed report that awards project has been postponed for re-examination. Original plan was to make awards in 25 categories.

Mr. Culligan expressed group’s second thoughts on awards: “Our business gets a lot of criticism, and sometimes the giving of awards magnetizes criticism.” Without indicating when first awards would be issued, if at all, he added that “we would like to better the awards situation in the broadcasting business.” RTES in April ended four-year association as host of annual Peabody Awards.

MINOW CHARGES ‘REWITING’

Pierson denies intent to persecute FCC chairman, gains Jaffe support in rebuffing Minow position

FCC Chairman Newton Minow took “vigorou exception” to what he felt was “violently imperfect rewriting” of both his recent NAB speech and his other views by Theodore W. Pierson, partner in Washington law firm of Pierson, Ball & Dowd, in Pierson paper presented Friday morning at Northwestern U. Law School symposium.

Mr. Pierson’s basic legal thesis was that FCC program review is illegal censorship and he observed that “the area of commission consideration of overall programming is home to a wideband of withered liberties that should not be preferred over the ‘vast wasteland’ Mr. Minow found one long boring day and night before his tv screen” (see page 62).

But FCC chairman felt Mr. Pierson’s “anger” should be with law and not with commission or chairman. He suggested Mr. Pierson should realize that “the power of broadcasting today is centralized in the hands of a very few people” and it is FCC’s intent to break that. “If the law is wrong, it should be taken to court and changed,” Mr. Minow asserted.

Nothing Personal • Later, Mr. Pierson said that during meeting break Chairman Minow expressed feeling Pierson paper was personal attack and for record he is sorry FCC chairman mistook his intent which certainly was not personal. Mr. Pierson said issues far outdate Mr. Minow who only picked up “tools” he found lying around at FCC and applied them more assiduously than anyone else since former Chairman James Lawrence Fly. Mr. Minow replied that he understood.

Mr. Pierson’s position—denying FCC’s claim it can legally link program responsibility to “privilege” of broadcast license, to operate in “public domain” frequencies—was saluted by Harvard Law School’s Prof. Louis L. Jaffe, who said, “I deplore this use of privilege to censor.” Prof. Jaffe, however, felt this is not “central issue” and said he hopes Mr. Minow will recede some and “stake his flag at the scarcity argument.” It was Prof. Jaffe who previous day had spied possible constitutional defects in Mr. Minow’s lengthy dissertation on censorship.

Prof. Jaffe said that because of scarcity factor he can see no censorship violation in broad requirement for balance in “services” or types of programs, despite his basic high regard for all media “of free speech.”

Scarcity argument, however, was countered by Mr. Pierson, who noted there actually are three times as many stations as newspapers, yet broadcasters do not enjoy same freedom as press. Only limitation permissible should be natural economic law, Mr. Pierson declared.

Depends On Person • To questions, Prof. Jaffe said it is “impossible” to define “good” television and in ultimate analysis all programs are good programs, depending on who is looking at them.

Commenting on Thursday talk by NAB President LeRoy Collins, Prof. Jaffe said he likes idea of “diversity and balance” in programming by market rather than by station but admitted this concept has administrative problems for FCC.

Expressing concern about what FCC is going to do about regulating network, Prof. Jaffe said networks already “are moving in the direction of providing exactly the kind of programs that the FCC wants.” He was worried lest FCC revert to some outdated chain broadcasting view and stifle progress now unfolding. He said he feels chain regulation issue would become most important problem before FCC in near future.

NAB Board Chairman Clair McCollough told meeting he is “tremendously impressed” with symposium and particularly with contribution by Prof. Jaffe. Mr. McCollough said he intends to “pursue” Harvard teacher for possible legal work for NAB.

King Skeptical • As ideological exchange intensified, former FCC member Charles H. King observed that “if this group can’t agree on the issues, how can we expect any centralized council to do so.” Allusion was to advisory group proposed for FCC by Dean Roscoe L. Barrow of U. of Cincinnati Law School.

Mr. King said he also is “pleased” to hear Prof. Jaffe’s position questioning concept of broadcaster’s “public trust” responsibility merely because he is li
censed on airwaves. Mr. King recalled basic law school training that went against concept of public "ownership" of airwaves because, to be owned, something must be reducible to possession.

Fairfax Cone, executive committee chairman of Foote, Cone & Belding, criticized attacks on tv by witnesses like George Jessel and Worthington Minor during FCC's program hearing in New York in June. Mr. Cone said, "It's just plain untrue" that rating services never call anybody or that sponsor contracts specify so many killings in programs. Mr. Cone was upset at distorted picture of tv and advertising public gets through play of such stories in press.

Mr. Cone said he personally feels "advertisers should be involved in no way with programs" and observed that "the magazine concept is really almost hollow." He said only bare handful of full-program sponsorships are left in tv today.

Quaal, Collins Disagree * WGN Inc. Executive Vice President Ward Quaal disagreed with NAB President Collins' ideas on specialized stations and felt "every station does have an obligation to provide balanced programming." Otherwise backing Gov. Collins, Mr. Quaal said NAB codes have "done a tremendous job."

Time Inc. Vice President Sig-Mickelson said that on basis of his former CBS experience he can say with authority that advertisers exercise no control over information programs ("negligible" negative control, if any) and only "minimum" control over other type shows.

Consultant Novik, emphasizing skin over decay of radio programming, said he can't wait another 30 years for court ruling on free speech issue. "Chairman Minow is right in the law until he is challenged in the courts," Mr. Novik asserted. He added that he feels proposed fall radio conference should be called by FCC itself, not by outside group.

John W. Guider, president of WMTW-TV Poland Spring, Me., felt two-day meet had "cleared the air" of many misconceptions and wished all licensees could have attended.

Peter Goeltem, president of National Audience Board, expressed appreciation for wide industry support in his group's mission to tell positive side of broadcasting to public. He hoped for "qualitative" ratings in addition to present quantitative measurements to aid tv progress.

Curtis buys NBC-TV pieces

Three NBC-TV participating shows for next season are nearer sell-out status with order Friday (Aug. 4) from Helene Curtis industries for segments in

"Lite Diet" defies FTC

Advertising of "Lite Diet" bread trademark will continue despite July 28 FTC order banning its use.

Bud Fox, president of Bakers Franchise Corp., New York, announced Friday (Aug. 4) that pending decision on appeal in federal courts, more than 100 licensees of special formula bread will have continued support of uninterrupted advertising schedule in newspapers, tv and radio.

Mogul, Williams & Saylor, N.Y., is agency.

Meanwhile, NBC-TV picked up additional summer order from Procter & Gamble, through Benton & Bowles, for minutes in Laramie and Michael Shayne. P&G's schedule starts this week and continues through mid-September.

Network regulation again asked by FCC

FCC has renewed its plea to Congress for authority to regulate networks. Commission said its present regulatory authority, which extends only to individual stations, is not sufficient to assure that airwaves will be used in public interest.

Request was contained in Aug. 1 letter to Sen. John O. Pastore (D-R.I.), chairman of Senate Communications Subcommittee. Letter, being released by senator's office today (Aug. 7), adds that authority to license networks, proposed by some congressmen, is not necessary.

Commission's letter was in response to series of questions put to FCC by Sen. Pastore in April, and amounts to progress report on status of its continuing study of networks. Sen. Pastore said he wanted information to help him in preparing program for his subcommittee.

MGM-TV plans legal drama

MGM-TV said Friday (Aug. 4) it is developing hour-long series for 1962-63 season based on life of Jake Ehrlich, famed San Francisco criminal lawyer, entitled 33 Montgomery, address where Mr. Ehrlich does his business. Series will be "non-violent" legal drama. Format is being developed by E. Jack Neuman, who wrote pilot for Dr. Kildare, MGM-TV-produced show starting on NBC-TV in fall.

United votes to buy 12 Friendly outlets

Stockholders of United Printers & Publishers Inc., Boston, voted (404,253 to 8,397) approval late Aug. 3 for acquisition of Friendly Group's 12 broadcasting properties (Broadcasting, July 24).

New York stockholder Bertram Field (owns 100 shares of United Common) protested proposed acquisitions at company's annual stockholders meeting at Dedham, Mass., and said through his attorney, Mortimer Shapiro, New York, that he has filed suit against company in Delaware (where United is incorporated).

Among Mr. Field's complaints: United is overpaying for stations and did not list full extent of its indebtedness on proxy statement. He also charged Friendly Group owes $900,000 to Follansbee Steel Corp., which is controlled by Louis and Jack Berkman, who in turn hold several thousand shares of United.

Friendly Group (WSTV Inc. and WPIT Inc.) includes WSTV-AM-FM TV Steubenville, Ohio; KODE-AM-TV Joplin, Mo.; WBOY-AM-TV Clarksburg, W. Va.; WRGP-TV Chattanooga, Tenn.; WPIT-AM-FM Pittsburgh; WSOL Tampa, Fla.; and WRDW-TV Augusta, Ga.

United, which makes greeting cards and specialty items, is offering $1,350,000 and transfer of an estimated 175,000 shares of company stock for stations.

Application for approval has not yet been filed with FCC.

Conferees okay FCC money

FCC's full budget request of $12,525,000 was approved Friday by Senate-House Conference Committee. Action, which goes back to both Houses for final vote, represents victory for Senate. Upper chamber had voted to grant commission its total request after House cut it by $125,000 (see earlier story, page 74).

Senate names conferees

Senate on Friday appointed its members of joint Senate-House conference committee to work out differences between FCC-reorganization bills passed by both chambers (see earlier story, page 74).

Named to Senate delegation were Sens. John O. Pastore (D-R.I.), Strom Thurmond (D-S.C.), Gale McGee (D-Wyo.), Clifford Case (R-N.J.), and Norris Cotton (R-N.H.). All are members of Communications Subcommittee.

House will appoint its conferees this week.
what's the sense in a city fence?

the Charlotte TV MARKET is First in the Southeast with 651,300 Homes*

Building a fence around a city makes as much sense as using the Standard Metropolitan Statistical Area concept of market evaluation.

Proving the point: Atlanta and Miami have SMSA populations of 1,017,188 and 935,047. The Charlotte SMSA population is 272,111 by comparison . . . BUT the total Charlotte TV Market is first in the Southeast with 651,300 TV Homes.*

Nailing it down: WBTV delivers 55.3% more TV Homes than Charlotte Station "B."**

WBTV

CHANNEL 3 C CHARLOTTE / JEFFERSON STANDARD BROADCASTING COMPANY

Represented Nationally by Television Advertising Representatives, Inc.
WLW Radio daytime audience has soared to Number 2 spot in the Nation among the more than 4,400 U.S. Radio Stations! That’s quite a position—second to one!

And in Cincinnati, WLW still overwhelmingly holds the first place crown—70% of the daytime total audience and 35% of the daytime metropolitan Cincinnati audience.

So when you’re buying Radio time, take a good look at these figures and charts... and you’ll see why you should call your WLW Representative... you’ll be glad you did!

"Warner's 'Films of the 50's' help us Out-pull Six Competitors in the Country's Toughest Competitive Market"

says Mal Klein Vice President, General Manager, KHJ-TV, Los Angeles, California

“This summer, the Seven Arts feature films are producing high ratings you'd be proud to get in the fall! These powerful attractions have given us what we needed to hold a lead in a town where leads are traditionally hard to hold.

“We're using Warner's 'Films of the 50's' on our 'Theatre 9', right smack in the middle of Los Angeles' Sunday night prime time. The show was sold out before we started, and you can see from the ratings what these Warner pictures are doing for our participating advertisers.”

Oct. 9-10 Palo Alto, Calif.

KBIG sells to more adults per minute, per dollar in all 8 Southern California counties than any other radio station.

BROADCASTING, August 7, 1961
“With a station like WSOC-TV, and a product like Bunker Hill Canned Beef, our heavy two-year tv schedule could really beef up sales. And it did. Today, Charlotte is one of the two biggest markets for Bunker Hill Canned Meats.”

EDWARD ACREE, Vice Pres.
Cargill, Wilson and Acree, Inc.
Richmond, Charlotte

Take a good commercial about a good product, and schedule it on WSOC-TV. Your sales results are bound to be successful. WSOC-TV serves America’s 19th largest tv market. Sells it, too. Carolina viewers know they can look at WSOC-TV for the best programming available. That’s why you get more for your advertising money on WSOC-TV...one of the great area stations of the nation.

WSOC and WSOC-TV are associated with WSB and WSB-TV, Atlanta, WHIO and WHIO-TV, Dayton

BROADCASTING, August 7, 1961
Statter-Hilton Hotel, Washington, D. C.

*Sept. 24—Minne, Broadcasters Assn., annual convention. Speakers include NAB President LeRoy Collins and FCC Commissioner Robert T. Bartley, Leamington Hotel, Minneapolis.

OCTOBER

*Oct. 2—Comments due on FCC's plan to utilize uhf spectrum, deintermix eight markets, add uhf channels at short spacing in 10 other markets.

Oct. 2-6—Society of Motion Picture & Television Engineers, 19th convention. Theme will be "Integration of Motion Picture and Electronic Systems." C. Loren Graham, Eastman-Kodak, is program chairman. Among topics to be discussed: Subscriptio n tv, tv equipment and techniques and tv recording. Lake Placid Club, Lake Placid, N. Y.

Oct. 5—Reply comments due on FCC inquiry and notice of proposed rulemaking changing fm spectrum and looking into duplication of am-fm programming.

Oct. 6—Comments due on FCC's reopened option-time rulemaking. Reply comments will not be accepted.

Oct. 8-18—International seminar on instructional television, sponsored by Purdue U. in cooperation with UNESCO and the U.S. National Commission for UNESCO. Dr. Warren F. Selbert, Purdue professor, is seminar director; James S. Miles, Purdue TVU, is associate director. Purdue U., Lafayette, Ind.

Oct. 12—Seven Wisconsin FM Station Clinic, Center Building, U. of Wisconsin, Madison.

Oct. 12—Start of NAB fall conferences in eight cities (see schedule in box on page 14).

Oct. 25-28—Sigma Delta Chi, 52nd national convention. Hotel Fontainebleau, Miami Beach, Fla.

Oct. 27—Oral arguments on FCC's reopened option-time rulemaking.

*Oct. 30-Nov. 1—Annual radio fall meeting, jointly sponsored by Institute of Radio Engineers and Electronic Industries Assn. Hotel Syracuse, Syracuse, N. Y.

NOVEMBER

Nov. 2-4—Assn. of National Advertisers, annual national meeting. The Homestead, Hot Springs, Va.

Nov. 5-8—Broadcasters Promotion Assn., annual convention. Waldorf-Astoria Hotel, New York City.

Nov. 10-California Broadcasters Assn., annual meeting. Mark Hopkins Hotel, San Francisco.

Nov. 15-15—Public Relations Society of America, 15th national conference. Shamrock-Hilton Hotel, Houston. Final day of conference will be in Mexico City.

Nov. 14-16—IRE, Mid-America Electronics Conference, Kansas City, Mo.

Nov. 15-17—Television Bureau of Advertising, annual meeting. Statter-Hilton Hotel, Detroit.

FEBRUARY 1962

Feb. 28-March 1—NAB, seventh annual conference for presidents of state broadcasters' associations. Shoreham Hotel, Washington, D. C.
THE BEST TO YOU EACH MORNING . . is sold in the early evening. Kellogg's uses the Emmy-winning Huckleberry Hound to do the job of selling. And Huck is demonstrating the power and impact of the spot medium on a market-by-market basis, buying only the markets they want — the time periods they want. They're successfully selective, too! Your nearest HR Rep will be glad to show you how the spot medium will work for you!

Call him. Television, Inc.

Local radio programming: the unseen gem in the media mines

Recently a radio station program director called on me with a proposal to buy a 15-minute program on his local station. I was intrigued principally because of its novelty. You simply are not approached often enough to buy programs on radio these days.

It seems that sometimes we become so obsessed with the numbers game, circulation buys and the magazine concept we forget that program sponsorship can give a client many values over and above that of simply reaching large numbers of people for a given amount of money.

No two clients have the same broadcast advertising objectives. For many the blitz spot approach serves very well to get store action on a special promotion. There are, however, many clients who must not only sell their products—they must sell ideas. They must develop good will and they must keep their name in front of their customers and stockholders on a consistent basis. For these advertisers, the right kind of a radio program, on a good station, at the right time, proves to be an excellent advertising and public relations investment.

Noise Not Enough • I have often wondered if a great deal of the dial-switching that goes on in radio is not, in part, because there is a great deal of sameness to an individual station’s program schedule. I am thinking of the gal who uses radio as a companion to the drudgery of her housework during the day. I doubt that she is content to relegate her companion to a background noisemaker. She very likely would want to be stimulated by a succession of programming that would pique her interest, inform her, or entertain her.

There is certainly a need and place for what I call “service” radio. These are stations that can be depended on to provide instantaneous news, weather reports and some entertainment values. My flag-waving is merely on the point that all radio cannot and should not be the same.

During the past 60 days, there have been a rash of people who have discussed with me why sponsors no longer have any program identification. Invariably, they cite Jack Benny Jello and Lucky Strike Hit Parade programs as classic examples of the finest in sponsor-program tie-ups. I really have not had a good answer except to point out that radio programming and radio buying have assimilated most of the trends of television programming and buying. When television costs started increasing and more individual sponsors were splitting the tab on a given program, the magazine concept became more prevalent on radio. This, coupled with spots, the demise of traditional network programming and the high cost of programming radio at the local level led to our current scarcity of program advertisers.

To Attract Clients • Local programming does not have to be expensive. News, sports, public affairs and special events are traditional and effective program vehicles. Many station operators could attract clients simply by developing the resources at hand.

One of the most satisfying things in broadcasting is to see a client who has never used radio try it for the first time and be highly successful. Many companies, as we pointed out, have no need for spot announcements to sell their products. They can, however, receive much benefit from their identification with a top-flight newscaster. Program advertisers can be developed, in my opinion, from that list of clients which stations have been unable to entice for lack of reasons why they should be in radio.

With the pure volume of advertising on the airwaves every day, we are constantly looking for ways an advertiser’s message can stand out. One way is obvious. That is to produce top quality commercial messages. Maybe we have overlooked the other possibility. That is to recommend that certain advertisers use the right program vehicles.

Whether programs be 5, 15 or 30 minutes, the cumulative effect that can be gained by proper use is worth many times the slight additional costs.

I am fully cognizant that one of a station operator’s toughest jobs is to get his program ideas transmitted to the proper agency or advertiser at the right time. As agency people, we have an increasing responsibility to provide our clients, through our media departments and account groups, with detailed recommendations on how to spend radio dollars most effectively.

No Other Word • I believe that perhaps the most over-used term in the broadcast business is “creative selling.” but it is the only way I can think of to describe what I think representatives and stations can do to help agencies do a better broadcast job for clients—especially when it comes to programming.

Most agencies want ideas that make sense for clients using radio. Therefore, specific program ideas tailored to the specific needs of clients are usually of interest to agencies.

Perhaps, our visiting program director has a good point. The great hope for survival in local radio seems to rest in better local programming. I have seen much improvement in the past six months. Much of the noise is disappearing and stations are becoming more knowledgeable about programming for their particular markets and, in many cases, for a segment of the audience. In my opinion, stations can still improve their product—programming—just as agencies and advertisers can improve their product—on-the-air advertising. Am stations must program foreground listening. It seems that automation and formula broadcasting have lulled some operators into thinking they are licensed to operate an IBM-like machine into which you feed a mix of music, news and commercials.

The public is bound to tire of listening to a machine and will go to the guy down the dial who is programming with the basic idea that radio is essentially one of our best means of communication.

Sherman J. (Jack) McQueen spent 17 years in radio and tv, starting with a Los Angeles radio station while still in high school. He later served as network program director and station relations manager of the Mutual-Don Lee network and business affairs manager of CBS, both in Hollywood. Before joining FC&B in early 1956, he spent three years with D'Arcy Advertising. He currently is vice president and director of broadcast for both Los Angeles and San Francisco FC&B offices.
When you measure them ALL...

...ONE stands out!  Take the full measure of the medium — one station is always a standout. In the rich New Haven-centered market it serves, WELI radio is your most productive buy. Ask your H-R man for a WELI Plus-Radio* plan. In Boston call Eckels.

*Full-scale merchandising — from Sound to Sales

The Sound of New Haven  5000 watts
talk about
The recent debut of NEWSCLOCK . . . WCKY's total news and information programming . . . has Cincinnati talking, and LISTENING to talk on WCKY. And that word "listening" is the key one to WCKY advertisers. For, total news and information programming is "pay attention" radio . . . radio that is no longer a background . . . radio that commands the listener's attention for both the program AND the advertising message . . . against a backdrop of the SOUND OF BEAUTIFUL MUSIC . . . the world's finest, most listenable music . . . There's lots of talk in Cincy about WCKY, and WE'RE doing a lot of talking via: Billboards, air promos, bus sides, newspapers, direct mail, movie trailers, and contests. Talk about WCKY with your AM Radio salesman.

50,000 WATTS • CINCINNATI
NO ONE ELSE CAN MAKE THAT STATEMENT!

...JUST US!

Before you buy television in the Pacific Northwest, consider this one basic fact: Only KTNT-TV in this area includes all five major cities of Western Washington within its "A" contour, and KTNT-TV's tower is ideally located to beam a clear signal to all of this major market.

Ask your WEED TELEVISION man about dozens of other reasons you should include KTNT-TV in your advertising plans.

A Little Learning is a Dangerous Thing

But you're safe in the growing Greenville-Washington Market. Thirty Colleges and Universities and more than 330,000 students mean a lot of learning and a lot of buying power in this market dominated by WITN and WNCT. Consider that educated idea when you're planning your next campaign. Avails and details are yours for the asking.

ONE OF THE TOP 100 MARKETS
Well over 1,000,000 Population — Set Count 200,000

OPEN MIKE®

On spear carriers

EDITOR: . . . Thanks to Broadcasting for a warning (and wonderful) line in a late editorial (Editorials, July 3) that indicates our fast trend to the authoritarian state: "Television may have deficiencies but it is not an animal to be baited by every bureaucrat in Washington who happens to be given a spear."—Ramyl Compton, President, WARN Ft. Pierce, Fla.

Yearbook-Marketbook

Wrong rep

EDITOR: . . . You carried a statement (Broadcast Advertising, July 17) that representation of WRR was being taken over by [Robert E. Eastman & Co.] . . . This is not true. We are being represented by the Gill-Perna organization. . . .—Durward J. Tucker, Managing Director, WRR Dallas.

[Broadcasting's] error resulted from misinformation concerning the result of negotiations between rep and station.

Wide area phones

EDITOR: VERY INTERESTED IN STORY (Broadcast Advertising, July 24) WHICH SAYS AVERY-KNODEL CLAIMS TO BE FIRST STATION REPRESENTATIVE FIRM TO ACQUIRE WIDE AREA TELEPHONE SERVICE FACILITIES. TO KEEP THE RECORD STRAIGHT, CBS RADIO SPOT SALES HAS BEEN USING WIDE AREA TELEPHONE SERVICE SINCE MARCH 14. . . . Maurice Webster, vice president and general manager, CBS Radio Spot Sales, New York.

Plea for price data

EDITOR: Why don't the manufacturers of broadcast equipment—who use your magazine to tell us of their products—mention what the products cost? . . . Most of us haven't the time to write the factory to see what it costs and then determine whether or not we want it.

I can understand that the price of a service may vary from market to market and the rate structure in an advertisement might be confusing. But a cartridge tape, for instance, should have the
...the best offer you've had today!

The best television buy in Denver right now is THE 10:30 MOVIE on KLZ-TV! For the first time in the history of the market a library of over 300 POST 1950 Hollywood feature films is available! This is the most spectacular movie package ever offered—the very cream of the crop from ten of the world's most famous distributors!

First Run in Denver

POST-1950 FILMS

How's this for a line up of features and stars: THE HIGH AND THE MIGHTY • HONDO • DIAL M FOR MURDER • ALL ABOUT EVE • VIVA ZAPATA • TARZAN ADVENTURES • SHIRLEY TEMPLE CLASSICS • ROAD TO RIO • EAST OF EDEN • JOHN WAYNE • RAY MILLAND • JAMES DEAN • JAMES ARNESS • ROBERT CUMMINGS • CLARK GABLE • BOB HOPE • GARY COOPER • GREGORY PECK • DORIS DAY • FRED ASTAIRE • JUDY GARLAND • BETTE DAVIS • SPENCER TRACY • CARY GRANT.

THE 10:30 MOVIE will premiere on KLZ-TV September 8th and will be seen every week Monday through Saturday, following the highest rated Denver News-Weather-Sports. Now is the time to place your order. Call your Katz man today.
same price regardless of the market. Why not state in the ad what the price is?—Charles C. Smith, President and General Manager, WDEC Americus, Ga.

Tv car promotion

EDITOR: Can you refer me to editorial material citing successful new car promotion on local tv?—Howard M. Paul, Bundy & Assoc. Advertising-Public Relations, Milwaukee.

[Mr. Paul has been referred to several automobile sales stories which have been carried in BROADCASTING.]

Let people decide

EDITOR: . . . Just who is going to set himself up as the judge of what is best for the people to hear and watch? . . . Let’s return to the Jeffersonian principles of democracy and let the people decide for themselves. And when the rock and roll stations lose their listeners, they will fade away. . . . and when people stop watching The Untouchables, it will be dropped. Until that time, I, for one, don’t want any bureaucrats telling radio and television broadcasters what they may and may not broadcast and I don’t think the majority of the people of this country do either.—Robert E. Wilson, Evansville, Ind.

The automatic swing

EDITOR: An obvious fact has been overlooked by the FCC and Congress: successful broadcasters soon learn that to serve their advertisers and the public they must first offer a desired service, format and programming. . . .

Ignored are the automatic self-regulatory powers at work. . . . Too much Top 40? There’s a swing to other programming. Too many westerns? Observe the swing away from westerns. . . .—Elbert M. Gallemore Jr., Hermosa Beach, Calif.

Ams interested, too

EDITOR: I am sure that your story, “Is FCC making fm basic medium?” (BROADCASTING, July 3), will be of no more interest and encouragement to the patient fm operator than to am operators, probably the majority, who wish to become unshackled, service wise, in their markets.

The present picture in aural broadcasting reminds one of the old “spark” days when in 1927 by edict of the present FCC’s predecessors, American shipowners were directed to change from spark type communication transmitters to those of the vacuum tube type by 1930—which they did! . . .

Please send us 100 reprints. . . .—Martin R. Williams, WFMS (FM) Indianapolis.

BROADCASTING, August 7, 1961

We’re proud of our Stainless Tower... say these leading broadcasters...
Here's the big three from ABC FILMS—each available for local stations for the first time. Turn the page and take a good look at three big ways you can build more audience, more sales with ABC FILMS, INC.
Praised by Sen. Thomas DODD (D., Conn.) chairman of the U.S. Senate Subcommittee on Juvenile Delinquency, as an example of a "good" action-adventure show that could be successful without being unduly violent.

(from BROADCASTING, June 19, 1961)
78 EPISODES* OF TV’S MOST OUTSTANDING ACTION-ADVENTURE SERIES AVAILABLE NOW IN SYNDICATION!
*Up to 226 episodes available in some markets. Check your ABC Films representative.

"WYATT EARP" after a six year network run with a record breaking 37.6% share of audience.

"WYATT EARP" on network this season has an average rating of better than 20.0—reaching more than 13,000,000 homes each week.

"WYATT EARP" is pulling powerful ratings in market after market... big and small... north and south... east and west!

NOW is the time to get with the biggest syndicate buy of them all... The Life and Legend of Wyatt Earp. For complete information, call or write

ABC FILMS, INC.
1501 BROADWAY—LA 4-5050
NEW YORK 36, NEW YORK
NOW LOCAL STATIONS CAN GO ‘ONE STEP BEYOND’

John Newland hosts 94 episodes representing the most exciting dramas in or out of this world. Top names star in the incredible, true life dramatic experiences beyond man’s ken. It’s another fascinating, first-run off network, first quality series from ABC Films. Every episode a chilling, supernatural spectacular, to help you achieve supernatural sponsor and rating success this Fall. On the network — as “Alcoa Presents” — this superbly produced series gained top local ratings, all across the country. And the largest segment of this audience was the family “buyer”—the adult female. That’s why these half hours are geared to take you that one step beyond the reach of all local competition. Use the phone, telegraph, mail or mental telepathy—but do it at once—contact your sales representative from ABC Films, Inc.

there is nothing harder to stop than a trend

Like the weather, ABC-TV continues hot in the run for summer ratings. Again places first where first place means most: in the competitive TV markets offering viewers a three-network programming choice. They choose...Nielsen tallies...and the trend keeps right on trending.

ABC Television

TV NETWORKS PUSH FOR SELL-OUT

- Only small pickings still available in prime-time slots
- $7.1 million production tab will be biggest in history
- Program profile similar to '60 despite 34 new shows

Sales as well as the programs on the television networks' fall schedules are now virtually locked in, with little more than remnants left for late-buying advertisers.

For the most part, the remnants consist of bits of participating shows or co-sponsorship positions in some hours.

The networks look forward to a near sell-out season despite critics' advance condemnation of a program charting that on the surface at least would not appear essentially different from that of the past season.

The big advertiser chips already are stacked. And there's this at stake:
- Weekly production costs will be the biggest in history. A record new record will be set of $7.1 million in regularly scheduled shows, according to Broadcasting's estimates. This is up some $300,000 from the 1960-61 season's $6.8 million, a previous high.
- A total of 34 new shows will be on the air in the fall, subject to the usual (and probably more critical) test of public acceptance. This is 12 fewer new shows than were scheduled at the outset of last season.

On page 36-37 Broadcasting lists all the nighttime shows now in the network prime-time schedules. Here is an accounting based on these lists:
- Of the 34 new shows, 11 will be on ABC-TV, 10 on CBS-TV and 13 on NBC-TV.
- There will be 68 shows returning from last season. Of this number 24 will be on ABC-TV, 28 on CBS-TV and 16 on NBC-TV.
- Advertisers now attempting to place their business on the network schedules would find a little less than 2 1/2 hours open, unless they were to accept a place in periods in which they would be but one out of several participating sponsors.

Each of the networks indicates the chance of change in programming to be slim from this point to the season's start. Where viewers will detect differences (as to timing down of violent action in some cases, or so-called "uplift" in content) will come in content of existing shows.

Here, by network, is a rundown of programming that can be purchased in whole or part:

ABC-TV: Except for Straightaway all of the network's unsold time is in small pieces of the following programs: Bugs Bunny, Tues., 7:30-8; New Breed, Tues., 9-10; Cheyenne at 7:30, and Ben Casey at 10, both Mon.; Bus Stop at 9, and Adventures in Paradise at 10, both Sun.; Roaring 20's at 7:30 and Leave It to Beaver at 8:30-9; both Sat.; Steve Allen on Wed., 7:30-8:30; Ozzie & Harriett at 7:30-8:30 Thurs., and Hathaways at 8-8:30 Fri.

CBS-TV: Half of Ichabod and Me, Tues., 9-9:30, of Pete & Gladys, Mon., 8-8:30, and of Twilight Zone, Fri., 10:30-11; a quarter of Eyewitness to History, Fri., 10:30-11; and a full hour of CBS Reports, Thurs., 10-11. These are openings in the participating shows, Frontier Circus and Investigator, both Thurs., at 7:30 and 9 respectively.

NBC-TV: Aside from one-half of Tall Man, Sat., 8:30-9, the open periods on this network include participation in 87th Precinct and Thriller both Mon. at 9 and 10 respectively; Laramie at 7:30, Dick Powell at 9 and Cain's Hundred at 10, all Tues.; Outlaws at 7:30 on Thurs.; International Showtime at 7:30 on Fri., and Tales of Wells Fargo and Saturday Night Movies on Sat., 7:30 and 9 respectively.

A crisis conference in Chicago

A score of leaders in broadcasting, government and the law met at a special Northwestern U. seminar (see photo) to debate the great questions that have been raised by the FCC's new, tough policies on programming. Is broadcasting protected by the First Amendment? Is the FCC acting as a censor? For full report see page 62.

A question on figures in Washington

Did the 1960 census short-change radio? A 4-point loss in radio penetration turns up in preliminary census report. Can radio be declining? Or are the government's figures wrong? For a deep look at a problem that could get serious for radio see page 82.

A spot clearing house nationwide

Now announced: a central billing agency to lift the load of paper work off agencies, reps and stations in the placement and billing of spot tv and radio. The Bank of America will handle the data processing. See page 38.

A hope for bigger U. S. tv system

The FCC puts out new bait to lure broadcasters into building uhf stations. Will they take the bait? And if they do, will the FCC have succeeded in expanding the system or merely giving present vhf broadcasters the means to keep out competition longer? Page 54.
### DETAILED WRAPUP OF FALL TV SCHEDULES

This table details next fall’s nighttime programs, how much they cost, who packages them, the time of night they are scheduled and the date they are to begin. The advertisers (with their agencies) which sponsor them, “Available” denotes an unsold period.

Production costs are estimated by BROAD-Casting on the basis of data from various sources. Costs in most cases represent the price of a single original in a series and includes neither agency commission nor averaging of first-runs against reruns, although invariably there are exceptions.

Agencies are in parentheses ( ); production firms in brackets [ ]; starting dates indicate the beginning of the fall cycle; new programs are in boldface; continuing show titles or familiar formats (e.g., 'Dinah Shore Show') are in italics. Since no program straddles the periods before 7:30 p.m. in any of the network lineups, all nighttime programs are shown from 7:30 p.m. to the conclusion of the period generally regarded in television as “prime-time” (usually 11 p.m.).

In all cases, advertisers listed in program periods reflect sponsorship in October of this year as now reportable in network sales offices. The duration of the purchases is not indicated.

A clearing house for spot's paperwork

NEW CENTRAL BILLING AGENCY FOR RADIO AND TV ANNOUNCED

A central billing service for spot radio and television, designed to tidy up the paper jungle of time-buying and to increase spot business by making it easier to transact, was announced last week.

The announcement came from a new firm, Broadcast Clearing House Inc., which said it had completed arrangements with the Bank of America to handle the data-processing for "an industry-wide system of automated billing and processing" which it hopes to get in operation by early next year.

BCH is headed by President John E. Palmer, who currently is western sales manager for Mutual, Executive Vice President Lee P. Mehlig, now vice president, general sales manager and co-owner of KGMC Englewood (Denver), Colo., and Secretary Arthur Wyman Sawyer, an account executive with the Garfield, Hoffman & Conner agency in San Francisco.

Their announcement came at a time when at least two other groups in New York are known to be working on plans for similar central billing services. One is a group of former Remington-Rand systems experts working with a company experienced in broadcast advertising (Closed Circuit, July 24). The other centers around a second company currently active in the broadcast advertising field. Although neither would reveal details pending completion of its plans, both said they would not be deterred by BCH's beating them to the wire with an official announcement.

Promising Response • BCH officials said their plan had been received favorably in private presentations to a large number of agencies, station and station-representative interests, including the Station Representatives Assn. They said formal solicitations would be started by December or earlier—as soon as price schedules have been worked out. For this they said they are awaiting completion of cost estimates by Arthur Young & Co., nationally known accounting firm.

Although they could not estimate what the charges would be, they said the saving for all participants would be "substantial." They suggested that 50 to 60% of the cost should be borne by stations and the rest divided about evenly between agencies and reps.

They estimated that such a service would need the support of about 80% of the principal agencies, reps and stations, and said their target date for operation was January or February and in no event later than March 1. They said the biggest delay at the moment was in completing cost estimates on which to base price schedules for the service.

A Cherished Idea • Need some sort of "clearinghouse" arrangement for the processing of spot radio and television orders has been widely proclaimed for many years. SRA has been actively supporting and promoting the idea since 1954.

One of the biggest arguments, especially in the case of spot radio, is that the paper work is so voluminous it discourages buying, and that, therefore, if the paper work were simplified more time would be bought. BCH noted that some agencies estimate that handling spot radio takes three times as many hours as television and five times as many as a print buy.

Another argument is that a "one bill, one payment" system for agencies would put spot bookkeeping on a par with network in this respect and hence would encourage wider use of spot. BCH said its system achieves the "one bill, one payment" objective and also will insure quicker payment for the stations. Payment by the 25th of the month following broadcast is BCH's goal. Achieving it would of course depend on the speed with which agencies and advertisers settle their obligations.

BCH officials quoted a number of industry executives in varying degrees of interest in or approval of their plan's objectives. These were Lawrence Webb, managing director of SRA; Lewis H. Avery, president of Avery-Knodel and of SRA; John Ennis, vp and media director of Foote, Cone & Belding; Shelby Page, vp and treasurer of Ogilvy, Benson & Mather; John Broomhead, manager of accounting and billing, Kenyon & Eckhardt; James O'Grady Jr., executive vice president of Young Television Corp.; Robert E. Eastman, president of the rep firm bearing his name; Kenneth Godfrey, vice president of the American Assn. of Advertising Agencies; William Kistler, vice president of the Assn. of National Advertisers and Frank Gromer, vp and media director of Foote, Cone & Belding.

Some of these quotes—most notably those of the AAAA and ANA officials—were essentially noncommittal, but others were enthusiastic:

Mr. Avery expressed enthusiasm and

The data processing for Broadcast Clearing House, a new spot billing service announced last week, will be done by the huge Bank of America. Here officials of the bank and BCH inspect some of the business machinery the bank uses. Seated and demonstrating a computer system is Ray Ellis, assistant cashier and chief computer operator of the bank's data processing center. Standing l-r are Robert Reilly, vice president of the bank; Lee Mehlig, BCH executive vice president; Ed Martin, the bank's director of research; John Palmer, BCH president; H. A. Keith, assistant vice president of the bank, and Oscar Palos, research consultant to the bank.
WHO Radio should be No. 14 on any "Top Market" radio list!

50,000-Watt WHO Radio Covers 865,350 Homes In Iowa PLUS!

E VERY time your marketing strategy calls for radio in America's top radio markets . . . 50,000-watt WHO Radio belongs on the list!

There are only 13 markets in America in which any radio station reaches a larger audience or more buying power than does WHO!

WHO Radio reaches 865,350 homes in "Iowa PLUS!" (96 of Iowa's 99 counties plus a number of counties in neighboring states). 75% of all Iowa retail sales are made in counties you reach with WHO. (Metropolitan Des Moines accounts for only 9% of Iowa's retail sales. All eight of Iowa's leading metro areas, including Des Moines, account for just 33%.)

Many surveys, for 24 consecutive years, have measured the Iowa radio audience, and have proved that WHO is Iowa's most listened-to radio station. A 93-county area Pulse (March, 1961) gives WHO the No. 1 position in every weekday quarter-hour surveyed over 94 other stations.

Next time you make up a "top radio market" list, be sure No. 14 is WHO Radio! Ask your PGW Colonel for the latest information on "Iowa Plus."

</tbody>
</table>

based on latest Hooper (see below) and latest SRDS Spot Radio (Mar. '61)

- Here’s one example how we dominate the Lansing market:

**HOOPER RATING**

said the SRA board of directors “heartily endorses the objectives of BCH and fervently hopes that someone will lead the industry out of broadcasting’s ‘paper jungle.’” Mr. O’Grady said Adam Young Inc. and Young Television Corp. “would probably be willing to participate in your project, depending upon the cost factor.” Mr. Eastman said the project “is important to our industry” and “it is therefore axiomatic that we support you in what you are doing to the utmost.”

Mr. Ennis called the BCH presentation “most impressive.” Mr. Gromer thought its possibilities “extremely interesting.” Mr. Broomhead considered the idea “sound” and thought a “more efficient manner of handling a particular medium will undoubtedly generate greater use of that medium by clients.” Mr. Page noted that “under the BCH plan, we will receive the benefit of a standardized bill from your organization and the advantage of preparing one check instead of many.”

Mr. Webb, SRA’s managing director, emphasized to BROADCASTING that SRA’s endorsement applied to the idea advanced by BCH, not to BCH itself because SRA does not endorse private companies. “No matter who does it,” Mr. Webb said, “the important thing is that it get done. It could be the greatest boon to spot radio and television that ever came down the pipe.”

**Biggest Bank Involved** • The BCH system employs new, standardized reporting forms to gather information that is then processed by the Bank of America.

This “bookkeeping” would be done at Bank of America’s data-processing center in San Francisco (see cut), which prompted industry observers to ask what effect this distance from New York, where the biggest volume of spot business is transacted, might have on the efficiency of the BCH operation.

BCH officials said this question had given them some concern, too, but that after checking with stations and reps and making test runs with “jet mail” between New York and San Francisco, they were confident of cross-country delivery within 9 to 12 hours, or overnight, and that the distance therefore would pose no problem.

**How It Works** • Here is the way BCH describes its procedures:

BCH suggests that the standardized order form originate with the station rep, be confirmed by the station and sent on to the agency, and then, upon agency acceptance, forwarded to BCH. BCH then codes each item on the order: client, product, agency, rep, station, type and class of time bought, cost of time, total cost of schedule, etc.

From this data BCH prepares a *pro forma* or *prima facie* billing statement for the agency to submit to the client. On one form this statement shows everything ordered by the client for a specific month. The information is listed and sub-totaled by states and cities and by stations.

BCH prepares its station billing form at the same time, listing all national spot business placed on a station, with accounts and products shown alphabetically. This form, according to BCH, “completely eliminates station copying errors, since there is nothing to copy.” At the end of the broadcast schedule the station notes any deviations from the ordered schedule, reports any make-goods that have been authorized, and returns a copy of the bill to BCH.

When it gets this copy, BCH adjusts the bill to conform with actual station performance “and sends payment (one check) for all national spot billing for the preceding broadcast month to the station.”

BCH then prepares for the agency its adjusted billing form, which shows what was ordered (as on the *pro forma* billing form), what deviations occurred, the amount by which these deviations added to or subtracted from the *pro forma* billing, and the amount of payments actually made. The entire bill for each product campaign is submitted on a single form.

**New York Office** • With announcement of its new service BCH also announced the opening of New York offices at 475 Fifth Ave. (telephone Lexington 2-8874). Mr. Mehlig, who was sales manager of WNMP Evanston, Ill., and subsequently general sales manager of KTLN Denver before he became a partner in KGMC, heads the New York operation.

Mr. Palmer, BCH president, is a radio management, sales and programming consultant in San Francisco in addition to his duties as western sales manager for Mutual. He operated his own rep firm and was with the John E. Pearson representation organization before joining Mutual. He has primary responsibility for selling the BCH concept to stations and reps.

Mr. Sawyer, BCH secretary, will work primarily among agencies and stations in New York, Chicago, Boston, Philadelphia, Detroit, Minneapolis and Atlanta, as well as on the West Coast. He has been engaged in radio sales at stations and at CBS Radio and also has had agency experience as media buyer and supervisor with Young & Rubicam and media director of John & Lewis, both in San Francisco.

IDEA MAKES TV AD: BURNETT

Advertising leaders give views on creativity at workshop sponsored by ‘Advertising Age’

The only thing that makes a good tv buy a bargain is a good creative idea in the commercial, Leo Burnett, board chairman of Leo Burnett Co., said Wednesday in Chicago before the fourth annual summer workshop on creativity in advertising sponsored by Advertising Age.

Another “hard reality” for advertisers and agencies today, he said, is that there is nothing right about a “right” media schedule until the right selling idea is found. The only thing that makes good research work is to help produce a working idea in the ad, he said, and warned that there’s nothing big about a good copy platform that “strait-jackets” an idea.

Other Speakers • Mr. Burnett shared the three-day workshop spotlight with a number of agency and advertiser leaders including Marion Harper Jr., board chairman and president of Interpublic Inc., New York, and Donald S. Frost, vice president of Bristol-Myers Co. The workshop director was Dr. Steuart Henderson Britt, professor of marketing, Northwestern U. School of Business.

George G. Huntington, vice president and general manager of TVb, told the workshop that if total advertising is to grow it cannot reply entirely on the increased budgets of current clients. “We all must find new clients by showing more basic material manufacturers that they have an obligation to their customers’ customers, that only by going to the public through their own advertising can they have a vote in the future of their own industry.” Mr. Huntington showed TVb’s “Progress of Discontent” film presentation.

Mr. Burnett outlined growing pitfalls in today’s chain of command at both agency and client which too often may serve to stifle the creative process and result in “watered down” advertising. Among these he listed “coddling of unworthy egos,” rule by committee, presentation by relay and revision by chain reaction.

He said that the protection of creative people against the realities of the advertising business is another reason “we have so much tired and ineffective advertising. These creative people by their withdrawal from reality have forced the responsibility for making decisions on the clients and account executives—the very situation they decry.”

Lint-Picking • Mr. Burnett felt the recent increase in legal lint-picking in advertising is understandable. Some of its worst aspects, however, have not come from government agencies such as the Federal Trade Commission but from super-safe, over-protective legal advisers of both advertisers and agencies, he said. Both agency and client must work for honesty, truth and clarity, he said, but felt young lawyers “too often seem to make it is mission to qualify and sterilize copy to the point that it loses its birthright.”

Mr. Harper told the workshop that “revolutionary” results are coming out of the experimental creative climate that Interpublic has formed in the unique penthouse offices of Jack Tinker and Partners at New York’s Hotel Dorsett. Although he could not give specifics because the Tinker projects are “classified,” Mr. Harper said the

three-year experiment, now at the halfway mark, is producing considerable positive results from putting four top creative minds in a free atmosphere and relieving them of all administrative and deadline pressures. The four partners are John H. Tinker Jr., Donald G. Calhoun, Dr. Herta M. Herzog and Myron C. McDonald.

The mixture is a form of intellectual adrenaline on their individual ability to think, Mr. Harper explained. The frictions of creative conversation, tackling only one problem at a time and seeing it through, he said, brings about a valuable “third view” about a problem distinct from that of either agency or client. The hope of advertising in the future is in experimentation, Mr. Harper said. He cited a great need for innovation and better advertising to raise the profit curve of American business.

Eight-Second Spot • Perhaps the biggest creative challenge in television today is the eight-second spot, according to Lawrence E. DuPont, vice president and director of TV-radio, Tracy-Locke Co., Dallas, who outlined the basic do’s and don’ts of the successful 1D commercial. “The copy man must employ almost surgical discretion deciding how much he can remove without killing the patient,” he observed.

“ID producers by and large are melancholy folks,” he said. “All day long their beat their fists in claustrophobic frenzy against the walls of the tiny eight-second world in which they are imprisoned. Then in the evening they go home only to see a spectacular, 2-1/2 minute commercial featuring thousands of beautiful girls, gorgously attired, complete with hot and cold running fountains, palatial sets and music by David Rose... It makes it easier to understand why on some occasions he has a compulsion to beat his wife, poison the cat and kick the hell out of every clock in the house.”

Mr. DuPont said the most successful eight-second spot is a production in itself, not an edited clip from a longer spot. It is simple and sticks to one idea. It is “mostly effective as reminder advertising. Those who expect it to do more are kidding themselves.” It has an advantage in driving home a dominant sales theme because of brevity.

It is necessarily “succinct and to the point. If the viewer remembers anything you said, the only thing he can remember is your sales theme.” Research experiments, he said, show that the picture overshadows other elements, including print, voice and sound, but all must be properly blended.

Music Function • Mitch Leigh, president of Music Makers Inc., New York, described how music in broadcast commercials today has evolved into a highly effective dramatic tool to produce “emotional memorability” for the sales message. Music well scored, he said, can immediately establish the mood of the commercial message and eliminate the need for the first paragraph of the copy script. Music sets the quality tone for a product promptly, too, he added.

Music in the tv commercials sets the “image” for what is being talked about while in the radio spot “music must make the picture itself,” Mr. Leigh said. Music can be used to give visual depth to the flat screen of the tv commercial, he said, explaining that to be most effective music must be carefully coordinated with both copy and art.

Practical tips and a demonstration showing how to cut costs in production of tv commercials without losing quality or effectiveness was given by Hooper White, manager of New York commercial production for Leo Burnett Co. Oversimplified: “Hire good writers,” Mr. White said no amount of production “lily-gilding”—which is expensive —can cure bad writing or a poor sales idea in the first place.

An even 20 of the top current tv commercials were reviewed by a panel consisting of Donald S. Frost, Bristol-Myers Co.; management consultant Edgar Kobak, and Hildred Sanders, vice president in charge of radio-tv, Honig-Cooper & Harrington, Los Angeles. But they could not agree on any spot as the

best, opinion ranging widely as to individual likes. They did agree that they liked the Dristan spot the least. The talk disclosed one success story: the Jax Beer cartoon spots, a southern regional account, have proved so popular people phoned to ask when they will be aired. As a result, Jackson Brewing Co. lists the times in its newspaper ads.

Compton-Saussy affiliation

Compton Adv., New York, announced July 31 it has acquired an interest in and affiliation with Walker Saussy Adv., New Orleans. The only personnel change involves Donald H. Halsey, Compton vice president, who also will serve as senior vice president of Walker Saussy.

Business briefly...

U. S. Time Corp., N. Y., will sponsor four full-hour entertainment specials on ABC-TV during the 1961-62 season. This in addition to the company's partial sponsorship of the Steve Allen Show on the network (Wed., 7:30-8:30 p.m. EDT), and one-half sponsorship of two Bing Crosby specials. Agency: Warwick & Legler, N. Y.

Oldsmobile Division, General Motors Corp., Detroit, has signed for alternat-week, full-hour sponsorship of Garry Moore Show (CBS-TV, Tues., 10-11 p.m. EDT), starting Sept. 26. Agency: D. P. Brother, Detroit.

Chevrolet Division, General Motors Corp., will sponsor the 24th annual Soap Box Derby on CBS Radio Sunday, Aug. 20 (5:30-5:45 p.m. EDT). Agency: Campbell-Ewald Co., Detroit.

The Professional Drycleaners of Oklahoma will launch a state-wide television advertising campaign Aug. 13-19, on WKY-TV Oklahoma City, KVOO-TV Tulsa and KSWO-TV Lawton. The campaign was prepared by Ackerman Assoc., Oklahoma City.

Rep appointments...

- KFRM Concordia, Kan.: Spot Time Sales, N. Y., as national representative.
- KRLD-AM-TV Dallas: Advertising Time Sales, N. Y., as national representative.
- KODA Houston: Advertising Time Sales, N. Y., as national representative.
The Conestoga Wagon, a pioneer in transportation, originated in Lancaster County, Pennsylvania. It was the principal medium of westward travel, prior to the railroads.

WGAL-TV, a pioneer station, introduced television to a sizeable area of Pennsylvania. Since its inception in 1949, WGAL-TV has firmly maintained its pioneering principles by being constantly alert to new and better ways of serving viewers throughout its coverage area.

instrumental in setting up local improvement programs.”

The committee said its help can be offered only if requested and if local advertisements are criticized “on grounds of taste or opinion” but that it will not deal with “factual validity of claims” and it doesn’t plan to duplicate the work of government regulatory agencies or the BBB in this area.

VOTES AND COMMENTS • The committee said that in view of the importance of the local ad area, local groups in charge of “truth” projects may wish to forward cases to the committee for its votes and comments. It was noted that a legal restriction demands that votes and comments be sent directly to the local advertiser and agency concerned and cannot be given to “other local people.”

If a majority of the committee’s 20 members holds the particular advertising to be objectionable, its opinions are sent to the advertiser and the agency. If the majority regards the advertising “seriously” harmful to the profession it asks both parties to take corrective action.

The committee, which said it considers the local programs for truth and taste in advertising in cities throughout the country extremely important for advertising’s welfare, noted an estimate of at least 30 such panels formed by advertising clubs and another 15 planned by other ad clubs.

Smith-Corona Marchant names BBDO as agency

Smith-Corona Marchant Inc., which pulled its approximately $1.5 million account from Cunningham & Walsh last June (Broadcasting, June 26), appointed BBDO to handle its advertising last week. The move came after the typewriter company had interviewed several agencies.

BBDO will handle all of the Smith-Corona product lines: portable typewriters, office typewriters, a new “compact” electric typewriter developed by the company, calculators, photocopy equipment and other office machines. Smith-Corona currently is pushing its new electric product line on all fronts and an increase in broadcast billings for the year is indicated. Last year, through Cunningham & Walsh, about $350,000 of the company’s billings went into broadcasting. This year, as the result of a first-quarter spring promotion on NBC-TV’s Today show and increased activity in radio spot, it’s indicated that the typewriter manufacturer may double its broadcast billings.

Smith-Corona left Cunningham & Walsh after 26 years. Its departure contributed heavily to the shake-up of C & W’s higher echelon last month (Broadcasting, July 24).

CBS Radio Pacific signs AHP for ‘news/dimension’

American Home Products has become the first advertiser to buy CBS Radio Pacific’s new regional split-run “news/dimension” package.

The plan offers run-of-schedule segments in virtually all the 10-minute CBS Radio news and five-minute news supplements aired between 9 a.m. and 5 p.m. seven days a week. Advertisers can buy one-minute announcements in five-minute segments or 30-second announcements in 2½-minute segments. They also have a choice between buying Group I (20 stations in California, Arizona, Oregon and Washington) or Group II (Group I plus 18 additional outlets in Colorado, Utah, Wyoming, Nebraska, Montana, Nevada, New Mexico, South Dakota and Texas).

The plan is available in three run-of-schedule packages, based on audience composition. There is “weekday” (66% women in audience), “weekend” (50% women, 50% men) and “total week” (combination of the two). The one-time rate for a five-minute segment is $275 for Group I, $375 for Group II, dropping to $245 and $345 for 12 or more spots per week for 52 weeks. For 2½-minute segments, the Group I rates begin at $195 and drop to $165, the Group II rates start at $280 and end at $250.

The plan includes 81 programs a week, the regular network newscasts plus Information Central, Your Man in Paris, Woman’s Washington, To Your Health and Moscow Scene.

American Home Products on Aug. 31 starts using the “news/dimension” package on Group II (38 stations) for 20 weeks on behalf of Dennison’s foods. Young & Rubicam is agency.

Agency personnel shifts

Harry B. Cohen Sr., board chairman of Cohen & Aleshire, became senior vice president and member of the executive committee of Donahue & Coe Inc, when the latter agency acquired Cohen & Aleshire’s major accounts and key executives on Aug. 1 (Broadcasting, July 24).

Other C&A officers who became vice presidents at D&C include: Edward Aleshire, president; Frank Brady, vice president and Harry B. Cohen Jr., vice president, secretary and treasurer. Some 15 other Cohen & Aleshire personnel will be absorbed by Donahue & Coe, which gains $3.5 million in radio-tv billing as a result of the merger. No change in the name of the Donahue & Coe agency is contemplated. Grove Labs, a division of Bristol-Myers, with billing of about $2.5 million, is the largest account involved in the move.

TvB pitch asks: is tv price too low?

Is television's price too low?

A new Television Bureau of Advertising brochure raises this question. TvB offers evidence to substantiate the claim that "it costs less to be a tv advertiser than to be a newspaper advertiser."

To tell how much a medium costs, and whether it's worth the price, TvB asks first that advertisers check any medium on these two counts: "what you actually pay to become an advertiser in a given medium, and what you buy with what you pay (a way to sell people and an audience)."

In terms of dollars, the brochure lists the costs of a one-minute tv commercial and a 1,000-line newspaper ad in the average of the country's top 100 markets (take the total costs and divide by 100). The costs: daytime tv minute, $100; late-night minute to reach the husband and wife together, $150; prime time minute for maximum family audience, $230; the 1,000-line newspaper ad, $624.

TvB declares the easiest way to look at the comparative price situation is to start with a hypothetical budget, for example, $300,000, which would buy: one 1,100-line ad in each of the nation's 1,763 daily newspapers with a combined circulation of 59 million copies; or, a full-page black and white ad in all 13 magazines with circulations over 3 million (combined circulation: 74 million copies), or one of the 14 most expensive nighttime network tv shows with a potential reach of 46 million homes.

Continuing, TvB says: "Assume the almost impossibly high readership figure of 50% for both newspapers and magazines and compare with the actual measured audience of the television show." The table as shown in the brochure:

Revlon drops specials for scheduled shows

Revlon Inc. and Harry Belafonte parted company last week. In the past two years the cosmetic firm and the entertainer collaborated on two successful hour-long specials on CBS-TV, and had a contract calling for two more original shows during the coming season.

Revlon attributed its move to a change in basic advertising policy—from sponsorship of specials to regularly scheduled shows. In the past the company sponsored only specials, but last spring began to pick up alternate-weeks of NBC-TV's Alfred Hitchcock Presents and Wagon Train. Plans for the coming season call for alternate-week sponsorship of CBS-TV's Ed Sullivan Show and Checkmate, and possibly an hour-long Christmas special.

A company spokesman denied that Mr. Belafonte's dissatisfaction with the number or content of commercials used on past Revlon specials had anything to do with the discontinuance of the programs. He said the first program, presented in December, 1959 (it won an Emmy Award), only contained two commercials, and the other one, telecast last November, carried "a not excessive" four commercial messages during the hour.

'Negro Group Plan' offered by Howard

A "Negro Group Plan" for advertisers that claims a radio coverage area reaching 54.2% of the national Negro market was announced last week by radio-tv representative Bernard Howard & Co., New York, which reps a major list of Negro-programmed radio stations. Included are five separate groupings: national, southern, northern, west coast and a selected "first 15" Negro metropolitan area.

The plan accommodates variations in schedules, a rate card issued showing costs for 12, 18 and 24 announcements plus 6 quarter hours per week for 13, 26 and 52 weeks for each of the groups offered. "Negro" coverage rates, for example, show a cost range from $32,472.18 for 12 weekly minutes for 13 weeks to $209,118 for 24 weekly minutes for 52 weeks, and $63,997.57 for six weekly quarter-hours for 13 weeks to $212,122.56 for the same amount of time purchased for 52 weeks. The firm represents stations in 27 markets.

Pepsi forms Teem Division

The Pepsi-Cola Co., New York, has formed the Teem Division to implement marketing of Teem, Pepsi's lemon-lime drink, and other new beverage products.

Robert M. Worden, a 10-year Pepsi veteran, has been elected a vice president of the company and placed in charge of the new products unit.

A full-scale advertising campaign, including radio and television spots, has been prepared for use by Teem's 250 bottlers. BBDO, New York, is the agency.

Burma-Shave appoints Scott

Burma-Vita Co., Minneapolis, has appointed R. Jack Scott Inc., Chicago, as agency to handle its new one-year saturation spot tv test for Burma-Shave in major markets this fall, starting with Chicago (CLOSED CIRCUIT, July 24). The historic roadside signs are to be preserved, but they may be curtailed some.

L. C. Odell, vice president and director of sales for Burma-Vita, said "we're shooting for the moon" in the television drive and spots "will be running out of your ears." He said the test is for a full year because no advertiser should expect any medium to do an effective job in any lesser period. Former agency was Bozell & Jacobs, Minneapolis.

ANY CHANCE FOR UHF BUILD-UP?

FCC tries forcing action to get broadcasters into high band but some see it as re-run of an aid-to-fm policy that failed

The FCC has taken another step down the road to uhf television—and this time it is holding out a carrot to persuade reluctant broadcasters that it would be a good idea to move into the upper band.

In a clear attempt to whet broadcasters’ appetites for uhf, the commission proposed last week to give these benefits to uhf applicants:

- Dual operation in both vhf and uhf for those already broadcasting in the vhf band.
- A pool of uhf channels to be reserved for existing commercial broadcasters for about three years.
- A first-come-first-served policy in uhf applications whereby an applicant will be guaranteed the channel he seeks without a hearing.
- Relaxation of various technical requirements that will make it less expensive to build and operate a uhf station.
- Abolition of the uhf table of allocations so that applicants may apply for any uhf channel—with some restrictions, however, to prevent a concentration of desirable, low band uhf stations.

As a further nod to uhf, the FCC proposed to deintermix eight cities by removing the single vhf outlet now in each community and converting the eight to all-uhf markets (see table this page).

At the same time, the commission proposed to add a third vhf channel at less than minimum mileage spacing to eight cities to create competitive facilities for the three networks (see table, page 55).

And, in three other cities the commission issued final orders to add a vhf to each, but without shortening mileage separations (see table, page 55).

The proposals to beef up the uhf system had the support of seven FCC commissioners, but the proposal to remove the vhs from the eight markets carried by a one-vote majority. Chairman Newton N. Minow, Commissioners Robert T. Bartley, Robert E. Lee, Frederick W. Ford, and John S. Cross were in agreement on the moves to expand the use of uhf, with Commissioners Rosel H. Hyde and T. A. M. Craven opposing.

On the proposals to delete the vhs in the eight markets, the chairman and Messrs Bartley, Lee and Ford constituted the majority, with Messrs. Hyde, Craven and Cross the opposition.

The rule-making notices to drop new vhs into eight cities were made by unanimous vote. The commission split in different ways on the final orders dropping new vhs, without changing mileage separations, into three cities (see table, page 55).

All the actions were announced July 28 (Broadcasting, July 31), but it was not until last week that the details became available.

Insurance — The commission’s proposals were greeted with dismay by many broadcasters and Washington lawyers and engineers. The consensus of their views is that the FCC is trying to force telecasters into uhf—just as it tried several years ago to force standard am broadcasters into fm.

“The only thing they’ll succeed in doing,” one knowledgeable Washington observer stated, “is to force a tv broadcaster to take out uhf insurance. It’s just what they did in fm.”

The managing director of one of the larger group owners said his company would have “no interest in duplicating our vhs with uhf’s.” Spokesmen for networks and other major group owners begged off answering on the ground that they had not had time to study the document and the FCC’s reasoning.

The move to drop an extra vhf into cities, even though at short spacing, was considered all to the good by network executives. ABC found it all for the best, and CBS and NBC found some good in the proposals—in that it would relieve some of their affiliates of handling two networks.

UHF to the Fore — If the FCC notification and actions can be taken at face value, the ultimate for tv is a heavier reliance on uhf—either on an area basis, or conceivably as the basic service throughout the country.

But the FCC’s actions cannot be taken without reservations.

First, the moves are proposals only
Final orders add vhf to three markets

**BENEFICIARIES: ROCHESTER, SYRACUSE, GRAND RAPIDS**

In the midst of all the proposals put out by the FCC last week for deinter- 
mixture, added vhf channels at below-
mileage separations and the moves to 
enhance uhf, the commission issued 
three final orders adding an extra vhf 
channel to Syracuse and Rochester, 
N. Y., and to Grand Rapids, Mich. 
All three of the channels meet the sep-
arration requirements, except that in 
a necessary reshuffle of channels between 
Rochester and Syracuse a 4.5 mile 
shortage exists on another channel. 

Here's what the FCC did: 

<table>
<thead>
<tr>
<th>City</th>
<th>Present Allocation</th>
<th>New Allocation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Syracuse, N.Y.</td>
<td>3—, 8, *43—3—, 5—, 9—, *43+</td>
<td>5—, 10—, 8, 10+—, 13, 15—, 21, 27+</td>
</tr>
<tr>
<td>Rochester, N.Y.</td>
<td>5—, 10—, 8, 10+—, 13, 15—, 21, 27+</td>
<td>15—, 21, 27+</td>
</tr>
</tbody>
</table>

Note: Ch. 9 in Syracuse and ch. 13 in Roches-
ter are required to protect Canadian stations.
Ch. 5 in Syracuse is 4.5 miles short of minimum
separation with WPTZ (TV) North Pole, N. Y.
There's a loophole in the rules that if there
are only two vhf stations might find
themselves in the driver's seat if there is
a plethora of stations seeking affiliation.
The threat of dissatisfaction is stronger when there are other outlets to
which a network can turn.

- Independent program producers 
  may find that their market has exploded
  into a myriad of buyers, all seeking
  program material. Certainly those
  stations not affiliated with a network would
  need independent programming—and
  more stations per market are the entire
  justification for uhf development.

- A fourth tv network might come into
  being.

- If more uhf tv stations begin broad-
  casting, a sizeable market might be estab-
  lished for uhf tv receivers. Since tv
  manufacturers, like all businessmen, will
  produce whatever can be sold, there is
  a feeling that at some point the set
  maker might find it more efficient to
  produce a single, all-channel set—rather
  than running two production lines, one
  for vhf and another for uhf.

**Nationwide, Competitive**

- The FCC's actions are premised on the com-
  mission's 15-year hope for a nationwide
  competitive tv system. This cannot be
  accomplished with only the 12 vhf
  channels, the FCC states.

- The commission acknowledges that it is
  disappointed in the results of the interim-
mixture (using vhf and uhf channels in
  the same city) policy adopted in 1952 when the tv freeze was lifted.
This policy, the FCC points out, held
out the hope for 1,875 commercial
stations and 252 educational stations in
over 1,200 markets.

As of June 3, the commission relates,
Continued page 56

Third vhf proposed for eight markets

**WOULD BE AT LESS THAN MINIMUM MILEAGE SPACINGS**

There are eight cities to which the FCC proposes to add a third vhf channel at less than the minimum mileage spacings required under the present rules.

None of the eight is less than 120 miles from a co-channel station—and, in fact, the FCC said it would not approve any transmitter site that is less than 120 miles from its companion on the frequency. Specific mileage separa-
tions cannot be ascertained until ap-
lications are submitted and granted,
Continued page 56
WHERE THIRD VHF WOULD GO

Lafayette, La. Operating in Baton Rouge: WAFB-TV, ch. 9; WBRZ (TV), ch. 2. In Houma, cp for ch. 11 held by St. Anthony Television Corp.

Birmingham, Ala.—Add ch. 3 minus, with radiation suppressed in direction of WRGP-TV Chattanooga, Tenn., and WRLB-TV Columbus, Ga., both less than 190 miles from Birmingham, and in the direction of WREC-TV Memphis, Tenn., and WEAR-TV Pensacola, Fla., since ch. 3 would be the one which interferes with these stations. Operating in Birmingham: WAPI-TV, ch. 13; WBRC-TV, ch. 6; educational WBQI (TV), ch. *10; cp for ch. 42 held by Birmingham Television Corp. (WBMG (TV)).

Charlotte, N.C.—Add ch. 6, with radiation suppressed in direction of WECT (TV) Wilmington, N.C.; WJBF (TV) Augusta, Ga.; WHIST Bluefield, W.Va.; WATE-TV Knoxville, Tenn., all less than 170 or 190 miles from Charlotte. Although no adjacent channel station must be changed, the most efficient utilization of ch. 6 at Charlotte requires offset by WECT, from ch. 6 even to ch. 6 minus. Operating in Charlotte: WBTB (TV), ch. 3; WSCC-TV, ch. 9; cp for ch. 35 held by Century Advertising Co. (WUTV (TV)).

Dayton, Ohio—Add ch. 11 with radiation suppressed in direction of WHAS-TV Louisville, Ky.; and WDLT-TV Toledo, Ohio, both less than 170 miles from Dayton. Use of this channel at Dayton would result in less than standard separation for adjacent ch. 12 WKRC-TV Cincinnati, Ohio. Operating in Dayton: WLWD (TV), ch. 2; WHIO-TV, ch. 7; cp for ch. 22 held by WONE Inc. (WONE-TV).

Jacksonville, Fla.—Add ch. 10 plus, with radiation to be suppressed in direction of WALB-TV Albany, Ga., less than 220 miles from Jacksonville. A ch. 10 station in Jacksonville will be less than 220 miles from the ch. 10 transmitter sites proposed by applicants for Largo, Fla., but no suppression is recommended; both stations will be free to radiate the maximum permissible energy in the direction of each other and accept such interference as may result. Operating in Jacksonville: WJXT (TV), ch. 4; WPGA-TV, ch. 12; educational WJCT (TV), ch. *7.

Johnstown, Pa.—Add ch. 8 plus, with radiation to be suppressed in direction of WGAL-TV Lancaster, Pa., and WJIT-TV Cleveland, Ohio, both less than 170 miles from Johnstown. Suppression also will be required in the direction of WCHS Charleston, W. Va., since ch. 8 plus would operate non-offset with this station. There are pending two petitions recommending the drop-in of ch. 8 plus to Johnstown. These will be given consideration if any party wishes to comment on this proposal. Operating in Johnstown: WJAC-TV, ch. 6; WARD-TV, ch. 19.

Knoxville, Tenn.—Add ch. 8 minus, with radiation to be suppressed in direction of WGTV (TV) Athens, Ga., and WSIX-TV Nashville, Tenn., both less than 190 miles from Knoxville. A non-offset, ch. 8 station in Knoxville will be less than the required separation from a proposed station in Greensboro-High Point, N.C., but no suppression is recommended; both stations will be free to radiate maximum energy in the direction of each other and accept such interference as may result. Operating in Knoxville: WATE-TV, ch. 6; WBIR-TV, ch. 10; WTVK (TV), ch. 26.

Oklahoma City, Okla.—Add ch. 5 from Enid, Okla., with radiation to be suppressed in direction of KFSA-TV Fort Smith, Ark., less than 190 miles from Oklahoma City. Operating in Oklahoma City: KOKT-TV, ch. 4; KIOW-TV, ch. 9; educational KETA (TV), ch. *13; educational KOKH-TV, ch. *25. In Enid: KOCO-TV, ch. 5.

FCC says, "to such future time as developments would call for a return to the present policy of limiting licensees to one tv station in any single market."

UHF Pool • In establishing a pool of uhf channels for existing vhf operators, the commission declares that this would be held in reserve for three years from the effective date of legislation for an all-channel receiver, or until Dec. 31, 1965, whichever is earlier. Uhf channels for education would be held longer.

The FCC's document contained a list of cities where uhf channels will be reserved for this dual operation. It does not identify the channels but it does list the number to be held (for example, New York, 7; Washington, 5; Houston, 4; in that order). That the FCC majority has embarked on a calculated push toward uhf is made plain by its report on squeeze-ins of vhf at short spacings. The assignment of additional vhf channels, the commission says, "must be regarded as an interim measure. . . ."

It further states: "The basic issue is clear. Either the major stress henceforward will be placed upon an evolving vhf service, or the industry and the public will continue to face the prospect of a television service severely hampered by inadequate numbers of operating outlets in many cities where there is need and demand for added stations. In these circumstances we think there is undoubtedly warrant for confining the expanded use of vhf frequencies to those relatively few cases where the urgency for quick relief is so great that it clearly outweighs the preferred course of directing further expansion into the uhf band."

The criteria for selecting those cities

BROADCASTING, August 7, 1961

ANY CHANCE OF UHF BUILD-UP?

there were only 536 commercial stations and 56 non-commercial stations in 282 communities.

Most significantly, it adds, only 75 of the 1,543 uhf assignments are in use. Also, it continues, only 65 markets are served by three or more competitive tv services.

The root cause of this difficulty, the FCC states, is the inability of uhf stations to compete with vhf outlets—in coverage and in audience.

Back in 1959, the commission recalls, it held out the possibility of five alternatives for the future—but three of these will be eliminated in the idea of contiguous bands of vhf channels, have had to be retired since they involved conflicts with national defense requirements.

The Two Choices • This leaves only two alternatives: an all-uhf service or continuance of the present vhf-uhf combinations.

"It is not yet clear," the FCC states, "whether a nationwide, competitive system can be achieved through the use of the uhf channels only. Though this may eventually be found to be feasible, for the present our efforts must be concentrated upon developing a system involving greatly expanded use of the uhf channels in combinations with the now virtually saturated 12 vhf channels."

The finger points, the FCC strongly intimates, to the day when uhf can be used in densely populated areas where communities are close together (the northeast and north central areas and the West Coast), with vhf channels used for wide area coverage in the less populated areas or where terrain difficulties cannot be overcome otherwise. Uhf propagation is extremely difficult in mountainous terrain.

The hope is, the FCC says, that its latest proposals for dual operation of vhf and uhf outlets by the same licensee in the same market will "mitigate" any dislocations required if it is finally decided to enlarge the uhf areas.

Cheaper Uhf • In a bid to make it less expensive to build and run uhf stations, the commission proposes to liberalize a number of technical requirements. It plans, it said, to (1) eliminate the requirement that vestigial side bands be attenuated (a saving of $10,000-$12,000, it is calculated by consulting engineers); (2) reduce visual-audio ratio requirements to obviate the need for a sound amplifier in the tv transmitter, running to a saving of $10,000-$50,000; (3) permit the use of directional antennas and (4) permit remote control (the last a means of reducing personnel costs at the transmitter). One of the questions that the FCC specifically asks is in the area of programming of the uhf outlet by the existing vhf station. Should the uhf be required to program independently, or should duplication of the vhf program be permitted? Those responding to the rule-making are invited to answer that question. There seems to be some belief at the FCC that independent programming might foster the sale of all-channel sets.

The commission says it will waive the duopoly rule in order to permit dual operation of vhf and uhf stations in the same market by the same licensee. This waiver policy would continue, the

National Representatives
Whenever all three networks cover
the same event at the same time...

more people watch it on NBC

When Gus Grissom rocketed into space, an estimated 43,000,000 people watched it—and throughout the shoot NBC TELEVISION attracted 61% of the network audiences.* It happens that way all the time. For instance: 1. During the National Political Conventions NBC News attracted greater viewing audiences than both other networks combined. 2. In the Great Debates, viewing on NBC was substantially greater than on either competing network. 3. More families turned out to watch the Election returns on NBC Television than the total for both other networks. 4. And it happened that way again for the Inauguration. 5. And again for coverage of Alan Shepard’s history-making flight. 6. When President Kennedy reported to the nation on his trip abroad, NBC News again won the biggest audience, this time by margins of 5% and 136%. 7. And in Presidential Press Conferences covered by all three networks, NBC averaged an audience pull 37% stronger than its closest competitor.

All-channel set bill appears doomed
NO HEARINGS PLANNED FOR CURRENT SESSION

The FCC's all-channel-receiver legislation—the proposal central to the commission's effort to break the uhf-vhf impasse—appears headed for trouble on Capitol Hill.

It is doubtful that hearings will ever be held on the bill in this session, which is expected to be wound up by the middle of September. The Senate and House Commerce Committees have hearings booked almost to the end of August, and the all-channel bill isn't on either committee's agenda. Nor do committee staffers expect it to be.

But more importantly, key members of both committees are registering either skepticism or outright opposition to the proposal, which would permit the shipment of only all-channel sets in interstate commerce. If the bill should die, it would only improve the steam out of the over-all attack planned by the commission on the uhf-vhf problem.

Sen. Charles D. Mathias (D-Md.), chairman of the Senate Communications Subcommittee, said last week he "doesn't like the idea of forcing" purchasers to pay the additional price of all-channel sets when only a vhf or uhf signal may be available in their area. The senator, however, said he would want to hold hearings before taking a final position.

Sen. Warren G. Magnuson (D-Wash.), chairman of the parent Commerce Committee, expressed a similar view, and added: "I think the bill will run into a lot of opposition."

On the House side, Rep. Oren Harris (D-Ark.), chairman of the House Commerce Committee, was reported last week to be opposed to the legislation, on at least two grounds: that it provides for FCC regulation of manufacturers and that it is putting the cart before the horse to require manufacturers to build only all-channel sets before both uhf and vhf signals are available in all areas.

for added vhf channels, the FCC states, were based on seven factors, among the most important being that the markets were within the 75 top tv cities, that two vhf stations were already in operation, and that no assignments be made at less than 120 miles co-channel and 40 miles adjacent channel.

In discussing this policy, the commission points out that the move of ch. 7 into Louisville is already under consideration but is faced with heavy difficulties—although the FCC says that if it finally decides to move ch. 7 into that Kentucky city it will give consideration to permitting below-minimum mileage separation. A similar discussion covers Providence, R.I.

Chairman Minow concurred in the policy on adding vhf channels, but added a statement stressing his feeling that the FCC has assigned the drop-ins for commercial use; he would have spelled out a policy that if educational groups feel they have a greater need for these channels the FCC will consider such a reservation.

Commissioner Cross went along with most of the proposals on uhf but registered dissent at the moves deleting existing vhf in the eight cities. He feels, he said, that up to 275,000 people now receiving service from vhf stations in those areas will be deprived of their only service by this move. This is on the basis that uhf stations cannot cover as wide an area as vhf outlets.

Geric's tv channel
go to etv group

Geric Investment Co., formerly operator of ch. 17 WTVI (TV) Fort Lauderdale, Fla., was found in default for failure to prosecute its license renewal application by FCC Hearing Examiner Asher H. Ende last week. He issued an initial decision looking toward granting ch. 17 there to The Board of Public Instruction of Dade County.

Mr. Ende said notification of hearing was sent by registered mail, return receipt requested, to Geric and its president, Mortimer W. Loewi. No reply was received.

The educational group was found by the FCC's hearing order to be "legally, technically, financially and otherwise qualified" to operate the station. The major point at issue was whether Geric had abandoned the station, which has been off the air since February.

Ch. 5 applicant asks Maguire clarification

Massachusetts Bay Telecasters, one of three applicants for Boston ch. 5 in the court-remanded ex parte case, suggested last week that the FCC investigate whether the activities of Richard Maguire, a former 23.7% stockholder in competing Greater Boston Television Corp., should disqualify GBT.

WHDH Inc., the third applicant and incumbent on the channel, had asked the FCC to disqualify GBT because Mr. Maguire's sale of his interest makes GBT an entirely different applicant (BROADCASTING, July 24). The FCC Broadcast Bureau replied last week that this WHDH pleading does not warrant serious consideration.

MBT said Mr. Maguire had left Boston for Washington, "where he is reported to be working for the executive branch of the government or working closely with the executive branch." MBT asked the FCC to determine if Mr. Maguire has arranged to resume an interest in Boston ch. 5 upon his return from government service and whether he would receive fees while in service from his law firm's efforts on behalf of GBT.

MBT said it is not charging Mr. Maguire with violating the letter or the spirit of the executive order concerning ethics and conflict of interest, but feels the situation should be clarified and put into the record of the case.

NOT LOOKING FOR WORK.
JUST WANT A JOB.

Agency Z was reportedly the most difficult place in town to get a job. Their psychological testing process was most rigorous. Their exhaustive reference checks were rumored to include evaluations from candidates’ kindergarten teachers on group cooperation and aggression patterns. People went in for interviews in depth and didn’t come out for days. Sober men got the spins. Applicants developed circulatory diseases.

Preliminary screening consisted of “The Walk.” Applicants were simply told to find the door marked PERSONNEL, buried at the center of the maze shown above. Then the tests were administered.

See if you can find your way to Personnel. Draw the shortest route on this page, send it to us, and we’ll send you an exciting new prize. It may be straight or in the round, thick or thin.

Bang! you’re dead or you’re dead, bang!

CENSORSHIP CAN BE BEFORE OR AFTER, CHICAGO SEMINAR IS TOLD

The FCC’s position that it has legal foundation to review past program performance in license renewal proceedings and that this does not violate the First Amendment’s no-censorship principle ultimately must be decided in a court suit whose issues go directly to those arguments.

This appeared to be the strongest conclusion among broadcaster participants at the half-way point Thursday night in FCC Chairman Newton N. Minow’s “homecoming” seminar at Northwestern U. Law School, Chicago, on the topic of freedom and responsibility in broadcasting. Participating in the two-day conference were 20 national leaders representing all principal shades of opinion in the mass communication field.

The high points of the exhaustive intellectual exchange, which involved as much prepared-text presentation as “discussion” (for Friday talks, see AT DEADLINE), included these developments:

- Harvard Law School Prof. Louis L. Jaffe’s brief “lecture” on constitutional law to Chairman Minow at the public session Thursday afternoon just after Mr. Minow’s elaborate legal defense of the FCC’s right to consider programming. Prof. Jaffe suggested Mr. Minow’s position might contain some holes.

He questioned Mr. Minow’s definition of “censorship” as confined only to prior restraint and as not involved in sanction after the fact. Prof. Jaffe, however, supported Mr. Minow’s premise that the FCC may look at a station’s “total” programming picture to determine whether a balanced-service responsibility has been met. Chairman Minow indicated they appear to agree in principle and did not contest Prof. Jaffe’s legal distinctions.

- Chairman Minow’s opinion that a television affiliate of a network at license renewal time—assuming that in all other respects he has met his licensee responsibilities—should not be held liable for airing network programs containing “violence.” Given in answer to a question by broadcaster John W. Guider, Mr. Minow’s view was based on the position that “in many cases the problem is out of the hands of the owner” since he doesn’t see the show until his audience does.

The “major responsibility” for violence on network shows, Mr. Minow said, lies in our “system” of producing and distributing programs and it is for this reason he said he supports proposals for the FCC to regulate the networks.

- The prospect that later in the fall an informal but national conference on the current problems of radio broadcasters may be called, with particular attention to the mounting paperwork and reporting demands being made on them by the FCC. The proposal was advanced by NAB President LeRoy Collins and was personally endorsed by Chairman Minow.

- An offer by the FCC chairman to use his good offices with the U. S. Justice Dept. to clear the way for local radio station operators in a given market to get together to consider a joint approach to a balanced programming offering that would best meet local needs—if such a proposal were to be initiated by the stations.

- Another view by Mr. Minow that he is sympathetic to specialized programming by radio stations (but not by TV stations) to compete in high-density markets, although legal precedent calls for each station individually to offer fully-balanced programming.

- A sincere hope by Fairfax Cone, executive committee chairman of Foote, Cone & Belding, that “someday there will be a meeting at which 99% of all the attention is not devoted to what is bad in television.”

He made a special effort to impress upon the gathering that “most broadcasters are trustworthy” and so are most advertisers and agencies.

- A hypothesis by Cincinnati Law School Dean Roscoe Barrow, author of the FCC’s Network Study and recently named consultant to the FCC, that the marketing function necessary to television’s well-being may have the effect of causing “good” programs to be driven out of television by more highly-rated programs of lesser quality.

- A flat contradiction to the Minow and Barrow positions by W. Theodore Pierson, Washington communications lawyer, who is convinced the whole Minow philosophy is propounded on censorship, pure and simple. Though unrestrained programming may have imperfections, he said, it is much to be preferred over a “vast wasteland of withered liberties.”

Participants in the two-day symposium, in addition to Messrs. Minow, Collins, Jaffe, Barrow, Pierson, Guider and Cone, included: the conference chairman, J. Leonard Reinsch, executive director of the Cox stations and tv-radio advisor to President Kennedy; the conference director, John E. Coons, Northwestern Law School professor; Warren
"Make a noise in the east . . . but strike in the west"

Long before Mao Tse-Tung gave us the headline for this ad, Sun Tzu, another Chinese militarist, said in 500 B.C.:

"To fight and conquer in all your battles is not supreme excellence; supreme excellence consists in breaking the enemy's resistance without fighting."

In today's terms, this strategy is called "Protracted Conflict." In today's world it is being vigorously practiced by Mao Tse-Tung and his brothers in the Sino-Soviet block.

This is Mao's formidable formula for Protracted Conflict:

I. Eliminate your enemies one by one. Kill the straggler in a group of men . . . penetrate the straggler in a group of nations.

II. Keep the enemy off balance. Example: Berlin, Laos, Viet-Nam — the basic communist policy of international thrusts and feints.

III. Use all possible propaganda and cultural warfare to sap the enemy's will to resist.

IV. Avoid a frontal assault until it can succeed without powerful retaliation.

V. Split the battlefield into a Peace Zone and a War Zone. (Today's Peace Zone is simply the full area of the communist empire. According to communist tactics, all international tensions lie within the War Zone. Thus, the question of colonialism may be debated in regard to Congo, never in regard to Hungary or Tibet.)

Americans can be fortified through facts. We may not know what the communists will try next, but the communist blueprint convinces us that whatever it is, they are going to try it. We need not be surprised or shaken.

We don't think these ads will change the tide of any battle. But through them, and the prime time announcements to our viewers and listeners, a few more facts about communism are being published . . . and, our knowledge of the facts of the case is our mightiest defense — and offense.
Which Collins comments d'ya read?

ARE FCC FORMS 'NET IMPROVEMENT' OR 'INTOLERABLE BURDEN'?  

Hottest debate of the broadcaster’s summer: Where does NAB President LeRoy Collins stand on revision of the FCC’s program form?

He has commented three times on the subject—in a July 13 memo to member stations, in the July 31 NAB Highlights (privately circulated to members) and in an Aug. 3 address to the Northwestern U. School of Law’s Conference on Freedom and Responsibility in Broadcasting (story page 62).

Is he consistent? Or has he done an abrupt switch?

The new form isn’t too bad but might be improved—in any case “a net improvement” — Gov. Collins was reported as saying in Broadcasting (July 17).

And then the lid blew off at NAB.

Gov. Collins charged Broadcasting had misrepresented his views in reporting the July 13 memo. He said in the July 31 Highlights, after observing he had received helpful comments from some members:

“These responses indicated that some have misinterpreted our position on the proposed new forms, and this has been stimulated further by distortions in Broadcasting magazine.”

Gov. Collins continued, “In order to clarify the matter, this is to advise you that we here of the NAB staff have not given blanket approval or endorsement of the FCC proposal.”

He continued in Highlights: “… The most uniform, single item of concern received thus far, however, is over the tremendous added burden envisioned in the proposed logging requirements. … The public-service accomplishments of broadcasters, generally, are not reflected adequately in the present form, I am told. It also is my understanding that the proposed form will enable the broadcaster to log and report all identifiable program material regardless of length or category. This would appear to recognize the great flexibility of radio and not confine it to strict five-minute or 15-minute segments. In this regard, especially, do I believe it represents a ‘net improvement over the old form.’”

Different Tack • But what appeared to be an entirely different approach to the program forms was taken by Gov. Collins Aug. 3. In his Northwestern speech Gov. Collins showed concern for the mechanical burden placed on stations by the proposed program form.

To clarify all this, Broadcasting presents the full text of Gov. Collins’ comments on the proposed forms in his July 13 memorandum to NAB members and the full text of his Aug. 3 comments on the subject at Chicago. Here is the text of his July 13 letter (excluding introductory matter):

“The proposal for changes in the logging requirements is completely new and would be necessary in order for the logs to reflect the factual information required in order to complete the application form.

“The proposed amendment to the program form represents a substantial revision of the proposal of the FCC, issued last Feb. 21 in the same proceeding, which we forwarded to you on March 1.

“You will recall that upon our initiative, following the issuance of the earlier proposed form, a series of conferences was held, attended by representatives of the NAB, the Federal Communications Bar Assn. and staff members of the commission. The purpose of these conferences was to seek ways of simplifying and improving the form in areas where mutual agreement could be easily obtained, leaving, of course, open for further consideration positions of likely deeper conflict in opposing views.

“The proposed form of the FCC represents a refinement and extension of the program forms that have been utilized by the commission for the past thirty years.

“On balance, it is our opinion that the new form represents a net improvement over the old form.

K. Agee, executive director of Sigma Delta Chi; Peter Goelert, founder of the National Audience Board.

Former FCC member Charles H. King; Clair R. McCollough, NAB board chairman and general manager of the Steinman Stations; Ralph McGill, editor of the Atlanta Constitution; Sig Mickelson, vice president of Time Inc.; Nathan L. Nathanson, Northwestern Law School professor; consultant Morris S. Novik; Ward L. Quaal, executive vice president-general manager of WGN Inc.; John Taylor, general manager of educational WTTW (TV) Chicago; Sol Taishoff, editor and publisher of Broadcasting.

Unable to attend were Presidential News Secretary Pierre Salinger and public relations counselor Edward L. Bernays. It was just 11 years ago that Chairman Minow sat in the same university hall as a law student. Mr. Reinsch also is a Northwestern U. alumnus.

Surprise • Prof. Jaffe appeared to be the surprise of the symposium. He made no secret of his belief that the First Amendment of the Constitution does cover broadcasting. And in his exchange with Mr. Minow he said the First Amendment’s protection is not limited merely to protection from censorship before “publication.” He thought it might also cover “the imposition of sanctions after the event.”

Nor, said Prof. Jaffe, “is the First Amendment’s protection inapplicable on the ground that the licensee is exercising a ‘privilege’” as is afforded the broadcaster through his license.

Prof. Jaffe later explained to news-
“True, more detailed information is being requested of licensees and applicants. The form itself, however, does not represent any basic change in the philosophy of regulation of the industry by the FCC.

“In our judgment, there exists no substantial question of legality. If the commission has the basic authority to require applicants for broadcasting facilities to file any information as to program plans, and this has been accepted in practice since the advent of radio regulation, the amount of such information required is a matter of sound official discretion.

“Against this backdrop the proposed form has the advantage of reflecting more accurately past and proposed operations of the licensee. It has the disadvantage of imposing a greater administrative burden upon licensees, and this burden will be more onerous on those stations with small staffs.

“However, our NAB staff believes that it is possible for any licensee to complete this form without outside special assistance. This was a prime objective of the committee that worked with the commission on revision of the form proposed last February.

“We at NAB are working on (1) possible improvements to be sought in the proposed form, and (2) the development of guidelines of assistance for our members after a final form has been approved. Your comments, of course, will be welcomed.”

Switch at Chicago • Following is the text of Gov. Collins observations on program form revision Aug. 3 at Northwestern U.:

“Another concern facing broadcasters, and especially radio broadcasters, and one which bears directly on their ability to perform with maximum responsibility, is the matter of the FCC’s proposed new license application and renewal forms.

“I have made it clear that I cannot find no legal objection to the FCC requesting information from licensees regarding programming.

“But I do object—and very strongly—to the almost impossible amounts of detailed paperwork broadcasters—especially the smaller radio broadcasters—will be required to perform to respond to some of the questions in the proposed forms.

“In many of the smaller stations this will place an intolerable burden on already overloaded personnel. And these stations simply cannot afford to increase their staffs.

“I have seen first hand the mountains of paperwork this entails in terms of the day-to-day operation of the smaller stations. I recommend that every member of the FCC take the time to make such an examination if he has not already done so.

“I am certain that it is not the desire of the commission to keep a station from doing a proper job by imposing an unfair and unreasonable administrative burden on it, and yet this will be the result in many cases unless modifications are effected.

“And while we are on the subject of the proposed forms, as they apply to programming in radio, I would like to oppose the concept that each station in a multiple-station market should broadcast what might be called a ‘balanced’ or ‘diversified’ schedule of programming.

“I do not know that this is the intent of the FCC. But I do feel strongly that it would be foolish to expect each station to carry such a ‘balanced’ program diet. This would not produce real diversification of programming but rather insidious conformity, in which every station would be sounding much the same as any other.

“What I hope the FCC has in mind—and it seems to make very good sense, from the standpoint of the broadcasters as well as the public—is an encouragement of specialization among stations where there is a large number in a given market, so that a person might be able to tune in one station for the best in good music, another station for needed foreign-language programming, another for special teen-age programming and so on across the scale of diversified interests.

“If the FCC will spell out that it has this in mind in asking the questions about programming on the new forms, it will prove extremely helpful.

“One of the most frequently expressed concerns of broadcasters is that the FCC and its staff have little appreciation of the administrative complications—the burdensome details-facing licensees in their day-to-day operations. The FCC, on the other hand, I am sure, feels that the industry does not appreciate the FCC’s burdens, problems and goals.

“Therefore, I propose that in mid-September of this year we hold a meeting to be attended by the commissioners and appropriate staff members and by a representative group of radio broadcasters.

“The purpose of the meeting would be to exchange freely and frankly the views of all participants regarding current radio broadcasting problems in a very informal conference atmosphere. I would not contemplate this meeting taking on the aspects of a formal hearing of record, but I believe it should involve the proposal of the commission to modify its application form and logging requirements.

“This would be entirely in order, procedurally, for the commission has expressly stated that it would not be limited to comments of record, but would further take into account any relevant information obtained in any manner from informal sources.

“I feel that such a meeting would be of significant help all around, and we offer the services of NAB in making appropriate arrangements.”

men that the Supreme Court for perhaps 20 years has held that to punish after an event is just as much censorship as prior permission to "print."

Prof. Jaffe told the conference he does agree with Chairman Minow’s position that it is not censorship nor a violation of the First Amendment to determine on the basis of the whole program schedule whether the licensee has met his responsibility for providing a general balanced television service.

Shuler Case • Elaborating on this point, Prof. Jaffe ventured that there is a limit to the imposition of sanctions after the event” and said he feels that a “refusal to renew a license” could be such a penalty if based on the “character” of the program content. His personal view, he said, is that if the Supreme Court today were to review the famed Shuler case (including an issue of religious bigotry) possibly five of the justices would find that refusal to renew the station’s license violated the free speech principle. (An appeals court in 1932 upheld the Federal Radio Commission’s refusal to renew a radio station license held by the Rev. Bob Shuler who was charged with defamatory and other damaging broadcasts.)

The Harvard professor earlier in the day had sparked sharp ideological exchanges among the participants with his paper which began the symposium’s initial closed meeting. He observed that ever since the 1946 Blue Book, the industry has come to loosely follow its precepts and Congress “has maintained a resounding silence, but the echo is probably adequate to demonstrate congressional ratification of the principle

BROADCASTING, August 7, 1961
of responsibility for balanced programs, even though it leaves unclear the powers of the FCC to police the obligation.

What should the government do about an excess of sex and violence on the air? Prof. Jaffe asked if the government should “measure out the quantity of sex and sadism that will be tolerated?” He said that except for cases of hard-core obscenity, the Supreme Court “might hold that the Constitution forbade censorship, though it is at least possible that censorship of the hours when children are ordinarily viewing might get by.”

Prof. Jaffe felt, however, “that a determined and continuing effort by the organized citizenry brought to bear on advertisers and licensees will bring about some amelioration. Given our prevailing culture, not much more can be expected.”

Beyond Help • Of general entertainment programs, Prof. Jaffe said, “The most alarming thing about TV is not its undeniable dullness, but the apparent fact that so many people have nothing better to do than to sit constantly before it. I insist that these passive sponges are so completely bereft of culture that for them the quality of programs is immaterial.”

As to whether “policing” of programming is feasible or desirable, Prof. Jaffe felt that it is, “but primarily through enforced publicity and reporting.” He sees government “as a grand court of inquiry” to stimulate public discussion. But he contends that in areas of opinion “it is a precisely flat legal prescription which we should avoid. Law in this area is likely to be inept or arbitrary; it may even entrench on the Constitution.”

Prof. Jaffe delved at considerable length into the legal nuances of his proposition that a general responsibility for balance is constitutional because of the present limited number of frequencies. It was on this broad premise that he concluded that the government “has a prime responsibility for end product of TV” and that this responsibility “can best be discharged by the official publication of standards, by unrelenting publicity and by an obligation on the industry to study the programmatic needs of its constituencies, to report on and to defend its performance.”

Minow Position • Mr. Minow devoted his entire prepared statement to a treatise of legal and legislative precedent supporting his position that the programming controls he advocates do not constitute censorship. His 21-page speech was backed by a 76-page legal memorandum prepared by legal assistant Joel Rosenbloom.

Legal precedent and the history of legislation and regulation of broadcasting are consistent in the area of censorship and establish these two things, Chairman Minow said: (1) the no-censorship provision of the Communications Act refers to prior restraint, and (2) the commission has the authority and duty to consider past and proposed programming of applicants. Those who cry censorship ignore these two facts, he said.

“They argue each time as if the slate were completely clean,” he charged. “Don’t study the law books. . . . Their argument to the commission . . . is often the same as their answer to their critics: ‘If you don’t like it, turn your set off.’”

For many years, Chairman Minow said, the word “censorship” has smothered and obscured analysis about the relationship between government and broadcasting.

The FCC chairman charged that there is much censorship in broadcasting today—but that it is by ratings, advertisers and broadcasters and not by the federal government. He said this censorship should be examined, spotlighted and deplored just as any form of censorship should be. “When a broadcaster defers to the advertiser in permitting the private interest to have priority over the public interest, the result is censorship—and in a most pernicious form,” Chairman Minow charged.

The Other Hand • The commission clearly does not censor anything, the chairman maintained. “We never view a program in advance of broadcast and prevent its being seen by the public,” he said. The commission does examine over-all program performance and proposals of licensees and applicants, he said.

“It is this that is called censorship,” he said. “It is this, they tell us, that violates the First Amendment and the Communications Act.” The analogy to newspapers is nonsense, Chairman Minow maintained.

The First Amendment applies differently to print media and broadcast media because broadcasting is different, he said. “There is a prior restraint [for broadcasting]—because it is necessary—but this restraint is against getting into the business in the first place unless you have a license.”

Pointing out that the Communications Act bestows upon the FCC the right to require stations to keep program logs, Chairman Minow asked: “Records of programs? What for if the

commission has no concern with programming?” He said that legislative history of the Radio and Communications Act leaves no doubt as to the power of the FCC to consider programming as one facet of the public interest.

If the chairman said, a tv station proposes to telecast little or no education, religion, educational or public affairs programming, the commission is free “and indeed obliged” to ask why. “This requirement is not censorship. The commission is not prescribing the specific programs to be presented. It has a right to ask why that applicant should have a piece of a precious resource.”

Where the Trouble Lies • “The trouble,” Chairman Minow said, “is that far too many licensees do not regard themselves as trustees for the public.” The frequency is regarded as theirs, not the public’s, and the license is not one to operate in the public interest but rather to get the greatest financial return possible out of their investment.

“Those few broadcasters and their professional associates who would evade the nation’s needs crying ‘Censorship! Oh where will it end’? I ask: Responsibility—when will it begin?”

Collins Proposal • An industry-FCC meeting in mid-September to work out the program-form mess was proposed by NAB President Collins.

Gov. Collins said the FCC’s proposed program form would place an intolerable burden of paper work on stations.

In his conference speech Gov. Collins opposed the concept that each station in a multiple-station market should broadcast a balanced or diversified schedule of programming, claiming it would not produce “real diversification of programming but rather insidious conformity.” He contended specialized programming in multi-station markets should be encouraged.

The proposed industry-FCC conference, to be informal in nature, would seek an exchange of views on current radio broadcasting problems. Gov. Collins said broadcasters often say the FCC has little appreciation of the burdensome details facing licensees.

Station Explosion • Reviving a suggestion made at the NAB convention last May, he blamed the “overpopulation of licensees” on the FCC. He said, “I could not be in more disagreement with Chairman Minow, who has said he feels the road to better programming in broadcasting lies through additional stations on the air and additional competition.”

Experience shows, he added, “that increasing competition beyond the reasonable-support potential increases the incidence of overcommercialism, reduces station income and thus decreases the ability to finance the special efforts required to produce the highest-quality operation.

“I hope that this lesson so painfully learned too late in radio will be heeded in television while there is time. Television needs to be fully competitive, but not to the extent that in order to survive every corner must be cut, every possible dollar earned.”

Gov. Collins lauded a proposed FCC study seeking answers to the economic questions plaguing many radio stations, offering NAB’s services in the project. Again he suggested a moratorium on issuance of new am grants, as earlier suggested by FCC Commissioner Robert B. Lee.

Arguing against FCC’s substitution of its taste and judgment of programming for that of a licensee, he said NAB has long agreed the Commission should hold every licensee accountable for good-faith efforts to serve the public interest in line with his promises.

“I am prepared to carry the fight for free broadcasting not only to the FCC and the Congress but to every home in America, beginning with one on Pennsylvania Avenue,” he said.

King Views • Former FCC Commissioner King said he does not feel we can have an effective system of broadcasting by private enterprise and at the same time have the government telling the industry what they must or must not put on the air.

“Let’s face it. What makes private enterprise tick is profits; it is only by making a profit that television can render the public service that it does.”

Mr. King said that when the government steps in to tell the broadcaster what he must or must not broadcast, both the opportunity for profit and the incentive that goes along with it are bound to be affected adversely. “Once started,” he added, “this thing tends to expand.”

But Mr. King did believe the Government can establish certain minimum standards of program content. The problem comes with how far minimum should range, he said.

‘Not From Washington’ • Mr. Guider, former partner in the Washington law firm of Hogan, Donovan, Jones, Hartson & Guider, now president of WMTV-TV Poland Spring, Me., told the conference he wants the program responsibility problem “solved at the station level and not from Washington.”

Mr. Mickelson observed that “somewhere someone has to make a subjective decision” about programming and said it should be a broadcaster decision completely, not one made by government.

He said why really is at issue is what is the definition of “good” or “bad” programming, because no one has yet been able to define them, any more than what is “public service.”

To suggestions that low-rated information shows be priced cheaper, Mr. Mickelson sounded a warning. “Producers would be under terrible pressure to justify higher audiences and higher prices,” he said, and this would have a “degrading effect” on information content.

Barrow Talk • Dean Barrow’s lengthy paper opening the Friday morning session described how tv programming is affected by non-governmental in-

68 (GOVERNMENT)
A lot goes on in Western New York that's not seen by the nation's eyes — but the millions in the WBEN-TV area (more than 2,800,000 in the U.S. alone) get a graphic glimpse of it all. WBEN-TV public-service programming sees to this — through seasoned crews, up-to-the-minute mobile equipment and a guiding station policy that regards public service programming as a public trust.

Niagara power, international regattas, Seaway progress, urban renewal, regular church telecasts — all come into the field of WBEN-TV cameras. These telecasts and award-winning features contribute to the public service image that WBEN-TV has created among millions of viewers.

This image builds loyal viewers who watch more often and with confidence. That is why your TV dollars count for more — on Channel 4.
fluences and reviewed various proposals that have been advanced for improving program quality and variety. He declined to propose any “solutions” because of the author’s relationship as a consultant to the FCC.

Mr. Barrow asked if tv’s marketing function possibly is getting in the way of its public service function in the light of today’s international survival battle.

Need for Stimulation • Dean Barrow continued: “What is television doing to stimulate and extract excellence in this time of conflict with totalitarian ideology? Is not the ultimate question one of the degree to which this great public resource—television—is furthering a strong, confident democratic spirit, and the degree to which its use as a marketing instrument impedes television’s service in the public interest?”

Mr. Barrow noted that the desire of the national advertiser is for a national market and the aim of the network is to deliver a national audience. Audience ratings show that stereotyped programming such as westerns, mysteries and quiz shows get the highest ratings. These factors working together, he found, under Gresham’s Law mean that the high quality shows are driven off the air even though they may attract “a substantial but not maximum” audience. As a result, broadcasters place a practical reliance on networks to select programming and “in this way the licensed broadcaster’s responsibility to serve the tastes, needs and desires of his community is impinged.”

Dean Barrow said commercial motives “loom large in the program selection process” because the advertising dollar turns the industry wheels. TV, he said, “has the greatest sales impact of all advertising media,” and for this reason advertisers have been quick to take advantage of this mass sales power.

His paper examined in detail the relationship of advertiser and agency, the network and station individually as well as their inter-relationship, network part ownership of programs, the NAB and its codes, the industry’s “powerful” lobby in Washington and such other topics as talent agency and network control of talent.

In discussing group pressures such as that encountered by the Untouchables, Dean Barrow felt that due care should be given in characterization of sensitive groups, but he argued that the “network or broadcaster should not introduce changes which render the program unfaithful to the message which the program was intended to communicate.”

Pierson Answer • Answering Messrs. Minow and Barrow, attorney Pierson said that the course they advocate will result in a high degree of centralized government control of TV programming.

How FCC members plan to spend the month

Surecease from the daily grind of decisions, actions and oral arguments comes to FCC commissioners in August. But vacation plans vary from long trips to “hoping to get a day here and there.”

Commissioner Robert T. Bartley will be on duty throughout August as acting chairman. He will pass on routine matters and act on certain motions.

Chairman Newton N. Minow started his “vacation” last week at the Northwestern U. Conference on Mass Media (see page 62). He will attend the American Bar Assn. meeting in St. Louis and spend most of the rest of August in Washington, D. C. He hopes to get away for a week or so to one of the nearby beaches with his family.

Also remaining in Washington and environs are Commissioners Frederick W. Ford and Robert E. Lee.

Commissioner Ford will be at home in Alexandria, Va., with his family, including his month-old son. Commissioner Lee is braving the Washington heat and hoping to sharpen his golf game.

Travelers • Commissioner John S. Cross will be at home in Eureka Springs, Ark., during the recess at the Riverview Resort Motel, which he operates with his wife.

Commissioner T. A. M. Craven leaves for Laconia, N. H., Aug. 10 after extended testimony on Capitol Hill before the Small Business Committee on the possibility of monopoly in space communications.

Commissioner Rosel H. Hyde will vacation at home in Downey, Idaho, after going to his son’s wedding in Logan, Utah, Aug. 9. He intends to visit another of his three sons in Westport, Conn., on the return trip to Washington.

“Still more bluntly, it is censorship,” he charged.

“Indeed, I believe that the greatest threat to tv’s achievement of its proper role in our free society is the restrictions and restraints that the censors and controllers have placed and which place upon the medium,” Mr. Pierson, a partner in the Washington law firm of Pierson, Ball & Dowd, said.

Mr. Pierson paraphrased Chairman Minow’s NAB speech thusly: “Unless you broadcast or propose to broadcast what I favor and have specified, you will not be permitted by our commission to broadcast anything.” This view, the Washington attorney stated, is a prior restraint upon broadcasting, it is censorship and violates the First Amendment.

Further, he said, Mr. Minow stated that he (Minow) would suppress programming which he does not meet with bureaucratic tastes. If you are a bureaucrat and you tell a broadcaster that he may operate if he broadcasts what you favor and may not operate unless he suppresses what you disfavor, what are you doing but requiring broadcasters to conform to your taste? Mr. Pierson asked, “Did he (Minow) mean that in his few months as chairman he had been able to discern what no one else has ever known or been able to define—the public interest in programming?”

Minow Stereotype • If the commission pursues the Minow plan, Mr. Pierson said, the agency will be the direct cause of the suppression of many programs and the release of many others, all tending to be stereotyped after the Minow pattern. Such a plan must constitute censorship; otherwise the First
the price is right on WWJ-TV

40-second prime time announcements will be available on WWJ-TV this fall on a fair and reasonable basis:

Basic rate for both 40-second and 60-second announcements will be $900.00.
Rate for 20-second announcements remains at $700.00.
30-second announcements will also be available at $700.00.

WWJ-TV management believes this new category of announcements is thus equitably priced, permitting use by advertisers of these expanded announcements for increased exposure, additional copy points, and exclusivity at rates commensurate with good advertising principles.

Moving into the new season, WWJ-TV is pleased to be able to offer excellent availabilities in 40-second breaks adjacent to the fine offerings of NBC’s attractive fall programs.

WWJ-TV continues its long-standing policy which precludes triple-spotting.
Amendment is inapplicable to the most effective means of communication yet devised by man—television, he stated. "It would mean that free speech and press are only for the less efficient and most ineffective modes—books, newspapers, magazines, handbills and movies. It would mean admitting that technological advance inevitably and progressively takes its price in loss of liberty.

"I say, Mr. Minow cannot have it both ways. . . . He cannot free us from our own imperfect tastes by binding us to his imperfect tastes without denying the principle of freedom . . . diversity and liberty instead of conformity and restraint."

No Justification • Pointing out that advocates of program control offer numerous justifications and excuses, Mr. Pierson said most of them are "old and hackneyed." It is impossible, he said, for the FCC to consider "overall" programming and "balance" without considering individual programs. The chairman, Mr. Pierson said, has dealt with specific programs and types with which he approved or disapproved.

"I submit that the area of commission consideration of overall programming is but a vast wasteland of withered liberties that should not be preferred over the 'vast wasteland' Mr. Minow found in one long boring day and night before his tv screen." Also, Mr. Pierson charged, in actual practice the FCC has used the term balance to coerce licensees into carrying types of programs the commission favors at the expense of programs the agency dislikes.

The commission has a right to require programming information of licensees, but only to test their character qualifications, Mr. Pierson stated. However, "in view of Mr. Minow's threats to deny applications where the program structures do not conform to his specifications, can it be said that the program representations in an application are uncoerced and voluntary?" he asked.

Referring to an earlier speech by Dean Barrow, Mr. Pierson agreed that tv is an imperfect instrument and added that it always will be unless a perfect machine is developed that does not require an "imperfect human being" to perform tasks or make judgments. The pall of imperfection that is cast on commercial tv shrouds all human activity, including above all, government action.

Mr. Pierson attacked the dean's proposal for a centralized program control in the FCC, NAB and outstanding citizens. "I would go the other way . . . [and] permit stations to unbalance the types of programs they broadcast at will and with abandon," he said. "The sum of such specialized program formats would result in overall balance in the industry output." He said that the "costly Barrow investigation" was not needed to establish that profit influences tv programming. "This was and is one of the most open and notorious facts within my knowledge," Mr. Pierson stated.

McGill Comment • Mr. McGill felt tv problems seem to be a part of an overall cultural evolution that now is in process. "Our culture is being wrenched and convulsed and what comes out of it may be a national culture instead of regional cultures," he said. To meet the challenges of the day, "we must come up with a positive approach."

Prof. Nathanson suggested that "it is very debatable that television at the present time represents our culture." He said he personally is not able to keep up with all the good books, magazines and films, but he has no problem keeping up with really "good" tv shows.

To a question of whether increased competition means improved programming, Mr. Quaal denied that it does per se. "I'm afraid the opposite will be true," he said, citing a competitive problem of 14 radio stations in the Albuquerque area. Mr. Quaal disagreed with Prof. Jaffe over a "monopoly" situation in network tv. Mr. Quaal asserted "there is plenty of competition in tv today."

On the competition issue, Mr. Agee noted that in some single-newspaper towns the sole paper is doing a better public service job than multiple papers competing in other markets. He said the "history of the broadcast media in meeting challenges has been very great."

Cone Remarks • Mr. Cone answered several comparisons of high class magazines which put tv in poor light. He observed that Harper's and Atlantic Monthly comes out but once a month, Sunday newspaper supplements once a week, but tv programs hour after hour, day after day. "Sure, there are poor shows telecast," he said, "but there are a whale of a lot of good shows on the air too." He also pressed for his "revolving spot" magazine carrier concept similar to the pattern used in space buying. This would give lower-rated public interest programs much better insurance of getting on the air, he declared.

Mr. Novik pointed out to the conference that although the radio station population has increased sharply in recent years, the diversity of what is offered has decreased. He attributed this to the music-and-news formula stations which have "forced the quality of other stations down to meet the competition."

Mr. Coontz felt that publicity about government concern over programming in itself has had a very beneficial effect on programming. Mr. Minow's "wasteland" speech he said was a good example of the effectiveness of this publicity impact.

Prof. Coons asked if the producers of Untouchables could do better if given a chance. Agency executive Cone observed he personally liked the show, but pointed out there actually is difficulty in getting scripts for good drama programs today. He recalled a recent contest for drama scripts brought in 1,500 entries, but that the judges could find only "two or three" that were of sufficient quality to accept or use on a broadcast.

Taishoff on "Scarcity" • During references to uhf, Mr. Taishoff asked if there really is a scarcity issue in tv today. With 70 uhf channels available, 150 permits surrendered in recent years, he suggested scarcity can't be used as an argument if plenty of channels "can be handed out for the asking."

Mr. Taylor said he hoped the vacant channels wouldn't go too soon because educators in the next decade are going to need them a half-dozen in a bunch in some markets to meet the teaching manpower challenge that is rapidly developing. He said educational tv will need all the uhf channels it can obtain "plus all the class D time that's available on commercial stations, too."
We’re selling disregard factors today

A funny thing happened to LVN¹ on the way to the studio the other day. He had a daymare. “What would happen,” a dream figure asked him, “if an advertiser purchased an infinite number of announcement on Station B in Eastern Iowa?”

“Money would be coming out of the holes in his head.” LVN answered, “and he’d spend an infinite sum.”

“And for Station C?”

“Ditto.”

This fascinating hard-sell hallucination is brought to you by Station A to dramatize a Fact: No matter how many announcements an advertiser purchases on Station B or Station C, he disregards a substantial part of the Eastern Iowa market.

This gives rise to the LVN Theory of Improbability, or Disregard Station A in Eastern Iowa at Your Peril, not to be confused with an old movie serial.

Taking Station A’s tv home potential as 100%, Station B’s home pot. is 79%; Station C’s, 84%. On an average daily daytime basis, on Station B alone an advertiser disregards 54% of the market; on Station C, 55%. On an average daily nighttime² basis, an advertiser on Station B disregards 50% of the market; on Station C, 26% of the market.

¹Graffiti appearing at end of memos beginning “To All WMT Sales.”
²Not to be confused with a nightly daytime basis.

These data are based on the ARB for Cedar Rapids—Waterloo, March, 1961.

No more automatic grants to survivors

OTHERS MAY FILE BIDS AFTER

Rulemaking was finalized by the FCC last week which no longer makes it “automatic” for the remaining applicant to receive a grant after merging or securing the withdrawal of a competing applicant for the same facility in a nearby city.

Under the new rules, the withdrawing applicant is required to give local notice of such intentions. The FCC will then take no action on the remaining application for 30 days during which time it will accept new applications for the same facility requested by the dismissing party.

The new rule, first proposed by Commissioner Robert T. Bartley (Broadcasting, Jan. 16), is designed to carry out more efficiently Sec. 307 (b) of the Communications Act. The section requires the commission to distribute frequencies among states and cities in a “fair, efficient and equitable manner.”

Any new applications filed under the rule will be entitled to a comparative hearing with other pending applications for the same facility. In adopting the change, the commission said the rule will serve the public interest by acting

MERGER OR DROP-OUT

as a deterrent to those who would use the FCC processes for private gain. Sec. 311 (c) now acts in much the same manner in the area of pay-offs with the two rules complementing each other, it was pointed out.

Commissioner Robert E. Lee dissented.

Small business group plans radio-tv study

A subcommittee of the Senate Select Small Business Committee is planning a wide-scale inquiry into broadcasting activities. Its point of departure will be advertising opportunities available to small business firms on television and radio.

Rep. Dale Alford (D-Ark.), chair- man of the Small Business subcommittee No. 6, feels there may be evidence of national advertisers putting small firms at a disadvantage by “monopolizing the choice advertising times.”

In a memorandum to subcommittee members, he said that the subcommittee could help small business firms by determining whether their complaints in this area are justified.

The hearings would also seek to determine whether the small firms are capable of participating in broadcasting to improve their business, he said.

One of eight subjects that Rep. Alford suggested the hearings could develop, however, appears limited to big business: “Do the national advertisers unduly influence” the networks and their programming?

Another question he feels should be discussed is pay-tv. The hearings would also get into the pay-tv question, according to the memorandum, to determine whether that system would stimulate the establishment of outlets in communities outside major metropolitan areas.

Other possible subjects listed in the memorandum follow:

• Under existing law, what broadcasting practices have developed that adversely affect small business?

• What time slots on television are reserved exclusively for large network advertisers?

• What programming and time periods are available to regional and local advertisers?

• If certain time periods are not available, why are they unavailable?

• What new legislation would help small business in the field of broadcast advertising?

• What has the FCC done to enhance competition and provide greater opportunities for small business?

Rep. Alford suggested no date for the hearings, but told subcommittee members he would like to hold them “at an early date.”

The subcommittee announced plans for hearings on the same subject two years ago, but they were never held.

Senate would restore FCC budget cut

The FCC’s total budget request of $12,525,000 was approved by the Senate last week in passing the $9,098,769.- 500 Independent Offices Appropriations bill.

The final say on the matter will not be heard, however, until the bill comes out of a Senate-House conference that began work Friday (Aug. 4) to resolve differences between the Senate bill and an $8.49 billion appropriation passed earlier by the House.

It appeared unlikely that the House conferees would go along with the Senate in restoring the entire $125,000 cut.

FCC revamp passes House in 198-150 vote

REP. ROGERS’ FLOOR FIGHT FAILS TO STOP APPROVAL

The House of Representatives last week approved the FCC-reorganization bill (HR 7856), but not without a fight. Rep. Walter Rogers (D-Tex.) waged a one-man floor battle against the bill, and forced a roll-call vote. The final tally was 198-150.

The reorganization legislation, which permits the commission to delegate adjudicatory functions to its staff and gives it the power to choose among the cases it will review en banc, now goes to a House-Senate conference.

The House bill differs in several minor respects from the Senate bill (S 2034). On FCC reorganization passed two weeks ago (Broadcasting, July 31).

Rep. Rogers vigorously opposed the bill on the grounds it would give civil service employees the power to make final decisions in review cases. He said this had been the intent of the President's FCC-reorganization plan, which the House rejected (Broadcasting, June 19).

Rep. Oren Harris (D-Ark.), author of the reorganization bill and chairman of the House Commerce Committee, and Rep. J. Arthur Younger (R-Calif.), ranking minority member of the committee, introduced four amendments to tighten up the bill and allay Rep Rogers' fears. But he remained unconvinced.

WITT HEARING IGNORED

Main Street shows apathy to station’s plight; little concern over whether license renewed

Local interest in the Lewisburg, Pa., license-renewal hearing last week of WITT, that city, was non-existent—both within the hearing room and on the streets of the community of 5,523 people.

The hearing was held on charges that Wireline Radio Inc., the licensee, had transferred control of WITT without prior FCC approval.

"We are guilty of two sins—not making any money and being dumb," a WITT official said in describing the difficulties of the station and its 44 stockholders with the FCC.

During all sessions of the hearing, Monday and Tuesday, the hearing room was empty except for parties to the proceeding, witnesses, area broadcasters and two reporters.

The one exception to the above was a short visit by the wife of a Bucknell U. (located in Lewisburg) professor. She said that she had heard about the hearing on WITT and was mildly curious about what was happening. The housewife disclaimed any knowledge of the issues involved but expressed the hope that WITT would remain on the air.

Up and Down the Street • Well over half of some four dozen Lewisburg residents interviewed on the street did not know that the WITT hearing was in process. And, a surprising number of the local citizens did not even know that the radio station was having difficulty with the federal government—despite announcements over WITT Sunday (July 30) that its renewal hearing would be held the next day and front-page coverage for the past several months by the Sunbury (Pa.) Daily Item, the principal daily newspaper serving Lewisburg. (Sunbury is 10 miles from Lewisburg.)

None of the area radio stations, including WITT, reported the hearing in their newscasts. WITT, however, carried periodical announcements July 30 that the hearing would begin the next day.

Except for those directly involved, the WITT hearing just was not a topic of conversation or interest in Lewisburg. Among most residents there was a general apathy toward the local radio station with no feeling one way or the other whether WITT retained its license.

An exception to this general feeling was Karl Purnell, publisher of the Union County Record, Lewisburg’s weekly newspaper. Mr. Purnell just purchased the Record a month ago and formerly was assistant to ex-Rep. Douglas Elliott (R-Pa.). He said WITT is a valuable asset to Lewisburg as its signal is heard throughout several Pennsylvania counties.

The Record did not report in advance that the hearing would be held in Lewisburg. The paper’s Thursday issue, however, printed a front-page story on the testimony. Six weeks ago when WITT returned to the air after going dark for 10 days, the Record carried a page-one story with picture of the station’s return to the air. This article included a plea by the WITT manager for advertiser support.

Merchants, Too • Most of the businessmen, while expressing a knowledge of the WITT hearing, were little concerned over the station’s fate. Here are some of their reactions:

"I know they are in some kind of trouble but I’m too busy to care." "I haven’t talked to anybody about WITT."

"What is the FCC . . . Minow, who’s that?"

"I didn’t know the station had been

A powerful pitch for Sec. 315 repeal

A powerful pitch for amendment if not repeal of the political broadcasting law was made before a Senate-FCC audience last Monday through the simple device of a kinescope of a campaign address last fall by a third party senatorial candidate in Colorado.

At the invitation of Sen. Gordon Allott (R-Colo.) the successful candidate, the audience saw and heard William R. Casey, independent candidate, harangue for 30 minutes. The kinescope was made by KLZ-TV Denver which, along with other Denver TV stations and numerous radio stations, gave Mr. Casey time under the equal time mandate of Sec. 315 of the Communications Act. Mr. Casey polled about 3,300 votes of more than 785,000 cast.

Hugh B. Terry, president and general manager of KLZ-AM-TV, said performances of this type will discourage stations from carrying political broadcasts unless the statute is changed and discretion is given station management. Many viewers were critical, he said. He argued that stations can be relied upon to exercise good judgment in handling political broadcasts and that relaxation of the 315 requirements along the lines proposed by Sen. Pastore (D-R.I.) would go a long way toward alleviating the problem. Mr. Pastore has introduced a bill to exempt candidates for the Presidency, Vice Presidency, Senate, House and state governorships from Sec. 315. Mr. Terry indicated that he personally favored outright repeal of the section. Sen. Pastore and Sen. Andrew Schoeppel (R-Kan.) were present. Sen. Allott was unable to attend because of the death of his brother.

All FCC members except Commissioner John S. Cross attended the luncheon in the Senate Office Building. Others present included Nicholas Zapple, communications expert of the Senate Commerce Committee, and President LeRoy Collins and Vice President Vincent Wasilewski of the NAB.
You roll it...let ASC ride it!

RCA Vidicon Chain, with Automatic Sensitivity Control, Assures Uniform Picture Quality...Automatically

To show the "Film of the Day" at its very best, use the RCA Vidicon Camera Chain, Type TK-21C—now with Automatic Sensitivity Control. By electronically controlling sensitivity of the camera tube, the TK-21C automatically rides gain for you...assuring superior reproduction of films with little or no operator attention. The operating convenience and uniform picture quality will add new spark to your film programming...give better service to your clients.

This improved camera chain with Automatic Sensitivity Control senses variations in camera output level, and compensates for wide transitions in highlight density. Reaction time is rapid—less than ½ second for a 10 to 1 change in highlight brightness. Even under the worst conditions, a transition from extremely dense to very light film (100 to 1 change) can be accomplished in less than one second. Automatic Sensitivity Control is supplied as part of new RCA TK-21C Vidicon Film Chains. Previous TK-21 models can be converted.

An integral part of a matched line of RCA TV equipment, the vidicon film system has been established as the standard of the industry. Continued improvements, such as automatic sensitivity control, make RCA vidicon chains one of your best equipment buys. Remember when you buy RCA you get the most advanced equipment...plus the kind of service before and after the sale that only RCA with its broad background in broadcasting can provide.

Get the full facts on the new RCA TK-21C Vidicon Film Chain—See your RCA Representative or write to RCA, Broadcast and Television Equipment, Dept. Y-22, Building 15-5, Camden, N. J.

RCA Broadcast and Television Equipment, Camden, N. J.
An open letter to Newton N. Minow

NORTH DAKOTANS' QUESTIONS POSE 'SECOND VIEWPOINT' ON ISSUES

The North Dakota Broadcasters Assn., has asserted broadcasting deserves the same freedoms accorded the press and has taken issue with many of FCC Chairman Newton Minow's views. The association's position was stated in a letter sent to Mr. Minow July 28 and signed by Leslie E. Maupin, secretary-treasurer of the association and commercial manager of KLPM Minot, N. D. Here is the text:

The North Dakota Broadcasters Assn., through majority approval, submit the following questions on certain viewpoints and contentions we feel were expressed in your recent speech [May 9] before the NAB. We submit these questions to point out a possible "second viewpoint" on some issues; in some cases, to point out a possible opposite viewpoint. Please believe we do not question your sincerity nor the "public benefit" of your motives. We only question the ultimate result of certain practices or procedures we feel were intimated or expressed in your speech.

1. "The airwaves belong to the public.

We certainly agree accessibility to the airwaves does belong to the public; but, in that broadcasting is entirely independent of government subsidy or support, we question whether "public ownership" actually applies. We surely agree the public owns the right to tune in or turn off their sets and select which programs they prefer. We question a government agency having a greater right to "dictate" broadcast programming than a right to dictate newspaper content or format; types of movies to be made and shown; types of stage plays to be produced, and so forth.

2. "Mere popularity should not be the test of what to broadcast.

Assuming, of course, that programming satisfies moral and decency principles, we wonder if the public should be denied free choice in broadcasting, as they have in all other forms of entertainment? And from the standpoint of listener-viewer acceptance, we question the public's likelihood to watch or listen to programming they may not like, in preference to not watching or listening at all.

3. "It is not enough to cater to the nation's whims; you must also serve the nation's needs."

We agree "serving the nation's needs" is obviously vital and necessary. And we are honestly doing our individual best to our own abilities and time availabilities. We believe a check of all radio and television stations will show a greater percentage of time (value) devoted to "public service" than by any other media.

4. "Commercial messages should be limited."

(Radio's present 18 commercials per hour regulation). This is not from your NAB speech, other than your reference to tele-

off the air until I read it in the paper."

"WITT got off on the wrong foot four years ago and has never recovered. It has had poor publicity and bad management."

"Nobody seems to care one way or the other."

"I depend on WITT. We need the station and it has been persecuted by the government."

While WITT has lost money every month it has operated, the license renewal problems have compounded a lack of revenue. Many past and potential clients have told the station they would not advertise "until your government problem is settled," station personnel reported.

This was verified by at least one businessman who said that he and others have been repeatedly told that WITT would be taken off the air by the government "the first of the month." Among those Lewisburg citizens who knew the hearing would begin last Monday, there was a general feeling that the station would be taken off the air that night. Without an understanding of FCC procedures, they expected an immediate order from "the government people."

The Official Proceeding • The hearing itself, before Examiner Asher Ende, was fairly routine. The commission alleged that an unauthorized transfer took place in December 1959 when Robert L. Wilson, owner of WKVA Lewistown, Pa., contracted to purchase the station for $26,100. As part of that contract, which was reported to the FCC, Mr. Wilson took over operation of WITT immediately and loaned the station operating funds. This fact was freely testified to by Mr. Wilson and WITT witnesses and it was shown that no attempt to hide the operation from the FCC was made.

Arthur Stambler, Washington attorney for WITT, called only three witnesses—Harold E. Pray, WITT stockholder and treasurer, William Nesbit, chief engineer, and Peter Ferrell, stockholder and former general manager. Mr. Pray said that WITT is insolvent to the tune of over $35,000 in debts, including approximately $18,000 to former and present employees who worked without pay. The station went off the air June 1 for 10 days when the telephone company disconnected service for non-payment of bills.

Mr. Nesbit and Mr. Farrell testified on technical violations for which WITT was cited by the commission. Testimony by these two and Carolus Spencer, FCC engineer in charge of the Buffalo office who issued the citations, brought out that many of the violations were not personally seen by Mr. Spencer but were admitted to him by the station. Mr. Spencer inspected WITT again July 29 and stated that the station's technical operations now conform with commission regulations.

Mr. Wilson stated that he cancelled his contract to purchase WITT after the deal was questioned by the commission. All concerned said they did not know FCC rules were being violated and stressed that the entire deal was spelled out for the agency.

Mr. Pray told of numerous other negotiations for the purchase of WITT after the Wilson deal fell through. One offer of $1,500 per share with 4,000 shares outstanding ($6,000) was received from Sam Booth, at that time owner of WMLP Milton, Pa., according to Mr. Pray. Milton is only five miles from Lewisburg and Mr. Pray said that WMLP planned to take WITT off the air.

Commission counsel Ernest Nash and Donald Rushford questioned Joseph Pelletier and Richard Fenstermacher, presently general manager and assistant general manager, respectively, of WITT, on whether they now exercise control over the station in violation of FCC rules. Both of the station officers assumed their part-time jobs when the station returned to the
vision's "endless commercials."

We honestly question whether the ability of the people to tune in or turn off their sets shouldn't be the prevailing right. We think the public, through program acceptance, proves they like commercials—perhaps because commercials are actually news; news about products and services in which they are generally interested.

5. (The idea) that the public must be given what is "best" for them, rather than what they (merely) prefer.

Couldn't this often result in the sometimes disappointing result of "leading a horse to water" . . . ? We question the public's acceptance of controlled programming over the uncontrolled "programming" of competing entertainment and news media.

6. (The idea) stations must have "balanced programming" according to standards which are (or will be) set by the FCC.

Couldn't this be likened to forcing all restaurants and hamburger stands to serve only balanced meals? No sandwiches. No quick snacks. Balanced meals only! We wonder if such a restriction, even though in the "public interest," would actually prove to be of public benefit. This again raises broadcasting's singular responsibility "to the public" in being the only entertainment media required to give the people not what they want, but what someone else states they should have.

7. Finally, the present right of the FCC to dangle license renewal as a weapon to force broadcasters to "get in line" with FCC programming requirements and/or preferences, regardless of apparent public preferences.

We wonder if this situation is not only undemocratic, but if an additional moral principle isn't involved. We wonder if the FCC should be considered more representative of the people than the people themselves? We also wonder if the FCC isn't taking the stand that "the majority is wrong," and that the commission, not the people, knows what is best for the people. Isn't the FCC an agency of the people; not an agency to represent, promulgate and instill (only) the tastes of a minority?

We submit these questions and contentions in the interest of better broadcasting, and to request "freedom of the press" for the broadcasting industry as a whole.

PLUGOLA COMMENTS

General disapproval voiced to FCC

Networks, stations and communications attorneys were unanimous in their disapproval of the FCC's proposed "plugola" rules in comments submitted to the commission last week.

The rule would require stations to make an announcement on the air whenever a product or service is promoted in which a licensee or any of his employees has 10% or more interest, beyond such promotion as is "ordinarily necessary" in program presentation. Almost all comments said such a rule is unnecessary. Many pointed out that such plugs represent advertising for which the licensee is not paid and therefore undesirable to him. All four networks and the NAB suggested that since the FCC is primarily interested in full disclosure of such interests, periodic reports to the commission be substituted for on-air announcement.

Many comments pointed out that announcements of station interests in products would constitute "undesirable program interruptions" and would annoy broadcast audiences. Also, it was generally agreed, making a list of the financial interests of all employees (including janitors, secretaries and other non-programming personnel) would constitute a great burden on the station and be further burden on announcers to memorize or keep constant surveillance.

The FCC rule was frequently characterized as "too broad, too ambiguous, too difficult to observe."

Some parties questioned the legality of the FCC instituting such a rulemaking. These held that if it were the intent of Congress or of the Dept. of Justice to pass such restrictions, Congress would have done so in the payola and quiz-rigging laws or the Attorney General would have recommended such steps in his 1960 report on broadcasting.

In branding the rule unnecessary, petitioners pointed out that hidden broadcast plugs were unfair trade practices and could be dealt with by the Federal Trade Commission. If a licensee willfully persists in inserting plugs, one comment said, the FCC can consider this as a reflection on his character qualifications at license renewal time.

Among the counterproposals it was suggested: that an announcement be made only when the financial interest of licensee or employees is "substantial"; that the announcement be made at any time (such as all at sign-off) or in any form making the broadcaster's financial interest apparent to the public; that an announcement of an employee's interest be made only if that employee is concerned with the selection of the particular program material to be broadcast.

Opponents desperate, says favored Moline TV

Charging three competing applicants for ch. 8 Moline, III., with "a desperate attempt to get in one more argument," Moline TV Corp. last week asked the FCC to strike their joint petition seeking reargument (Broadcasting, July 24).

Moline TV, favored for ch. 8 in commission instructions to its staff (Broadcasting, July 3), said it "will not engage in a polemical battle contained in a pleading of this character." Community Telecasting Inc., Illiway TV Inc. and Midland Broadcasting Co. asked for a reargument on the grounds Moline TV is the only ch. 8 applicant which did not survey local program needs. They also held the FCC could not grant ch. 8 to Moline if it fully understood the record.

Moline TV replied that none of the three petitioners could receive a ch. 8 grant "under the oldest and most basic criteria of all—character. Each of them bears the mark of Cain of gross character deficiencies bordering on absolute disqualification."
THREE SHOTS FROM A SHOOTING SCRIPT:

"CAMERA MOVES UP AND OVER JAR AND LID SO WE LOOK DIRECTLY DOWN ON THEM FROM OVERHEAD AND SEE THEM AS TWO CIRCLES. SUPER: 'DOUBLE CIRCLE OF PROTECTION.'"

"DISSOLVE TO GIRL IN SLIP, REACHING AS IN FIRST SCENE. FLOAT IN ONE WHITE CIRCLE OUTLINE WHICH MOVES IN SYNC. WITH AUDIO."

"HOLD CIRCLE AND DISSOLVE TO GIRL AT TABLE AS IN SECOND SCENE. FLOAT IN SECOND CIRCLE. NOW BOTH CIRCLES MOVE IN SYNC. WITH AUDIO."
FCC SATELLITE PLAN TAKES BEATING
Smythe, Brophy, Loevinger see flaws; defense this week

The FCC's proposal to permit private companies to form a private consortium of international common carriers to own and operate U.S. communications satellites under government regulation came under heavy fire on Capitol Hill last week.

The Senate Small Business Committee's Monopoly Subcommittee, the latest congressional unit to hold hearings on U.S. space communications policy, provided the forum, and a former FCC official, Dallas W. Smythe, provided most of the fire. Mr. Smythe, a professor of communications at the U. of Illinois who was chief economist at the commission from 1943 to 1948, raked the FCC plan from stem to stern.

He said a satellite cannot be "owned" since, in space, "no law exists as to ownership," and he challenged the FCC's assumption that "the first practical application of space satellites must be restricted" to private interests.

He denied also that communications satellites are analogous to cables or wireless circuits between stations, or that private companies offer the best hope of the U.S. being first with space communications system. Both assumptions are cited by the FCC in defense of its plan.

Unlike conventional communications systems, he said, satellites require government aid for launching and tracking. And "the amount of time wasted by private corporations fighting among themselves for their spheres of influence in the process of creating the consortium will also be enormous," he said.

As the 10 Gathered • Mr. Smythe, who testified on Thursday as the 10 companies chosen by the FCC began gathering in Washington to open negotiations for the joint venture operation, added that private companies would be unable to deal with the many international problems that space communications will entail.

He said there is a need for negotiations with the Soviet Union to keep communications satellites out of the cold war. In this connection he noted that Russia has announced it is developing a cosmic transmitter capable of color television broadcasting.

He said communications satellites should be operated by a government authority and ultimately by a United Nations agency.

Disagreement with Mr. Smythe's proposal as well as with the FCC was voiced by officials of General Telephone & Electronics Corp., domestic common carrier excluded from the joint venture plan under the rules laid down by the commission.

Theodore F. Brophy, GTE's vice president and general counsel, said ownership of the satellite should be open to all domestic and international common carriers, and should not be restricted to international carriers.

He added that a private enterprise system would be the least costly to the public, the most efficient, and would best demonstrate to the world "that a capitalistic, democratic republic" can lead the world in peaceful uses of space.

Loevinger's Surprise • Early in the hearing, the Justice Dept.'s antitrust chief, Lee Loevinger, repeated his view, already given to several congressional committees, that ownership of the satellite system should be broadened. One new twist to his testimony, given in response to questions, was the disclosure that AT&T, one of the companies in the FCC's joint-venture scheme, is under scrutiny by the Justice Dept. for alleged antitrust violations.

The FCC will have a chance to defend its position against the criticisms leveled at its plan when it testifies before the subcommittee on Thursday.

The line of questioning pursued by Subcommittee Chairman Russell B. Long (D-La.) indicated the commission would have a lot of explaining to do. Sen. Long appeared concerned that the commission's proposal for the joint-venture plan fails to provide sufficient safeguards against monopolistic practices.

FCC on Spectrum Study • At an earlier hearing on space communications last week, the commission endorsed the objectives of a proposed study of the manner in which spectrum space is allocated. But it suggested that the proposal be completely revamped.

As called for in SJ Res 32, the study would be conducted by a five-member commission, last six months and be expected to lead to recommendations for changes in the administration of the spectrum. The resolution was introduced by Sen. Vance Hartke (D-Ind.).

The commission, in a statement presented by Chairman Newton N. Minow, said the study should be conducted by the FCC, which has "plenary authority" regarding non-government frequencies, and an "adequate counterpart" on the government side. The commission added, however, that it doesn't know if such a government counterpart exists.

The commission said the study should last at least a year and that the FCC and its counterpart "should stand ready to implement the results ..."
Radio has been dealt a stiff blow by the 1960 U. S. Census. Or has it?

A statistical tussle was brewing at the weekend to determine if:
- Home radio saturation really dropped from 95.7% in the 1950 census to 91.3% in 1960, or
- Hasn't changed much during tv's growth.

Principals are the U. S. Census Bureau, which compiled the figures, Radio Advertising Bureau, which doesn't like them, and NAB, which has called for a re-check.

Both NAB and RAB question the authenticity of the 1960 figure and the way it was compiled.

They argue that 91.3% is a sample figure obtained by a quick bite at a mountain of uncompiled census data that eventually will show complete results of the 1960 radio-tv count.

A Broadcasting check into the way the 1950 and 1960 radio set counts were obtained raises serious doubts that the figures are comparable (see box this page). Auto sets aren't involved in the dispute.

By the time the feeding is settled it's possible the difference in the methods that were used may account for the decline in the saturation rate. And there already is contention the 91.3% figure in the 1960 census may reflect about the same saturation as the 95.7% figure in 1950.

In any case, it's obvious there has been a significant increase in the total number of radio homes.

Here are controverted points:
- The definition of a household was broadened, adding 300,000 to 500,000 homes to the 1960 statistical base.
- Of critical importance—the 1950 census included homes with radio sets temporarily out of order or at a service shop; in 1960 only homes with sets in working order were counted.
- The 1950 census was conducted personally by enumerators who pressed for answers; the 1960 figures were part of a formidable 12-page housing questionnaire left at one out of 20 homes for someone in the home to fill out and mail.

That raised another basic question: Are the personally gathered results of 1950 comparable with the mailed results of 1960?

Conrad Taeuber, assistant director of the Census Bureau, told Broadcasting the 91.3% figure was based on a sampling of the national statistics and was subject to a sampling error. He said the preliminary figure was compiled and made public to meet industry demands for nationwide radio and tv saturation figures gathered in the April 1960 census.

Tv's saturation in 1960 was placed at 86.7% (see story page 83). Industry Questions Figures

Richard M. Allerton, NAB research manager, said NAB has "challenged the 91.3% figure." He told Broadcasting, "The generally accepted industry figure is 96%. This new Census Bureau figure is preliminary and based on sample data. I have asked the Census Bureau to re-check the figure and am keeping in close touch with bureau officials."

Miles David, RAB vice president, said, "The results coming out of the Census Bureau this week are based on a fragmentary sample and, as we understand it from the Advertising Research Foundation, were the results of a test run made to check the programming of the computer. The 91% figure therefore could be far too low, as is also borne out by other indicators showing audience growth."

Mr. David also said that "RAB, when it learned about the questioning technique to be used in the 1960 census, protested vigorously to the Census Bureau. Based on numerous research projects of its own and on a project done in conjunction with the Census Bureau and ARF, RAB knew that the census technique could not faithfully reflect U. S. radio homes. As a result of this protest, the Census Bureau agreed to add a separate study of radio in 1960."

"This was done apart from the census but specifically as a check on the census results. It used personal interviews in a sample of about 5,000 homes and employed more effective questioning techniques to measure radio homes than were used in the census itself. This will be available simultaneously with the census figures."

**Different questions, different answers**

Are the 1950 and 1960 U. S. Census figures for radio sets directly comparable or is it another apples vs. oranges situation?

Here are the official instructions and questions:

1950 census instruction: "Check 'Yes' for radio even if temporarily out of order or being repaired elsewhere." The question: "Is there a radio in this unit?"

1960 instruction: "Count only sets in working order. Count floor, table and portable radios as well as radio combinations. Do not count automobile radios." The question: "Do you have any radios?"

The definition of a housing unit was changed. In 1960 a housing unit was redefined to include places without cooking facilities or a separate entrance. This broadened the census base by adding from 300,000 to 500,000 households, mainly small or one-room housing units that were combined with a main household in 1950.

A third point of major significance: Sets temporarily out of order or at a repair shop were counted in 1950; only sets "in working order" were counted in 1960.

The working-order requirement could mean a difference of several percentage points in the saturation rate, according to a basic Politz study conducted in 1954. In that study Politz found 96.3% of homes had one or more radios. But when each home was checked to see if radio sets were in working order, the saturation figure was cut to 92.5%.

Another factor: The Census Bureau's 1950 radio-tv data were personally gathered at households by enumerators. The 1960 radio-tv figures were included in a legal-like 12-page form containing literally dozens of complicated questions about household equipment and the status of occupants. These forms were left in one out of every 20 households and had to be filled out by the occupants and mailed.

According to the Census Bureau, about 80% of the homes sampled mailed back their questionnaires. Of these, two out of three were "completely acceptable." The unacceptable questionnaires were rechecked personally by enumerators as were the 20% that didn't return the forms.
the expected release of the census radio-homes figures in January 1962. In effect, this study will provide a correction factor for the figures coming out of the census itself.

Warren Cordell, vice president and chief statistical officer of A. C. Nielsen Co., told Broadcasting: "It is extremely difficult to compare figures 10 years apart when there are differences in terminology and in the universe."

"Were it possible to make an accurate check," he said, "the radio saturation figure might be as high as 98%." Nielsen used a 98.1% saturation for radio in 1952. Currently it is using a three-year-old frozen figure of 96.3% saturation, or 49.5 million radio homes.

He suggested that if the Census Bureau could translate its 1960 census figure to include homes with radios temporarily out of order the result would be much higher. He recalled that a 1954 Politz study, widely regarded as one of the best surveys of the type ever conducted, showed that the "in working order" limitation cut the national saturation by nearly 4%.

Mr. Cordell said he had been worried about the 1960 radio figure following a 1959 sample survey made by the Census Bureau. This showed just under 89% saturation, a figure that caused concern in media circles.

The Bureau's Position • "We're checking the 91.3% radio figure," Mr. Taeuber, assistant director of the Census Bureau, told Broadcasting, "but have found no errors so far."

He said the bureau has evidence the do-it-yourself census in 1960 was more satisfactory in some respects than the historic enumerator technique but added there is a lot of evaluation work to be done.

Asked if he felt householders may have been influenced by the 1960 question with its "in working order" requirement, he said the possible influence could exist in two-thirds of homes that reported only one set in the home.

Mr. Taeuber said the final bureau total might be as high as 93% or as low as 89%. He recalled that a 1959 check made for the bureau's own use showed an estimated radio saturation of just under 89%, a marked drop from the 1950 figure of 95.7%. The 89% figure was rechecked at the time but no significant error was reported.

The 91.3% sample figure was based on 620 out of a total of 275,000 census districts. Mr. Taeuber said the sample was developed for internal use but when some of the results checked with the 100% enumeration census it was decided to develop national figures based on the sampling of national data. In the case of radio-tv the technique yielded national saturation figures months in advance of a complete tabulation.

There is no measurable effect in the

TV NEARING SATURATION

Census sample finds video in 89.4% of homes and multiple sets in 13.4% of video homes

Nearly nine out of every 10 homes (89.4% or 47.7 million homes) have one or more tv sets, according to a nationwide sample survey conducted last May by the U. S. Census Bureau. The study was conducted for Advertising Research Foundation and financed by NAB, Television Bureau of Advertising and the networks.

The 89.4% tv saturation compares with 87.5% in May 1960 when a similar sample study was made. The U. S. decennial census taken in April showed that 86.7% of homes had tv sets in working order, according to a preliminary estimate by the Census Bureau (story page 82).

Since ARF U. S. sample studies were started in 1955 the mult-set tv saturation has grown this way: June 1955, 67.2% (32.1 million tv homes); Feb.-March 1956, 72.8% (35.5 million tv homes); Aug. 1956, 76.1% (37.4 million tv homes); April 1957, 80.2% (39.8 million tv homes); Jan. 1958, 83.2% (41.9 million tv homes); May 1959, 86.3% (44.46 million tv homes); May 1960, 87.5% (46.2 million tv homes); May 1961, 89.4% (47.72 million tv homes).

The ARF-Census Bureau study for May 1961 shows 13.4% of tv homes have more than one set, with the total number of tv sets in some homes placed at 54.67 million.

Standard metropolitan areas show a tv home saturation of 92.2% compared to 85.3% for areas outside cities, according to the study. An urban-farm breakdown shows 90.3% saturation in urban areas, 90% in rural nonfarm and 79.8% saturation in rural farm areas. Four-person households have the highest tv saturation, 96.2%.

New England has the highest tv saturation followed by Middle Atlantic. Lowest saturation was found in the East South Central region. The regional figures follow: New England, 95.1%; Middle Atlantic, 93.2%; East North Central and Pacific, 90.8%; West North Central, 90%; Mountain, 86.7%; South Atlantic, 85.9%; West South Central, 84.5%; East South Central, 82%.

The percentage of multi-set homes was highest, 16.9%, in standard metropolitan areas.

The 1960 and 1961 surveys included Alaska and Hawaii and were based on the new definition of households, which includes many small housing units formerly not separately tabulated.

For the first time the number of multi-set tv households exceeded the number that had no television.

The fact that one out of 20 households was checked for radio-tv and other household data in the 1960 census compared to one out of five in 1950, according to Mr. Taeuber and industry research people.

The only state whose radio-tv results have been compiled is Vermont. Mr. Taeuber said Vermont's final tabulation showed 92.8% radio household saturation in 1960 compared to 96.8% in 1950 although there was a gain of 3,881 in the number of radio households because of the larger gain in total households. He suggested this paralleled the trend shown by the nationwide census (91.3% compared to 95.7%), even though it represented only one state.

As to the change of definition of a housing unit, Mr. Taeuber said, "The new definition probably added 300,000 to 500,000 households though we originally had estimated it might add a million homes."

TV Figures Accepted • No disagreement was apparent at the weekend over the results of the Census Bureau's television homes count in 1960 although the figure is under the Advertising Research Foundation-Census Bureau saturation based on one of the bureau's monthly sampling surveys. The 1960 preliminary tv census saturation (April) of 86.7% is close to the May 1960 ARF sampling figure of 87.5%. The technique used in developing the preliminary decennial census figure is subject to sampling error.

Some Other Facts • Over 100 million home radios (including clock and portable models) have been produced by U. S. manufacturers since the 1950 U. S. Census was taken. The total does not include uncounted millions of imported sets, radio-phonograph combinations, tuners or kits.

Using the 1950 total households figure of 42,343,311, the census saturation figure that year shows a total of over 40 million radio homes.

Eight million radio homes were added in the 1950-60 decade, the 1960 census saturation of 91.3% (preliminary) indicating a total of 48.4 million radio homes when the census was taken in April 1960.

Just to keep everybody happy, the official government economic encyclopedia Statistical Abstract of the United States shows 49.95 million radio homes in 1960. This is attributed to Census Bureau surveys and industry sources.
AFTRA strikes back with $5,000 fines

The strike of the Los Angeles local of the American Federation of Television & Radio Artists against KFWB Los Angeles was hotter last week than the August sun beating down on the pickets. As the strike entered its fourth week, both sides were trying to knock out the other, with no conciliatory gestures from either.

AFTRA threw the hardest punch—fines of $5,000 each, levied by the local union’s board of directors against Chuck Blore, Jim Hawthorne and Don French, who were found guilty of “conduct prejudicial to the welfare of AFTRA” after a hearing Wednesday (Aug. 2). The trio was convicted of crossing the AFTRA picket line and entering the KFWB studios after the strike had been called “knowingly and with intent to act as strikebreakers.” They were also found guilty of acting as strikebreakers on each day since the start of the strike.

The defense presented by the trio at the hearing was that Mr. Blore is vice president in charge programming for Crowell-Collier Broadcasting Corp. (KFWB, KEWB Oakland-San Francisco and KDWB Minneapolis-St. Paul); Mr. Hawthorne is program director of KFWB and Mr. French is program director of KEWB. As members of management, they stated, they have a primary responsibility to management to keep KFWB in operation.

Resignations Ignored As the union’s charges against them were based on their membership in AFTRA, the trio submitted their resignations to the AFTRA tribunal before the end of the hearing, they reported. The AFTRA board, however, ignored this in its statement of findings. In addition to the fines, the board ordered the three to “cease and desist” from strike-breaking activities by midnight Aug. 4, or be expelled from the union.

KFWB’s attack was the filing of charges against Mr. McCue and AFTRA with the National Labor Relations Board. First charge filed Monday, was that the union had attempted to induce KFWB employees to leave their posts through intimidation and coercion. NLRB assigned Floyd Brewer to investigate this charge.

Later in the week, KFWB filed another charge against the union with NLRB. “We’ve claimed that [Mr.] McCue is failing to bargain in good faith and has failed to meet with us despite the fact that there is a strike in progress,” Jim Simons KFWB station manager stated.

This charge was based on two incidents. On Friday (July 28) at a meeting called by Jules Medoff, federal mediator, AFTRA had presented a new wage demand for the newscasters at KFWB. These were for wages of $200 a week the first year, $212.50 the second and $225 the third of a three-year contract. KFWB rejected these and made a counter-proposal of $170, $177.50 and $185, with the further proviso that all employees now on strike would be paid a minimum of $185 starting immediately. This was not acceptable to AFTRA. The meeting adjourned and no further get-together has been held or called since then.

On Monday (July 31), AFTRA representatives refused to join a negotiating session with a group of Los Angeles independent radio stations when representatives of KFWB were also present.

“KFWB claims that by these and other actions,” Mr. Simons said, “Mr. McCue and AFTRA are restraining and coercing radio stations of the multi-employer group in the selection of their representatives in collective bargaining as well as KFWB. AFTRA’s refusal to meet in negotiations with KFWB, its refusal to discuss wage offers, plus refusal to participate in meetings with KFWB is, in our opinion, a failure to bargain in good faith, and we have so charged.”

KCOP (TV), RRTEA sign three-year pact

KCOP (TV) Los Angeles has signed a three-year contract with the Radio, Recording & Television Employees Assn., an independent union which represents 75 members of the station’s production and technical staff. RRTEA was organized by a group which pulled out of the International Brotherhood of Electrical Workers after a lengthy IBEW strike against KCOP two years ago.

The contract contains several unusual provisions, such as one permitting the 40-hour work week to be scheduled so an employe may do the stint in four 10-hour days rather than five eight-hour days, giving him a three-day weekend on a regular basis. Another enables the station management to make layoffs, when necessary, on the basis of ability, with seniority as a factor to be considered, rather than seniority as the only factor. The station also agrees to provide fully-paid major medical insurance for the employes.

The pact includes as a basic principle the right of management to run the station as it sees fit and management on its part agrees to maintain high standards of working conditions. The top wage scale is now $218 for engineering technicians, up from $207.50. Employees are entitled to vacations of up to five weeks.

State proxy conference

NAB’s seventh annual Conference of Presidents of State Broadcasters Associations will be held Feb. 28-March 1, at the Shoreham Hotel, Washington, according to Howard H. Bell, NAB vice president for industry affairs. The conference provides a forum at which administrative officers of the state groups discuss their area problems and national issues affecting the industry.

Metromedia reports net down

Metromedia Inc., New York, reports gross revenues for the first 26 weeks of 1961, ended July 2, rose by more than $4 million over the first half of 1960. This year’s first-half total was $23,397,580 compared with $19,177,895 grossed a year ago.

Metromedia announced Friday (Aug. 4) that net income, after taxes, amounted to $396,537 for the 26-week period, or 23 cents a share, as compared with $738,970, or 43 cents a share, for the same period in 1960.

Net income, after taxes, for the 13-week period ended July 2, amounted to $409,203, or 24 cents a share. The 1960 net income for the same period was $592,471, or 35 cents a share.

New fm stereo services

Three more fm stations have reported start of stereo service.

WSPA-FM Spartanburg, S. C., began stereophonic broadcasting tests July 11 and went on the air Aug. 1 with a complete fm program featuring stereophonic sound.

WDTM (FM) Detroit began fm stereo broadcasting July 16 with the presentation of a Philadelphia Orchestra concert.

KCFM (FM) St. Louis held an open house to exhibit its new quarters and herald its inauguration of fm stereo.

The new facility was built following a fire last year which nearly put the station out of commission. President-General Manager Harry Eidleman hosted the affair which drew 250 advertisers, agency personnel, civic leaders and members of the St. Louis press.
YOU MAY NEVER SEE THIS OLDEST CLOCK*

BUT... WKZO Radio Gets Results Day and Night in Greater Western Michigan!

You needn’t be a clock watcher to find lots of top-rated segments on WKZO Radio for Kalamazoo-Battle Creek and Greater Western Michigan.

WKZO Radio consistently reaches the largest share of the area’s radio audience. Pulse (see left) gives WKZO Radio an average of 73% more listeners than Station ‘B’ during 360 quarter hours surveyed, 6 a.m. - Midnight, Monday through Friday.

Take advantage of WKZO Radio’s superior around-the-clock coverage of the fast-growing Kalamazoo-Battle Creek and Greater Western Michigan area. Avery-Knodel can give you all the facts.

THEATRES TO FIGHT
Arkansas okay of pay tv test
to be opposed, says TOA unit

International Telemeter has won an important victory in the U. S. for its
wired pay tv system, but members of the opposition—various film exhibitors
—promise further legal battles before conceding pay tv is here to stay.

This was made apparent in the wake of the July 28 ruling of the three-man
Arkansas Public Service Commission granting Telemeter, through its local
franchiser, Midwest Video Corp., a clear mandate to conduct a wired pay tv
test in Little Rock (AT DEADLINE, July 31). In a unanimous decision, the com-
mission found the proposed test to be “in the public interest,” directed South-
western Bell Telephone Co. to establish rates and facilities for the pay tv
system and dismissed a petition by inter-
vening theatre owners—Independent
Theatre Owners of Arkansas (an affili-
ate of Theatre Owners of America),
Rowley United Theatres and United
Theatres Corp.—which contended the
commission lacked authority to rule
on the matter because pay tv programs
will be produced outside the state.

After studying the ruling, TOA’s
Joint Committee Against Toll Tv
said last late week it will definitely
fight the decision through legal chan-
nels. Dissenters have 30 days to file
an appeal in Arkansas state courts, and
may eventually take the appeal to the
state supreme court.

An initial hearing was held in Little
Rock May 15, and subsequently con-
tinued June 19 and 20 on a petition
filed last January by Midwest Video
to obtain facilities for its pay tv test
from Southwestern Bell.

The commission ruling of July 28 is
seen by some as a precedent for other
affiliates of the American Telephone &
Telegraph Co. to follow if and when
Telemeter moves into other areas of
the country. A spokesman for Tele-
meter, the pay tv subsidiary of Para-
mount Pictures, reiterated last week that
a community on Long Island (New
York) and another at an unnamed loca-
tion on the west coast are Telemeter’s
next targets for pay tv experiments.

(The company, through Trans-Canada
Telemeter, has been conducting a pay
tv test in Etobicoke, a suburb of To-
ronto, Canada, since February 1960).

At Least a Year • Telemeter also be-
lieves that, barring unforeseen legal
difficulties, it will be at least a year be-
fore its programming will go over the
Little Rock lines. It would take that
time much for tv coin boxes and cables
to be put into operation.

Louis A. Novins, Telemeter’s presi-
dent, hailed the Arkansas decision as
“an important and basic victory,” and
saw it as “clearing away of a major
roadblock” to the introduction of cable
pay tv elsewhere in the U. S. He said
that “it should now be apparent” that
the forces of pay tv cannot be stopped by
“self-serving groups,” like movie ex-
hibitors and he cautioned “average
exhibitors to wake up “and stop be-
suckers for the ‘big boys’ with tv and
other interests.”

Major movie theatre circuits will be
the first ones to hop on the pay tv
bandwagon once it starts rolling. Mr.
Novins predicted, and he indicated
some exhibitors who publicly are the
most vehement against pay tv, are al-
ready amenable to deals.

Mr. Novins singled out for attack the
chairman of the Committee Against
Toll Tv, who he said is associated with
a company which will sponsor movies
on tv on Saturday night this fall. “The
chairman,” he said, “would serve ex-
hibitor interests far better if he headed a
committee against free movies on
Saturday nights . . . . At least pay tv
charges an admission for viewing a
current motion picture.”

Mr. Novins was obviously referring
to Philip Harling, chairman of TOA’s
Joint Committee Against Toll Tv. Mr.
Harling is vice president and executive
secretary of Fabian Theatre Corp.,
whose president, Sy Fabian, is also
president of Stanley Warner Corp., a
non-affiliated company. International
Latex Corp., a subsidiary of Stanley
Warner Corp., will sponsor minutes on
NBC-TV’s Saturday Night at the
Movies (9-11 p.m.) program in the
fall.

Neither Mr. Harling nor a repre-
sentative of TOA cared to comment on
Mr. Novins’ statements.

ABC Radio schedules
regional affiliate meets

A series of four ABC Radio regional
meetings with affiliates will be held
Aug. 21-30 by a team of officials in-
cluding Leonard H. Goldenson, presi-
dent of AB-PT; Robert Pauley, ABC’s
vice president in charge of radio, and
James Hagerty, ABC vice president in
charge of news, special events and pub-
lic affairs.

They will address station owners and
managers (eastern regional district) on
Aug. 21 at the Sheraton-East Hotel in
New York and then proceed to re-

gional sessions as follows: Mark Hop-
kins Hotel in San Francisco (Aug. 25),
the Sheraton-Chicago Hotel in Chicago
(Aug. 28) and Sheraton-Charles Hotel
in New Orleans (Aug. 30). Reviewed
will be sales report details with em-
phasis on the third-quarter report which
ABC said last week indicates a 30% rise
over that period last year.

Other ABC Radio officials taking part
are Jim Duffy, national sales di-
rector; William Rafael, national pro-
gramming director, and Earl Mullin,
national director, stations department.
Attendance of network executives in
each of the regional areas also is
planned.

NT&T gross income up 7%

National Theatres & Television re-
ports a 7% increase in gross income for
the third quarter of its fiscal year
ended June 27. The gross for the quar-
ter was $10,722,509, compared to
$10,028,325 for the like quarter of last
year. Net income rose to $114,306 or
four cents a share, from a loss of
$2,235,293 or 79 cents a share in the
1960 quarter.

These results “confirm the restaura-
tion of the business to a profit-making
status,” NT&T President Eugene V.
Klein said in his message to stock-
holders. “The earnings are modest, but
truly significant. . . . While $1,521,396
of the loss a year ago was a special
 provision for a decline in value of the
company’s investment in National Tele-
film Assoc., the remainder of the loss
came through regular operations and
amounted to $713,897. The contrast
between 1960 and current profits from
operations thus further emphasize the
progress made.”

EASTMAN KODAK BUYS
COLOR TV

Eastman Kodak certainly knows color. This Fall they
will be sponsoring the new color TV show, Walt Dis-
ney’s “Wonderful World of Color,” Sunday nights. The
agency is J. Walter Thompson. Learn more about color
TV now. W. E. Boss, Director, Color Television Coordi-
nation, RADIO CORPORATION OF AMERICA, 30
Rockefeller Center, New York 20, N. Y., Tel: CO 5-5900
"We noticed an immediate improvement in quality of program transmission and video tape recording when we installed our new Sarkes Tarzian solid state Vertical Interval Switcher. The unusual flexibility of the VIS-88 has substantially expanded our production capabilities. We're really quite proud of it," says R. F. Kinard, chief engineer of WLBT, Jackson, Mississippi.

Check these specs and see for yourself why the new Tarzian Switcher has won such immediate and enthusiastic acceptance in the industry. And remember, we will engineer your switching system requirements at no cost or obligation to you.

6. Isolation (between any 2 channels)
   60 db @ 3.58

This performance is engineered into a compact package less than half as big as other switchers, and it's priced lower.
**Negro-Spanish division organized by Pearson**

A group of Negro and Spanish stations represented by John E. Pearson Co. are being organized into a separate department at the representative firm, Mr. Pearson announced last week.

Key Broadcast Management Inc., New York consultancy operated by Ralph Weil and Arnold Hartley, has been named to set up the special division.

Mr. Pearson said the specialized broadcast field has now "come into its own" and that the Negro consumer is assuming "growing importance in our total economy."

He said proposals made to him by Key would result in a sharpening-up of the entire Pearson operation.

**Senators fm network reaches into Georgia**

An fm network reaching down to Tennessee and Georgia is being added for play-by-plays of the Washington Senators baseball club. A club spokesman said that as of last Wednesday (Aug. 2) networking arrangements were completed with 25 fm outlets and the number is expected to reach 40 by the first fm network broadcast, scheduled Aug. 11.

The baseball club invites other fm stations interested in joining the network to direct inquiries to the network headquarters, 7th & Florida Ave., N.W., Washington, D. C. Telephone: Dupont 7-6333.

The Senators earlier (July 28) had announced expansion of its entire radio network to 64 stations in eight Middle Atlantic and Southern states. Senators baseball originates through WTOP-AM-FM-TV Washington.

**Colorado chief justice defends radio-tv access**

Public response to radio-tv coverage of court trials in Colorado has been good, Chief Justice Frank H. Hall of the Colorado Supreme Court said Aug. 2 in an address to the conference of Chief Justices of the American Bar Assn.

Chief Justice Hall spoke in St. Louis at a session which precedes the main ABA convention this week. "Our judicial processes are better understood," he said in commenting on ABA's Canon 35 (banning radio, tv and photographers from courtrooms). The canon has been adopted by 21 states and the District of Columbia.

The Colorado judiciary decided over five years ago to allow broadcast coverage of trials unless the trial judge rules otherwise. Chief Justice Hall said he has heard no protests since the state rejected Canon 35.

Frank P. Fogarty, Meredith Stations, speaking as chairman of NAB's Freedom of Information Committee, declared last week the banning of broadcast coverage from the courts of Kansas would penalize the public in its right to full freedom of information.

Writing Justice Clair E. Robb, of the Kansas Supreme Court, Mr. Fogarty said, "The public relies on radio and tv to keep informed. Broadcasting presents to the public exactly what is happening, not what some other person says is happening." His comment followed a ruling by the Kansas State Supreme Court banning radio-tv equipment in any courtroom in the state.

**Media reports...**

**New affiliate** - WMMM Westport, Conn., joined MBS July 31 as the 428th affiliate. The station, on 1260 kc with 1 kw, is owned by Westport Broadcasting Co., of which Sidney J. Flamm is vice president and general manager.

**FHN appointed** - Taft Broadcasting Co., Cincinnati, appoints Farson, Huff & Northlic, Inc., N. Y., as its agency. Taft stations are: WKRC-AM-FM-TV Cincinnati; WTVN-AM-FM-TV Columbus, Ohio; WBRC-AM-FM-TV Birmingham and WKYT (TV) Lexington, Ky.

**Advisory committee formed** - KHOL-TV Kearney-Holdrege, Neb., announced the formation of a permanent eight-member advisory committee consisting of leading citizens within the two channel area. The committee will meet periodically with executives of the station to advise on current needs of the communities.

---

**Fm showcase studio building**

Friendly Frost Inc., Westbury, N. Y., expects its new WTFM(FM) Lake Success, N. Y., outlet to be the first metropolitan New York station to program stereo fm broadcasts when the station starts operations in September on 103.5 mc with 20 kw power. Described as the nation's first three-way sound center, the building will house WTMF, recording studios and a luxury sound salon (a retail outlet which will offer limited editions of custom hi-fi and stereo music systems, fine furniture, paintings, sculpture and art objects.)

Capped by a 20-story transmitting tower, the wrapped-in-glass structure is located at 173rd St. on the Long Island Expressway in Fresh Meadows, N. Y. Glass partitions will connect the radio station and sound salon allowing visitors to watch the station in operation. The entire center will be visible to some 120,000 cars which pass the location daily.

WTFM will be under the supervision of David H. Polinger, director of Friendly Frost Broadcast Div., who formerly was general manager of NTA Spot Sales and manager of NBC's San Juan, Puerto Rico affiliate, WAPA-TV. Friendly Frost also operates WGLI and WQMF (FM) Babylon. The broadcast division will be headquartered in the new building.

THE BOLLING CO. INC.
FCC okays $30 million in station sales

CAPITAL CITIES’ BUY OF WKBW, WPAT OUTLETS IS THIRD LARGEST

More than $30 million in station sales were approved by the FCC last week at its final meeting before the August summer recess, among them the third largest sale in broadcast history.

Among the approved transactions were two acquisitions by Capital Cities Broadcasting Corp. (Lowell Thomas-Frank Smith), totaling $19.35 million: WKBW-AM-FM-TV Buffalo, N. Y., for $14 million, and WPAT-AM-FM Paterson, N. J., for $5,350,000.

The Buffalo sale is the third highest in broadcast annals. CBS paid $20 million in 1958 for WCAU-AM-FM-TV Philadelphia plus real estate ($15.6 million for the station property and $4.4 million for the real estate). Time Inc. paid $15.75 million for the Bitner radio-tv properties in 1957, including stations in Indianapolis, Minnesota-St. Paul and Grand Rapids.

The 50 kw WKBW (on 1520 kc) was founded in 1925 by the Rev. Clinton H. Churchill, who is the sole owner. The tv adjunct, on ch. 7 with ABC primary affiliation, went on the air in 1958; it is owned 51% by Dr. Churchill.

Under the terms of the sale agreement, Dr. Churchill becomes a member of the Capital Cities board; Clinton D. Churchill, son of the pioneer Buffalo broadcaster, remains as vice president and general manager of Capital Cities' Buffalo stations.

Capital Cities bought the Paterson, N. J., stations—which in recent years have become a New York area top-rated audience-getter with a good music format—from Dickens J. Wright and associates. Mr. Wright remains as chief of the WPAT stations, which he and his group bought in 1954 for $300,000. WPAT has 5 kw on 930 kc.

New Lineup • Capital Cities, which got its start in tv in 1953 when it acquired what is now WTEN (TV) Albany, N. Y., now has six tv, three am and two fm stations. They include in addition to WKBW-AM-FM-TV and WTEN, satellites WCDA (TV) in Albany and WCDY (TV) in Adams, Mass.; WROW Albany; WPRO-AM-TV Providence, R. I., WTVD (TV) Durham, N. C.

Chairman Newton N. Minow and Commissioner Robert T. Bartley dissented to both Capital Cities acquisitions on the issue of concentration.

Among the major transactions approved by the FCC last week was the realignment of tv ownership in Rochester, N. Y.—WROC-TV (ch. 5) going to WVET-TV and WVET-TV's interest in ch. 10 going to the other shareholder, WHEC-TV (CLOSED CIRCUIT, July 31).

The Rochester actions are being worked out this way:

Veterans Broadcasting Co. (WVET-TV) and WHEC Inc. (WHEC-TV-Gannett) are paying Transcontinent Television Corp. (licensee of WROC-TV) $6.5 million for the real estate and equipment used in the operation of that station. This includes network affiliation contracts with NBC and ABC and an agreement not to compete for five years within 35 miles of Rochester.

Of this amount, WHEC Inc. is paying $3,692,500 for 58.7% of TCT’s Rochester assets, and Veterans is paying $2,432,500 for 41.3% of these facilities. After this, Veterans will turn over to WHEC Inc. its license for sharing ch. 10 in exchange for WHEC’s interest in the WROC-TV property. This leaves Veterans owning 100% of WROC-TV and WHEC-TV owning 100% of ch. 10.

Ifs and Buts • The FCC approval of the sale includes several conditions: that Veterans must agree to use ch. 8 instead of ch. 5 and go through various steps before beginning operation on ch. 8. Ch. 8 has been substituted for ch. 5 in Rochester as part of the FCC’s rulemaking to add another channel in Syracuse, N. Y. (BROADCASTING, July 31).

In the order approving the Rochester transfers the commission denied objections by WSAY Rochester and the AFTRA and NABET locals.

Chairman Minow dissented to the entire transaction; Commissioner Bartley to that part which involved WVET-TV turning over its license to WHEC-TV. Both dissents involved concentration issues.

Changing hands ANNOUNCED • The following sales of station interests were reported last week subject to FCC approval:

• KAPR Douglas, Ariz.: Sold by David V. Harman (Copper State Enterprises) to William and Katherine Mende for

avoid the hazards of selling on your own

Why take the risks involved in negotiating without our knowledge of markets, of actual sales, of responsible contacts? In speaking to any buyer, Blackburn’s experience and reputation for reliability naturally lend greater weight to our opinion than any seller can reasonably expect to be given to his own.

$60,000. Mr. Mende is news and program manager of WESO Southbridge, Mass. KAPR is 1 kw daytime on 930 kc. Broker was Wilt Gunzendorfer & Assoc.

**APPROVED** • The following transfers of station interests were among those approved by the FCC last week (for other commission activities see for The Record, page 98).

- **WROC-AM TV** Rochester, N. Y.: Sold by Transcontinental Tele-Communication to WVET-TV and WHC-AM, both Rochester, for $6.5 million. After informal steps, the WVRC-AM facility will be owned by WVET-TV, with WHC-AM-T and sole occupant of ch. 10 there (see separate story, opposite page).
- **WPAT-AM-FM** Paterson, N. J.: Sold by Dickens J. Wright and associates to Capital Cities Broadcasting Corp. for $5,350,000 (see separate story, opposite page).
- **KUDI Great Falls, Mont.**: Sold by D. Gene Williams and associates to James F. Hadlock for $300,000. Mr. Hadlock is majority owner of KBUC Salmon and KDEN Eureka, both California.
- **WZOK-AM-FM** Jacksonville, Fla.: Sold by Carmen Macri to Peninsular Life Broadcasting Co. for $300,000. Peninsular Life Broadcasting is 80% owned by Peninsular Life Insurance Co. and 20% by Mr. Macri.

**AB-PT profits rise for first half-year**

A favorable and record profit level for American Broadcasting-Paramount Theatres Inc. was reported last week for the first six months of this year by Leonard H. Goldenson, AB-PT president.

Estimated net operating profits in the period totaled $5,694,000, or $1.34 a share compared with $5,653,000 or $1.33 a share in the six months of last year; net profits (including capital gains) were up to $11,843,000 ($2.79 a share) from $6,981,000 (or $1.64 per share). Second quarter net operating profits: 2,269,000 (53 cents a share) compared to last year's $2,317,000 (55 cents per share), and net profits (including capital gains): $4,504,000 ($1.06 a share) compared to $3,601,000 (85 cents a share) in 1960. (Second quarter capital gains came principally from the sale of half of AB-PT's stock holdings of Microwave Assoc. and reduced by a $2 million provision for reserve against foreign investments.)

Revenues from the broadcast operation (ABC-TV and ABC Radio) were up in the first half of the year, while

**Out for a quick one?**

Either KBON's announcers are mighty persuasive or radio, persuasive, doesn't realize its own power. It started July 4 when the Omaha station aired an intensive schedule for a local auto dealer. The first announcer advised, "At Ed Mitchell's used car lot, ask for Ken." A second announcer countered, "... if Ken is out, see Hans." Back came the first announcer, "If Hans is out, see Marvin." And announcer No. 2 had the topper, "'If Marvin's out, steal it!"

Boxscore: Five cars were sold. And evidently Ken, Hans, and Marvin stepped out together. One car was stolen.

theatres also showed a gain in business. Mr. Goldenson reported continued advances in foreign tv, noting an agreement made to affiliate with a new tv station to be constructed in Panama City (as part of the Central American tv network which AB-PT helped establish last year). Panama is the 11th foreign country where AB-PT has interests in or agreements with tv stations.

Pease forms own rep firm

Bernard P. Pease, for 14 years manager of Weed's Detroit office, has announced the formation of his own representative firm, Pease Sales, effective Aug. 1, with headquarters in that city. Mr. Pease will continue to represent the full list of Weed radio and television properties in addition to selected other stations in markets not in conflict with Weed.
RKO General sales group replaces reps

RKO General’s radio and tv stations in seven markets will be represented as of Oct. 1 by its own national sales organization in place of the four national reps now serving the stations (CLOSED CIRCUIT, July 31).

Hathaway Watson, vice president in charge of broadcasting of the wholly-owned subsidiary of the General Tire & Rubber Co., who is to announce the move today (Aug. 7), said: “It is our objective to improve our service to advertisers and their agencies. With four fully-staffed offices selling only RKO General stations, we can work more closely with buyers, understand their requirements, and provide detailed information and service to fulfill these requirements.”

Offices of the RKO General sales group will be located in the offices of its stations in New York, Chicago, Los Angeles and San Francisco. Additional sales offices may be added later.

Mr. Watson observed that the company's decision to go ahead with plans for its own national sales operation did not stem from dissatisfaction with the existing national rep firms.

The affected companies are: H-R Representatives, Young Television Corp., Robert E. Eastman Co., and Avery-Knodel Inc.

The stations which will be represented by RKO General’s national sales arm (no official name has been designated) are: WOR-AM-FM-TV New York; WNAC-AM-TV and WTKO (FM) Boston; KJU-AM-FM-TV Los Angeles; CKLW-AM-FM-TV Windsor-Detroit; WHBQ-AM-TV Memphis; KFRC-AM-FM San Francisco, and WGMS-AM-FM Washington, D. C.

NABET loses WBT-WBTV poll

Technicians employed by Jefferson Standard Broadcasting Co. at WBT-WBTV (TV) Charlotte, N. C., voted July 27 against representation by the National Assn. of Broadcast Employees & Technicians. The official vote was 23 to 6 against the union (30 eligible to vote). NABET had notified the company April 19 that it represented the WBT-WBTV technicians and asked immediate negotiations. The Charlotte election was conducted by the Winston-Salem, N. C., regional office of the National Labor Relations Board.

EMI/US acquires General Communications

PRODUCTS WILL BE INCORPORATED INTO BROADCAST DIV. (Aug. 1). Capitol’s expansion in the electronics field through purchase of the Fort Atkinson, Wis., firm for $500,000 had been announced July 28 by Glenn E. Wallich, Capitol Records president.

Newly acquired company, specializing in solid-state system engineering, becomes the General Communications Div. of EMI/US and will incorporate the products and personnel of the former EMI/US Broadcast Div.

E. D. Peterson, president of General Communications during its 12 years in broadcasting, has accepted a long term management contract with EMI/US.

Among the General Communications products to be integrated into the EMI/US line of tv cameras and associated broadcast equipment are fully-transistorized tv switching equipment, mechanical and electro-mechanical switching devices, solid-state video and pulse distribution equipment, special effects generators, dial monitor systems, picture monitors, custom studio consoles, solid-state power supplies and automation systems.

EMI/US was activated last March for the manufacturing and marketing of a complete line of electronic products in the general communications field, many of which are provided by EMI Ltd. of England, the principal stockholder in Capitol Records. The British firm is one of the world’s largest electronics companies and a pioneer in commercial tv.

EMI/US, with manufacturing facilities in Los Angeles and Fort Atkinson, now comprises four divisions: General Communications (formerly Broadcast Div.), Electron Tube, Magnetic Tape and Consumer Products. Executive offices are in Los Angeles and New York.

Vice president in charge of Capitol’s electronics activities is Daniel C. Bonbright.

Washington firm plans $120,000 stock sale

A Washington, D. C., firm which plans varied electronic and broadcasting projects filed with the Securities & Exchange Commission to offer 30,000 shares of common stock to the public at $4 per share.

International Telecommunications Consultants Inc. revealed in its registration statement that the company is interested in purchasing and operating radio and tv properties, particularly uhf tv stations, “when the trend toward the use of these frequencies is more discernible and commercially profitable.”

In a news release, the company said it is also about to start research on a new low-cost video recording system intended to complement the home tape recorder and expected to sell for under $1,000.

Muntz to export to Japan

Japanese imports may have become a competitive problem for some U. S. radio set manufacturers, but not Muntz Tv Inc., Evanston, Ill. President Wallace A. Keil last week said that for a switch Muntz is going to invade the Japanese market soon with a $100 19-inch set which Muntz will produce in the U. S.
and which will compete with Japanese-made 14-inch sets that sell in Tokyo for $100-150. He said, today’s conventional set has 16-18 tubes but by using GE’s new three-in-one tubes the new Muntz “Metropolitan” model will have only seven tubes. During the past year Muntz sold 65,000 tv sets, Mr. Keil said, and is shooting for 180,000 sets a year by 1965.

Stereo fm session set for WESCON

More than 35,000 engineers, scientists and executives of the electronic industry are expected to attend the 1961 Western Electronic Show & Convention to be held Aug. 22-25 at the Cow Palace in San Francisco. In addition to the largest display of new electronic products and components in some 1,200 booths, the four-day meeting will encompass 123 formal papers, to be presented in 41 sessions. The meeting is presented under the joint auspices of the Western Electronics Manufacturers Assn. and the western chapters of the Institute of Radio Engineers.

Of interest to broadcasters will be the session on stereophonic fm broadcasting, to be held Wednesday morning (Aug. 23). Harold Kassens, chief, aural existing facilities branch, FCC’s broadcast facilities division, will open the session with a report on the new standards for stereophonic broadcasting. D. R. von Recklinghausen of H. H. Scott Inc. will discuss stereophonic fm receivers and adapters. James Gabbert, co-manager, KPEN (FM) San Francisco, will speak on converting fm broadcasting stations for stereo transmission. R. A. Isberg, U. of California, is session chairman.

Among the sessions is one in a new field for WESCON, that of coherent optical emission, with one paper describing the use of the ruby optical maser as an amplifier of light, rather than just as a generator. A special evening session will deal with the technical, military, politico-economic and psychological aspects of arms control.

Prodelin names Ameco

Prodelin Inc., Kearny, N. J., entering the community antenna television market, has named Ameco, a division of Antennavision Inc., Phoenix, Ariz., as exclusive catv products distributor, including Prodelin’s newly developed coaxial transmission line. Tradename Spir-O-foam, the 75-ohm, polyethylene-foam, aluminum-sheathed, semiflexible cable is available in 3/4-inch and 1/2-inch sizes.

25% of electronic sales, employment in the West

The 11 western states this year will account for just under 25% of the nation’s electronic sales and employment, Phillip L. Gundy, vice president of Ampex Corp. and president of the Western Electronic Manufacturers Assn., said last week.

Reporting on a WEMA survey based on reports of the trade association’s 320 member companies, Mr. Gundy said that projected sales of electronic equipment and components in the West for 1961 should reach a new high of $2.815 billion, 24.9% of the anticipated national electronic sales total of $11.3 billion. For 1960, the Western total was $2.465 billion out of a national total of $10.2 billion and for 1959 the West did $2.111 billion in electronic sales out of $9.4 billion for the nation.

Electronic employment has kept pace with sales, the report stated, rising in the West from 160,000 in 1959 (out of 750,000 nationally) to 190,000 in 1960 (out of 825,000 nationally) and to 215,000 in 1961 (out of 875,000 nationally). These totals do not include broadcast, service and distribution revenues, Mr. Gundy explained.

WFBC-TV DOMINATES 42nd*MARKET

Max Glandbard, formerly tv producer, Kenyon & Eckhardt, New York, joins North Adv., that city, as tv producer-writer.

Jon Ross, account supervisor at Tilds & Cantz, Los Angeles, and Joe Seideman, account executive at KTTV (TV), that city, are opening their own advertising agency, Ross & Seideman, Aug. 1 at 17000 Ventura Blvd., Los Angeles.

THE MEDIA

Douglas P. Collins appointed general manager of WCMW Canton, Ohio. Clark Dozer, who has been manager of station for past 12 years, named station manager under new ownership. Mr. Collins, executive vp of Douglas Properties Corp., now licensee of station, has served with stations in Youngstown, Ohio, and Syracuse, N. Y.

Dick Barrett, sales manager of WMFT Terre Haute, Ind., appointed general manager replacing Dick Beiser, resigned.

Richard K. Fife, manager of KLIX Twin Falls, Idaho, appointed station manager of KGHF Pueblo, Colo.

CHEVROLET BUYS MORE COLOR TV

This Fall Chevrolet through Campbell-Ewald will sponsor "Bonanza" on Sunday nights. The trend is to color. Are you with it? Learn more about color TV now. W. E. Boss, Director, Color Television Coordination, RADIO CORPORATION OF AMERICA, 30 Rockefeller Center, New York 20, New York, Tel: CO 5-5900
Yes... six announcers—or as many announcers and other program personnel as you have on your staff—all available from sign-on to sign-off with an absolute minimum of effort and expense. The secret is the AUTOMATIC TAPE CONTROL system shown at right. Formerly distributed exclusively by Collins Radio Company, there are more than 4,000 units being used daily in over 600 radio and TV stations and the major networks. The ATC system gives you maximum use of staff voices with only one man on duty. It records spots, programs, special effects, music... anything up to 31 minutes in length... on pre-set tape magazines. Staff members record while on duty. Then your operator simply slips the magazine into the playback slot, presses a button and the message is on the air instantly. When the message is completed, the tape rewinds automatically, ready for a repeat performance or storage.

On all ATC units, there is a provision for a second auxiliary control tone which can be used to automatically start other equipment. And, ATC gives you true fidelity in reproduction with a frequency response of ±2 db from 70 to 12,000 cps; ±4 db from 50 to 15,000 cps. Signal-to-noise ratio is 55 db, and wow and flutter under 0.2% rms.

NOW COMPLETE AUTOMATION AVAILABLE
ATC 55, our newest development, permits the automatic use of 55 consecutive magazines without reloading or resetting. Used in sets of two or more, ATC 55 allows completely automated broadcasting twenty-four hours a day.

ATC is made by the originator and largest manufacturer of automatic tape control equipment... more than 4,000 units in use in over 600 radio and TV stations.
